4005. Dayton report

Newsgroup: rec.radio.amateur.policy
Date: 2004-05-17 03:03:00 UTC
From: Mike Coslo <mcoslo@adelphia.net>
Message-ID: <6M2dnVOnPpz4tjXdRVn_iw@adelphia.com>
Source record: 92067

I just got back from Dayton.

As I expected, I had a good time.

I got to drool over the new Yaesu and Icom top end rigs. Not that I'm likely to ever own something that costs over 10K!

Friday was hot and muggy.
Saturday was rainy and cool (hey-it's Dayton, eh?)
At the flea, there was a lot more radio equipment than last year, thank goodness. And real radio equipment, not just old Motorola UHF Handi-talkies. I think maybe some of the bloom is off the Ebay seller's orgy.

Stuff I liked:

The better flea market.
Of course the new equipment to look at.
The couple funny pictures I got of people taking pictures of "Booth Babes" - that's right, not the ladies, but the people taking pix of them.

Parking at the Salem Mall beats heck out of parking in the grassy (muddy) fields next to the Hamvention. The short bus ride takes you and your purchases close to your car in a paved lot, so you don't get muddy.

At the flea beer stand, there was a rep giving out free samples of Michelob Ultra (yuck!) and Michelob amber bock (amazingly enough - yummmmm) I had to buy a couple.

Stuff I didn't like:

Seems every year, we get there on time, and the flea doesn't open until 20 minutes late.

Flea sellers that are firm on prices. I insulted a few people with my offers on equipment..... Seriously newbies, you are *supposed* to wrangle over the price. If you think that FT-101 is worth 600 dollars and won't haggle, you probably aren't going to sell it.

With all due respect - are those Collins rigs *really* worth it?

Ten-Tec wouldn't sell me the demo of the Capacitor kit they had for sale. I needed two for a tuner project, and they only had one plus the demo. And I just couldn't talk them into selling me the display unit! I kinda understand, but it was still frustrating.

Finally, this observation - and I really hate to make this, because of all the jokes about obese hams. I noted a number of those little three

wheeled carts at Dayton. Some of them were moving around people that obviously needed them. This is a wonderful thing, allowing people that might otherwise not be able to even attend the event. Unfortunately, fully 95 percent of the riders of the carts were people whose only apparent affliction was that they were very, very overweight! This is not good for a person, and it made me kind of sad to see it. If these good people want to do themselves a favor, they could rise off their backsides and get the exercise that they need. Good for the heart, and will help get rid of the excess baggage.

Note this is not only Amateur radio. I'm beginning to see grossly obese people doing the cart thing all over. SO this isn't aimed at Dayton or Hams.

But all the niggling over small things - and they were indeed very small - I had a hoot at Dayton this year, and if everything works out I'll be there again next year.

George Orwell, aka Roger Wiseman under cover of yet another anonymous remailer wrote:

> dumbass davey's dad the episcopalian priest who died march 1 is probably > getting...
> terry his mommy was the...

Roger, I really want to thank you for providing confirmation of the things I wrote about your behavior.

> wiseman isn't
> even near the river, lardass. you lose as usual.

Glen Dale is near the river. Therefore, if you live in Glen Dale, you live near the river.

There is quite a bit of good information about your particular problem available on the web. One site says:

"Antisocial Personality Disorder: Lack of regard for the moral or legal standards in the local culture, marked inability to get along with others or abide by societal rules. Sometimes called psychopaths or sociopaths."

Another site provides the following material:

"Diagnostic Criteria"

"A.There is a pervasive pattern of disregard for and violation of the rights of others occurring since age 15 years, as indicated by three (or more) of the following:
1.failure to conform to social norms with respect to lawful behaviors as indicated by repeatedly performing acts that are grounds for arrest
2.deceitfulness, as indicated by repeated lying, use of aliases, or conning others for personal profit or pleasure
3.impulsivity or failure to plan ahead
4.irritability and aggressiveness, as indicated by repeated physical fights or assaults
5.reckless disregard for safety of self or others
6.consistent irresponsibility, as indicated by repeated failure to sustain consistent work behavior or honor financial obligations
7.lack of remorse, as indicated by being indifferent to or rationalizing having hurt, mistreated, or stolen from another."

Yet another site has this to say:

"Definition"

"Antisocial personality disorder is a psychiatric condition characterized by chronic behavior that manipulates, exploits, or violates the rights of
others. This behavior is often criminal."

"Causes, incidence, and risk factors"

"Personality disorders are chronic behavioral and relationship patterns that intefere with a person's life over many years. To receive a diagnosis of antisocial personality disorder, a person must have first had behavior that qualifies for a diagnosis of conduct disorder during childhood."

"The cause of antisocial personality disorder is unknown, but genetic factors and child abuse are believed to contribute to the development of this condition. People with an antisocial or alcoholic parent are increased risk. Far more men than women are affected, and unsurprisingly, the condition is common in prison populations."

Take your medication, Roger or they'll end up putting you away.

> a mile away.

I welcome this chance for dialog, Roger but you'll have to show me that
you have enough common sense to know that I wrote nothing of your
street, but of the town of Glen Dale, which is situated along the Ohio
River. You live there--you ought to know these things.

> > Then he manufacturers little perversities about a spouse, a parent or a

Retranslation: You keep getting the boot from ISP's. You use anonymous
remailers of necessity.

> Hey, did you enjoy putting that child molesting daddy of yours in the
> ground in march?

Thanks, once again for proof of my initial statement.

You left in mid-tour and bolted. It was noted and commented upon by
those in attendance. You have not attended another meeting.

> > He's been turned in by at least one local for deliberate QRM on 20m, has
>
> yeah, old fatassed bertie, your gay lover.

Bzzzt. That's incorrect. N8NN was living in Germany and I was living
in Tanzania when you had your close encounter, Roger. It was someone
else.
You may drive yourself crazier by guessing who it might have been.

> > been retested by the FCC
>
> too bad they didn't give any reason, did they imbecile? anybody who got
> their license under he VE system can be retested at any time...

...but never without a reason. There's always a reason. Care to tell
us about the reason for your retest?
>
> > and is in danger of losing his ticket over his character.
>
> And davey lives in his own little world. they all wear jack boots and

I don't have any power over those who would yank your ticket over
character issues. You're about to stew in the cauldron which you
personally heated.

> > I just keeping forwarding anything he posts about me to local law enforcement.
>
> bwhahahahahahahahahahaha...to that corrupt local law enforcement, you
> mean.

You aren't doing yourself any favors by making such claims. You aren't
what your surname suggests.

Our problem child doesn't rank high on the local popularity charts in or out of amateur radio.

Thanks, Brian.

For me, anyway, it really would have been better to go. I needed to be away for a bit, but hey...can't always have everything the way we want it, eh...???

At least I can look forward to Huntsville...If anyone is within a "relatively" reasonable drive time of Huntsville, AL, and has never been to this one, they should try to. It's the second or third weekend of August, and is always a lot of fun.

The "flea market" is indoors, but there's lots-and-lots of it. All the usual forums and a very reasonable showing of vendors and organizations. All-in-all it's a very well conducted regional hamfest. (Computers are there, but in an ancilliary role!)

73 & thanks again...

>> be markendly and acutely painful" in order to know that it's true?
>
>Please, not another threat to injure me.

Where's the threat?

I asked you if you need a piece of paper to know if a slap in the face
would hurt?

No one >>I<< know does, and no one >>I<< know who is invilved with or
knowledgeable of the MARS program argues with the concept that No Amateur Radio
= No MARS.

>> That you are inadequately knowledgeable of MARS programs and
>> policies to know otherwise is also true.
>
>Now you lie.

No, I do not.

You continue to argue that if the licensed Amateur participants in the
MARS program ceased to participate, that the program would carry on.

I know better. So do people who are in the program. Anyone who can
"argue" against common sense obviously is ill-prepared to REALLY "argue" the
facts.

>> It's not stupid. Perhaps poorly worded, at least to a person such
>> as yourself who cannot understand the interdependence of the two.
>
>Poorly worded? Naw, Wrongly Worded!
>
>It's just wrong.

Nope. No Amateur Radio = No MARS. And the MARS program is

>> Still need that peice of paper to know a slap in the facr hurts,
>> Brain?

>
>Nope. I need a cite from any applicable regulation to convince me
>that your statement is true. Got one?

Nope. But then I've been a member of all three programs at one time or
another.

I know from EXPERIENCE that all three programs are dependent upon licensed
Radio Amateurs to conduct thier programs.

No Amateur Radio = No MARS.

It really is THAT simple.

>> > > That "Lennie is my hero" line REALLY put you out front!
>> >
>> > Yep, he pulls out all the stops when he rubs your nose in your silly,
>> > stupid statments. I don't. I try to remain civil. Apparently, you
>> > don't respect civility.

>> crapola in THIS thread, I had made it a point of very carefully typing
>> B r i a n.
>
>That was very sweet of you, but doesn't change just how wrong your
>MARS=ARS claim was.

It's not wrong.

The Amateur Radio serice CAN live without MARS. There's precious little
that MARS programs do that Amatuers can't do or aren't doing already.

If, for some obscure reason, every licensed Amateur withdrew from MARS,
MARS would have to fold.

On the otherhand, if MARS folded up tomorrow, there'd be a lot of
disappointed Amateurs, however the Amateur Service would continue.

>> As for Lennie...the only "stops" he usually winds up pulling out
>> are the ones holding him and the rest of his fecally contaminated
>> verbal effluent back.
>
>Geee, it just doesn't look that way from my perspective.

I am sure it doesn't. You have already proven that your perspective is
very...uhhhhhh...unique.

>> That he does it to himself (and now takes you along with him) is
>> evident. That he was once a person of accomplishment and

>> responsibility now fallen on his lack of character and honesty is
>> pitiful.
>
>Odd, but I haven't seen much of Len lately. How nice of him to be
>taking me along with him.
>
>> That you voluntarilly get in step behind him is laughable at best.
>
>Its called, "The High Road."

In the Marines we learned that being up high wasn't always a good idea.
In either case, you often arrive at the same destination, just more tired for
your effort and without any benefit of having made the trip the long way
around.

>> > > So...we're even.
>> >
>> > Maybe before God, or before the Law. But in very, very few other

No...just as supervisors, watch standers, traffic handlers, technicians
and engineers.

That's all.

>> >Then be succinct, and do clear up any misunderstandings right away.
>>
>> Why? You don't do that.

Looks like Dave can claim "spank" on Roger. Wonder if Dave is
Stagger Lee, Roger's long time Nemesis?

Tampa Tom

It can only be a disincentive to Morse Code *use* if it is required
for Morse Code use but not for other mode use.

That's what I wrote. Not:

" ~Morse Code exams are a disincentive to CW use.~ "

which is what *you* wrote, and incorrectly said was a paraphrase of
what I wrote.

> even
> though many, many, many amateurs

How many?

along = prep 1: in line with the direction of (sail~the coast) 2: at a
point on or during (stopped~the way)

since roger lives well inland from the river, your statement that he is
"along the river" is erroneous, much like all your statements. you
should have the common sense to know since you were born in that shit-
hole town with the corrupt law enforcement and city government.

wrong roger didn't leave in mid tour. sure it was, probably by you. why
would i attend someplace when it isn't in my area, stupid?

> > > He's been turned in by at least one local for deliberate QRM on 20m, has

>> you are abruptly slapped with the open hand across the face, it will
>> be markendly and acutely painful" in order to know that it's true?

>Please, not another threat to injure me.

The gunnery nurse seems always to threaten people who disagree
with him. That's a LOT of threats. :-)

The Military Affiliate Radio System is authorized by Department
of Defense Directive 4650.2, 26 Jan 98. Individual service
branches have specific regulations. For the Army it is Army
Regulation AR 25-6 as revised 29 Oct 98. For the USAF it is
AFI 33-106. For the USN-USMC is is MARS Communications
Instructions NTP 8(C), March 1998.

The United States Army is the birthplace of MARS, first
organized at the AARS or Army Amateur Radio System in 1925.
The purpose was to increase skills within the Army by using
amateur knowledge to improve Army communications. It was
not a terribly popular thing either in or out of the Army.
The AARS stopped at the start of the USA involvement with
WW2 and cessation of amateur operations. It resumed in 1946.

In 1948 the AARS was renamed with the organization of the
USAF as a part of the new MARS, dropping the "amateur" in
favor of the word "affiliate." By 1948 military radio was
rather far from amateur practice and techniques. In 1962
the USN and USMC were made a part of MARS.

The intent of MARS was basically a morale booster for all
military personnel assigned far from USA territory. The
role has changed (by directive and regulations) to become
a liason between the military and civilian emergency
organizations, principally FEMA. MARS also has ties with
SHARES, the group of government HF radio users throughout
the USA and foreign US locations. For morale purposes
the military has direct Internet connections through the
various DSN (Digital Switched Network) portals on land
and afloat.

>> No Amateur Radio = No MARS.
>>
>> > > No Amateur Radio = No MARS

>
>Now you lie.

The gunnery nurse has distinct definitions of "lie" different
from other people. Those who disagree with him are "always
lying."

>> > > >> >Dismissed.

>> It's not stupid. Perhaps poorly worded, at least to a person such
>> as yourself who cannot understand the interdependence of the two.
>
>Poorly worded? Naw, Wrongly Worded!
>
>It's just wrong.

The gunnery nurse will never concede any mistake he made.
He has his own definitions and commands all to obey those
unique definitions.

For example, name-calling is part of his tough-guy credo.
His personal "directive" allows that as part of his
"civility." It isn't in the normal definitions that all
others use.

>> And you're still a punk.
>
>Not really.

The gunnery nurse "permits" that form of "civility" by
his own "directive." Name-calling is SOP.

>> > So, please substantiate your silly, stupid statement with a citation
>> > from an applicable regulation.
>>
>> Still need that peice of paper to know a slap in the facr hurts,
>> Brain?
>
>Nope. I need a cite from any applicable regulation to convince me
>that your statement is true. Got one?

The gunnery nurse has had, what, three weeks, to cite one
and has not. A simple Internet search will turn up the
official documents from the DoD and all three service
branches. He is continuing a game of bluffing in trying
to intimidate others to concede to him.

MARS has never been an important part of military
communications, never a part of either tactical or
strategic planning. At best it is an extension of
Special Services (in the Army old term) for entertainment
and morale boosting of service personnel. However, the
affiliation with the military has terribly important
self-image boost points for individual amateurs who want
to enoble themselves into thinking they are "part of the
grand scheme to 'serve their country'."

>> > > That "Lennie is my hero" line REALLY put you out front!
>> >
>> > Yep, he pulls out all the stops when he rubs your nose in your silly,
>> > stupid statments. I don't. I try to remain civil. Apparently, you
>> > don't respect civility.
>>
>> Sure I do.
>
>No, you don't.

Gunnery nurse is a VERY sore loser. He can't abide by any
disagreements to his statements or opinions. Ergo, all who
disagree with him are "liars" and worthy of all kinds of
name-calling.

It must be the extension of the old USMC mythology where
NCOs are all gods who MUST be obeyed and never, ever
questioned. No "civility" is allowed within ranks.

The problem of this ex-USMC member is that neither amateur
radio nor the Internet is any part of the USMC.

>> And right up to the part where you started in on your usual
>> crapola in THIS thread, I had made it a point of very carefully typing
>> B r i a n.
>
>That was very sweet of you, but doesn't change just how wrong your
>MARS=ARS claim was.

Gunnery nurse cannot concede anything.

MARS exists because of the Department of Defense Directive
that says it does.

A close inspection of USN-USMC NTP 8(C) will reveal that
USN and USMC MARS operators do NOT need to possess amateur
radio licenses in order to operate MARS radio equipment.
In both USA and USAF regulations, MARS operations are done
by Army or Air Force personnel who are not required to have
amateur radio licenses.

VOLUNTEER civilians are welcomed by all three branches but
only the USA and USAF require volunteers to possess amateur
licenses. USN-USMC does not.

>> As for Lennie...the only "stops" he usually winds up pulling out
>> are the ones holding him and the rest of his fecally contaminated
>> verbal effluent back.
>
>Geee, it just doesn't look that way from my perspective.

:-)

Gunnery nurse has his own fantasy land perspective on
society and definitions and civil behavior. He hasn't

been able to adjust to civilian life after being rejected
by the USMC.

>> That he does it to himself (and now takes you along with him) is
>> evident. That he was once a person of accomplishment and
>> responsibility now fallen on his lack of character and honesty is
>> pitiful.
>
>Odd, but I haven't seen much of Len lately. How nice of him to be
>taking me along with him.

I've been gone, doing more important things in life. :-)

>> That you voluntarilly get in step behind him is laughable at best.
>
>Its called, "The High Road."

I'd call it "independent thought."

Some in amateur radio do NOT permit independent thought
and become outraged with anyone disagreeing with their
noble, righteous bigoted thoughts of amateurism.

>> > > So...we're even.
>> >
>> > Maybe before God, or before the Law. But in very, very few other
>> > ways.
>>
>> You're right, but not for the reason I am sure YOU think...
>>
>> SO FAR we are still waiting for you to back up your assertions
>> that "unlicensed radio services" play a "major role" in disaster
>> communications.
>
>So? I hope you won't mind if I keep you waiting?

Gunnery nurse cannot concede anything on a subject. What
he stated is divine law and none may go against that.

>> We're also waiting for you to back up your Somalia claims. You
>> continue to argue that "It's true because I say it's true", yet there
>> should be a paper trail wide enough to roller skate on to show where
>> your assertions are true.
>
>But I never needed your blessing. You'll just have to roller skate
>elsewhere.

Actually, there's been NO third-party proof that gunnery
nurse was ever in the USMC. All we have to go on is his
"word" and his "I've got the proof in my wallet" sort of
statements. :-)

We have yet to see a "paper trail wide enough to roller skate
on to show where [gunnery nurse'] assertions are true."

No problem. Gunnery nurse, when confronted with the truth
and evidence, will, like the fictional Col. Jessup, will
simply state someone is a "liar" and then call them all sorts
of nasty names to show how "wrong" they are. :-)

>> No one except everyone who knows enough about the current affairs
>> of the various MARS programs and thier dependence upon the Amateur
>> Radio service to make it work and sustain it.
>
>If its so obvious to "everyone," then anyone should be able to post
>the citation.
>
>But they aren't.

The "citations" gunnery nurse claims are constructs within
his own little minds. MARS exists because of a DoD Directive
and that should be that. Of course, it isn't that, but that
doesn't stop the gunnery nurse from his virulent outrage.

Gunnery nurse felt "wronged" by statements of disagreement.
Such seems to be a cause for verbal warfare.

>> > Best of Luck.
>>
>> None needed...You make it too easy...Again.
>
>Easy? I see no citation.
>
>Best of Luck.

I've given the appropriate directive and regulations. Anyone
can find them on the Internet. Gunnery nurse doesn't know
them, therefore "they don't exist." :-)

If you have an ex-call I missed, let me know what it was. As for Jim Hampton, take it up with him. His entry on QRZ says that he held KG6AAY on Guam from 1967-1968. I have no way of checking that.

My main interest in doing this was to see who was posting. Not surprisingly I found that most of us are Extras. I find it a little harder to come up with any reason why so many long-term posters are from PA (?), let alone why most of the no-coders seem to be in Michigan? I suspect the latter group have possibly spoken to oneanother on air.

They don't, but the FCC is heavily into the concept of reducing the
regulatory burden by simplification of rules, a very Reaganesque idea.
Which is simpler, keeping a requirement for some licences only or making it
go away altogether? Abolishing Element 1 completely fits their philosophy,

and the alternative doesn't.

Of course, since the code tests are done by volunteers you could argue that no money will be saved. Firstly, that won't stop them, and secondly, VEs may be less likely to claim expenses if they don't have to buy code tapes, so some paltry amount of money may in fact be saved.

Can a Morse Code Exam be a disincentive for other modes?

> That's what I wrote. Not:
>
> " ~Morse Code exams are a disincentive to CW use.~ "

> which is what *you* wrote, and incorrectly said was a paraphrase of
> what I wrote.

But in the proposal quoted above, the Morse Code Exam is not a
disincentive for other modes.

If there were EVER a reason to have a Morse Code Exam, it would be to
ensure that a person operating (using) CW knew how to do so. The
above proposal does EXACTLY that. But you say it's a disincentive. I
say that's too bad.

> > even
> > though many, many, many amateurs
>
> How many?

Don't know, I haven't kept count.

You have before, and I saw no one stopping you.

> > And only you can say what is a disincentive in the amateur world, and
> > all other opinions are wrong?
>
> Not at all. Just don't attribute an opinion to me that isn't what I
> wrote.

So the Morse Code Exam has never been a disincentive to any mode,
including CW, ever in the history of the amateur radio service?

This is fascinating. I've known several NO CODE Technicians that
learned Morse Code and operated CW on 2M without having ever taken a
Morse Code Exam at the time.

Your position has always been that it's imperative for all amateurs
pass a Morse Code Exam prior to having CW privs. Except when they
don't have to pass a Morse Code Exam for other priveleges. In that
case, the Morse Code Exam is a disincentive to CW use!!!

Holy Cow!!!

> > > >> > When I pointed out that Morse Code exams have always been a

Of course. I think I nailed it. Again.

> > despite your claim that you don't read my posts.
>
> I don't read most of them.

Yet you manage to zing right into the doozies, somehow. You are one
(1) lucky guy.

> Would you prefer that I read none of them?

If you're going to be snippy about it, yes.

> OK, Done.

See? You didn't even wait for an answer.

> >>PLONK<<

You've made a series of astounding and rediculous statements over the past couple of months. If I weren't here to point them out, who would? The PCTA lock-step marches on.

Best of Luck.

> is always a lot of fun.

I used to meet a friend at the Indy hamfest in July, then I'd travel
up to Ft Wayne hamfest in November to see him again. He moved to
Montana last summer. I guess I could meet him at the Sturgis Hamfest.

> The "flea market" is indoors, but there's lots-and-lots of it. All the

>
> 73 & thanks again...
>

> Steve, K4YZ

Steve, it's kind of funny that the Hamvention folks moved the date back hoping for better weather, then we had such a bad weekend. Its even more sad that since Ohio is the home of the Hamvention, many of the other hamfests here are so tiny. Someday I'd like to go to another big fest other than Dayton, maybe Miami. I'd have to take some extra time off because I need a tour of the Nat'l Hurricane Center, and a trip to Margaritaville.

along = prep 1: in line with the direction of (sail~the coast) 2: at a
point on or during (stopped~the way)

since roger lives well inland from the river, your statement that he is
"along the river" is erroneous, much like all your statements. you
should have the common sense to know since you were born in that shit-
hole town with the corrupt law enforcement and city government.

re-retranslation:
"whaaaaaaaaaaaaaa
aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa!"
"reduced", boy are you stupid. you can't post without an isp, dumbass,
and you have absolutely no idea who posts this since all headers are
stripped away by the chain of remailers.

....
Aw, come on, Wiseman. Everybody knows you have an account at
Stratuswave.net. You just don't dare posting from it lest I get you TOS'd
from it, too.
And what has you so upset, Roger? You are using just about all of your nyms
on this board but your filthy mouth, like your fingerprints, gives you away
every time.
Dave's comment that you are a Sociopath must really have hit your sore
spot!!!! You best calm down, Roger. Take your meds or it will be back to
booby hatch for you!

Actually the river isn't such a good idea now that I think about it,
the EPA would get it's knickers in a real twist.

...and thus it is with our Glen Dale sociopath. Now he's challenging Brian to fight him. The reality is: he wouldn't show up. Roger is quite brave, as long as it is from the safety of his home. Now that you've commented, brace yourself for a torrent of filth from the internet gnome.

If you told this guy you'd meet him by the river, he wouldn't go
anywhere near the place. He'd be far, far from the river--you know, at
his home nearly a mile away.

He must post in the third person. If he admits to being Roger Wiseman, local authorities pay him a visit. This way he had some minimal amount of deniability--unless they obtain a warrant and decide to look at the material on his computer. He's tried this third person stuff before but has always slipped up. He forgets that he has posted most of his material under his own name previously. Wiseman ends up doing one of his, "Duh--How do you know it's me?" routines.

Roger has himself painted into a corner.

4050. Is FCC ready to toss another bomb?

Newsgroup: rec.radio.amateur.policy
Date: 2004-05-18 04:50:00 UTC
From: K&#65533;HB <groupk0hb@earthlink.net>

The following, written a few years back by my friend
Don Stoner, W6TNS, (SK) bears repeating. His
organization, NARA, is defunct, but the message
he states in his editorial is still absolutely valid.

73, de Hans, K0HB

- -
In My Opinion....

An editorial by Donald L. Stoner, W6TNS

In November of 1988, the Federal Communications Commission
slipped a bomb into our hamshacks and lit the fuse.. The FCC
announced they were reallocating a portion of the 220 MHz
band to a new communications service based on a petition
submitted by United Parcel Service. Our national
organization, The American Radio Relay League has tried to
snuff out the fuse and get the decision reversed. But as
far as I can tell, the 220-222 MHz part of the band is a
goner!

How could this have happened? Well, for starters, we took
the Amateur Radio Service and our fraternity for granted. It
never occurred to us that the FCC might give some of "our"
frequencies away just because we didn't use them.

The FCC even warned us of their intention. In 1984 Robert
Foosaner was Chief of the FCC Private Radio Bureau. He
indicated in a CQ Magazine interview that the band was not
being used adequately. Mr. Foosaner flatly stated it might
be assigned to other services. Unfortunately we didn't
believe him .

I have a theory that the FCC confiscated these frequencies
to send Amateurs a message. I believe the message is "shape
up or ship out." Warm up the tar and start collecting
feathers if you like, but in my opinion, the Commission did
Amateurs an enormous favor. A two MHz slice of radio
frequency spectrum is a small price to pay for awakening us
from our long sleep.

The Amateur Radio Service is coming back to life after 20 or
more years of being totally oblivious to the changes taking
place all around us. Amateurs are starting to ask how they
can contribute to the fraternity. They want to improve
themselves and they want to see the service revitalized.

They want more young people to enjoy Amateur Radio. Teachers, particularly those who are Amateurs, are beginning to realize how the service can be used to educate our youngsters in a number of disciplines.

This metamorphosis also happened to your humble editor in November of 1988. I've enjoyed Amateur Radio for almost 40 years. In the 50's and 60's I wrote a number of books and articles for Amateurs. I have also taken the Amateur Radio Service for granted. I'm as guilty as anyone. But that stopped when we lost part of the 220 MHz band. The National Amateur Radio Association became more than just a gleam in my eye.

What Are The Goals of NARA?

Broadly speaking, the goal of The National Amateur Radio Association is the promotion of ham radio. The organization has four specific goals within this broad framework. These are to a) publicize or market Amateur Radio to the general public, b) attract young people to the Amateur Radio Service, c) help existing Amateurs achieve the greatest benefit from the Amateur Radio Service and d) make Amateurs aware that our radio frequencies are in jeopardy from commercial interests. Here are some of my specific thoughts on these four areas:

Marketing Amateur Radio To The Public

Many people don't understand the significance of marketing and sales. The difference is very germane to this discussion.

Let's say you go into a ham radio store and tell the person behind the counter you want to buy an ICOM IC-781. He or she takes your order along with your money and hands you a radio. In this instance the person is simply an order taker and not even a sales person. A sales person tries to convince you to buy a specific product but they are not marketeers. The people who publish the brochures, run the advertisements and create your desire to own the IC-781 are the marketeers. Marketing creates the desire to have something.

For as long as I can remember, we hams have been order takers. We have not been salespersons and by no stretch of the imagination could be called marketeers of ham radio. If someone expressed their desire to be a ham, or an ex-CB'er convinced us they were a born-again communicator, we'd "take their order" and accept them into our ranks. Until recently, we never tried to be salespersons or marketeers for our hobby.

Deep down inside the human brain, is a little grey glob that scientists label the "I've got mine" lobe. In this area of the Amateur's brain is stored the feeling that we really don't want any more hams than we already have. We'll never admit it, even to ourselves, but the feeling is there. More hams equal more QRM, more problems with the FCC and more drift away from the way things used to be in the "good ole days."

More is not always better. More people with an Amateur Radio license may not have a positive or beneficial effect on the Amateur Service. We must mold and shape these people in the traditions that have guided us since the early part of the century. How we accomplish this will be the subject of articles in future issues of this journal.

Attracting Young People

When I was a kid, ham radio was a young peoples hobby. My best friend was a guy named Barry Windsor. Barry and I were fascinated by ham radio. We used to go over to Sid Dunn's house every Saturday morning. I never saw Sid without a cigar in his mouth. It was just another one of his appendages. When the end of his "stoggie" would get all goopy and slobbery,
he'd line it up on the edge of the
workbench, along with the other stubs, to dry out.

Anyway, Sid used to take time each week to teach us about ham radio. He'd work somebody in Upper Slobovia on 20 meters and our eyes would stand out on six inch stems. Then Sid would tell us the reason he could do this was (insert lecture here) his three element beam and how it worked, or the 304TL amplifier and how it worked, or radio propagation and how it worked. You get the idea.

Barry and I and some of the other kids pecked away at keys rather unsuccessfully trying to learn the Morse code. I lost track of the others but finally made the grade when the FCC, in their infinite wisdom, created the Novice and Technician license.

Somehow, someway, we must resurrect the magic aura that existed back in Sid's hamshack. Essentially, we must try to give something back to our fraternity in exchange for all the wonderful things it has given us.

It's not going to be easy! Today kids have computers, Nintendo games, cars, the opposite sex and Madonna, MTV and a million other distractions. We've taken the first step to redress the problem of attracting young people by creating a new "code-free" license. What this license becomes, and whether it is successful in attracting newcomers is entirely

up to us. If we don't tell anyone about the Amateur Radio Service and how easy it is to become a ham, the new Technician Class license will be a "dud." In short, we must all make an effort to /b1 market ham radio to the public.

In marketing, you commonly give away a sample which gets the "hook in and set", to use a fishing metaphor. That's what the new Technician license can do that for our fraternity. It can be the "hook" that we use to attract people to Amateur Radio.

But we must get out and hustle the service to young people. That's where NARA comes in. We intend to tell our members how to recruit youngsters. We intend to print stories about how others have done it successfully.

We believe the place to recruit youngsters is in the schools as early as possible. Again, we are going to have a lot to say about our schools in future issues of "The Amateur Radio Communicator".

Helping Existing Hams

Like it or not, a lot of hams passed their written test simply by memorizing the questions and the correct answer. Why not? What's wrong with that? You memorize the code don't you?

But these hams are not particularly proud of the fact they don't understand the answers or even the questions. They are curious about the technical aspects of the Amateur Radio Service.

I have yet to meet a ham that does not want to improve him or herself. Some Volunteer Examiners have established classes to teach people how to become a ham. Who has a class to teach you how to upgrade from Novice/Technician to General? Very few, I suspect.

Each issue of "The Amateur Radio Communicator" will have a theory article. Hopefully they will be as useful and interesting to existing hams as well as to newcomers. If you have specific questions that you would like to see answered in this publication, send them to "Editor- A Touch Of Class".

Preservation Of "Our" Frequencies-

I put the word "our" in quotes. We seem to think of the radio spectrum as "ours." A number of bands of frequencies are loaned for our use, by the Federal Communications Commission. We can continue to use them so long as it is in the national interest to do so. Make no mistake about it

fellow hams. The FCC did not let us use parts of the radio spectrum because they think we are nice guys or gals. They do so because it is more in the national interest to loan these frequencies to the Amateur Radio Service than to someone else. If that equation changes, more frequencies will be lost to other activities which are perceived by the FCC to better advance the national interest.

In November 1988, the FCC brought the point forcibly to our attention. They reminded us, once again, "If you don't use 'em, you're gonna lose 'em!" Some of our bands are barren waste-lands that we Amateurs seem to be saving for a "rainy day." Six meters is under utilized except for a few hardy souls in Southern California. The Commission knew the 220 MHz band was not adequately occupied. It won't be adequately occupied even when the FCC allocates the 220- 222 MHz portion for land mobile use. We have already lost the 902 MHz band and the fate of our satellite "S" band will be decided next year by the World Administrative Radio Conference (WARC) in Spain.

The 1296 band is priceless. Do you know of anyone who operates this band? Does your ham store have any 1296 MHz equipment in stock or do they have to order it? Is there a 1296 MHz repeater in your town. I doubt it.

If we maintain our "business as usual" approach, we are going to lose more frequencies. A lot more!

73, de Don, W6TNS

The point about being visible has always been obvious to me,
and it makes me want to scream that often it does not seem obvious
to others.

I learned of amateur radio because it was out there. I can't even
remember where I read about it first, maybe a magazine for Scouting
here in Canada, maybe it was "Jack & Jill" or "HIghtlights for Children"
and both of those magazines were aimed at quite a young crowd.

Obviously when I found the hobby electronic magazines a year or so later,
after I had decided I would indeed get a ham licesne, there was still amateur
radio content in them. But while that would have steered people with
an existing predisposition to the hobby into the hobby, it doesn't do
a thing if somebody has no knowledge of the hobby.

But it's rare, and seems increasingly rare with each passing year, to
see references in common areas of society. The local ham clubs
do not promote the hamfests, which at the very least can be of interest
to the electronic and computer hobbyist and might let the hobby rub off
on them. Promoting hamfests is not merely about getting bodies to
the event, it's an excuse to be out there. I'm the one who posts
to the local buy and sell newsgroup about some of the local hamfests,
trying to provide a bit about the event and amateur radio (I always put
a link to the Radio Amateurs of Canada website), making sure it's not
merely the facts to bring in hams to the event. Maybe someone will see
the notice, and take enough interest to look further, and that's as
important as getting people to the event. It would be better if those
involved in the clubs, who were generating the information in the first
place, was doing the simple act of posting a message each time there is a
hamfest. Posting to amateur radio related newsgroups does not reach the
newcomer, or potential newcomer.

Likewise, for some years I've been putting up "bootleg" posters about
one of the local hamfests. I don't do a good job of it, but I do a near
infinitely better job than is done already (ie nothing at all). One year,
I even pointed out that there should be such a poster, hanging from the club's
website, so anyone interested could print up a few, and stick them up,

but no luck. So I just copy the information from the website, stick the club's logo at the top, and print out some. I think I put up 200 this year, putting them near some universities, getting them up at the local Ben & Jerry's putting them not where hams congregate, but where the general public might see them. Since they have the URL to the club's website, anyone seeing them has a chance to learn of the hobby, which is far better than in the days before the internet.

They rarely get the announcements in the various listings of upcoming events by non-profit groups, though I'm not sure if that's lack of trying or the publications have to choose what to list due to space.

But we do need to work on this. There was a time when amateur radio was likely part of the common language of society, even if most were not hams and might not even know much about the hobby. I think most were aware of the hobby, and had a vague idea of what it was about. This was because it was out there in public view. Local stories, friends of friends, big antennas in the neighbor's back yard.

But I'm not so sure this is the case anymore. It seemed to be much more visible when I was a kid, thirty five years ago. Someone would come across it, and something would tempt them enough for them to seek out more information. But if they don't come across the hobby in the first place, how could they be interested, how could they do any searches? It is far easier for us to get the details to them today, but unless we have a presence out in existing clusters, they will never find our websites (or whatever).

Na Alun don't worry about those expenses for code tapes or programs or 33
RPM records etc. There have been many a VE out there who has taken his
significant other out for a "night on the town" after a VE session. Why
would some guys drive for a hundred miles to "take" a test when tests are
locally offered ???

Dare I say shenanigans ..... ??????

I take K0CKB out for a "night on the town" anytime I damned well please,
but it has nothing to do with funds from a VE session.

If you can prove your accusation, then the FCC will be greatly
interested in hearing from you.

On the other hand, it's my guess that you're full of
male-bovine-fecal-matter up to your eyeballs, and somebody ought to
stomp a mudhole between them for your slander.

With all kind wishes,

Gee, Roger. Stagger Lee did it to you again over in r.r.a.m.

:
: > Even funnier, I heard on good authority that Woger got booted from
: > Stratuswave recently. He must be running out of ISPs that will take his
: > worthless ass.
:
: How fucking stupid can you get, PrisonBITCH??
: BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!

Then why is it that a traceback to you comes up with domain names like 1Cust127.tnt1.wheeling.wv.da.uu.net these days? (The digits in "1Cust127" may change, but the "tnt1.wheeling.wv.da.uu.net" seems to remain the same.) The last time I bothered with you, I traced you to poolA-042.stratuswave.net, but that address doesn't seem to show up any more.

That notwithstanding, the most important thing for the targets of your abuse to know is that the complaint address registered for the IP addresses you've been using recently (NetRange: 65.224.0.0 - 65.239.255.255; NetName: UUNET97DU-2BLK) is

abuse-mail@mci.com,

and that MCI can take things from there.

Once again, Woger, you are welcome.

>please call or e-mail me, and left my number. Nothing heard yet.

Quite a while ago a notice was posted here that Dick had passed away. Perhaps someone (not me) wants to Google-search RRAP to find it.

A search of the QRZ index showed that his license name was Richard S. Carroll and his last address was Willow Springs, MO. No DOB was listed.

A search of the Social Security Death Records Index shows a Richard S. Carroll, DOB 4/18/1942, passed away 10/25/2003. Although there was no place (city, county, state, ZIP) listed for last benefit, his Social Security card was issued in Missouri, and his passing was verified by Death Certificate submitted to Social Security (probably by his survivors to receive the lump sum burial benefit). IIRC Dick retired from the Missouri State Police communications division, so it would be plausible that he did not receive a retirement benefit from Social Security.

This all appears to fall into place. We'll miss him.

I learned about SWL-ing and ham radio from "Boy's Life", the
magazine of the Boy Scouts of America, when I was in the 8th grade.
It helped that a close family friend (a non-ham) had been a radio
repair tech in WW-II which had ended only a few years before and he
steered me in the right direction.

After messinmg around listening to and repairing AM and SW radios of
the late 1930s-1940s era, I finally got hooked on ham radio in the
11th Grade at the high school radio club (W2CLE, the oldest HS radio
club in the country, founded before WW-I). I got my Novice/Tech
license at the end of 11th Grade (1952). Along the way I changed my
intended college major from chemistry to electrical engineering.

Neither I nor ham radio nor electrical engineering has been the same
ever since.

Indeed it does. Thanks for the leg work, Phil.

I will remember Dick as the guy who talked tough, but in the next breath,
would offer the proverbial "shirt off his back" to help you. This is
evidenced by many e-mails answering my curious questions and culminating
with his QSL on my wall.

We will miss him. (Hope he and N0BK are laughin' at us poor slobs down
here.)

You must be mistaken. I just checked my log and I've worked W4NTI dozens of times over the past few years. Nearly half of the Q's were on SSB (I think that mode qualifies as "phone".) Certainly Dan wouldn't work people he considers "lids".

Good luck on this one now!

The only "threat" is to those people who think that lying is an
acceptable means of "representing" Amateur Radio.

> The Military Affiliate Radio System is...(SNIP)

...a lot older than the 1998 manual you cited.

Thanks for the history lesson. You cut and paste well.

It still does not change the fact that without licensed Amateur
Radio operators to man it, it would be defunct.

> >Now you lie.
>
> The gunnery nurse has distinct definitions of "lie" different
> from other people. Those who disagree with him are "always
> lying."

Nice try. It's still not true.

> >Poorly worded? Naw, Wrongly Worded!
> >
> >It's just wrong.
>
> The gunnery nurse will never concede any mistake he made.
> He has his own definitions and commands all to obey those
> unique definitions.

Back up Putzy.

There many in this forum who can attest to my having offered an "I
stand corrected" on several occasions.

On the OTHER hand, we have caught you in NUMEROUS errors or
blatant misrepresentations of the facts, and YOU have NEVER
apologized, offered a correction, or otherwise admitted your errors,
even when they were corroborated as errors by several respondents.

> MARS has never been an important part of military
> communications, never a part of either tactical or
> strategic planning. At best it is an extension of

"I am only here to civilly debate the Morse Code test issue"....

Remember who said THAT Lennie?

You really have your moments of lowness and sliminess, but this
one was pretty well in the running with the lowest.

In as much as YOUR rear-area radio clerk duties were probably of
even less importance in :the grand scheme" of the Armed Forces, I
imagine it eats at you that MARS members do more for free than you
EVER did while on Uncle Sam's payroll.

> It must be the extension of the old USMC mythology where
> NCOs are all gods who MUST be obeyed and never, ever
> questioned. No "civility" is allowed within ranks.

Thanks for once again demonstrating that your current events
knowldege of the Armed Forces is even less now than it was when you
were in it....If that's at all possible.

> A close inspection of USN-USMC NTP 8(C) will reveal that
> USN and USMC MARS operators do NOT need to possess amateur
> radio licenses in order to operate MARS radio equipment.

> by Army or Air Force personnel who are not required to have
> amateur radio licenses.
>
> VOLUNTEER civilians are welcomed by all three branches but
> only the USA and USAF require volunteers to possess amateur
> licenses. USN-USMC does not.

Well, Your Scumminess...why don't you go right ahead and apply
for membership and a station authorization in N/MC MARS...?!?!

I'd love to see the result.

> Gunnery nurse has his own fantasy land perspective on
> society and definitions and civil behavior. He hasn't
> been able to adjust to civilian life after being rejected
> by the USMC.

We'll just add it to the ever-expanidng list of what you DON'T
know.

> Actually, there's been NO third-party proof that gunnery
> nurse was ever in the USMC. All we have to go on is his
> "word" and his "I've got the proof in my wallet" sort of
> statements.

Contact the VA, Lennie.

You've got my full name, branch of service, and my date of birth
is 18 Sept 1955. You'll excuse me if I don't offer you my SSAN, too.

Of course that's been offered to you before and like most REAL
facts, you never follow-up on it.

That would be because you're a coward.

> We have yet to see a "paper trail wide enough to roller skate
> on to show where [gunnery nurse'] assertions are true."

You've been offered access to the VA to verify it before, Lennie.
>
> No problem. Gunnery nurse, when confronted with the truth
> and evidence, will, like the fictional Col. Jessup, will
> simply state someone is a "liar" and then call them all sorts
> of nasty names to show how "wrong" they are.

Not "someone", Lennie...You. Because you are a liar.

Always have been...always will. What a loser.

Zounds, Tom!!! I doubt that the proceeds from most tests would cover much of a night out on the town, once the VEC gets it's cut. Then you have the other VE's to split the booty with..... Heck, I doubt you could eat at Arby's by the end of the malfeasance.

All endeavors have the occasional bad egg, but at every test I ever attended - there were 4 of them - the VE's seemed as honest as can be, plus some of them that I personally knew are in no doubt as to their honesty.

And FWIW, I live in State College PA.

I took my Technician test in Williamsport, over an hour away.

I took my General test in Butler PA, a two hour + drive

I took my Element 1 test in State College PA (flunked it at Butler)

I took my Extra test at Lock Haven, around an hour drive.

Basically the reason that I traveled to the tests was because that was where a test was taking place when I had the time to take the test.

Amateur Radio Newsline™ Report 1396 May 14, 2004

Amateur Radio Newsline report number 1396 with a release date of
Friday, May 14, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hamvention 2004 is opening and B-P-L is
still in the
news. Find out the details on Amateur Radio Newsline report number
1396
coming your way right now.

**

HAMVENTION COVERAGE

The 2004 Dayton Hamvention is about to open its doors. One of this
year's
Hamvention themes is going back to the future. Our producer Bill
Pasternak,
WA6ITF, flew in a few days early to find out what it really means for
those who
will be attending the show.

--
Audio report only: Hear it at www.arnewsline.org
--

Bill, Mark Abramowicz NT3V and yours truly will all be at Hamvention
to bring
you all the highlights on next week's Amateur Radio Newsline
report. (ARNewsline(tm))

**

THE BPL FIGHT: B-P-L EXPECTED TO DRAW ATTENTION AT DAYTON

While the latest in ham gear is certain to be grab the interest of
most of those
attending this year's Dayton Hamvention, the topic of Broadband Over
Power
Lines internet access is likely to be on the lips of many. Amateur
Radio
Newsline's Mark Abramowicz, NT3V has more...

--
While not much has happened in the past week on the B-P-L issue, look
for lots
of discussion on the Dayton Hamvention floor. You can expect to see

American
Radio Relay League President Jim Haynie W-5-J-B-P in the middle of it.

We told you here on Amateur Radio Newsline two weeks ago of Haynie's call to
arms and his direct appeal to President Bush to abandon support for B-P-L
technology.

Haynie is convinced Bush has been misled by his advisors. He and A-R-R-L's
Washington corps have asked for a meeting with the president. There's nothing
new to report on that front.

But Haynie says it's important for the ham community to continue to make its
voice heard by writing to the White House, your congressman and your senator
about B-P-L. Even though the Federal Communications Commission turned down
the A-R-R-L's request to extend the May 3 deadline for comments on B-P-L,
Haynie says there are still ways to be heard.

The A-R-R-L's website (www.arrl.org) has helpful tips on writing that letter or e-
mail or picking up the phone and calling your representative in Washington.

Meanwhile, the FCC is now studying the National Telecommunications and
Information Agency report on B-P-L. And while the glowing press release put out
by N-T-I-A touted the possibilities of B-P-L, the technical data in the report
presents another picture.

And that picture is anything but fuzzy. N-T-I-A cites major interference concerns
and suggests the methods used to measure B-P-L interference are inadequate.

It also cites worries B-P-L signals could affect aircraft operations and suggests
more stringent measurement standards and interference mitigation techniques
need to be explored.

Could that B-P-L fast-track train be slowing? No one is willing to speculate on
that, especially since President Bush and F-C-C Chairman Michael Powell appear

to be on the same page in their push for deployment of B-P-L.

Could the F-C-C be convinced to wait for the next N-T-I-A report and table the
issue for a few months? No one knows how to read the tea leaves in Washington.

Tune in weekly to Amateur Radio Newsline and we'll keep you on top of the
issue with the very latest news and views of those close to the B-P-L issue.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.
--

And look for Mark's report on the B-P-L buzz and other topics from the
Hamvention floor during our special program next week produced in Dayton.
(ARNewsline(tm))

**

Ham radio did all it could to help save the life of a stricken runner at a recent foot race in
Indianapolis. Jack Parker, W-8-I-S-H, has the details:

--
Audio report only: Hear it at www.arnewsline.org
--

Thanks Jack. (W8ISH, ARNewsline(tm))

**

RADIO RULES: FCC MKES "MINOR AMMENDMENTS" TO PART 97

The FCC says that it has minor amendments to various Amateur Radio rules. A
bulletin from the ARRL highlights some of them including the most significant
one. It involved revising the wording of Section 97.307(d), which defines
spurious emissions. The updated language imposes a slightly higher standard on
newer transmitters or amplifiers of any power level.

The FCC also has redefined what constitutes an Amateur Radio operator to
reflect the advent of the Universal Licensing System electronic licensee database.
The current rule defines an amateur operator as "a person holding a written

authorization to be the control operator of an amateur station." Under the
revised Section 97.3(a)(1) an amateur operator is "a person named in an
amateur operator/primary license station grant on the U-L-S consolidated
licensee database to be the control operator of an amateur station."

The FCC made these and several other regulatory changes on its own motion
rather than in reaction to any petitions. The decision appeared May 5 in the
Federal Register. The changes become effective June 1st. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard
on bulletin stations around the world including the WB3ERZ repeater serving
South Central Pennsylvania.

**

ENFORCEMENT: CONVICTED MURDERER LOOSES HAM TICKET

A ham serving a prison sentence for the murder of his wife has had his Amateur
license revoked. Roger Thomas Scaggs, the now ex-W5EBC, had his ticket
pulled after the FCC determined that he no longer holds the requisite
requirements to remain a Commission licensee.

On March 6, 1996 Scaggs was convicted of murder in the death of Penny
Scaggs, his wife of thirty-five years. The court record in that case showed that
Scaggs beat his wife to death with a galvanized lead pipe and then stabbed her
several times. He was sentenced to a prison term of thirty-two years and fined
ten thousand dollars.

The Commission says that its character policies provide that any felony
conviction is a matter predictive of licensee behavior and is directly relevant to
the functioning of the Commission's regulatory mission. It says that Scaggs
conviction mandates the conclusion that he does not possess the requisite
qualifications to be or remain a Commission licensee and that his

license should
be revoked. (FCC)

**

ENFORCMENT: NO FISHING COMS HERE

The owners of four trucking companies, two seafood companies and one fishing
boat have all been cited by the FCC for operating without a license on amateur
frequencies. According to the C-Q magazine website, three of the trucking
companies are in North and South Carolina and the fourth is in Idaho. They
were allegedly operating on 10 meters. The fishing boats are in the Pacific
Northwest, purportedly using the 2 meter band. (CQ)

**

ENFORCEMENT: FCC AGAIN WRITES TO K1MAN

The FCC has again written to Glenn Baxter, K1MAN, and the commissions note
has both good and bad news for the Belgrade Lakes, Maine radio amateur. On
the positive side, the April 14th letter informs K1MAN that a review of his
transmissions indicates that he is complying with the Amateur Service regulations
regarding broadcasting and bulletins and station control.

The negative? The FCC alleges that K1MAN is in violation of rules regarding use
of his Amateur station for pecuniary interest and those regarding deliberate
interference to ongoing communications.

Also, the letter again told Baxter that his "felony affidavit complaints" will not be
accepted by the regulatory agency. He was also reminded that all frequencies in
the Amateur Radio Service are shared. No frequency is assigned for the
exclusive use of any station, and that Baxter's station has no greater rights to a
frequency at any particular time than does any other Amateur station. (FCC)

**

ENFORCEMENT: CONSERVATIVE GROUP CALLS ON CONGRESS TO REPRIMAND FCC

A faith based group is chiding the FCC for not acting more decisively in getting
dirty words off the public airwaves. Amateur Radio Newsline's Jim Davis, W-2-J-
K-D, has more:

--

AUDIO

--

Focus on the Family was founded by Dr. James Dobson, whose commentaries
are heard on radio stations world-wide. (Published reports)

**

ENFORCEMENT: FCC CHAIRMAN DOES NOT SUPPORT REVOKING BROADCAST LICENSES

F-C-C chairman Michael Powell says he doesn't support legislation that would pull
a broadcast station license after a third indecency violation. He is not opposed
to high fines to get the attention of broadcasters who step across the indecency
line.

Speaking at the recent National Association of Broadcasters convention in Las
Vegas, Powell suggested that he would support extending indecency regulations
beyond over-the-air broadcasting to other media, such as cable and satellite
broadcasts, but only if the FCC is given approval by Congress.

Powell labels as a "red herring" a proposal by Viacom president Mel Karmazin for
more specific decency guidelines. Viacom owns C-B-S. That's the network which
aired the controversial Super Bowl half-time show with rock star Janet Jackson. (Published
reports)

**

RESCUE RADIO: EMERGENCY TRAINING IN KANSAS

A day-long program on Amateur Radio emergency communications will take
place Saturday, July 24, 9 AM in Kansas. This, at The Salvation

Army, 420 E
Santa Fe, Olathe which is 15 miles southwest of Kansas City.

According to the ARRL Letter, the day begins with "New Ham Orientation,"
sponsored by Johnson County Amateur Radio Emergency Service. This session
will provide an overview of ARES and explain how amateurs can get involved.
Following a lunch break the Kansas Salvation Army Team Emergency Radio
Network will sponsor an ARRL Emergency Communications seminar.

Seats are limited. For additional information contact June Jeffers, KB0WEQ, by e-
mail to kssatern@att.net or call area code 913-856-8674 during normal business
hours, Central time. (ARRL)

* *

HAM RADIO CONFERENCES: CSVHFS IN CANADA IN JULY

More information is now available on the upcoming Central States V-H-F
Conference that has been mailed out and also posted to the conference website.
Included are the latest highlights of conference plans, border crossing tips and
Canadian currency tips. Also posted is the 2004 President's Message along with
last years Noise Figure Measurement Test results and the Antenna Test Range
results.

The conference is scheduled for July 22nd to the 25th at the Delta Meadowvale
Resort & Conference Center in Mississauga, Ontario, Canada. All the latest is in
cyberspace at www.csvhfs.org and the Ontario VHF Association's page at
www.ovhfa.com. We hope that you have a great time. (Peter Shilton VE3AX)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of
America, We are the Amateur Radio Newsline with links to the world from our
only official website at www.arnewsline.org and being relayed by the

volunteer
services of the following radio amateur:

**

RADIO LAW: SAN DIEGO TV SHOP OWNER CONVICTED

Here's the kind of a story you probably have not heard of in
years. How about a
T-V repair shop owner convicted of duping his customers. Jim
Meachen, Zed-L-
2-B-H-F, has the rest of the story:

--
AUDIO
--

The store owner pleaded guilty to ten criminal counts, including
grand theft,
forgery, fraud and false advertising. (listeners reports)

EMERGING TECHNOLOGY: DTV AT A SNAILS PACE

The General Accounting Office has issued a report saying that more
than 80
percent of Americans are either unaware or only "somewhat aware" of
the
transition to digital television signals. They are also unaware that
Congress
plans to sell the analog spectrum that will become available when TV
stations
convert from analog to digital.

Lawmakers are counting on the money to help balance the budget.
However, the
digital transition may be years away unless more consumers start
buying digital
TVs to receive the new signals. Current sales of those expensive
digital sets
appear to be fairly flat at best. (Science OnLine)

WORLDBEAT - ALBANIA: NEWS FROM ALBANIA

Turning to news from around the world, many noticed the signals from
OH2BH
and OH2PM bouncing in from Albania not long ago. In fact, the pair
made some
6000 QSOs while visiting that nation. They were also there to remind
the world
of Amateur Radio about it's shared responsibility to help those

in need. You are
welcome to join this effort by making your old gear active from
Albania. For U.S.
tax payers, your donations can be processed by the Northern
California DX
Foundation. Contact W6OSP by e-mail to w6osp@aol.com for details.
(N4GN)

WORLDBEAT - CANADA: SOME RAC APPOINTMENTS ANNOUNCED

Radio Amateurs of Canada's Board of Directors has approved Eric
Ferguson, V-E-
3-C-R, as the organizations new Treasurer. This, for the term ending
Dec 31st,
2005. Feguson comes to Radio Amateurs of Canada with extensive
banking
experience at the Executive level at a major Canadian bank.

The Board of Directors has approved Dave Goodwin, V-Oh-1-A-U, as the
Director
for Radio Amateurs of Canada's Atlantic Region. Goodwin will
complete the term
of David Nimmo, VE1NN, who resigned in early March. (RAC)

**

WORLDBEAT - UK: NEW 6 METER BEACON ON THE AIR

And members of the United Kingdom's Blacksheep Contest Group have
activated
a new 6 meter propagation beacon located near the city of
Hertfordshire, in grid
square IO91. This, as a replacement for the GB3NHQ beacon which
closed down
some years ago.

The new GB3BAA beacon became operational on 50.016 MHz at 15:10 UTC
on
April 20th, and ground-wave reception reports from Normandy and
northern
England have already been received. Further reports would be most
welcome,
and should be sent to Mr. I. Phillips, G0RDI, by e-mail to
gb3baa@77hz.com (RSGB)

**

DX

In DX, 3-B-9-F-R has been heard operating from Rodrigues Island on 10
meter
FM. He was heard on the worldwide calling frequency of 29.600 MHz

between
1200 and 1400 U-T-C, working Europe. (GB2RS)

Also heard on is A-P-2-J-Z-B in Pakistan. He was monitored on 12 and 17 meters
SSB. Watch 24.955 MHz after 0930 U-T-C and also around 18.110 MHz after
1445 UTC. QSL direct to the operators call directory address.
(GB2RS)

**

THAT FINAL ITEM: WHO INVENTED THE SCANNER RADIO - REDUX

And finally this week, an update on our recent story of who really invented the
first scanner radio. We previously reported that a group of broadcast engineers
working at Cape Canaveral during the early days of the space race developed the
first scanner radio. This, so that the late NBC newsman Roy Neal, K-6-D-U-E,
could know when a launch was going to take place.

Well, that is quite true but Harvey Cronen, a S-W-L who is one of our listeners in
New Jersey has some further information. He says that musician and inventor
Raymond Scott is the person who holds a patent on at least one form of
automatic scanning radio.

Harvey sent us a web link to a site that chronicles the life of Scott. While he is
best known as the orchestra leader on the early NBC television show "Your Hit
Parade" and as the husband of the late songstress Dorothy Collins, there was
another side to Raymond Scott that few in the public knew about. It is all on the
website and it is there where it says that Scott actually patented a broadcast
band radio receiver which tunes in on stations around the country and changes
frequency by itself at any given interval. This, says the website, permitted Scott
to catch most of the nations disc-jockey shows in a brief span and find out what
tunes are being played.

There is lots of truly fascinating information at this very informative website

about Raymond Scott, his life, his inventions that impacted on the worlds of
recording and communications as well as his music. It is well worth visiting at
www.raymondscott.com. (H. Cronen)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the
RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm).
Our e-mail address is newsline @arnewsline.org. More information is available at
Amateur Radio Newsline's(tm) only official website located at
www.arnewsline.org. You can also write to us or support us at Amateur Radio
Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline
Young Ham of the Year Award is now on. This program is open to any FCC
licensed young radio amateur age 18 or younger residing in the contiguous 48
states and who has made a significant contribution to the community, the nation
or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website.
That's in cyberspace at www.arnewsline.org. The cutoff for nominations this
year is midnight on Tuesday, June 31st.

Next week, a full wrap-up on Hamvention 2004 which is opening as this newscast goes to air. Our Editor Bill Pasternak, WA6ITF, is in Dayton this week, sor for
now I am Don Wilbanks, AE5DW editing, anchoring saying 73 and we thank you for
listening."

That'll likely happen, Mike. If and when Element 1 is retained solely for the Extra, I suspect the Extra CW sub-bands will become a pretty crowded place. Kinda silly as those who won't (Not can't.) learn CW won't be on any CW sub-bands.

We do that now. Those of us who did our element 1C are just a tiny bit peeved that people got upgraded to Extra and didn't have to take the test.

I needle a buddy of mine about it all the time. He got his 'extra' when the rules changed, having already passed the 4B test. I got my extra in 1993.

Oh, then why is he posting you are a loser, loser? Shall I repost what
Ticker posted?
And Holsten is a well-known pedophile, lardass, why do you think
everybody calls him the pedo?

Here's what "Ticker" said about you:
http://www.network54.com/Hide/Forum/message?forumid=243612&messageid=107
1750724
Fuck off asshole.
by Ticker
Just what the fuck is it that you'd like to debate? You're a clown. A
fat one. No debate there.
You're a whiney bitch that has to shit everywhere you type something.
You drag your friends from
board to board and intrude on a world that would rather you had a
girlfriend to keep you off the
computer. Most of all you're BORING. Your faggot friends are boring.
Even your passion for Daleks
is boring. Boa should have shit all over you instead of making a half
assed attempt at seeing any

value in your presence. You and your mental case rantings have managed to try and take advantage
of Boa's celebrity in order to gain some credibility for your extremely weak show. You were the
only one that had anything to gain from his interview with you. You are too stupid to act in
concert with someone that is apparently on your side. Stevo learned how to show respect.
You haven't. Being on your side is social suicide. You have nothing to defend.
"At least he (Lloyd) has a job."
A kid's job. The kind of job that white people should reserve for kids that need weekend money,
or for someone to supplement their "real" job's income for a few weeks or so. How long has your
underachieving ass been delivering pizzas? Nice planning for your retirement. If we don't have to
support you now, we will when you're too old to cart your fat ass off to Pizza Palace any more.
Fuck you Lloyd. And all your faggot friends.

Posted on Dec 18, 2003, 10:32 AM

And Schwartz, who isn't even a ham and knbows Morse Code says you are stupid and lazy:
http://www.network54.com/Hide/Forum/message?forumid=243612&messageid=1071075686

Lloyd Davies demands affirmative action for himself
by Schwartz
All those others had to learn morse to get their license but Lloyd, because he is either
too stupid or lazy to learn morse, now wants to standards lowered so he can get his license.

Sounds like Affirmative Action to me! Lower the standard when you can't match them.

Posted on Dec 10, 2003, 3:01 PM

http://www.network54.com/Hide/Forum/message?forumid=243612&messageid=1071080918

poor pizza boy getting his ass kicked in.....
by Schwartz
Boa found him guilty, just go back and read his postings from the past. Of course Boa saying
something has as much credibility as a flipping a coin in the air.

Are you too stupid and lazy to look at postings in the past like you are when it comes to
learning morse code? yes, you are.

By the way, adult men don't go around calling themselves "time lord"

Grow up.

Posted on Dec 10, 2003, 4:28 PM

http://www.network54.com/Hide/Forum/message?forumid=243612&messageid=1071073934

Listen Lloyd
by Schwartz
Any truck driver will disagree with you, manual transmissions are far from dead, all big rigs
have them. And in Europe, most of the cars still are manual transmission. So your analogy is bad.

Morse is still useful - for example if your signal is really weak, morse is the best way to
communicate on a weak signal where data or voice breaksdown quicker.

Learning morse requires committment Lloyd, it's not a game like your childish Dalek games but
it takes committment. Maybe you lack the intelligence or patience to learn morse code. I don't
know.

.. -.-. .... .-- .- -.- --..

Posted on Dec 10, 2003, 2:44 PM

http://www.network54.com/Hide/Forum/message?forumid=243612&messageid=1071074645

Listen idiot.... just because your too stupid
by Schwartz
Again idiot. Morse code should be a requirement. If your signal is really weak, morse is the
best way to transmit. Maybe if you actually copied morse intercept like me, you would understand
this simple concept. Just because you are too stupid and lazy to commit to learning doesn't mean
they should dump it.

I learned morse. I mastered it. Of course, going by your posting history I can't expect a pizza
delivery turd who is part of the "tin foil hat" crowd to actually attempt to learn something.

Or you are simply too stupid to learn morse code.

Posted on Dec 10, 2003, 2:32 PM

http://www.network54.com/Hide/Forum/message?forumid=243612&messageid=1071076097

Then don't whine about it since you are too lazy to learn it
by Schwartz
I bet if you were intelligent enough to learn it, you be the first one crying about someone
wanting to get rid of the requirement. Your just fat and lazy and don't want to do the tough
things in life. That is why you are a obese pizza driver instead of doing something productive
in your life. If you can't even commit to learning morse, then you will always be a fat pathetic
loser.

By the way, I'm not that old, I make a good living and go to college so I can even further myself
better. You are fat, ugly, balding, and a pizza driver who focuses on aliens and robots.

Grow up fat boy, and do something that requires effort in your life. Then you wouldn't have such
low self-esteem. Being drunk, fat, and stupid is no way to go through life.

Posted on Dec 10, 2003, 3:08 PM

Look in the mirror Lloyd
by Schwartz
The same can be said about your show. You get like 5 people listening? I've thought about it and I decline to come on the air live as I have nothing to gain from it, I can get a larger audience on a yahoo voice chat room. I will be happy to debate you in a forum where imposters can't reign though.

Your choice.

> You are losing everywhere,

No, stupid, I'm just posting words over the computer.

>you don't even know who posts at Nim Busters against you, do you?

Yeah, you with about 100 screen names and Holsten alweays talking about sucking dicks.

> Take you wares to Cigarwise.com

Why, since I don't smoke or care for people who do, dumbass?

>and leave Dave Heil and myself alone!

You brought this into here, by posting as "Tim" and bringing Dave Heil into this. He wouldn't have been brought into this if you hadn't brought all this up, lardass!

> There have been many a VE out there who has taken his
> significant other out for a "night on the town" after a VE session.

As a reward for putting up with the demands of being a VE. Paperwork,
lots of extra stuff about the house, spending a good part of the
weekend at some hamfest or other giving tests to strangers for not
much more than a couple of donuts......

> Why
> would some guys drive for a hundred miles to "take" a test when tests are
> locally offered ???

Lots of reasons. Most of the VE sessions I know of are part of a
hamfest, so two things get done. Timing of the tests is another - if
someone is a "morning person", taking the test in the evening is
setting oneself up for failure. "Local" tests that are scheduled at
inconvenient times don't do the testee any good.

> Dare I say shenanigans .... ??????
>
Got any proof? Not aspersions on the character of unnamed persons, but
actual solid proof of wrongdoing? If so, tell Riley - FCC does care
about such things. If not, why besmirch the efforts of thousands of
honest volunteers?

The VEs who do the grunt work of actually giving the tests didn't
invent the system and they don't make the rules. In the 20 year
history of the system, only a tiny handful out of thousands of VEs
have been found guilty of any sort of wrongdoing in connection with
their VE activities. Perhaps an apology to the vast majority of honest
VEs is in order.

Yes, I wish FCC would do all the testing, and that the tests were
secret, etc., etc. But that's just not going to happen any time soon
because it costs $$$.

I was deeply saddened to read of the passing of Dick Caroll, W0EX. He was a great guy and a fine radio amateur. I'm glad to have known him, online, by email and most of all on the air. He and N0BK are sorely missed. WA2SI and I were wondering about him during a CW QSO on 40 the other night, and the next day the bad news was in the newsgroup.

So in memorial of W0EX and N0BK, we're going to try for a regular sked. Tuesdays, 9 PM EDST (0100Z), 7037 kHz plus-minus QRM. Just a friendly discussion net. All are invited. We'll call "BXN" instead of "CQ". "BXN" derives from the B in N0BK and the X in W0EX, and of course N for net.

Join us.

In other words Hans you are telling me that absolutely no money other than the legal "fees" EVER passes between tester and testee under our completely lilly white VE system. If you believe that one then you are the one that is in need of a bovine cleanout. It seems to me ..correct me if I am wrong ...that there have been instances where there were people recalled for testing due to "irregularities". The testing system even under the FCC was misused by fellows who
where "ghost" testees. Did I also say that all VEs were on the free ticket take? Nope .....so Hans don't get your shorts in a knot and keep taking the XYL out for dinner .....

Yep there Alun ...I was referring not to the legal percentage that can be charged but to the "selling" of tickets via questionable testing practices. Again this is something that did happen even under the FCC testing via shills taking the tests and the conditional cheating. Call me jaded or whatever ...but I firmly believe that some where out there a ticket can be purchased . BTW Alun ...stop by if your heading this way.

God Bless 73 Tom Popovic KI3R Belle Vernon Pa.

I'll certainly be there.

Just for clarification, (Please correct me if I'm mistaken, Jim.) 0100z,
Tuesday is the same as 9 PM EDST, Monday. So we're talking about a Monday
eve. net here. Nuthin' more enjoyable than actually gettin' OTA.

It isn't happening, is it? So the name calling escalates. Then
violent acts are mentioned. I've counted two so far.

> MARS has never been an important part of military
> communications, never a part of either tactical or

But it is important to have a back-up for certain communications. The
"Base Support Team" concept is fairly well thought through.

However, the
> affiliation with the military has terribly important
> self-image boost points for individual amateurs who want
> to enoble themselves into thinking they are "part of the

Until they discover that they can wear an actual uniform with "RANK"
on it via the Air Force's CAP program.

Ditto the adjustment, but I'm not sure about the rejected part. When
did he leave the service? There was a big RIF starting in 92. The AF
was down to half-strength by the end of 96.

Independent thought does seem to be lacking in some circles.

Hey, have you read about the hams that are going to try to send an
amateur rocket into space?

Maybe if they donate a bunch of money to Kerry, they will receive a
personal visit from the Loral techs and get the thing off the ground.

>could get on the air and only associate with like minded individuals?

Because then they couldn't call themselves "Pro CW Testing
Amateurs." :-)

> Removing the test would be the ultimate filter.

I disagree. It would be Removal of Amateur Radio As They Know It
and they won't, can't have that. Blasphemy against the Church
of St. Hiram.

Liken this period of time to the Dark Days of the Catholic Church.
The late Don Stoner (the "S" in SGC Corporation*, makers of the
SG-2020 HF transceiver) may be the counterpart of a Martin Luther
from his editorial (quoted by Hans Brakob many times) in nailing
"theses" to the "church door...or the NECVEC petition (RM-10870)
may be part of that also.

"Tradition" of always having a code test for amateurism is so firmly
implanted (or brain-washed into) in minds that any suggestion of
removal of the code test is considered by those PCTA as heresy,
almost an abomination to some god.

Amateur radio = radiotelegraphy is an equation which those
stubborn soles of see-double-you require all to walk on.

* The "G" of SGC, Pierre Goral, passed on several months ago.

Quoting the official titles and military branches who control MARS
is not lying.

>> The Military Affiliate Radio System is...(SNIP)
>
> ...a lot older than the 1998 manual you cited.

I did not cite "manuals." I cited the current Department of Defense
DIRECTIVE as well as the three major military branch
REGULATIONS that define MARS within each others' branch.

MARS was "born" in 1925 as the AARS or Army Amateur Radio
System. That is thirty years older than you.

> Thanks for the history lesson. You cut and paste well.

SOMEONE had to inform you since you were ignorant of the
beginnings of the Military Affiliate Radio System AND the pertinent
regulations of MARS.

> It still does not change the fact that without licensed Amateur
>Radio operators to man it, it would be defunct.

Incorrect. MARS functions - at its core - through military personnel
who man the headquarters such as Fort Huachuca, AZ, for the
Army and Scott AFB, IL, for the Air Force. Various military branch
net control stations around the country and the globe are manned
by military personnel who do NOT have to be licensed radio
amateurs.

Without the DoD DIRECTIVE, the Military Affiliate Radio System
would be defunct. It would no longer be military.

MARS seeks VOLUNTEERS for extensions of the MARS objective
and those come from amateur radio. Volunteers volunteer their
services but MUST abide by MARS regulations and operate for a
minimum amount of air time in any half-year period. In return, such
volunteers gain self-esteem plus a great deal of bragging rights to
fellow amateurs as if they "were somebody." Ho-hum.

>> >Now you lie.
>>
>> The gunnery nurse has distinct definitions of "lie" different

>> unique definitions.
>
> Back up Putzy.

Who are you talking to? Do you call all who disagree with you
by Yiddish colloquialisms meaning "asshole" in English?

> There many in this forum who can attest to my having offered an "I
>stand corrected" on several occasions.

Those exist but they are BURIED under a torrent of verbal abuse
and denigrations you heap in hate of all those who disagree with
you. Google has it ALL.

> On the OTHER hand, we have caught you in NUMEROUS errors or
>blatant misrepresentations of the facts, and YOU have NEVER
>apologized, offered a correction, or otherwise admitted your errors,
>even when they were corroborated as errors by several respondents.

Incorrect again.

But, your newsgroup technique is noted. When confronted by a
challenge of misbehavior, you turn around and try the "mirror ploy"
of changing the subject of the accuser of the same "crime."

You have repeatedly tried to accuse Brian Burke of "not citing" any
military regulations pertaining to the Military Affiliate Radio System
for three weeks, yet were UNABLE to come up with any military
regulations or directives as any cite. Those were very easy to get
via a simple Internet search.

You can't "prove me wrong" on what I quoted about MARS since
all I had to do was to contact the appropriate directive and
regulations origins and repeat them. You were unable to do this.

There MIGHT be some DoD or military branch revisions that were
done since 1998 (six years ago) on MARS. If so, I will stand
corrected on proof of validity of such later revisions and being
presented with a publicly-accessible reference source for same.

However, YOU presented NOTHING in the way of MARS cites or
regulations that govern the existance of MARS. You had three
weeks to do that in and FAILED. You were attempting to "win
message points" by just bluster and bluff. That may work in the
USMC on lower ranks but it doesn't work in civilian society.

>> MARS has never been an important part of military
>> communications, never a part of either tactical or
>> strategic planning. At best it is an extension of
>> Special Services (in the Army old term) for entertainment
>> and morale boosting of service personnel. However, the

>> self-image boost points for individual amateurs who want
>> to enoble themselves into thinking they are "part of the
>> grand scheme to 'serve their country'."
>
> "I am only here to civilly debate the Morse Code test issue"....

The Military Affiliate Radio System does NOT employ any on-off
carrier keying communications modes such as "morse code."
:-)

You are trying to misdirect again by the "mirror ploy." That doesn't
work but you can't seem to understand that after six years of trying
to use it. You FAILED to come up with any cites of DoD Directives
of military branch Regulations after three weeks, and now you think
you can misdirect by more bluff and bluster? :-)

> Remember who said THAT Lennie?

Who is "Lennie?" A character out of a Steinbeck novel? :-)

[if so, the name is spelled wrong...]

I am TRYING to concentrate on the manual telegraphy testing issue
but am engulfed in a sea of hatred from the pro-telegraphy proponents
who engage in uncivil behavior against those against the test.

However, YOU told a number of LIES in describing the Military
Affiliate Radio System and YOU are held accountable for those LIES.

> You really have your moments of lowness and sliminess, but this
>one was pretty well in the running with the lowest.

Tsk, tsk, tsk. Nasty name-calling does not befit the rank, status,
and privileges of amateur extra. Not even amateur human being.

Telling the TRUTH about the Military Affiliate Radio System is NOT any form of "lying."

Challenging YOU on your inability to find appropriate cites for the creation and continued existance of the Military Affiliate Radio System is NOT any form of "lying." It may make you livid and outraged, but that is so much TS for you. [send me your TS card and I'll punch it for you]

> In as much as YOUR rear-area radio clerk duties were probably of
>even less importance in :the grand scheme" of the Armed Forces, I
>imagine it eats at you that MARS members do more for free than you
>EVER did while on Uncle Sam's payroll.

Tsk, tsk, tsk. Livid and Outraged is an appropriate description of the gunnery nurse.

1. I was NEVER a "radio clerk" in any capacity, not even in a Radio Shack store. :-)

2. I was an MOS 281.6, microwave radio relay operations and maintenance SUPERVISOR as well as a fixed-station HF radio transmitter operations and maintenance SUPERVISOR.

3. I was assigned to the third-largest HF radio communications facility in the entirety of the Army Command Administrative Network for three years. The work I did during assignment resulted in promotion as well as increase in responsibility.

4. Nothing "eats at me" for any reason of the existance of the no-longer-primary HF radio communications networks of the past, present, or future. I did my duties well, was rewarded both professionally and personally (for liking what I did), and that resulted in a personal change of future career directions after completing military service.

5. Since the end of my military service obligations, I have worked IN radio communications of civilian, military, and commercial services, from VLF on up through about 25 GHz. While I've never worked ON the DSN, any part of it, I have used it for communications. [do you know what "DSN" is?]

> Well, Your Scumminess...why don't you go right ahead and apply
>for membership and a station authorization in N/MC MARS...?!?!
>
> I'd love to see the result.

Why? I have NO desire to become a part of MARS. I was simply injecting some official Directives and Regulations which you were unable to supply in support of your little tantrum against Brian Burke.

I'd love to see you return to regular medications to control your emotional outbursts of hatred and outrage against those who disagree with you. I don't expect to see that happen, but it would

be nice for all concerned.

>> Actually, there's been NO third-party proof that gunnery
>> nurse was ever in the USMC. All we have to go on is his
>> "word" and his "I've got the proof in my wallet" sort of
>> statements.
>
> Contact the VA, Lennie.
>
> You've got my full name, branch of service, and my date of birth
>is 18 Sept 1955. You'll excuse me if I don't offer you my SSAN, too.

I don't have any such data that you describe. All anyone has is
"your word." So far all anyone has is a lot of bluff and bluster,
NO referenced documents and NO references from others who
supposedly "know you."

> Of course that's been offered to you before and like most REAL
>facts, you never follow-up on it.
>
> That would be because you're a coward.

What "REAL facts?" NARA (National Archives and Records
Administration) in St. Louis has all the archived militrary service
records. It isn't worth 37 cents stamp and trouble of posting to
obtain your supposed "military record."

But, you are trying to misdirect again, trying to shift focus on
some supposed flaw of my character...and all I did was quote the
official Directive and branch Regulations of MARS. :-)

It wasn't "cowardice" to do a simple search and find all that
information. Took only a half hour at no cost. YOU failed to do
a simple thing like that in three weeks time in your tantrum
against Brian Burke. Tsk, tsk, tsk.

>> We have yet to see a "paper trail wide enough to roller skate
>> on to show where [gunnery nurse'] assertions are true."
>
> You've been offered access to the VA to verify it before, Lennie.

The Veterans Administration can't "verify" your service record.

NARA can. Try to understand your government.

> Not "someone", Lennie...You. Because you are a liar.
>
> Always have been...always will. What a loser.

Tsk, tsk, tsk. Still off the meds. A supposed "medical professional"
who can't get medical help. :-)

Temper fry...

Because then they couldn't call themselves "Pro CW Testing
Amateurs." :-)

> Removing the test would be the ultimate filter.

I disagree. It would be Removal of Amateur Radio As They Know It
and they won't, can't have that. Blasphemy against the Church
of St. Hiram.

Liken this period of time to the Dark Days of the Catholic Church.
The late Don Stoner (the "S" in SGC Corporation*, makers of the
SG-2020 HF transceiver) may be the counterpart of a Martin Luther
from his editorial (quoted by Hans Brakob many times) in nailing
"theses" to the "church door...or the NECVEC petition (RM-10870)
may be part of that also.

"Tradition" of always having a code test for amateurism is so firmly
implanted (or brain-washed into) in minds that any suggestion of
removal of the code test is considered by those PCTA as heresy,
almost an abomination to some god.

Amateur radio = radiotelegraphy is an equation which those
stubborn soles of see-double-you require all to walk on.

* The "G" of SGC, Pierre Goral, passed on several months ago.

I've been a Extra for 30 years now. I hardly ever operate in the exclusive
subbands, either phone or cw. But here lately I have been.

I have no problem with leaving 50 khz per band for CW.

Good Hams that know CW are more than willing to reduce speed (QRS). In fact real CW ops know that it is idiotic to keep sending faster than your contact can receive. It's a waste of time.

As for you not wanting to talk to me for saying my opinion of phone only ops. That's ur choice Alun. And your loss. You would enjoy working W4NTI on CW.

Thank you Hans,

I actually do consider ALUN a lid. Because he has stated he is a phone operator ONLY. To me that is a lid.

Not really. I operate phone, have so for years. It's just that if that is
ALL you do in ham radio, I think your a LID.

LID = Poor Operator

I understand it is difficult for you to understand how it is to be a real ham. You know one that knows and uses other modes than phone.

Again you will simply have to learn to deal with that Alun. I am sure you will find someone out there that will agree, and simpathize with you and your problem. However, I am not that person.

Have a good day.

>> not a terribly popular thing either in or out of the Army.
>> The AARS stopped at the start of the USA involvement with
>> WW2 and cessation of amateur operations. It resumed in 1946.
>> In 1948 the AARS was renamed with the organization of the
>> USAF as a part of the new MARS, dropping the "amateur" in
>> favor of the word "affiliate."
>
>The Air Force was always forward tinking.

I know, but the USAF was "born" in the Army Signal Corps. :-)

Signal budget bought the very first "air force" airplane, a
Wright Flyer.

>> The intent of MARS was basically a morale booster for all
>> military personnel assigned far from USA territory. The

>> the USA and foreign US locations.
>
>They don't use CW anymore, either. They've gone digital.

Don't say that too loudly in here...the dittyboppers don't like it.

MARS exists via a DoD Directive, is managed by the military,
main stations are operated by the military using military
equipment, and doesn't transmit IN the amateur bands. I guess
that some folks think that "MARS is amateur radio." :-)

>> The gunnery nurse has had, what, three weeks, to cite one
>> and has not. A simple Internet search will turn up the
>> official documents from the DoD and all three service

More will be mentioned, blurted out in another spasm of bluff,
bluster, and bravado. Tsk, tsk, tsk. :-)

>> MARS has never been an important part of military
>> communications, never a part of either tactical or
>> strategic planning. At best it is an extension of
>> Special Services (in the Army old term) for entertainment
>> and morale boosting of service personnel.
>
>But it is important to have a back-up for certain communications. The
>"Base Support Team" concept is fairly well thought through.

MARS is "backup?" For what, Special Services? USO?

In today's battlefield, DIGITAL is the thing in everything from comms
to the now-ubiquitous little personal digital camera and the various
websites the Iraqi and Afghani GIs use to connect back home. How
else did the press get hold of the Iraq prison abuse pictures? They
got them first from the INTERNET.

MARS "might" be a good backup for civilian organization liason
such as REAL emergency interface with FEMA, etc., but it is an
old thing that never adapted beyond 1954. If nothing else, a few
MARS volunteers get to take home military commo equipment
that was declared surplus. Real green machines they can play
with...that the taxpayers once owned.

>> However, the
>> affiliation with the military has terribly important

>> amateur radio licenses.
>
>Steve estimated that it was no more than 1%, 2%, 10%, or 20% of the
>total MARS personnel, depending on which day he said it.

He must have an imaginary roster of all "MARS personnel" and
thinks that volunteers are somehow enlisted for some kind of
duration. [of what we don't know...] :-)

>> VOLUNTEER civilians are welcomed by all three branches but
>> only the USA and USAF require volunteers to possess amateur
>> licenses. USN-USMC does not.
>
>Oh, My!!!
>
>And wasn't Steve in the U.S. Marine Corps? Shouldn't he have already
>known that? What he do with all that service time? Play
>tiddly-winks?

He sure wasn't in any military commo work. He can't name a single
military radio by either nomenclature or familiar name. Not even a
"plugger" (AN/PSN-11 GPS receiver).

I'm having a great deal of difficulty in thinking he was ever IN the USMC.

So far, all he's ever said is a bunch of words. No references, no scans
of any papers, nothing but a bunch of words in a newsgroup (when he
isn't sending nastygrams to those who disagree with him). All we know
is that he's in the FCC database for AMATEUR radio.

>Ditto the adjustment, but I'm not sure about the rejected part. When
>did he leave the service? There was a big RIF starting in 92. The AF
>was down to half-strength by the end of 96.

If he was born in 1955 as he says (I'd already made E-5 then,
working on microwave terminals), then he could have enlisted at 18,
making that 1973 (I was a senior staff engineer at RCA EASD in
Van Nuys, CA, then). If he did about 18 years in the corpse, then he
got his medical discharge about 1991. [if he did a full 20 it was 1993]

Supposedly he got out on a medical "due to an accident." Okay, so
if the accident resulted in physical damage to curtail a USMC career
completion, how come for why he got a private pilot's rating? Did the
FAA "dumb down" the private pilot physical?

The progression doesn't add up or make any logical routing. The
REAL story hasn't come out yet.

>> >Odd, but I haven't seen much of Len lately. How nice of him to be
>> >taking me along with him.
>>
>> I've been gone, doing more important things in life. :-)
>
>Well thanks for taking me along.

Sorry about that. :-)

>> >> That you voluntarilly get in step behind him is laughable at best.
>> >
>> >Its called, "The High Road."
>>
>> I'd call it "independent thought."
>>

>> and become outraged with anyone disagreeing with their
>> noble, righteous bigoted thoughts of amateurism.
>
>Independent thought does seem to be lacking in some circles.

Ever body gotta march to the same beat, same music, chant the
1930s mantras about telegraphy skills in amateurism.

>Hey, have you read about the hams that are going to try to send an
>amateur rocket into space?
>
>Maybe if they donate a bunch of money to Kerry, they will receive a
>personal visit from the Loral techs and get the thing off the ground.

It will be about as effective as the fledgling ARRL's first try at
a national commo relay network cross-country trial.

Rocketry into outer space isn't as easy as it looks. Goddard spent
years in the southwest as an amateur rocketeer and didn't get very
high. The VfR (Verein fur Raumschfart) or German rocket society
did about the same but got an assist in monies from the Wehrmacht
and a nice test area called Peenemunde on the Baltic coast.

Look at the infamous Viking rocket that was supposed to launch on
the IGY. Got maybe a half foot off the pad and went kaBlooie.

Burt Rutan's outfit is well on the way to success in that area, having
completed the first of a series of flight trials. [Rutan built the first
circumnavigation-without-landing aircraft] Scaled Composites not
only built the manned rocket but also the launch aircraft. The first
flight went beyond the astronaut wings limit...except the 61-year-old
pilot is a civilian and won't get the fancy astronaut wing insignia.

>> Gunnery nurse cannot concede anything on a subject. What
>> he stated is divine law and none may go against that.

>

Poor baby. Therapy not coming along well, is it?

"Real ham" = One who abides by 1930s standards and practices

This is the year 2004, over 6 decades later.

>Again you will simply have to learn to deal with that Alun. I am sure you
>will find someone out there that will agree, and simpathize with you and
>your problem. However, I am not that person.

We can sense your differences. And bigotry. And frustration.

Without the telegraphy test, an Amateur Extra has no real
self-perceived elitism over all other amateurs. It must be a
great blow to self-esteem to face the loss of status and rank.

>Have a good day.

Interesting. A Noo Yawker from the "south." :-)

>it are world class fools.

The REST OF THE RADIO WORLD GOT RID OF TELEGRAPHY.

Are all those other radio services "fools" that they got rid of
radiotelegraphy?

I guess you think so. <shrug>

How's your therapy coming along?

France dropped the Morse requirement.

http://www.ref-union.org/accueil/actualites/pdf/7_mai_Lettre_du_Ministre.pdf

The publication in the 'Journal Officiel de la Republique Franciase' took
place on the 16th of May, 2004. Please look at
http://www.ref-union.org/accueil/a_la_une_supplement/pdf/2004-316.pdf .

The strange thing is that Class 2 operaters are not (!) allowed to use A1A,
A2A and F1A on amateur bands below 30 MHz. This is strange!

If this official publication means that foreign Class 2 operators (CEPT-2)
may use HF bands in France, has not been clarified yet.

Genuine Class A.

4143. Low power video transmitter

Newsgroup: rec.radio.amateur.policy
Date: 2004-05-20 18:01:29 UTC
From: "Daniel Kelly (AKA Jack)" <d.kellyNOSPAM@NOSPAM.ucl.ac.uk>
Message-ID: <c8iro6$22us$1@uns-a.ucl.ac.uk>
Source record: 92206
Cross-posted to: rec.radio.amateur.policy,rec.radio.noncomm,rec.radio.swap,uk.radio.amateur,uk.tech.broadcast

Hi guys,

From your vast collective knowledge, please could you recommend a video transmitter with the following characteristics:

* very low power consumption (<70mA), ideally running at below 7.4volts

* small size

* transmits mono audio and colour video

* transmits outside the spectrum used by WiFi (802.11b/g uses 2401-2483 MHz). In practice I guess this means the video tx must use either 800Mhz, 1400Mhz, 2300Mhz or 5800Mhz. It must be legal for use in the UK. What I'm after is a video TX that uses a "quiet" part of the spectrum. 2.4GHz certainly aint quiet (wifi, digital cordless phones, microwaves, AV transmission)!

* available in the UK

* costs less than 150 UK pounds

* comes with a compatible RX which also has very low power consumption.

Many thanks for your help,
Jack

PS
Sorry for sending to so many newsgroups. I've spent bloody ages trying to find a solution but with no luck yet so I'm eager to get as much advice as possible.

Ask your local motion picture sound folks. There are a number of short
distance wireless systems which use licensed frequencies, which are often
used for video taps on film jobs. I don't know of any under #150, but
you might find some used ones at a film sound rental place.

Check with Black Box. They do a system to feed a director's monitor on
location. Works pretty well. No idea about cost, though.

Yes, but it is good practice on the internet not to use specific characters
like the cedille, accent aigu, accent grave, accent circonflex etc. etc.

In come ASCII-translation tables, these characters translate to nothing,
smileys etc. etc.

Maybe salvage the modulator from a dead VCR? Or for that matter, use a VCR
set to "video input" mode. It may need a small power amp to get a
decent signal
20 meters, though....

Not in the context of the particular give-and-take with "Real Ham"
Dan. :-)

>A "real ham" is one who holds an amateur radio license.

Actually, a "real ham" is the butchered meat of swine. :-)

The FCC regulations don't define "ham" at all. The FDA does.

Why do you persist in all the confusion of colloquialisms?

>You don't.

Right!

>You have no stake whatever in amateur radio.

Tsk, tsk, tsk. All you want to do in here (which is newsgrouping,
not amateur radio) is drive a stake through any heart that doesn't
beat to the rhythm of classical radiotelegraphy in amateur radio.

Quit trying to play Van Helsing. Hollywood already done a movie
about that and you don't have a part in it. [Hugh Jackman doesn't
have an Aussie ham license either]

>> This is the year 2004, over 6 decades later.
>
>...and despite your self-declared several decades interest in amateur
>radio, you have yet to show enough interest to become a participant.

Oh? Did you miss something in the past six years of messaging
in here? I've been a professional involved with radio and radio
communications. Interesting work. Paid well, too. I've
communicated on frequencies you aren't allowed to as a "licensed
amateur" or even as a State Department government employee.
:-)

Didn't need a bit of manual telegraphy skills or licensing (as an
amateur) to do any of that.

Where is it "written" that I have to demonstrate some "interest in radio" to the Great Heil?

You DEMAND amateur radio license acquisition in order to state anything on amateur radio regulations in here.

You should make public your "authorization" to make such demands.

Without that "authorization" you are just another bitchy whining complainer who can't hack any real discussion beyond the "official" words on amateur-radio-as-it-used-to-was when you first engaged in that hobby.

Without that "authorization" you are just another SS-wannabe who wants nothing more than to fight anyone who doesn't agree with your "orders" posted on this bulletin board. In other words, just another disagreeable gunnery nurse (but without bedpan).

Until you show your "authorization," you'll have to discuss it with the only Real Authority on this newsgroup, Paul Schleck. Hint: he is a licensed radio amateur of Amateur Extra rank.

What you seem to want this newsgroup to become is just another Chat Room where like-minded dittyboppers can commiserate in a mental commisary all about "real hams" (who know and love morse code) and follow the League's orders explicitly, complete with all the jargon and standards and practices of 1930's amateur radio.

Meanwhile, this newsgroup is still unmoderated and open to anyone with Internet access. No doubt you will redouble your efforts to put down anyone who doesn't think like you do and DEMAND certain things in order to satisfy your "authorized" orders. Pthththththth.

DAN, Dan, dan, it is the -EXAM- that we are getting rid of. If we got
rid of the psk practical exam, would you think we are trying to get
rid of the mode?

Contact Giles at www.G1MFG.com he does some small cheap 2.4 Ghz modules that you can put on frequencies around that band beware the odd police helicopter etc!.

Or ask him if he can do you a couple on 1394 MHz which is a licence exempt band with is intended for CCTV applications and hardly anyone uses it. You are supposed to use "approved" equipment but if your on frequency and don't use more than 500 milliwatts ERP then you shouldn't be troubled. Ofcom officers have better things to do:)

Or you could use a TV VCR type modulator and put the output of that into a small aerial amp and use a multi element Yagi TV aerial and that should carry a short distance. Chose a "quiet" channel in your area. Not that I'd suggest for a moment you break the WT act of course:!

You are supposed to use "approved" equipment but if your on frequency and don't use more than 500 milliwatts ERP then you shouldn't be troubled. Ofcom officers have better things to do:)

You can buy equipment for this use but I think its a bit more expensive. AFAIK there aren't legal bands for TV transmission on 800 MHz.

Can you say what you want it for at all?...

Hans, what I meant was he said "phone ops are lids" in the group, not that he said "phone ops are lids in the group". Obviously I need to spell things out for you to get it.

Here is his original post (in quotes below):-

Then why are you trying to tell us that " "Real ham' = One who abides by
1930s standards and practices"?

> The FCC regulations don't define "ham" at all. The FDA does.

> >You have no stake whatever in amateur radio.
>
> Tsk, tsk, tsk. All you want to do in here (which is newsgrouping,
> not amateur radio) is drive a stake through any heart that doesn't
> beat to the rhythm of classical radiotelegraphy in amateur radio.

You've told us on numerous occasions all you want to do here. You never
seem to get around to doing what you've stated. Now you'd like to tell
me all I want to do. I've not stated all I want to do here so your
comments are conjecture on your part. Take your pick, Leonard:
classical telegraphy, classical SSB, classical AM phone. You aren't
doing any of them in amateur radio. You aren't a participant.

> >> This is the year 2004, over 6 decades later.

> communications. Interesting work. Paid well, too. I've
> communicated on frequencies you aren't allowed to as a "licensed
> amateur" or even as a State Department government employee.
> :-)

1. I wrote "amateur radio". You're drifting off into a description of
your past professional radio experience once again.

2. I don't really care where on which frequencies you communicated as a
professional.

3. You have no idea which frequencies are used or may be used by the
U.S. Department of State.

> Didn't need a bit of manual telegraphy skills or licensing (as an
> amateur) to do any of that.

You wouldn't need any to obtain the most basic amateur radio license in
the U.S. either.

> Where is it "written" that I have to demonstrate some "interest in
> radio" to the Great Heil?

I didn't write anything about "some interest in radio".

> You DEMAND amateur radio license acquisition in order to state
> anything on amateur radio regulations in here.

I've DEMANDed nothing. I continue to point out that you have nothing to
do with amateur radio as a participant or a regulator.

> You should make public your "authorization" to make such demands.

You should look up the definition of the word "demand".

> Without that "authorization" you are just another bitchy whining
> complainer who can't hack any real discussion beyond the "official"
> words on amateur-radio-as-it-used-to-was when you first engaged
> in that hobby.

Wrong-o, Pops. I'm a licensed radio amateur. I have a vested interest
in any changes in regulations involving amateur radio license testing or
amateur radio operation. You, on the other hand...

> Without that "authorization" you are just another SS-wannabe who
> wants nothing more than to fight anyone who doesn't agree with
> your "orders" posted on this bulletin board. In other words, just
> another disagreeable gunnery nurse (but without bedpan).

"Fight"? "Orders"? If we were fighting, you'd best pack a lunch and
rest up beforehand, old timer. I haven't issued any orders.

> Until you show your "authorization," you'll have to discuss it with
> the only Real Authority on this newsgroup, Paul Schleck. Hint:
> he is a licensed radio amateur of Amateur Extra rank.

I'll have to discuss what with Paul Schleck?

> What you seem to want this newsgroup to become is just another

> mental commisary all about "real hams" (who know and love morse
> code) and follow the League's orders explicitly, complete with all

> the jargon and standards and practices of 1930's amateur radio.

You aren't wrapped very tight.

> Meanwhile, this newsgroup is still unmoderated and open to anyone
> with Internet access. No doubt you will redouble your efforts to put
> down anyone who doesn't think like you do and DEMAND certain
> things in order to satisfy your "authorized" orders. Pthththththth.

No DEMANDs have been made of you, Len. You continue to post. I'll
continue to point out your lack of anything to do with amateur radio.
You've certainly kept mum about your childlike antics exemplified by
some of your comments to the FCC. Wanna discuss those?

Dave K8MN

Hello,

tony sayer wrote:
> Can you say what you want it for at all?...

Sure. I need to built a wearable, covert video camera & transmitter. The camera, battery and TX all need to live in a hat and last for 16 hours without changing the battery. The receiver will be carried in a bag and will connect to a Riviera hard disk AV recorder.

It's for a psychology experiment. Nothing dodgy.

Many thanks for all the excellent help,
Jack

Dear Dave,

Many thanks for your reply. Do you have a URL for "Black Box"? I've had a look on Google but no joy. And unfortunately my subscription to The Knowledge Online has just expired.

Thanks,
Jack.

We don't have that now! On HF/MF, there are *no* CW-only subbands.

I think such subbands are a very good idea. Something like this:

CW-only subbands:

160 meters: 1800-1850 kHz
80 meters: 3500-3575 kHz
40 meters: 7000-7050 kHz

30 meters: 10100-10120 kHz
20 meters: 14000-14075 kHz
17 meters: 18068-18088 kHz
15 meters: 21000-21075 kHz
12 meters: 24890-24910 kHz
10 meters: 28000-28100 kHz

Bottom 25 kHz of 80/40/20/15 reserved for Extras. Rest is available to all other classes of license. CW would still be legal outside these subbands but observance of the subbands would be encouraged as good operating practice.

Why not?

You'd think that such a move would be offered by at least some of the nocodetest folks...

> amateurs.

As usual, only partially correct...more wrong than ocrrect.

Those programs are headquartered at the locations you cited.
Good job.

Those programs, beyond those confines, are mangaged by, conducted
by, and are "staffed" by volunteer licensed Amateur Radio operators.

I had already acknowledged that there are military personnel
assigned to certain MARS stations.

However those "net control stations" will have a hard time
"controlling" ANYthing if there was no one there to control.

Rest of usual "if you yell louder they will understand you"
trolling snipped.

No Amateur Radio = No MARS.

It really is THAT simple.

Sorry Jim, they are busy with trying to lower the test requirements right now.

After all the Technicians are freebied up to General, they'll turn their attentions to those pesky and annoying gentleman's agreements for CW portions.

I'll bet you a pepperoni and cheese pizza that their bandplans will look quite different than yours. Theirs will be much simpler!

The rationale will be that it is SO much trouble for people to keep within bandplans that it is a big headache for hams to keep track of where they are supposed to be. And why do those CW people get half our bands anyhow?

The most amusing part will be when Carl and Bill show up with their spin on how it *isn't* a spectrum grab.

But you know, I suspect that in the brave new world of post-restructuring ARS, that the new hams will simply do squatters rights on the bandplan. It's only an agreement, so what can we do if they decide to work there?

I wonder when the first CW segment SSB contest will be held?

Source record: 92236

Is anyone else embarrassed by the 'public sound and fury' antics of ARRL in response to the BPL threat? Below is part of some correspondence I sent to my Division Director. If you feel it's time for more sound science and less hand-wringing, you should let YOUR Director know.

- -

Jay,

I understand all the arguments against BPL rollout and I agree with 98% of them. I also agreee that ARRL ought to mount the strongest possible technical rebuttal to relaxation of Part 15 rules. To that end the work of Ed Hare, et.al. is dead on target. I personally authorize you to double the amount of my dues to support sound science-based work which generates a technically convincing rebuttal to Michael Powell and his minions.

But this amateurish "whipping up the troops to write letters to the White House" and similar tactics are embarrassing. The typical ham (I'm sorry to report) hasn't the technical accumen to make any sort of persuasive case against BPL, so their protests take on the whining tone of "you can't do this to us because we do all this good stuff on HF.".

As someone with a lot of professional contacts in the wireless industry, I can tell you that our public and regulatory image is on a swift decline. We are increasing viewed as technically naive kneejerk obstructionists. For every Ed Hare doing good technical investigation and writing convincing counter arguments, there are thousands of clueless emotional emails and letters irresponsibly stoked up by Dave Sumner editorials. The valuable and responsible work of Ed Hare gets lost in the "noise and fury".

Sheesh! Why didn't you say that? What you want is a covert pack kit.
Markertek Video Supply (www.markertek.com) sells the V2CMS package for
$125 which uses the 2.4 GHz ISM band.

I do warn you that the system does have some problems dealing with large
amounts of rapid movement between the receiver and transmitter. At such
a high frequency, multipath effects get weird.

And I don't know if any of this stuff is legal to operate in the UK, or
who manufactures the unit for Markertek.

I've never pretended I don't want more phone spectrum, but there again, I have no connection with NCI either.

There are a couple of different issues here, and they are getting mixed up. As a phone operator, it annoys me that the FCC rules give me _smaller_ subbands than in the gentleman's agreement known as the IARU Region 2 (North & South America) bandplan (not the one drawn up by the Antiquated Radio Relay League, which of course is a subset of the FCC rules, as they couldn't very well suggest illegal operation).

Repealing code testing will put more people on HF who don't do CW, although some of them will be into PSK31, etc., so there will be more pressure to do something about this. I actually agree that NCI is not the appropriate vehicle for that, unless the name were changed? I also agree that they said they would go away when they won, but I'm not them.

From the CW perspective, no doubt the CW segments of any bandplan are less than the sum total of the FCC CW and data allocations, but the data guys have to have somewhere to go! Do you really need CW only segments to protect yourselves from them? (I don't know the answer, this is a genuine question, and I'm not a data person so I really have no axe to grind).

If you do think that, and that may be a reasonable position to take, I only have one point of disagreement. Above 1842 is available to phone in the 160m bandplan, and no I'm not talking about the League, I mean the IARU bandplan again. Since 1810-1850 is the amateur exclusive part of the band, it just wouldn't be right for all of that to be reserved for CW (although you could have more CW somewhere else as far as I am concerned). 8 kHz is not too much to ask for as a DX window for phone, and at least the FCC doesn't prohibit it even of the League have failed to recognise it. If you ask the FCC to prohibit phone there, then you can be sure I will file a comment to the contrary.

The short answer is "because we're not 'elitist snobs' and our feet
are not 'firmly planted in the past'

The longer, more accurate answer is that it's not as simple as some
folks would like you to think.

For some, it really is "just about the code test". But for others, the
real issue is something variously called 'standards' or
'achievements'. That's where the real disagreement is. And it comes
out in a whole bunch of ways.

For example, how often have you heard the buzzphrases "it's a hobby"
or "it's just a hobby" or similar, given as an argument against some
requirement or another? Think about what the person pushing those
phrases really means. They're usually *not* saying "it's not a job".
Instead, what they're really saying is "don't expect much" or even
"don't expect anything".

Look at how the *written* exams have changed over the years, despite
claims that "it's just about the code test". Yet we have vocal support
for free upgrades and further written test reductions.

Did you see the article on "is training class efficient?" which
detailed a one-day-to-Tech cram course? They boasted an 85% success
rate - meaning that after just one day of class, 85% of their students
passed the Tech test. This was done by rote memorization of the
written exam question pool. Is this really what's best for the future
of the ARS? Some folks think so!

When you see arguments for "one class of license" ask "with what
requirements?" - but don't hold your breath waiting for an answer.

When you see people railing about "standards and requirements of the
1930s", ask what they propose as the "standards and requirements of
the 2000s" - but again, don't hold your breath waiting for a detailed
answer.

Some folks don't think there should be *any* standards or requirements beyond a bare bones set of rules and regs from FCC. Of course we know what happens in a radio service where that is the norm. It isn't pretty.

Hey Hans,

Once upon a time, in my naivety, I thought a good sound technical rebuttal of BPL would be sufficient to sway the regulators. After all, it is so technically awful that it *should* be easy to convince an intelligent person without much difficulty that it is a loser technology. Certainly other countries around the world have agreed it is such.

My old opinion can be googled up here. But times have changed.

I think the decision was made a long time ago based on other than technical reasons, and BPL *will* be rolled out, and I don't think there is one thing that we can do about it, save for the ballot box.

BPL is going to happen! All money spent fighting it, all letters to representatives, all comments to the FCC and all the hand wringing is 100 percent useless.

I am pegging my hopes on BPL being the failure that it will inevitably be. The utilities will run the fibers, start running the BPL portion of the lines, and after they find out how many of their transformers are putting out trash that interferes with the digital signal,(check the FCC actions on arrl.org to see how good the utilities are at replacing noisy transformers) and after the BPL users figure out that cable is faster and DSL is more reliable anyhow, BPL will become the 8 track of the internet.

Then what will happen is that they will step back, take a look, and figure out that they already have 95 percent of the job finished. The fiber is almost to the houses! simply run it the rest of the way, and LIB! decent speed internet connections! If the ill educated consumers at the other end want to they can go wireless, so they don't even have to connect their machines to a outlet in the wall.

>> Army and Scott AFB, IL, for the Air Force. Various military branch
>> net control stations around the country and the globe are manned
>> by military personnel who do NOT have to be licensed radio
>> amateurs.
>
> As usual, only partially correct...more wrong than ocrrect.

"Ocrrect?" :-)

Tsk, tsk, tsk...without the DoD Directive there would be NO MARS!

You don't seem to understand that.

I can't make it any simpler. MARS IS MILITARY.

MARS is NOT amateur.

MARS doesn't operate ON amateur radio frequencies.

MARS doesn't use amateur radio callsigns.

MARS has its own callsigns.

Amateurs can't use MARS callsigns IN amateur radio.

> Those programs are headquartered at the locations you cited.
>Good job.

What is "good" about doing a simple, one-time search?

YOU were unable to do the same simple task in three weeks.

BAD JOB to you, Oddjob-wannabe.

> Those programs, beyond those confines, are mangaged by, conducted
>by, and are "staffed" by volunteer licensed Amateur Radio operators.

Beyond what "confines?"

Confines of being UNABLE LEGALLY to operate MARS in amateur
bands?

Confines of being UNABLE LEGALLY to use amateur call signs
outside of ham bands?

Confines of being UNABLE LEGALLY to use MARS callsigns IN
ham bands?

> I had already acknowledged that there are military personnel
>assigned to certain MARS stations.

MARS is MILITARY. [that's what the "M" refers to in the acronym]

> However those "net control stations" will have a hard time
>"controlling" ANYthing if there was no one there to control.

If you say so, Man from MARS. :-)

However, it's very easy for a thousand or so MILITARY MARS
personnel to communicate with OTHER military MARS stations,
including inter-service-branch communications.

MARS military stations have the equipment, have the personnel,
have the authorization.

> No Amateur Radio = No MARS.
>
> It really is THAT simple.

You have it really SO WRONG. :-)

No Department of Defense authorization for MARS means NO MARS.

MARS operates OUTSIDE of civil amateur radio bands.

MARS is NOT amateur radio.

...and that's the way it is.

>
>Then why are you trying to tell us that " "Real ham' = One who abides by
>1930s standards and practices"?

I'm not telling you that. All those who trumpet the 1930s standards
and practices do. :-)

You still want to maintain the ancient rules...because you got your
title, rank, status under that archaic standard.

Losing that title, rank, status, even if only to yourself, would be a
mighty blow to your self-esteem. [that's rather obvious]

>> The FCC regulations don't define "ham" at all. The FDA does.

Ham is the butchered meat of swine. :-)

>You've told us on numerous occasions all you want to do here.

I'm doing that. :-)

>You never seem to get around to doing what you've stated.

Less here where it doesn't count for much in the real world.

LOTS more at the FCC where it DOES count.

>Now you'd like to tell me all I want to do.

Nobody can tell Big Dave what to do...he da man! :-)

>I've not stated all I want to do here so your
>comments are conjecture on your part.

All you seem to do in here is bitch, moan, get nasty at folks who
don't agree with you. Not a likeable guy you are. :-)

>Take your pick, Leonard:
>classical telegraphy, classical SSB, classical AM phone. You aren't
>doing any of them in amateur radio. You aren't a participant.

None of THIS newsgrouping IS amateur radio, Big Dave.

The FCC is NOT a "participant" in U.S. amateur radio.

The FCC MAKES the rules and regulations for U.S. amateur radio.

You seem to have a terrible incognizance problem with those two
sentences! [mental Pampers would help you]

>1. I wrote "amateur radio". You're drifting off into a description of
>your past professional radio experience once again.

Boils you down to very pale meat, doesn't it? :-)

>2. I don't really care where on which frequencies you communicated as a
>professional.

You just don't "care" about anything but attempting to triumph over
others in a newsgroup! :-)

>3. You have no idea which frequencies are used or may be used by the
>U.S. Department of State.

Does State have its own MARS-like organization? :-)

Since when did State enter into this discussion...other than you want
to impress your neighbors about your mighty governmental career?

>> Didn't need a bit of manual telegraphy skills or licensing (as an
>> amateur) to do any of that.
>
>You wouldn't need any to obtain the most basic amateur radio license in
>the U.S. either.

I have no need for any amateur radio license. I'm "not a participant,"
remember? :-)

>> Where is it "written" that I have to demonstrate some "interest in
>> radio" to the Great Heil?
>
>I didn't write anything about "some interest in radio".

Now, now, don't get petulant. This isn't a quibble over semantics
or syntax or spelling.

You've written MUCH about the equate of "having an interest in
radio" with amateur radio. You can't deny that. It's in Google all

nice and archived for those so bruised and battered over losing
verbal battles that they have to quote endlessly from it. :-)

>> You DEMAND amateur radio license acquisition in order to state
>> anything on amateur radio regulations in here.
>
>I've DEMANDed nothing. I continue to point out that you have nothing to
>do with amateur radio as a participant or a regulator.

You DEMAND that ALL who "have an interest in radio" become
radio amateurs, all nicely licensed and mentally very important.

You can't deny that. [but you will vainly, and self-importantly try]

>> You should make public your "authorization" to make such demands.
>
>You should look up the definition of the word "demand".

You should take off that Luftwaffe Oberst costume and return it to
Western Casting. Otto Preminger imitations from "Stalag 17" are
outre' and trite, rather old.

>Wrong-o, Pops. I'm a licensed radio amateur. I have a vested interest
>in any changes in regulations involving amateur radio license testing or
>amateur radio operation.

Your "vest" is in bad need of tailoring. The importance of your self
has resulted in an expansion of your mental waist beyond limits.

You are LICENSED! Oh, my. Terribly important you are!

>> Without that "authorization" you are just another SS-wannabe who
>> wants nothing more than to fight anyone who doesn't agree with
>> your "orders" posted on this bulletin board. In other words, just
>> another disagreeable gunnery nurse (but without bedpan).
>
>"Fight"? "Orders"? If we were fighting, you'd best pack a lunch and
>rest up beforehand, old timer. I haven't issued any orders.

Sweetums, if this had been a real physical fight, you wouldn't have
been able to write anydamnthing in here. :-)

>I'll have to discuss what with Paul Schleck?

For starters, your "participation" in this newsgroup.

Do you have a "participation license" granted to you to bitch and
whine and moan in here about those who aren't licensed in
amateurism?

>> What you seem to want this newsgroup to become is just another
>> Chat Room where like-minded dittyboppers can commiserate in a
>> mental commisary all about "real hams" (who know and love morse
>> code) and follow the League's orders explicitly, complete with all
>> the jargon and standards and practices of 1930's amateur radio.

>
>You aren't wrapped very tight.

No problem. You are unable to open packages, gift or otherwise.

>No DEMANDs have been made of you, Len.

Irrelevant since you can't order anyone around, despite your mighty
psycho-war effort to bluff and bluster others off your "licensed"
turf. :-)

>You continue to post.

It's your time you are wasting. No problem for me. :-)

>I'll continue to point out your lack of anything to do with amateur radio.

Tsk, tsk, tsk. Still into the "turf" thing, aren't you? :-)

>You've certainly kept mum about your childlike antics exemplified by
>some of your comments to the FCC.

What "childlike" antics, little toddler? :-)

Poor baby. Can't take grown-up debate against opposite-to-yours
opinions, can you?

You have to call them "childlike" as if you were a "grown-up" trying
to spank children? [you must have been talking to Dee?]

You seem to have dysfunctional attributes in your "parenting." :-)

>Wanna discuss those?

Not with SS-wannabes like yourself.

The FCC makes and enforces the civil radio regulations in the United
States. If you have an old bone that you think needs gnawing on,
then go make your Comments to the FCC about regulations.

It probably busts your chops no end that actual civilians, citizens of
this country, can actually hold a discussion-debate with government.
You just can't stand it when others have opinions contrary to yours.
You have to call such folks names, denigrate them, pejorate them,
do all you can to stifle independent thought.

Hiram forbid that anyone should think opposite to your god-like
viewpoints! After all, you are federally LICENSED as an amateur!

You are a PARTICIPANT!

Only YOU RULE! ...nobody else allowed to say anydamnthing. :-)

The colonel just loves it when a dictatorial plan comes together...

Hello, Hans

I've about made my mind up that it isn't going to be the hams that stop this mess.

Of course, there are other users of low band VHF who may raise a stink (especially once it gives them a problem). I am chuckling over one thought, however. Yes, the BPL industry *claims* that they can put bandpass filters on and largely eliminate nearby interference in a given band (such as amateur bands).

I do have on question. Has anyone else in this group worked in an emc lab? Especially an Open Air Test Site? I have. They are going to have to have one pretty wide *clean* band to be able to test for regulatory compliance. A band that will stretch from well below 10 meters up past our 900 MHz band. They cannot test from inside an anechoic chamber; it must be an open air site. I have seen a number of times that the ambient noise levels were too high to allow testing. I can only imagine what happens if BPL gets pumped through the power lines (street power is, perhaps, 200 feet away). Hopefully, everyone understands that every new product utilizing rf (or even digital signals above - I don't remember exactly - something like 10 kHz) has to be tested for unwanted rf radiation if it is to be sold in the United States (oh, and Europe, Canada, etc. etc.) Also, devices in current production also have samples pulled from production lines and tested periodically. Kinda hard if BPL is nearby.

Once the problem is finally figured out by the lawyers, the next problem is who will reimburse the power companies if they then disallow BPL (word to the wise: hang on tight to your wallet - us taxpayers to the rescue, once again LOL).

As for technical acumen, the current state of affairs is such that even if you really don't even know the difference between positive and negative, you may well pass the exams for an amateur radio license.

Just my ramblings - but, still, hang on to your wallet.

73 from Rochester, NY

There is no psk practical exam. The ONLY PRACTICAL exam we have in ham
radio is the CW TEST. Most of the rest is mainly BS memorization, that for
the most part is not even relevant to real world ham radio.

Just a minute here Hans. Several of the Alabama hams, including myself, have sent letters off to our various state and federal congressmen and women, also to the public utilities that may be involved.

Our replies from these people have been quite complimentary and indicate we are taken seriously.

I think you are dead wrong on this one Hans.

I hope you are right here Mike. And I think you are. It only took Alabama power 5 years to clean up my 30 some sources of noise in my immediate neighborhood. This is going to get interesting when I trash their BPL signals.

It seems to me that Lennie's UNaccomplishments in "radio" far
exceed anything he MAY have accomplished.

And his "word" as to what he says he's going to do is useless.

> > Oh? Did you miss something in the past six years of messaging

>
> 2. I don't really care where on which frequencies you communicated as a
> professional.

Lennie may be allowed to "communicate" on any number of of
DISCREET channels at any one time, and then only as the parameters of
the contract he may be presently working on allow.

He has never been allowed, and at present will not be allowed, to
select the frequency, the mode, or the parameters under which he
"operates".

> > You DEMAND amateur radio license acquisition in order to state
> > anything on amateur radio regulations in here.

>
> You should look up the definition of the word "demand".

Common sense would dictate that anyone "commenting" on how others
"do" something actually have some EXPERIENCE in what they are
commenting about.

It goes without saying that Lennie has absolutely NO experience
in Amateur Radio practice. He can cut-and-paste from various websites
all day long about the THEORY of Amateur practice (noting that I am
NOT addressing "technical" theory")

> > Without that "authorization" you are just another bitchy whining

Ahhhhh yes...As soon as he's backed into yet another corner,
Lennie switches back to making analogies to the Nazis.

How predictable.

> > Until you show your "authorization," you'll have to discuss it with

For me, it is about standards.

> For example, how often have you heard the buzzphrases "it's a hobby"

> of the ARS? Some folks think so!

This is what almost all university students do. It's "cramming". And it kind of works. The "kind of" part is that the knowledge does not make it into long term memory. So while a person can take and pass a test using this method, the knowledge gained goes away right after the test for the most part.

But it isn't the fault of question pools - it is how they are used. I used the pools and on line tests when I went for my tickets. First thing I did was take an on line test. Then with the aid of the pool, reference books and even the web, I looked up the answers to the questions that I missed. I kept taking tests, and kept going back and learning what I missed.

By the time I was finished, I KNEW the answers, and it wasn't from memorization, save the band edge stuff.

I put forth the proposition that it is just as easy to cram with textbooks as it is with question pools. I can read a textbook as easily as I can a question pool. It is all a question of how we use th etools we are given. And no one can control that.

> When you see arguments for "one class of license" ask "with what
> requirements?" - but don't hold your breath waiting for an answer.

I like one class - Amateur Extra.

What is the address for reporting AB8MQ TOS violations

to Earthlink?

What? Is Roger using Earthlink now? I read that Stagger Lee was getting close to finding out yet another of Rogers accounts but I didn't realize he had done so. I bet Little Roger is fuming!
I read that Stagger had somehow tracked Roger and even exposed him but Roger claims that Stagger was lying. Funny. Roger lies about everything and anything so I gotta believe that Stagger did out him big time. Who would you believe?
Poor old Roger should be getting close to running out of local ISP accounts if he has not done so already. No wonder he had to go to Earthlink. Nobody in his area will let him have an account.
Do you think this sociopath will ever learn?
Sicko Roger could probably keep an ISP if he'd learn to act in a decent and civilized manner but the psycho apparently does not know how.
Roger's foul mouth, his cruelty, his libel and his antisocial behaviour have earned him nothing but disdain and even pity. I don't know anybody who pities him...I just tossed that in there. Most everybody simply cannot stand the little bastard and that seems to be the bottom line.
Dave said it when he referred to Roger Wiseman, AB8MQ, as a sociopath.

"Kï¿½HB" <groupk0hb@earthlink.net> writes:

>Is anyone else embarrassed by the 'public sound and fury' antics of
ARRL
>in response to the BPL threat?

I'm not, Hans.

What would you have ARRL do?

So far, there have been QST and website articles on BPL, detailed
comments that included actual observations as well as serious models
and simulations, and W1RFI doing a first-class presentation to amateur
and industry groups. (I got to see it here in Philly). Also suggested
letters and emails, etc.

In addition, ARRL has been banging the drum for well thought out and
well written comments and other feedback.

Most hams don't have the resources to make actual measurements or
simulations of something like BPL. That's one reson we need a strong
national organization like ARRL.

Would you rather they keep quiet? Tell hams not to comment?

What's really embarrassing is that any "professional in
radio-electronics" - in any engineering or regulatory capacity - would
even consider an HF-VHF based BPL-type system.

My apologies, Lennie...I forgot that YOU are the only one allowed
to make typos in RRAP...Forgive me, Your Worminess...

> Tsk, tsk, tsk...without the DoD Directive there would be NO MARS!

The DoD directive >>ENABLES<< MARS.

The civilian, licensed Radio Amateurs make it work.

> You don't seem to understand that.

comprehension problems.

> I can't make it any simpler. MARS IS MILITARY.

MARS is supported and subsidized by the military. If MARS folded
tomorrow, the Armed Forces would manage just fine.

> MARS is NOT amateur.

No Amateur Radio = No MARS.

> MARS doesn't operate ON amateur radio frequencies.

You just noticed that, eh?

> MARS doesn't use amateur radio callsigns.

Whoopie doo, Lennie.

> MARS has its own callsigns.

And I said othrwise WHERE...?!?!

> Amateurs can't use MARS callsigns IN amateur radio.

Sure they can.

> > Those programs are headquartered at the locations you cited.
> >Good job.
>
> What is "good" about doing a simple, one-time search?

Nothing at all in your case, Lennie. I was trying to be civil.

> YOU were unable to do the same simple task in three weeks.

No Amateur Radio = No MARS.

> Confines of being UNABLE LEGALLY to use amateur call signs
> outside of ham bands?

No Amateur Radio = No MARS

> Confines of being UNABLE LEGALLY to use MARS callsigns IN
> ham bands?

No Amatuer Radio = No MARS

> > I had already acknowledged that there are military personnel
> >assigned to certain MARS stations.
>
> MARS is MILITARY. [that's what the "M" refers to in the acronym]

And the "A" is "A"ffiliate...Amateur Radio being the organization
it (MARS) is affiliated with.

No Amateur Radio = No MARS.

> > However those "net control stations" will have a hard time
> >"controlling" ANYthing if there was no one there to control.
>
> If you say so, Man from MARS.

And they'd be talking to...whom...?!?!

Those messages would be getting delivered by...whom..?!?!

> However, it's very easy for a thousand or so MILITARY MARS
> personnel to communicate with OTHER military MARS stations,
> including inter-service-branch communications.

A THOUSAND...?!?!

BBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHA
! ! ! ! ! !

ANDERSCUM, every time I think you've exhausted your last stupid
assertion about Amateur Radio or anything associated with it, you
prove me wrong and add ONE MORE to the till!

> MARS military stations have the equipment, have the personnel,
> have the authorization.

Authorization...Yes...almost every Marine Corps unit I was
attached to had a Navy/MC callsign assigned to it.

In almost every case, I was the ONLY person in the unit who knew
what it was, and that was only because I found out from some personal
interest.

I know of at least four Navy vessels that had MARS callsigns
assigned that had NO operators, and in two of those cases the CEO had
no idea what his MARS call was nor how to go about using it!

Two local Army Reserve units have MARS calls. They are only
active because the local, civilian, licensed Amateurs who happen to be
MARS members have approached the commanders of the units to which they
are assigned and got them "active".

> > No Amateur Radio = No MARS.
> >
> > It really is THAT simple.

The "way it is" is that you ahve once again unzipped your fly and
let us see just how little you really have to show, Lennie!

You make a loud rant "on paper", but what you have shown us is
that beyond the "theoretical" of searchable public documents, you have
absolutely NO IDEA of what you are talking about.

You are the very epitiome of the ABUSE of free speech...A big
mouth with no facts to back it up...

Oh well...Nothing new from you, Putz.

You need to stop now Alun. All you are doing is proving my point over and
over. You are a lid because you operate only phone.

Have a Good day mate.

4212. Amateur Radio Newsline™ Report 1397 – May 21, 2004

Newsgroup: rec.radio.amateur.policy
Date: 2004-05-23 00:55:02 UTC
From: radionews@aol.com
Message-ID: <20040522205502.10186.00001871@mb-m15.aol.com>
Source record: 92276

Amateur Radio Newsline™ Report 1397 – May 21, 2004

Amateur Radio Newsline report number 1397 with a release date of Friday, May 21, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Mr. Haynie goes to Washington D C and Dayton, Ohio comes alive with the sound of ham radio. These stories and more on Amateur Radio Newsline report number 1397 coming your way right now.

(Billboard Cart Here)

**

THE BPL FIGHT: MR. HAYNIE TO MEET WITH WHITE HOUSE TELECOM ADVISORS

This weeks top story starts in Dayton Ohio and ends in Washington D-C. It was at the Dayton Hamvention that ARRL President Jim Haynie, W5JBP, announced that he would be meeting with presidential advisors art the White House Telecommunications Office to discuss the Broadband Over Powerline situation. Amateur Radio Newsline was there when a horse but upbeat W5JBP thanked the ham radio community for making the meeting come about:

--

Haynie: “When we ran the story about my FAX’ing the President of the United States a powerful letter, what you helped me do with your letters and your e-mails was to get me an appointment Thursday morning, 10 a.m. in Washington. So you helped me to do that. (applause).

--

The meeting between President Haynie and those advising Peresident Bush on telecommunicastions matters was scheduled for Thursday, May 20th. We will have a full report on it, next week. (ARNewsline(tm))

**

THE BPL FIGHT: HAM TURNS THE TABLE ON BPL PROPVIDER

Still with BPL news, word that a ham attending an industry sponsored demonstration of the technology in Australia came prepared to do battle. From Brisbane, Q-News reports:

--

A presentation was given by Piero Peroni, who is the Business Manager for the BPL trial within Aurora Energy and Adrian Wild who is the Corporate Affairs

Manager within Aurora Energy.

Martin, VK7GN gave an audible demonstration of the interference on his portable HF receiver and I think it would be fair to say by all accounts the Corporate Affairs Manager was quietly horrified at the noise!

--

Whether or not the ham radio counter demonstration to Aurora Energy will slow down or stop the rollout of BPL down-under is, at this time unknown. (Q-News)

**

DAYTON HAMVENTION NEWS: A BIG SUCCESS

Back here in the U-S-A, Jim Haynie’s White House meeting announcement was just another layer of frosting on the very sweet ham radio cake known as the Dayton Hamvention. By all accounts, Hamvention 2004 was as good as any of those in the past and maybe better than some. Amateur Radio Newsline’s Mark Abramovich, NT3V, takes us on an audio tour of this years show:

--
The big buzz at Dayton was the introduction of two new, top-of-the-line HF radios.

Yaesu introduced thousands of visitors to its booth here to the FT DX 9000 - a radio the company has been developing four years. Here's Chip Margelli K7JA of Yaesu - Vertex Standard.

Over at the competition, Icom introduced showgoers to its sleek, new IC7800. It's already been out for more than a month and Icom representatives concede they underestimated the market demand for this high-end radio.

Here's Ron Rotino, W9WL, represting Icom.

In other Dayton news, Alinco announced a new distributor relationship. Evelyn Garrison WS7A tells Amateur Radio Newsline about the new partnership.

Now Amateur Radio Newsline Editor Bill Pasternak WA6ITF also took in the show besides running his annual Town Hall forum. Bill couldn't help himself when he stopped a the U.S. Towers booth where two lovely sales, eh, models were posing for pictures. Here's the exchange between our own California guy and some young ladies who came to the Dayton Hamvention for the first time..

Behind any Dayton Hamvention is the general chairman. This year Gary De Combes N8EMO took on that enormous responsibility. At the close of the show, he summed it all up for Amateur Radio Newsline.
And how did one of the big radio manufacturers we didn't mention yet think things went. Kenwood's Leo Famie was pleased with this year's event…

And, of course, Chip Margelli, summed up what Yaesu Vertex Standard thought.

Finally, there were lots of new friends and acquaintances made during the Dayton Hamvention 2004. And, despite the rain, spirits of those scouring the flea market for goodies weren't dampened.

It was one for the record books, too, in terms of participation.

Hope to see you here, next year.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, from the convention floor at the Hara Arena - home of the Dayton Hamvention.

--

As of the time this report is being prepared the Hamvention Committee has not announced a final attendance figure, but several vendors told Amateur Radio Newsline that their sales were way up over the past few years. And thats good news for both the United States economic recovery as well as for Amateur Radio. (ARNewsline(tm))

**

DAYTON HAMVENTION NEWS: N8EMO AND WX8F ASKED TO RUN HAMVENTION 2005

In a related development, on Monday night, May 17th the Dayton Amateur Radio Association’s Planning Council unanimously recommended the clubs Board of Directors reappoint Gary De Combes, N8EMO and Jim Nies, WX8F as General Chairman and Assistant General Chairman respectively, for Hamvention 2005. The two were affirmed to lead the 2005 show on Tuesday night the 18th. That's only two days after the close of this years show. Normally , no action is taken to fill these positions until the June Board of Directors meeting.

More on the 2004 Dayton Hamvention in future Amateur Radio Newsline reports. (ARNewsline(tm))

RESCUE RADIO: HAMS TAKE PART IN SIMULATED AIRPORT DISASTER

Over a hundred ham radio operators from seven counties in two Eastern states, provided emergency communications support for the Saturday, May 8th disaster drill at Dulles International Airport. The exercise consisted of a simulated plane crash and fire. The aim of the session was to provide treatment and transport of 200 volunteer "victims" to area hospitals by helicopter, ambulance and bus. Bill Pasternak, WA6ITF, picks up the story from here:

--

Larry Hughs, K3HE, is the Public Information Officer for for the ARRL’s Virginia Section. He tells Newsline that the job of Amateur Radio was to provide communications between agencies at the simulated crash site, those providing patient transportation, and the participating hospitals. To

accomplish this, hams from a number of the regions Amateur Radio Emergency Service groups set up several portable repeaters in and around the airport grounds. They also provided a live Amateur Television link between the site and the airport Operations Center. This allowed airport management to monitor the progress of the drill.

Hams also accompanied some of the officials at the simulated crash site to provide instant communications to other temporary operational areas. Others rode the buses that transported ambulatory victims to local hospitals. This gave planners voice communications and real-time position data via Automatic Position Reporting System. Meantime, other radio amateurs were stationed at ten area hospitals. They helped to coordinate the arrival and departure of those simulating the victims of the crash.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, reporting.

--

Dulles International Airport is in Northern Virginia, near Washington, DC.. Its also not that far from where Al Quida terrorists crashed a jumbo jet into the Pentagon building on September 11th of 2001. Back then ham radio was among the first of the “First Responders” on scene and is credited in helping to save numerous lives. (K3HE, ARNewsline(tm))

**

RESCUE RADIO: SUIT BLAMES MOTOROLA HT’S IN 911 DEATHS

The families of twelve firefighters killed when the World Trade Center in New York City collapsed on 9-11 have sued the manufacturer of the hand held radios the men were carrying. According to Popular Communications magazine, the five billion dollar action against Motorola and the City of New York claims that Motorola failed to warn the Fire Department that its hand-helds could not transmit or receive in a high rise building. Because of this, the plaintiffs contend that firefighters could not hear an order to evacuate. (Popular Communications)

**

ENFORCEMENT: NC HAM MAY FACE LICENSE RENEWAL HEARING

A North Carolina ham who allegedly interfered with repeater operation in that area may not get his license renewed. This, as FCC chief rules enforcer Riley Hollingsworth writes to Daniel Barrett, KE4NOK of Kings Mountain to tell him that his application to renew his ticket has been referred to the enforcement arm of the agency by the Wireless Telecommunications Bureau.

According to Hollingsworth’s letter, the action was based on information coming to the Commission's attention that Barrett is alleged to have used his station to interfere with various repeater operations on 145.350, 145.450 and 147.120 MHz and that he ignored requests of repeater control operators to refrain from using their repeaters. Hollingsworth’s note also says that Barrett ignored the Commission Warning letter dated December 24th of 2003 regarding use of and interference to the repeaters and that apparently

Barrett’s use of, and interference to, these repeaters continues.

Hollingsworth’s letter tells Barrett that his renewal application will not be routinely granted. Rather, that the Commission may need additional information from KE4NOK in order to determine his qualifications to remain a Commission license. The letter also tells Barrett that it may be necessary to designate his application for an evidentiary hearing before an Administrative Law Judge. In such a proceeding Barrett would be required to appear at a hearing in Washington, DC. (FCC)

**

ENFORCEMENT: UNLICENSED BROADCASTER CHALLENGES FCC’s AUTHORITY

An unlicensed radio station taken off the air by the FCC last fall has challenged the regulatory agency in federal court. Attorney Mark Vermeulen, representing San Francisco Liberation Radio, says that the seizure of the station's equipment in an October 2003 raid came without proper notice and violated Constitutional protections of due process and the First Amendment.

In an appearance before U.S. District Judge Susan Illston, Vermeulen argued that -- quote -- "It's a bedrock principle that parties have a right to pre-seizure notice and a right to be heard.

But government attorney Sarah Winslow disagreed with Vermeulen's free speech arguments. She told Judge Illston that there is no First Amendment right to broadcast without a license from the FCC.

The FCC had monitored San Francisco Liberation Radio for years. They eventually tracked the station to a laundry room basement in the San Francisco home of James and Charlotte Hatch. The Hatches never made a secret of their operations. They also claim that they had unsuccessfully sought an FCC license to operate legally. (Published reports)

**

FOR THE BIRDS: FCC RETAINS BIOLOGICAL CONSULTANT

Remember all those stories about thousands of migratory birds getting killed by running into radio towers? Well the FCC has now retained the services of Avatar Environmental Services of West Chester, Pennsylvania as a biological consultant. This, to assist in fulfilling the FCC's role under the National Environmental Policy Act and other federal environmental statutes.

The CGC Communicator reports that Avatar will give the Commission access to the services of experts with training and experience in evaluating the impact of construction projects on animal and plant species.

According to CGC, Avatar has performed similar services for other agencies. The possible impact of communications towers on migratory birds is one of the immediate pressing issues. (CGC)

**

RADIO CELEBRATIONS: W6RO AT AGE 25

A big celebration out West in the world of Amateur Radio. This as the Queen Mary Ocean liner ham radio station W6RO turned 25 on April 29th.

W6RO is actually the club call sign of the Associated Radio Amateurs of Long Beach, California. Long Beach is where the retired ocean voyager is permanently birthed and open to the public as a tourist attraction. The club operates the W6RO station which is located in the Wireless Room adjoining the ships historic radio museum.

In its two and a half decades of operation, visiting hams from around the world have called C-Q and made numerous contacts using its gear, and its well known call sign phonetics of W-6-Rolling Ocean. (W6RO)

**

HAM RADIO BOOKS: NEW VHF PROPAGATION BOOK FROM CQ

CQ Communications has announced the publication of a new resource book for hams active on VHF and UHF bands. Its a book for those who want to learn more about long-distance propagation possibilities available to them.

Titled "VHF Propagation - A Practical Guide for Radio Amateurs" the book examine each of the most common long-distance propagation "modes" found on these bands. Topics covered include tropospheric scatter and ducting, Sporadic-E, Aurora, 6-meters and the F-layer, transequatorial and more. The book then explains how each mode occurs and offer tips on making the most of these band openings.

"VHF Propagation - A Practical Guide for Radio Amateurs" was written by Ken Neubeck, WB2AMU, and Gordon West, WB6NOA. It is available from many ham radio dealers or direct from CQ anytime through the CQ online bookstore. To find it take your web browser to www.cq-amateur-radio.com and then click on “Visit the CQ Store." (CQ)

**

THE SOCIAL CIRCUIT: ROCHESTER HAMFEST IN JUNE

With the 2004 Dayton Hamvention now a part of history, we turn to the ham radio social circuit for the rest of 2004. Next up is the giant Rochester Hamfest the weekend of June 4th through the 6th. As usual, it takes place at the Monroe County Fairgrounds and is combined with the ARRL Atlantic Division Convention.

Chairman Harold Smith, K2HC, tells Newsline that this years outing features over 100 inside exhibitors, 1200 flea market spaces and that very much coveted on site free parking. He also says that area hotels can be found for $69 a nmight or less.

Interested in finding out more? You can do it right on-line at www.rochesterhamfest.org or by calling the hamfest office at 584-424-7184 during business hours Eastern Daylight Time. (Rochester Hamfest)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO HONORS: HAM HONORED FOR SERVICE IN IRAQ

The United States Department of Commerce has honored Fredrick Matos, W3ICM, of Annapolis, Maryland. This by presenting him with its Gold Medal Award for Distinguished Achievement.

The ARRL Letter says that Matos is an employee of the National Telecommunications and Information Administration. He was given the honor for his work to help establish telecommunications in Iraq, where he was deployed for nine months.

While in Iraq, Matos who also holds the Iraqi call YI3DX helped establish a central telecommunications authority along with assigning frequencies to local law enforcement groups. He was also responsible for issuing YI Amateur Radio licenses to both nationals and visitors.

In presenting the award April 13, Commerce Secretary Donald L. Evans welcomed Matos home and thanked him for his role in "expanding freedom around the world." (ARRL, Daily DX)

**

EMERGING TECHNOLOGY: BEWARE OF FOREIGN PET CHIPS

Heres a communications story of a different sort, but one that affects anyone with a four legged friend around the house. The United States Humane Society and other animal care organizations are cautioning pet owners that the nation's animal shelters may not have the proper scanning devices to detect and read some foreign manufactured pet identification microchip.

The warning comes as a European company has entered the microchip market and is selling its microchips in approximately 440 veterinary clinics housed in one of the nation's largest pet product retailers. But the company has not yet provided many of the nation's shelters, humane societies and veterinary hospitals with compatible scanners needed to read all the microchips currently in pets. As a result, the animal protection groups recommend that pet owners thinking about getting their pets micro-chipped contact both the chip manufacturer and their local shelter. This, to make certain that compatible 125 kHz scanners are present in their community. (Science OnLine)

**

WORLDBEAT - INDIA: FREE FOR ALL

On the international scene, Amateur Radio training classes have just started at the National Institute of Amateur Radio in India and there is a very pleasant twist. According to Administration Manager Jose Jacob, VU2JOS, the course is

available free of charge to anyone in that nation who is age 12 or older. (Q-News)

**

WORLDBEAT - UK: NEW BARTG AWARDS MANAGER NAMED

Over in the U-K the British Amateur Radio Teledata Group has a new Awards Manager. This, as the group announces that Phil Cooper, GU0SUP, has taken over from Nigel Roberets, G4KZZ, in that post. Cooper will handle all awards, including the well-known Quarter-Century Award. For more information e-mail awards@bartg.demon.co.uk (RSGB)

**

WORLDBEAT - SPAIN: A WEDDING OPERATION

Spanish special event station A00FL will be on the air between the 21st and 30th of May. This, to celebrate the wedding of Prince Felipe and Doña Letizia Ortiz. If you work this one, QSL as directed on the air. (Q-News)

**

ON THE AIR OPERATIONS: THE MORRIS CANAL SPECIAL

Closer to home, July 10th and 11th are the dates when New Jersey’s Nutley Amateur Radio Society activates station W2GLQ. This, for the first ever Historic Morris Canal Special Event.

Stations will operate from various locations along the 109 miles route of he canal from 1300 to 2200 U-T-C. Operations will continue thru 2005.

More information is on the Nutley Amateur Radio Society website. Its in cyberspace at at www.hometown.aol.com/kc2aup (Press release)

**

DX

In D-X, kook for K9OT and KB9LIE to be active portable F P from Miquelon from the evening of July 2nd until noon local July 11th. This is a 100 watt operation on 160 through 6 meters from the
ham radio friendly Maxotel Hotel. They will also have a 6 meter breakable beacon on 50.120 Mhz. Emphasis will be on 6, 12 and 17 meters SSB for Peg and 160 through 30 meters CW for Paul. QSL via K9OT direct with SASE or bureau. Sorry, no electronic Q-S-L are available for this one. (Various DX sources)

**

THAT FINAL ITEM: UP - UP - AND AWAY

And finally this week, we go back to the Dayton Hamvention where Amateur Radio Newsline ran into one of the nations best known experts in Amateur Radio balloon launches. And does Bill Brown, WB8ELK have a story about recruiting new young hams using high altitude ham radio carrying balloons. Amateur Radio Newsline’s David Black, KB4KCH, has the details:

--

Bill Brown's class is all about going up up and away--and getting college credit at the same time. Brown teaches a course on building balloon payloads at the University of Alabama in Huntsville--and he makes amateur radio a big part of the curriculum.

--

Audio only: Hear it at www.arnewsline.org

--

The ham bands get used not just by the students--but by what goes up. Amateur radio experiments are aboard the payloads students assemble.

--

Audio only: Hear it at www.arnewsline.org

--

Brown's class is also creating a positive effect on amateur radio—by helping bring new people into the service:

--

Audio only: Hear it at www.arnewsline.org

--

About five students become licensed each semester. From the South - East bureau in Birmingham Alabama, I'm David Black , KB4KCH, for the Amateur Radio Newsline.

--

Again that website for more information on this very interesting project is www.WB8ELK.com (ARNewsline)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That’s in cyberspace at www.arnewsline.org. The cutoff for nominations this year is midnight on Tuesday, June 31st.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Don Wilbanks, AE5DW, saying 73 and we thank you for listening."

This weeks newscast was recorded in part at the 2004 Dayton Hamvention and at our studios in New Orleans, Louisiana. Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

> >1930s standards and practices"?
>
> I'm not telling you that.

Excuse me. Yes, you personally told us that.

> All those who trumpet the 1930s standards
> and practices do. :-)

No, nobody here except you has written that. Now you've backtracked and
have told us that it is something different. The several of you
inhabiting the body of Leonard Anderson need to come to an agreement.

> You still want to maintain the ancient rules...because you got your
> title, rank, status under that archaic standard.

Y'know Len? I got my four different classes of license under several
different standards. When you've obtained a license under any standard,
perhaps you'll be able to engage in a rational discussion of amateur
radio licensing.

> Losing that title, rank, status, even if only to yourself, would be a
> mighty blow to your self-esteem. [that's rather obvious]

It might appear that way to an outsider like you. From my perspective, you're a guy who doesn't want to participate in an endeavor where anyone has more status than you. Tough it out, old timer.

> >> The FCC regulations don't define "ham" at all. The FDA does.
>
> Ham is the butchered meat of swine. :-)

That conflicts with what you wrote in the very recent past.

> >You've told us on numerous occasions all you want to do here.
>
> I'm doing that. :-)

Actually, you aren't.

> >You never seem to get around to doing what you've stated.
>
> Less here where it doesn't count for much in the real world.
>
> LOTS more at the FCC where it DOES count.

Okay, Mr. Mitty. I'm sure folks at the FCC find your sheer volume of material fascinating.

> >Now you'd like to tell me all I want to do.
>
> Nobody can tell Big Dave what to do...he da man! :-)

I respect authority, Len. You aren't authority.

> >I've not stated all I want to do here so your
> >comments are conjecture on your part.
>
> All you seem to do in here is bitch, moan, get nasty at folks who
> don't agree with you.

Are the several of you inhabiting the body of Leonard Anderson having a group discussion among yourselves?

> Not a likeable guy you are. :-)

...not by you or "William". I can certainly live with that.

> >Take your pick, Leonard:
> >classical telegraphy, classical SSB, classical AM phone. You aren't
> >doing any of them in amateur radio. You aren't a participant.
>
> None of THIS newsgrouping IS amateur radio, Big Dave.

That's right. If this was amateur radio, you wouldn't be a participant.

> The FCC is NOT a "participant" in U.S. amateur radio.

Yes, the Commission participates. You don't participate.

> The FCC MAKES the rules and regulations for U.S. amateur radio.

> You seem to have a terrible incognizance problem with those two
> sentences! [mental Pampers would help you]

Your perception is incorrect. I understand that the Commission
participates in that it regulates amateur radio.

> >1. I wrote "amateur radio". You're drifting off into a description of
> >your past professional radio experience once again.
>
> Boils you down to very pale meat, doesn't it? :-)

Actually, no.

> >2. I don't really care where on which frequencies you communicated as a
> >professional.
>
> You just don't "care" about anything but attempting to triumph over
> others in a newsgroup! :-)

I wrote what I meant to convey, that I don't care on which frequencies
you communicated as a professional.

> >3. You have no idea which frequencies are used or may be used by the
> >U.S. Department of State.
>
> Does State have its own MARS-like organization? :-)

Do a web search.

> Since when did State enter into this discussion...

Since you brought it up.

> other than you want
> to impress your neighbors about your mighty governmental career?

My neighbors don't read this newsgroup.

> >> Didn't need a bit of manual telegraphy skills or licensing (as an
> >> amateur) to do any of that.
> >
> >You wouldn't need any to obtain the most basic amateur radio license in
> >the U.S. either.
>
> I have no need for any amateur radio license. I'm "not a participant,"
> remember? :-)

Having a need or desire and actually doing something about obtaining a
license are two very different things.

> >> Where is it "written" that I have to demonstrate some "interest in
> >> radio" to the Great Heil?
> >
> >I didn't write anything about "some interest in radio".
>
> Now, now, don't get petulant. This isn't a quibble over semantics

> or syntax or spelling.

That's right. It isn't a quibble over semantics. I wrote "amateur
radio" no matter how badly you want it to be "radio".

> You've written MUCH about the equate of "having an interest in
> radio" with amateur radio. You can't deny that.

I certainly can deny it. I've written nothing about "interest in
radio". I've written of "interest in amateur radio".

> It's in Google all
> nice and archived for those so bruised and battered over losing
> verbal battles that they have to quote endlessly from it. :-)

Good. You can research it and prove your claim then.

> >> You DEMAND amateur radio license acquisition in order to state
> >> anything on amateur radio regulations in here.
> >
> >I've DEMANDed nothing. I continue to point out that you have nothing to
> >do with amateur radio as a participant or a regulator.
>
> You DEMAND that ALL who "have an interest in radio" become
> radio amateurs, all nicely licensed and mentally very important.

I've DEMANDed nothing.

> You can't deny that. [but you will vainly, and self-importantly try]

Denying it is quite easy. I've made no demands of you. You rise or fall
on your own efforts. I've pointed out that you have not obtained even
the most basic amateur radio license.

> You are LICENSED! Oh, my. Terribly important you are!
>
> >> Without that "authorization" you are just another SS-wannabe who
> >> wants nothing more than to fight anyone who doesn't agree with
> >> your "orders" posted on this bulletin board. In other words, just
> >> another disagreeable gunnery nurse (but without bedpan).
> >
> >"Fight"? "Orders"? If we were fighting, you'd best pack a lunch and
> >rest up beforehand, old timer. I haven't issued any orders.
>
> Sweetums, if this had been a real physical fight, you wouldn't have
> been able to write anydamnthing in here. :-)

You mean for all the laughing I'd be doing, old timer? You're probably
right.

> >I'll have to discuss what with Paul Schleck?
>
> For starters, your "participation" in this newsgroup.

If I have need of Paul Schleck. I'll get in touch with him. As of
right now, I don't need him.

> Do you have a "participation license" granted to you to bitch and
> whine and moan in here about those who aren't licensed in
> amateurism?

As you pointed out earlier, this isn't amateur radio. I need no more
license to target you than you need for taking potshots at radio
amateurs and their traditions, Mr. Professional.

> >No DEMANDs have been made of you, Len.
>
> Irrelevant since you can't order anyone around, despite your mighty
> psycho-war effort to bluff and bluster others off your "licensed"
> turf. :-)

It can't be irrelevant. You brought it up. You accused me of making
DEMANDS but you haven't come up with a single example. What demand has
been made of you?

> >You continue to post.
>
> It's your time you are wasting. No problem for me. :-)

Let's see....This is an amateur radio newsgroup dealing with amateur
radio policy. I am a radio amateur. It seems to make sense for me to
be here.
You aren't a radio amateur. You, on the other hand, aren't involved in
amateur radio. Which one of us is wasting time?

> >I'll continue to point out your lack of anything to do with amateur radio.
>
> Tsk, tsk, tsk. Still into the "turf" thing, aren't you? :-)

The turf is amateur radio. You aren't in on the action. You're a
bystander.

> >You've certainly kept mum about your childlike antics exemplified by
> >some of your comments to the FCC.
>
> What "childlike" antics, little toddler? :-)

Those on the Commission's web site; the ones deriding the comments of
others.

> Poor baby. Can't take grown-up debate against opposite-to-yours
> opinions, can you?

You haven't exhibited any "grown-up debate" here, ever. I'll find out
if I can take it when and if you ever do so.

> You have to call them "childlike" as if you were a "grown-up" trying
> to spank children? [you must have been talking to Dee?]

I call them childlike because I read them.

> You seem to have dysfunctional attributes in your "parenting." :-)

I'm not your parent.

> >Wanna discuss those?
>
> Not with SS-wannabes like yourself.

Is the sentence above your idea of grownup behavior?

> The FCC makes and enforces the civil radio regulations in the United
> States. If you have an old bone that you think needs gnawing on,
> then go make your Comments to the FCC about regulations.

Quit making DEMANDS, Len.

> It probably busts your chops no end that actual civilians, citizens of
> this country, can actually hold a discussion-debate with government.
> You just can't stand it when others have opinions contrary to yours.
> You have to call such folks names, denigrate them, pejorate them,
> do all you can to stifle independent thought.

Most radio amateurs are civilians. We can and do comment to and
petition our government. I've never had the opportunity to debate with
government.
You might tell us how you accomplished such debate.

Your thought is certainly independent. Independent doesn't mean that it
is rational thought.

> Hiram forbid that anyone should think opposite to your god-like
> viewpoints! After all, you are federally LICENSED as an amateur!

Right. I'm involved in amateur radio. You are on the sidelines and
have been for what is it?--several decades.

> You are a PARTICIPANT!

Yes, I am.

> Only YOU RULE! ...nobody else allowed to say anydamnthing. :-)

The FCC rules. I participate. You say much but you aren't involved.

> The colonel just loves it when a dictatorial plan comes together...

The colonel is dead. KFC is owned by a big corporation.

I'm not embarrassed by the League's actions in the least. It would serve us well if each radio amateur were to draft letters to his congressman and senators. These folks do pay attention to their constituents. This type of letter writing campaign is what put the heat on Michael Powell over the proposed radio-TV station ownership changes. Those in the Congress don't understand BPL but they understand all about votes.

Yo spud, Amateur Radio Operators don't handle MARS traffic.

However, the Marines did have trouble getting authorized to activate
Navy MARS. So I requested that we activate an AF MARS station to
provide MWR traffic for the Marines. In the space of two dits, the
Navy authorized MARS use. An AF MARS authorization is written into
each TALCE deployment.

Best of Luck.

Wow! No wonder you got put out.

Directives "enable" something or some action.

Unable to adapt to military service and unable to adapt to civilian life.

Where does that leave you?

>>
>> I'm not telling you that.
>
>Excuse me. Yes, you personally told us that.

Anyone who espouses the 1930s standards and practices, such as requiring manual telegraphy skills in order to be licensed in amateur radio, says that. It doesn't have to be overtly stated (this is not a court of law and you are NO judge...).

>> All those who trumpet the 1930s standards
>> and practices do. :-)
>
>No, nobody here except you has written that.

Like I said, this is NOT a court of law and you are NO judge.

>Now you've backtracked and
>have told us that it is something different.

No. Nothing different. I've said that all along. You haven't been
paying attention. :-)

>The several of you
>inhabiting the body of Leonard Anderson need to come to an agreement.

NO "agreement" needed with a single body, single personality.

I suggest that YOUR multiple personalities can't reach any
agreement on what this one person wrote.

Call a meeting and discuss that among YOUR personalities.

>> You still want to maintain the ancient rules...because you got your
>> title, rank, status under that archaic standard.
>
>Y'know Len? I got my four different classes of license under several
>different standards.

Wonderful. Keep on doing that until you get it right. :-)

>When you've obtained a license under any standard,
>perhaps you'll be able to engage in a rational discussion of amateur
>radio licensing.

I already have several licenses.

Your "rationality" is on short ration.

YOU define "rational" as strict and utter obediance to a SINGLE
set of standards AND take the arrogant, UNofficial role of being a
judge (plus jury and executioner) of who can say what and to whom.

That is NOT "rational," herr robust. That is DICTATORIAL.

>> Losing that title, rank, status, even if only to yourself, would be a
>> mighty blow to your self-esteem. [that's rather obvious]
>
>It might appear that way to an outsider like you.

:-) An "outsider" is it? [of course, no official license, absolute
inability to say anydamnthing according to Herr Heil]

>From my perspective,
>you're a guy who doesn't want to participate in an endeavor where anyone
>has more status than you.

Ol' Dozer Davie is busy, busy, busy moving soil to make a mountain
out of metaphoric molehill. [your OSHA backup beeper is not working
old timer, get it fixed...at an appropriate service place that knows how
to work on simple circuitry]

Dozer Davie is also busy, busy, busy trying to cover up the subject of
WHEN the manual telegraphy test will be eliminated in U.S. amateur
radio licensing. He wanna keep shifting to denigrating others that
don't think as arrogantly and self-importantly as Him. :-)

>Tough it out, old timer.

I do that constantly. That's how I've survived that long. :-)

By the way, did you return that SS costume to Western Casting?
The rental prices are going up soon.

>> >> The FCC regulations don't define "ham" at all. The FDA does.
>>
>> Ham is the butchered meat of swine. :-)
>
>That conflicts with what you wrote in the very recent past.

No conflict. I've written before (roughly over a year ago) that a W6
already defined "ham" as "the butchered meat of swine" a number
of years ago.

That fits with one dictionary definition.

As far as I know, without bothering to check with the Food and Drug
Administration, the FDA still has rules on ham and can approve it
or disapprove it. Also beef, fish, and poultry. Are you too chicken
to defy the FDA? :-)

>> >You've told us on numerous occasions all you want to do here.
>>
>> I'm doing that. :-)
>
>Actually, you aren't.

Not in this message, true. I'm replying to nothing more than some
idiot's heckling and cat-calling about "cannot say anydamnthing
about amateur radio without a amateur radio license."

Except for its personal amusement value, your constant mention of
needing an amateur radio license in order to discuss matters of
amateur radio policy, is just a time-wasting exercise. :-)

You don't have a single bit of authority to judge who can say what
and to whom in here.

All you have is a big keyboard and wayyyyy too much time on your
hands to satisfy that warped thought-control police mind one of your
personalities has.

>> >You never seem to get around to doing what you've stated.
>>
>> Less here where it doesn't count for much in the real world.
>>
>> LOTS more at the FCC where it DOES count.
>
>Okay, Mr. Mitty. I'm sure folks at the FCC find your sheer volume of
>material fascinating.

How would you know? [did you add Thurber to your schiz ids?]

Oh, yes...you are one of those claiming "insider information" on U.S.
government...because you once got a regular salary for working for
working in one part of it. You claim to KNOW things. Uh huh.

>> >Now you'd like to tell me all I want to do.
>>
>> Nobody can tell Big Dave what to do...he da man! :-)
>
>I respect authority, Len. You aren't authority.

Tsk, tsk, tsk. You only respect Davie Heil.

YOU ARE NOT AUTHORITY.

[can you understand it better if written all-caps?]

Davie, all you've got is a Big Ego and all you have is a Big keyboard
in front of a control-freak personality problem.

>> >I've not stated all I want to do here so your
>> >comments are conjecture on your part.
>>
>> All you seem to do in here is bitch, moan, get nasty at folks who
>> don't agree with you.
>
>Are the several of you inhabiting the body of Leonard Anderson having a
>group discussion among yourselves?

I'm not the schizoid, herr robust.

Your own multiple personalities badly need to seek consensus there.

:-)

>> Not a likeable guy you are. :-)
>
>...not by you or "William". I can certainly live with that.

So, you are unable to live with dissent.

Must be hell to be so royal. Or "heil." :-)

>> >Take your pick, Leonard:
>> >classical telegraphy, classical SSB, classical AM phone. You aren't
>> >doing any of them in amateur radio. You aren't a participant.
>>
>> None of THIS newsgrouping IS amateur radio, Big Dave.
>
>That's right. If this was amateur radio, you wouldn't be a participant.

If this were a "rational discussion," you would have LOST long ago.

>> The FCC is NOT a "participant" in U.S. amateur radio.
>
>Yes, the Commission participates. You don't participate.

The FCC makes regulations and - sometimes - enforces those
regulations.

The FCC does NOT promote amateur radio, nor does it put amateur
radio over and above all other radio services it is required to regulate.

NO staff or commissioner is required to have any "participatory"
amateur radio license in order to exercise regulatory power over
amateur radio.

Ain't that a bitch, though? :-)

Imagine that...THE regulatory power over amateur radio and not a
single FCC person is required to have any amateur radio license!

You precipitate in here, little snowflake, not participate.

You are a crystalized form of ego condensed out of a fog of old-
time ideas, standards, and practices, trying to clump in drifts to
disable independent thought of others.

The weather is too hot for your rigid, arrogant assertion of mandatory
old-time ideas, standards, and practices. Your precipitation only
leaves a wet smudge on the surface of rational discussion.

A paper towel can quickly wipe up your mess.

>> The FCC MAKES the rules and regulations for U.S. amateur radio.
>
>> You seem to have a terrible incognizance problem with those two
>> sentences! [mental Pampers would help you]
>
>Your perception is incorrect. I understand that the Commission
>participates in that it regulates amateur radio.

Tsk, tsk, tsk. There you go with the "participation" thing again.

Hello? Did your ancient dictionary dry up and blow away?

The FCC is somehow a "participator" like the ARRL? :-)

NOT ONE SINGLE FCC STAFFER NEED HAVE ANY AMATEUR
RADIO LICENSE TO *REGULATE* U.S. AMATEUR RADIO.

You are a precipitate. Dried sludge at the bottom of a Petrie dish.

>> >1. I wrote "amateur radio". You're drifting off into a description of
>> >your past professional radio experience once again.
>>
>> Boils you down to very pale meat, doesn't it? :-)
>
>Actually, no.

Actually, YES. :-)

>> >2. I don't really care where on which frequencies you communicated as a
>> >professional.

>>
>> You just don't "care" about anything but attempting to triumph over
>> others in a newsgroup! :-)
>
>I wrote what I meant to convey, that I don't care on which frequencies
>you communicated as a professional.

Poor precipitate.

You "care" only to denigrate all those who disagree with you and
stand up to you, tossing back the same sort of thing (and in greater
quantity) as you try to heap on others.

Doesn't feel good to your noble, royal ego, does it?

>> >3. You have no idea which frequencies are used or may be used by the
>> >U.S. Department of State.
>>
>> Does State have its own MARS-like organization? :-)
>
>Do a web search.

All I find is Heilian spiders squeaking "you can't talk about amateur
radio without an amateur radio license!" :-)

>> Since when did State enter into this discussion...
>
>Since you brought it up.

You never mentioned the U.S. Department of State before?!?!?

>> other than you want
>> to impress your neighbors about your mighty governmental career?
>
>My neighbors don't read this newsgroup.

Then they can't be "rational," can they?

They aren't "participatory?" :-)

>> >> Didn't need a bit of manual telegraphy skills or licensing (as an
>> >> amateur) to do any of that.
>> >
>> >You wouldn't need any to obtain the most basic amateur radio license in
>> >the U.S. either.
>>
>> I have no need for any amateur radio license. I'm "not a participant,"
>> remember? :-)
>
>Having a need or desire and actually doing something about obtaining a
>license are two very different things.

Oh? Now it is a finer Heilian definition of "NEED OR DESIRE?"

Of course, according to the arrogant Heilian definition, one MUST have
an amateur radio license in order to discuss amateur radio!

>> >> Where is it "written" that I have to demonstrate some "interest in
>> >> radio" to the Great Heil?
>> >
>> >I didn't write anything about "some interest in radio".
>>
>> Now, now, don't get petulant. This isn't a quibble over semantics
>> or syntax or spelling.
>
>That's right. It isn't a quibble over semantics. I wrote "amateur
>radio" no matter how badly you want it to be "radio".
>
>> You've written MUCH about the equate of "having an interest in
>> radio" with amateur radio. You can't deny that.
>
>I certainly can deny it. I've written nothing about "interest in
>radio". I've written of "interest in amateur radio".

Quibble, quibble, just so much dribble. :-)

Up near the beginning of your message you said:
"When you've obtained a license under any standard,
perhaps you'll be able to engage in a rational discussion of amateur
radio licensing."

Hello? I've got SEVERAL licenses by SEVERAL STANDARDS.

Had them (plural) before you got a single one. :-)

Want to "quibble" more about what YOU wrote...and all readers have
read?

>> You DEMAND that ALL who "have an interest in radio" become
>> radio amateurs, all nicely licensed and mentally very important.
>
>I've DEMANDed nothing.

Sure you have. Many times. It's getting to be a standard bit of
off-key singing done in falsetto.

>> You can't deny that. [but you will vainly, and self-importantly try]
>
>Denying it is quite easy. I've made no demands of you.

Yes you have. Demands on TIME.

Except for its amusement value, replies to you WASTE TIME.

>You rise or fall on your own efforts.

Yes. I've risen to this occasion more than once, Dozer Davie.

Must really gripe your big, sorry butt that I keep telling things
like they are. :-)

>I've pointed out that you have not obtained even
>the most basic amateur radio license.

There you go again. :-)

Oberst Heil adjusts his monocle and addresses the troops:

"You cannot have a rational discussion about amateur radio
without FIRST getting an amateur radio license!!!"

>As you pointed out earlier, this isn't amateur radio.

No kidding? Ah, but, the Grate Heil said that an amateur radio
license is REQUIRED in order to have a "rational" discussion
about getting an amateur radio license!

That's a "chicken-egg paradox" thing painted different colors and
repackaged. :-)

>I need no more
>license to target you than you need for taking potshots at radio
>amateurs and their traditions, Mr. Professional.

Tsk, tsk, tsk. One of your personalities getting paranoid pot-shots?

Bandage that personality's wounds and continue on...

You need some (unlicensed) ability to take adversity, Mr. Amateur.

You've shown repeatedly that YOU CAN'T TAKE IT. You become
petulant, irritated, sometimes outraged at the slightest negativism
of your arrogant, follow-my-directive authority. Tsk, tsk, tsk.

>It can't be irrelevant. You brought it up. You accused me of making
>DEMANDS but you haven't come up with a single example. What demand has
>been made of you?

Something about "one has to have an amateur radio license in
order to 'rationally' discuss anything about amateur radio." :-)

>Let's see....This is an amateur radio newsgroup dealing with amateur
>radio policy. I am a radio amateur. It seems to make sense for me to
>be here.

In general, it would, but you go FAR beyond that in your arrogant
petulance of constantly trying to heckle, jeer, denigrate all those
who disagree with you.

Social-wise, you are rated a "LID" as a human being on newsgroups.

>You aren't a radio amateur. You, on the other hand, aren't involved in
>amateur radio. Which one of us is wasting time?

According to Heilian Law, obviously the one without OFFICIAL
AMATEUR RADIO LICENSE to do the "rational" ritual. :-)

>> >You've certainly kept mum about your childlike antics exemplified by
>> >some of your comments to the FCC.
>>
>> What "childlike" antics, little toddler? :-)
>
>Those on the Commission's web site; the ones deriding the comments of
>others.

Poor baby. Can't take the heat of the discussions?

Precipitates are like that. Snowflake condensates melt quickly and
turn into hot vapor when exposed to heat. They steam and try to
burn others but quickly cool down and do no more. It's a return to
room temperature. :-)

>> Poor baby. Can't take grown-up debate against opposite-to-yours
>> opinions, can you?
>
>You haven't exhibited any "grown-up debate" here, ever. I'll find out
>if I can take it when and if you ever do so.

Poor baby. Still angry, still trying to get the last word, still trying
to bluff and bluster like you are some kind of "leader." :-)

>> You have to call them "childlike" as if you were a "grown-up" trying
>> to spank children? [you must have been talking to Dee?]
>
>I call them childlike because I read them.

Slowly, with a finger tracing out each letter? :-)

>> You seem to have dysfunctional attributes in your "parenting." :-)
>
>I'm not your parent.

Darwinian Law comes to humanity's rescue! :-)

>> The FCC makes and enforces the civil radio regulations in the United
>> States. If you have an old bone that you think needs gnawing on,
>> then go make your Comments to the FCC about regulations.
>
>Quit making DEMANDS, Len.

A CONDITIONAL phrase begins with "if," senior. That wasn't a demand,
just a conditional statement.

But, if you CAN'T take any controversy, much less negative opinion,
by all means stay away from making any comments in public to the
FCC. Stay in here where you have the fictional equivalent of King of
the Loud Hill, where you can safely send nastygrams to those who
won't agree with you.

>Most radio amateurs are civilians. We can and do comment to and
>petition our government.

Ah, but amateur radio is DIFFERENT according to Heilian Law.

In order to comment to government on amateur radio, Heilian Law
states that commenter MUST have an amateur radio license!

Well, so much for the First Amendment...

>Your thought is certainly independent. Independent doesn't mean that it
>is rational thought.

Neither is your arrogant petulant whining over your perceived "hurts"
in this newsgroup...done for years...

Poor baby.

What, exactly, does that have to do with my question? I'll try again:
How many pieces of MARS traffic did you handle?

> Best of Luck.

I really hate to say it folks, but if someone REALLY wanted to track you via the net, it would be relatively easy to do so (unless one not only uses an anonymous remailer, but does so from an anonymous shell account via remote access from yet another shell account, etc).

I should know this as I *DO* have some professional training in this particular subject.

IMHO, both stagger lee and roger are lying and trying to bluff each other (and the rest of us).

its just easier to slap them in an ignore bozo filter and be done with it! Thats what I suggest y'all do.

just my 2 pennies worth.

While Lennie the Lame is busy attempting to hide his lack of
experience behind piles of obfuscation, Dave has DECADES of it.

> >Tough it out, old timer.
>
> I do that constantly. That's how I've survived that long.

You've "survived" so long at the expense of others work.

> All you have is a big keyboard and wayyyyy too much time on your
> hands to satisfy that warped thought-control police mind one of your
> personalities has.

Actually, the one with way too much time on his hands is you,
Lennie...Perhaps if YOU had an Amateur Radio license and spent some
time on the air you'd have less to waste...?!?!

> >I respect authority, Len. You aren't authority.
>
> Tsk, tsk, tsk. You only respect Davie Heil.
>
> YOU ARE NOT AUTHORITY.

You keep wanting to argue about who's "in authority", Lennie.

No doubt due to YOUR desire to be the one IN authority.

However your lack of maturity (in terms of character, not
chronological years) and experience will keep you from EVER being that
in ANY Amateur Radio forum or event.

> [can you understand it better if written all-caps?]

LEONARD H. ANDERSON IS A FOOL.

Did YOU understand THAT, Lennie...?!?!

> Davie, all you've got is a Big Ego and all you have is a Big keyboard
> in front of a control-freak personality problem.

Pot/Kettle/Black.

You're awash in it, Your Scumminess. Everyone here except you
and Brian see it. Sucks to be you.

> >Are the several of you inhabiting the body of Leonard Anderson having a
> >group discussion among yourselves?
>
> I'm not the schizoid, herr robust.

Sure you are. There's the Lennie who makes claims that he's
going to do things, then there's the Lennie who makes excuses about
why he didn't do them.

Pretty "schizoid" to me, Lennie, and I am far more qualified to
know the difference than you are.

> >Yes, the Commission participates. You don't participate.

> >> radio amateurs, all nicely licensed and mentally very important.
> >
> >I've DEMANDed nothing.
>
> Sure you have. Many times. It's getting to be a standard bit of
> off-key singing done in falsetto.

And you HAVEN'T, Scummy one?

You have "point blank" demanded that I or others "shut up"..."go
away", etc etc etc.

But then stand-up-manship was never your forte.

> >> You can't deny that. [but you will vainly, and self-importantly try]
> >
> >Denying it is quite easy. I've made no demands of you.
>

Then stop replying. So far, you've only proven that all
assertions about YOUR lack of character, honesty and practical
knowledge of the Amateur Radio Service were correct all-along.

> >You rise or fall on your own efforts.
>
> Yes. I've risen to this occasion more than once, Dozer Davie.

Only to have fallen on your own, dull, sword.

> Must really gripe your big, sorry butt that I keep telling things

>
> "You cannot have a rational discussion about amateur radio
> without FIRST getting an amateur radio license!!!"

Only an idiot would argue with the concept of having some sort of
first-person based experience in a topic before trying to comment on
it.

So far, all YOU have been able to offer is what you can glean
from various websites or second hand opinions.

Dave, on the otherhand, has "credentials" in the Amateur Radio
Service that YOU could not hope to duplicate if you and Mrs Scummy hit
the road for the next 10 years in pursuit of nothing else but.

> >As you pointed out earlier, this isn't amateur radio.
>
> No kidding? Ah, but, the Grate Heil said that an amateur radio

> in this newsgroup...done for years...

Dave has not "whined" about 'perceived "hurts"

He HAS accurately pointed out YOUR shortcomings of facts and
practical experience, that lack most often manifesting in your errors
about Amateur Radio programs or practice.

> Poor baby.

Sucks to be you, Lennie.

We'll never know, JJ...Lennie the Lame is the first and only
person I know of to claim that he could participate in MARS without
being a licensed Amateur.

I will preempt Brain and state OTHER than those appointed or
hired to oversee the program by DoD.

This one caveat notwithstanding, I am still awaiting Lennie'e
presentation of his Navy-Marine Corps MARS callsign and credentials of
membership.

Thankfully, I know better than to hold by breath!

The Marines had NO difficulty getting "authorized".

They had trouble getting the schedule arranged for gateways and
getting appropriate equipment to the deployed units. Callsigns and
"authorization" were already in place.

Seems the Marines have a nasty habit of carrying combat equipment
into combat areas as a first priority. MWR gear comes after that.

> Best of Luck.

Back at ya!

With a DD214 that provides a nice income and the words "Honorable"
on it.

The DoD directives do indeed "enable" the MARS program. Do you
disagree? Perhaps it was a DoS directive? DoJ...?!?!

Nope.

> Did YOU understand THAT, Lennie...?!?!

No, your nastygram was over-driven resulting in signal distortion.

You are splattering all over the band, out of control...(again).

>> Davie, all you've got is a Big Ego and all you have is a Big keyboard
>> in front of a control-freak personality problem.
>
> Pot/Kettle/Black.

Out of curiosity, how many keyboards do you go through in a month?

Four? Six? They sure take a beating when you get all fired up in
outrage and hatred...

> You're awash in it, Your Scumminess. Everyone here except you
>and Brian see it. Sucks to be you.

"Awash?" No floods here like in the midwest.

At a ground elevation of about 840 feet MSL there's not much danger
of flooding at this location.

We have a General Electric washer and dryer used on a regular basis.
Front-load washer, five years old. Very efficient. Got rebates for
energy efficiency. Not overworked.

>> >Are the several of you inhabiting the body of Leonard Anderson having a

"Stop replying?" Ooooo...issuing Orders, gunnery nurse?

This is just an amusing morning word workout, gunnery nurse.

Your name isn't "Dave Heil," gunnery nurse.

You don't need to jump in and disrupt a dispute between two
others...but you are OBSESSED with "getting certain folks."

Poor baby. You are frustrated that your tactic DOES NOT WORK!

Tsk, tsk, tsk.

>> >You rise or fall on your own efforts.
>>
>> Yes. I've risen to this occasion more than once, Dozer Davie.
>
> Only to have fallen on your own, dull, sword.

Nope. :-)

Tsk, tsk, tsk, to try for wordsmithing you need to control the
selection of words in your phrases. You should have written:

"Only to fall on your own blade."

Bulldozers have a BLADE. See the connection? "Blade" on a
bulldozer and "blade" on a knife?

Your "knife" is unsharp and you can't handle it properly.

BULL you can do and "bulldozing" you attempt...but you don't know
how to control anything yet.

>> Must really gripe your big, sorry butt that I keep telling things
>> like they are. :-)

tsk, tsk, tsk...[all in lower-case due to pitifulness of reply]

You are OBSESSED with hatred of certain other people. You are
still mentally unbalanced. Get help.

> So far, all YOU have been able to offer is what you can glean
>from various websites or second hand opinions.

Not "glean" but rather reveal, as in regulations and directives of the
latest effective dates.

Gunnery nurse was UNABLE to name or reference a single MARS
directive or regulation in three weeks of give-and-take with Brian
Burke. UNABLE. Despite holding an "amateur extra" license
(suitable for framing), gunnery nurse tried to bluff and bluster through
an argument, NOT ONCE being ABLE to reference a single directive
or regulation concerning MARS. Tsk, tsk, tsk.

Poor gunnery nurse is sick and disgusted that anyone not licensed
in amateur radio EVER worked in other radio on a professional
basis...and for half a century!

> Dave, on the otherhand, has "credentials" in the Amateur Radio
>Service that YOU could not hope to duplicate if you and Mrs Scummy hit
>the road for the next 10 years in pursuit of nothing else but.

Not a problem. A good digital scanner can duplicate all sorts of
"credentials." :-)

Is there a "change in requirements" now?

One has to join the Department of State, spend years in foreign
lands, in order to obtain a U.S. amateur radio license?!?!?!?

I have to commit adultery with some "Mrs. Scummy" to do all that?

Tsk, tsk, tsk...

>> >As you pointed out earlier, this isn't amateur radio.
>>
>> No kidding? Ah, but, the Grate Heil said that an amateur radio
>> license is REQUIRED in order to have a "rational" discussion

And what is your busy, but poorly constructed "reply" but another
obsessive NEED to "get someone" he hates?

YOU are NOT Davie Heil, will never be.

Get some mental therapy and work on your ability to get along
with others. It will help you and those around you.

So far, your identity crisis has resulted only in some mild amusement
for me and a a lot of irritation to other readers in here. That is NOT
good for your image.

Tsk, tsk, tsk...then what is written in an official USN-USMC Communications Instruction is "wrong?" :-)

> I will preempt Brain and state OTHER than those appointed or
>hired to oversee the program by DoD.

What are you trying to state in that sentence?

"Preempt?" You have NO authority, can't "preempt" anything.

> This one caveat notwithstanding, I am still awaiting Lennie'e
>presentation of his Navy-Marine Corps MARS callsign and credentials of
>membership.

"Caveat?" Are you having pretensions of literary expertise as well?

Tsk, tsk, tsk. Read the ENTIRETY of a dictionary some time... :-)

Tsk, tsk, tsk, more obsessive NEED to "get hated others" in here.

The USN-USMC Communications Instruction is a regulation for USN, USMC Military Affiliate Radio System operation. It says what it says and all working in the USN-USMC MARS program are obliged to obey it.

That does NOT mean anyone talking about it or showing what it contains "must be a participant." :-)

> Thankfully, I know better than to hold by breath!

Trying regular breathing sometime, gunnery nurse.

That way your brain could receive the necessary oxygen to function (at least somewhat) close to normalcy.

Get some mental therapy for that obsessive hatred you have. It will
better for all concerned.

A DD-214 only shows Release from Active Duty.

A Discharge from military service is a different form. THAT form would
have the conditions of discharge on it.

Your "credentials" are very confused (still).

> The DoD directives do indeed "enable" the MARS program. Do you
>disagree? Perhaps it was a DoS directive? DoJ...?!?!

The Department of Defense Directive ESTABLISHED the Military
Affiliate Radio System.

Note the words "military" and "affliate."

Department of State does NOT direct any military activity.

Department of Justice does NOT direct any military activity.

Try to understand your government.

Quit holding your breath so much. It deprives your brain of oxygen.

In the grand scheme of things, I think not getting an amateur license,
and getting put out of the US Marine Corps are magnitudes apart.

Your mileage may vary.

They did until the Air Force offered to handle the MWR traffic.

> They had trouble getting the schedule arranged for gateways and
> getting appropriate equipment to the deployed units. Callsigns and
> "authorization" were already in place.

No, they had a local problem allowing it.

> Seems the Marines have a nasty habit of carrying combat equipment
> into combat areas as a first priority. MWR gear comes after that.

One marine had a pallet of amateur radio gear, "enabled" by heavy airlift.

I really hate to say it folks, but if someone REALLY wanted to track you
via the net, it would be relatively easy to do so (unless one not only
uses an anonymous remailer, but does so from an anonymous shell account
via remote access from yet another shell account, etc).

I should know this as I *DO* have some professional training in this
particular subject.

IMHO, both stagger lee and roger are lying and trying to bluff each other
(and the rest of us).

its just easier to slap them in an ignore bozo filter and be done with it!
Thats what I suggest y'all do.

just my 2 pennies worth.

Hi Scott,

Thanks for your suggestion. I have looked at several "ready made" wireless cameras. None of them really cut it for me though. I need a good camera with a very low power consumption. From what I've seen, the only way I'm going to get a decent camera & TX is if I buy them separately. Here's the current draw of my present draft design:

camera = 20mA
tx = 35mA

A 66gram lithium polymer battery back will power this sytem for 16 hours.

Thanks,
Jack

Somebody has to get the Marines to where they're going. If they don't
mind a long ride, they take a boat. If they're needed a bit quicker,
they take a plane. Airplanes typically require a runway, and
Mogadishu had one. What they didn't have was atc and weather. Too
bad the Marines aren't self-propelled. It would save everyone a lot
of trouble.

I think something as absurd as what Steve is trying to defend is worth
rubbing his nose in it again and again.

Do you agree with "Sorry Hans, MARS >>>IS<<< Amateur Radio" ?

> good health, nice home, wonderful wife. I've got U.S. patent
> 3,848,191. You haven't got any. [which may be your problem...]

Don't need a "patent", Lennie.

I'll accept all of your assertions as true, especialloy the ones about
your wife...It would take a woman with a heart of gold (or too broken and
depressed) to tolerate a creep like you.

I guess SOMEONE had to do it, though.

>>> [can you understand it better if written all-caps?]
>>
>> LEONARD H. ANDERSON IS A FOOL.

Yep. YOU continue to prove it.

>> "I am only here to civilly debate the Morse Code test issue"...
>>From the archived lies of Leonard H. Anderson.
>
> The gunnery nurse is here only to attempt personal attacks on
> humans he can't get along with. Poor baby.

First of all, you're not what I consider to be human.

Secondly, you provide me the stuff to work with.

Lastly, it's not an "attack" if it's true.

>>> Hello? I've got SEVERAL licenses by SEVERAL STANDARDS.
>>
>> None of them an Amateur Radio license, and none of them with ANY
>>experience in practical Amateur Radio applications.
>
> Poor deluded gunnery nurse...thinks amateur radios work by different
> laws of physics than any other radio...thinks amateur radios won't
> work without passing a test for manual telegraphy. Tsk, tsk, tsk.

You continue to avoid the fact that "physics" are not the issue.

And I have never suggested that the ONLY test to take was the Morse test.

I have repeatedly encouraged you to take the Amateur Technician since it
doesn't require a Morse Code examination.

However you still seem stymied byt the process. Actually, I think it's
because you might have to actually demonstrate your REAL knowledge base...Your
ego wouldn't allow you to expose yourself to the ridicule of failing the test
in a room full of grade school kids who just passed it.

Poor baby. Sucks to be Lennie.

>> You have "point blank" demanded that I or others "shut up"..."go
>>away", etc etc etc.
>
> I don't shoot blanks, little gunnery nurse.

Obviously you do.

Tell us about those kids you raised that helped you to formulate an
informed opinion on the ability of teenagers (and younger) to be competent
Amateur licensees...?!?!

Oh yeah...I forgot, that's yet another arena in which you slobbered your
ill-prepared vulgarities in.

>> But then stand-up-manship was never your forte.
>
> "Stand-up-manship?" :-)
>
> You mean like the puerile little penwomanship you exhibit all the

> "sucks to be you," etc., etc., etc.

But you ARE a putz, Lennie. It DOES suck to be you, and you are scummy.

So what's the problem?

>> So far, all YOU have been able to offer is what you can glean
>>from various websites or second hand opinions.
>
> Not "glean" but rather reveal, as in regulations and directives of the
> latest effective dates.

And absolutely NO practical experience...Not one second's worth.

> Gunnery nurse was UNABLE to name or reference a single MARS
> directive or regulation in three weeks of give-and-take with Brian
> Burke. UNABLE. Despite holding an "amateur extra" license
> (suitable for framing), gunnery nurse tried to bluff and bluster through
> an argument, NOT ONCE being ABLE to reference a single directive
> or regulation concerning MARS. Tsk, tsk, tsk.

Didn't need to, Lennie.

No Amateur Radio = No MARS.

Just like the slap in the face, it doesn't need to be documented that it
hurts to KNOW it hurts...

> Poor gunnery nurse is sick and disgusted that anyone not licensed
> in amateur radio EVER worked in other radio on a professional
> basis...and for half a century!

I think it's great, Lennie.

I just think you're a scumbag for trying to push your oblivious weight
around in THIS forum over Amateur PRACTICE when you have abasolutely ZERO
experience in it.

The real pitiful part is knowing that you probably were a lot of the
things you claim, only to have it all undone by your now well documented
propensity for lying and antagonism.

Again...Sucks to be you.

> I have to commit adultery with some "Mrs. Scummy" to do all that?

Nope...Just roll over and tap her on the shoulder tonight. Or is that
walk down the hall and tap on the door...?!?!

>> Pot/Kettle/Black...Witness your own frequent "demands" peppered
>>with liberal doses of profanity and lack of facts.
>
> "Liberal doses of 'profanity?'"
>
> Tsk, tsk, tsk...talk about the deep black pot with continued use of
> a Yiddish colloquialism for "asshole" (the word "putz") trying to call
> anyone else nasty...

But you ARE a putz, Lennie.

The very post I am responding to has only served to revalidate that assertion.

> Get some mental therapy and work on your ability to get along
> with others. It will help you and those around you.

I am still waiting for you to enlighten us as to what credentials in "mental health" you have that qualify you to make that suggestion.

> So far, your identity crisis has resulted only in some mild amusement
> for me and a a lot of irritation to other readers in here. That is NOT
> good for your image.

The amusement IS all yours, Lennie. I quite clearly imagine you laughing at a lot of things, not all of them perceptible to those around you.

Laugh on, Lennie. You're the putz the REST of us are laughing at.

Yes, this is true. The covert pack kit is designed that way. the V2CMS
is _only_ a transmitter/receiver pair and does not come with a camera.
This is because there is a huge variety of body plant cameras out there
intended for different applications, and so you want a transmitter that
will work with any of them.

From "work" that is NOT the same as what I was required to do in the US
Marine Corps.

From "work" I was cleared to do AFTER I completed the USMC required
physical rehab after I was retired out.

Those "disabilities" came from service connected injuries. Doing their
"work".

For cheap 900MHz, 1.2GHz and 2.3GHz wireless video cameras, TX's and RX's see the following websites.

http://www.chaners2000.com

http://www.flyonthewall.uk.com/

http://www.pakatak.com

Note that in the UK only 1394MHz and 2.4GHz wireless video cameras are licence exempt.

You could of course use a 1.2GHz or 2.4GHz TX legally at a higher power level if you have an amateur radio licence.

Most of the cheap miniature wireless video cameras use a free-running oscillator so it is relatively easy to retune them to a suitable frequency. I bought a 900MHz camera and could tune it up to about 1.6GHz without too much difficulty.

Range for typical 5mW o/p camera is in the order of 10m with simple antennas. If the camera is body worn you need to improve the RX antenna, or increase the TX power.

For technical discussions about monitoring microwave video see:-

http://groups.yahoo.com/group/MicrowaveTVmonitors

some useful notes can also be found at:-

http://www.geocities.com/radproject.geo/Mvideo.html

AEF can be quicker than any carrier group, especially if the beach is
hundreds or thousands of miles away from the hotspot. Or not.

Need a TALCE to deploy AEF and its logistics tail. Create Air Bridge.
TALCE in First. And get everything there before the Navy could.

> No runways or ATC needed. And no particular interest in the USAF or it's
> MWR department.

Get real. Were you a reservist or something like that? The Navy
slobbered over our BX and "MWR department."

> Just a mission.

Which often involves the Air Force, even if just to expedite MWR
calls.

Ditto 10th Mountain. Didn't see the Navy transporting those folks,
and there was a big beach just inches from the Mog runway.

Hey, ever wonder why the Navy stencils their names over their
dungarees back pocket?

Steve, I realy would have liked to check into the Holiday Inn, Express or not. Slept on top of a pallet for the first few days.

Nothing at all like your "seven hostile actions" which were probably just seven cases of self-abuse.

No wonder you're out.

Yeh, yeh. You claim to work in an ER where lifting of patients and
various other intense stressors are at work. Why wouldn't you be fit
for duty in the USMC?

>> 3,848,191. You haven't got any. [which may be your problem...]
>
> Don't need a "patent", Lennie.

You should get one. You have made the grade of original, but
rather disordered thought, on advancing the state of the known art
on insulting others. :-)

> I'll accept all of your assertions as true, especialloy the ones about
>your wife...It would take a woman with a heart of gold (or too broken and
>depressed) to tolerate a creep like you.

"Gold especialloy?!?" :-) :-) :-)

Sorry, you've called me a "liar" too many times for you to "accept"
anything I've written.

You've insulted my wife way too many times, in public, without knowing
a single thing about her, to "accept" any turnaround in your attitude.

> I guess SOMEONE had to do it, though.

You are really and truly bitter and frustrated, aren't you? You can't
stop your obsessive hatred of certain other people.

You really need some mental therapy.

> First of all, you're not what I consider to be human.

Hoo boy, you are on a hatred roll there. Don't slip in the bitter.

> Secondly, you provide me the stuff to work with.

No. That's your own fevered, angry mind busy fantasizing.

> Lastly, it's not an "attack" if it's true.

It's not true. It IS a personal attack.

You aren't a divinity and cannot define what is "right" or "wrong."

You are unable to relate to civil society.

>> Poor deluded gunnery nurse...thinks amateur radios work by different
>> laws of physics than any other radio...thinks amateur radios won't
>> work without passing a test for manual telegraphy. Tsk, tsk, tsk.
>
> You continue to avoid the fact that "physics" are not the issue.

Then why are you so insistent that I take some kind of amateur test?

I've already passed commercial and industry tests long ago. Made
a good living at that kind of work.

You keep denigrating a career in radio-electronics by others. Why?
Are you THAT resentful of others having success at a chosen field
of endeavor? [that's not a good mental picture, all that resentment]

> And I have never suggested that the ONLY test to take was the Morse
>test.

A manual telegraphy test is NECESSARY for a U.S. amateur radio
license examination having below-30-MHz-privileges. That's LAW.

> I have repeatedly encouraged you to take the Amateur Technician since it
>doesn't require a Morse Code examination.

To adopt nursie's own line of response, "you are LYING SOB*."

You've NEVER "encouraged" anyone, you crock of salacious snit.

You've COMMANDED as if you were some kind of Dill instructor
in the murines. :-)

* SOB = Son Of a Beeper.

> However you still seem stymied byt the process.

There is NO REQUIREMENT to have any amateur radio license in a
newsgroup.

Quit trying to COMMAND something that isn't "regulation." :-)

>Actually, I think it's
>because you might have to actually demonstrate your REAL knowledge
>base...

Define "REAL knowledge," nursie. Being able to sing hymns in the
Church of St. Hiram? Memorizing stacks of advertisements in QST?
Memorizing the Amateur's Code as if it were military General Orders?

Your mind has flipped out of reality long ago. Hint: One doesn't
get regular paychecks for demonstrating false knowledge on the
job. [engineering isn't like purchasing parts in a small company
for less than a half year]

Your mind has flipped out of reality long ago. Hint: One doesn't
get magazine articles reviewed and accepted by editors for being
false. [just because you can't understand them doesn't make them
false]

Your mind has flipped out of reality long ago. Hint: Nightime
college classes are rated the same way as daytime college
classes and tests there are rated and graded the same.

>Your ego wouldn't allow you to expose yourself to the ridicule of failing the
>test in a room full of grade school kids who just passed it.

I would have NO "ego problems" with being in any room full of
grade school kids whether there was a test or not.

Is it required in amateur radio to sink down to the knowledge level
of grade school kids in order to be a "real ham?"

I've been a commercial illustrator and still capable of working in
several media from pencil through oils. Do you expect me to
"test in fingerpainting" (a la kindergarten classes) to show my
skills in art?

If "real ham radio" can be accomplished by "grade school kids,"
is that some kind of inducement for adult activity?

You are way to childish for me to take you seriously as an adult.

> Tell us about those kids you raised that helped you to formulate an
>informed opinion on the ability of teenagers (and younger) to be competent
>Amateur licensees...?!?!

Tell us about your "normal" teenagers.

This isn't a hobby of child welfare.

> Oh yeah...I forgot, that's yet another arena in which you slobbered your
>ill-prepared vulgarities in.

? I am supposed to sire children in order to obtain a "real ham license?"

You are becoming obscene, not heard...

> But you ARE a putz, Lennie. It DOES suck to be you, and you are scummy.
>
> So what's the problem?

I have no problem. YOU have one.

Basically, YOUR problem is this terrible obsession of being unable to
let go your hatred of anyone who stands up to you and shows you
what you are doing wrong. You can't just drop a subject and go on
to another. You have to bring up that hatred time and time again.

That isn't normal behavior.

>>> So far, all YOU have been able to offer is what you can glean
>>>from various websites or second hand opinions.
>>
>> Not "glean" but rather reveal, as in regulations and directives of the
>> latest effective dates.
>
> And absolutely NO practical experience...Not one second's worth.

>> Gunnery nurse was UNABLE to name or reference a single MARS
>> directive or regulation in three weeks of give-and-take with Brian
>> Burke. UNABLE. Despite holding an "amateur extra" license
>> (suitable for framing), gunnery nurse tried to bluff and bluster through
>> an argument, NOT ONCE being ABLE to reference a single directive
>> or regulation concerning MARS. Tsk, tsk, tsk.
>
> Didn't need to, Lennie.
>
> No Amateur Radio = No MARS.

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio.

> Just like the slap in the face, it doesn't need to be documented that it
>hurts to KNOW it hurts...

You have to understand that MARS did NOT grow out your fantasy
or myths that you cherish when unable to comprehend reality.

MARS was "born" in 1925 as the AARS or Army Amateur Radio
System. After WW2 and silencing of the AARS, it was reborn in
1948 in both the Army and the new USAF as MARS, or Military
Affiliate Radio System. The USN joined in a few years later.
The Directive and all Regulations are quite clear, unambiguous,
and available to anyone.

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio.

> I just think you're a scumbag for trying to push your oblivious weight
>around in THIS forum over Amateur PRACTICE when you have abasolutely ZERO
>experience in it.

Tough on you, isn't it? :-)

> The real pitiful part is knowing that you probably were a lot of the
>things you claim, only to have it all undone by your now well documented
>propensity for lying and antagonism.

Ooooo...trying for new distinctive literary imagery, are you? :-)

You are resentful and bitter that anyone else can have experience in
REAL COMMUNICATIONS as well as holding a REAL JOB in the
radio-electronics industry. Tsk, tsk, tsk...you triumph amateur radio
as "better" because you've not done any of that REAL
communicating.

> Again...Sucks to be you.

Tsk, tsk, tsk...all that hatred and bitterness showing again. YOU
don't have experience in REAL communications or in REAL
radio-electronics work so you insult those that have done it.

Amateur radio is supposed to be an enjoyable avocational
radio activity carried on for personal enjoyment. You don't
demonstrate that at all. You USE amateur radio as a spring-
board to dive into another ranting spate of personal insults.

>> Tsk, tsk, tsk...talk about the deep black pot with continued use of
>> a Yiddish colloquialism for "asshole" (the word "putz") trying to call
>> anyone else nasty...
>
> But you ARE a putz, Lennie.

Is nursie Jewish? [oy, gevalt!]

>> Get some mental therapy and work on your ability to get along
>> with others. It will help you and those around you.
>

> I am still waiting for you to enlighten us as to what credentials in
>"mental health" you have that qualify you to make that suggestion.

"Credentials" to observe a demented person vent bile time and
again in public, insulting anyone who has the slightest
disagreement with him? Not necessary. It is plain to everyone.

> The amusement IS all yours, Lennie. I quite clearly imagine you
laughing
>at a lot of things, not all of them perceptible to those around you.
>
> Laugh on, Lennie. You're the putz the REST of us are laughing at.

Tsk, tsk, tsk...your multiple personalities got together to stage a
protest, did they?

Sorry you are (said Yoda).

Temper fry...

Nice environment you are the model of... :-)

ARRL turned you down for a PR job, did they? [wonder why...]

This thread was originally just a list of names of those picking
certain dates for the elimination of the manual telegraphy test for
a United States amateur radio license.

This thread has mutated (as usual) into yet-another pile of h-s
personal attack diatribe, hatred spewing denigrations of those
not favored by nursie.

Nursie needs mental help. Has needed it for a long time.

Obviously the "rehab" wasn't complete.

Remember, MARS is NOT amateur radio.

Temper fry...

beach...?!?!

According to a DoD Directive and three Regulations -

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT "amateur radio."

The only thing that "hit the fan" in this thread is nursie's cursing and foul-mouthed, foul-minded pejoratives and denigrations connected with his psychosis of being unable to separate a civilian hobby radio activity from the murine corps.

Try to stay focussed, EX-murine. Amateur radio is NOT the same as the USMC.

> No runways or ATC needed.

You are fantasizing again. Amateur radio is NOT the same as the USMC.

> And no particular interest in the USAF or it's MWR department.
>
> Just a mission.

Nursie could convert to Catholicsm in order to take a Retreat at some Mission. The peace and quiet might soothe the savage, disordered beast within him.

MARS is NOT "amateur radio."

Temper fry...

Obviously, the "physical rehab" wasn't complete. A DD-214 is NOT an
honorable discharge...it is just a Release from active duty.

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT "amateur radio."

Temper fry...

It's almost impossible to NOT notice all the curses, denigrations, and
general personal attacks of hatred and outrage from frustrated
ex-murines who still can't understand they aren't in the military
service anymore.

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio. It is based on a Department of
Defense Directive, not by the FCC or ARRL.

> Try to read what OTHERS say, and not make third hand interpretations based
>upon Lennie's rantings and antagonisms.

What "others," nursie?

Did all of your split personalities get together and hold a group protest?

Did you see the Department of Defense Directive? Are you able to
read it? Did you see the USN-USMC Communications Instruction?
Are you able to read it? How about the USAF or USA Regulations?

NO "third-hand interpretations" from four documents from the
authorities on the Military Affiliate Radio System. No "interpretation"
necessary at all.

Without the MILITARY authority, MARS ceases to exist.

It's as simple as that.

But only to those capable of rational thought. Fantasy fliers with
too much P-51 time in their frequency flyer program aren't capable
of rational thought.

Get some medical help for your psychosis.

LHA / WMD

The enlightenment will be
>astounding.

Someone's "medical rehabilitation" wasn't finished.

"M" in MARS = MILITARY

"A" in MARS = AFFILIATE

Yon leatherneck (and rest of body) is unable to differentiate between Amateur Radio and Military Affiliate Radio System.

Maybe medical science wasn't up to the task of finishing the "rehabilitation" program?

Mike is unable to compete in this arena. [ice is too cold for him]

TAFKARJ is busy with 160 years ago and the first COMMERCIAL use of manual telegraphy done by PROFESSIONALS. :-)

Herr Robust has gone out to buy more poison with which to flavor his "replies." [or maybe his pen dissolved in the acid]

Katapult Kellie is scrounging up a camera to snap more bears for Navy intelligence.

Hans has been hitting the gym so that he could "throw out with great force." [or throw up, unknown...]

Wince Ficus bloomed early with a teeny, tiny nastygram.

Gunnery nurse can't think for all the noise of singing "Halls of Montezuma" and other little gems of murine brainwashing while confusing the Amateur's Code with code of civil, civilian conduct.

Mama Dee is silent, apparently out disciplining other children.

What a cast of characters to convince anyone of "enjoying the magic of having one's very own radio station by learning morris goad in order to talk legally via SSB." :-)

Brain Burke CLAIMS to have been there.

So far he's not been able to produce even ONE trophy photo from Somalia.

I don't know a single Ham Radio operator who, having ahd a chance to
allegedly operate from an exotic location, can't produce at least ONE photo,
QSL card, or some other "proof" of having been there.

I have my doubts as to wether he ever left the confines of a protected US
facility in Europe, let alone deployed from CONUS.

> Kellie wasn't even IN any military.

Doesn't matter.

W3RV asked a question. Brain retorted with a smart alec answer that has once again left him in the position of looking like a liar with insinuations of "knowing" something, yet not being able to document it or have experience to back it up.

Kinda like you.

> Those who live constantly in Fantasyland cannot be rational.

You're right...and you DO have a California address, so I guess you CAN'T be "rational".

Sucks to be you.

Which was it, a DD-214 or an "honorable discharge?"

> I'll get another one in September of this year.

When did you "re-enlist?"

One service period = one discharge. Not two.

You can have a discharge any time you want. Some folks call
that "physical abuse."

> If you're gonna presume to demonstrate knowledge of administrative
>proceeses of the Armed Forces, Lennie, ya need to spend some more time
>learning about them. Then you can plagerize those sites too.

Apparently there's a gross lack of your understanding of military
procedure. For example, the Department of Defense (they are in
charge of ALL U.S. militaries) issued a Directive describing and
establishing MARS.

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio.

Nursie, get some mental therapy. You need it.

Temper fry...

>> goad in order to talk legally via SSB."
>
> Hot Flash, Hot Rod...
>
> It's not required to learn Morse Code to use SSB.

I know that...in military and commercial radio. I used SSB voice the first time in 1954 communicating with Hawaii from Tokyo.

I did much the same late last year talking from a moored sailboat in a California marina.

Both times and all times in between WITHOUT needing an amateur radio license!

But, without passing a manual telegraphy test, it is NOT LEGAL to do that on U.S. amateur bands below 30 MHz.

> Hasn't been for 13 years.

You really CANNOT read Part 97 with any comprehension, can you?

What part of Part 97 stumps you? Let us know and maybe one of us can help you out...

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio.

Get some mental help...

Temper fry...

Nursie hasn't produced even ONE photo of his "seven hostile actions."

Nursie hasn't produced even ONE photo of his described duty with
the 3rd Marine Division.

Nursie hasn't produced even ONE photo of his so-called murine life
that was supposed to be a close to 20 years.

Nursie couldn't find the appropriate Directive or service branch
Regulations of the Military Affliliate Radio System in order to back
up his assertion about "MARS is amateur radio."

> I don't know a single Ham Radio operator who, having ahd a chance to
>allegedly operate from an exotic location, can't produce at least ONE photo,
>QSL card, or some other "proof" of having been there.

Yah, yah, yah...big old nursie "I've got it in my wallet" "proof" of doing
what he LIES about sure has at least ONE photo, don' he?

Where did all those "hostile actions" you were in take place?

Were they all plot-lines on "JAG?"

> I have my doubts as to wether he ever left the confines of a protected US
>facility in Europe, let alone deployed from CONUS.

You say everyone else "LIES" (because you do?).

WHERE did all your "hostile actions" take place?

>> Kellie wasn't even IN any military.
>
> Doesn't matter.

Ho ho ho, YES IT DOES.

Don't forget Kellie claimed to "do work for USN intelligence!" :-)

Another truth-stretcher.

> W3RV asked a question. Brain retorted with a smart alec answer that has
>once again left him in the position of looking like a liar with insinuations
of
>"knowing" something, yet not being able to document it or have experience to
>back it up.

Ho, ho, ho! MORE truth-stretching.

WHERE did nursies "hostile actions" take place?

Where are all those photos of the 3rd Marine Division duty?

Where is your scanned copy of your DD-214 with its infamous
"honoroble discharge" on it?

> Kinda like you.

I have no less than 600 photos of my three years at ADA, trimmed
down to a 20-page narrative with lots of color photographs, 6 MB
in PDF form (readable on any PC or MAC). A couple of the black
and white photos are Signal Corps origin (and have the proper
credits).

Ed Hare and a few others got paper copies of the old 30-page
version via surface mail.

Anyone else "need" an electronic copy and they are able to handle
a 6 MB file, they are welcome to one as an e-mail attachment.

If worst comes to worst, I can always retrieve my DD-214, scan it
and upload it as an e-mail attachment as proof. I can even scan
my REAL honorable discharge paper, forwarded the same way.
That even goes as far as scanning the backs of the Signal Corps
photos to show the legends mimeographed there.

But, I'm not going to do so on command of some lying insulter
who can't offer ONE shred of "proof" he actually did some of the
lies he states.

>
>> Those who live constantly in Fantasyland cannot be rational.
>
> You're right...and you DO have a California address, so I guess you CAN'T
>be "rational".

You really ARE an UGLY little person...mentally hateful and
frustrated...resorting to insulting the entirety of the most populous
state of the Union.

You are mentally SICK. No "training" or "credentials" needed to
show that.

But, you ARE an Amateur Extra, the very model of what manual
telegraphy and too much RF exposure can produce.

Temper fry...

I was never in any National Guards unit ("NG"). Four years in Reserves.

What is nursie here for?

Easy rhetorical answer: Nursie is here to talk nasty to folks in order to relieve his everyday stresses and make hisself real big in his own eyes for being so "brave."

>> MARS is NOT amateur radio. It is based on a Department of
>> Defense Directive, not by the FCC or ARRL.
>
> MARS, without Amateur Radio, would be defunct.
>
>> Without the MILITARY authority, MARS ceases to exist.
>>
>> It's as simple as that.
>
> Without the civilian, Amateur Radio licensed participants, it would not be
>able to function, civil, military or otherwise.

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

A Department of Defense Directive ESTABLISHED the MILITARY AFFILIATE Radio System. Three separate military branch Regulations further define those branch-specific MILITARY activities.

> It really is THAT simple.

MARS is MILITARY and it is NOT "amateur."

You are unable to understand military service regulations. No
wonder you are no longer in any military.

>> But only to those capable of rational thought. Fantasy fliers with
>> too much P-51 time in their frequency flyer program aren't capable
>> of rational thought.
>
> P-51's are great, but not my idea of a "fantasy flight".

REAL private pilots are acquainted with the term "P-51 time." That's
a nastyphrase of those private pilots who LIE in their log-books
by writing in more time than they really have...using a Parker 51
pen.

If you were a REAL private pilot you would know such things.

>> Get some medical help for your psychosis.
>

Was that on your "DD-214" form along with "honorable discharge?"

So, you couldn't stay IN the murines on duty and still receive
this "rehab?"

Lots and lots of military personnel spend time IN rehab and
return to duty, continuing on with their military careers.

But you could NOT.

That strikes a discordant note...very much like you fabricated
the whole "accident-rehab-honorable-discharge" thing.

Maybe because the MEDICAL discharge was NOT for some
kind of "accident" during duty.

For one thing, a DD-214 form is simply a release from active
duty. It is NOT a "discharge" paper.

For another, you've not yet described this "accident" in detail
sufficient to prove you aren't defrauding the government of anything
or, for that matter, the newsgroup readers.

> Now, do ya need it in any other language, or is your cranial-rectal
>inversion quota filled for the day...?!?!

Try Yiddish, putz-man.

You think that bluff and bombast is going to snow all us readers of
the newsgroup? If you do, you are seriously deluded.

It's easy to put a few things in order and arrive at the conclusion
that you've been LYING to us newsgroup readers.

> "I'm laughing at the superior intellect..."

Those who have no intellect at all are easily amused.

Brian, don't forget the private piloting (as a CAP air ace), hang-
gliding, and rollerblading, plus claims of hoisting a big field
pack in some kind of civilian "forced march." :-)

His "rehab" didn't extend to his mind, judging by his ugly little
behavior in here...or maybe it is post-traumatic stress syndrome
from those "seven hostile actions."

Who knows? The real story has yet to be revealed.

Meanwhile nursie flashes around that DD-214 "discharge paper"
like he wuz a hero...(sandwich)...

Sure MARS is not ham radio, but are not most MARS operators also
ham radio licensees? Hams that have been authorized by the military to
```

operate on MARS radio systems using military owned stations for military traffic?

Take a look at the tables in Part 97. You will see that ALL bands
from 50.1 upward (except for 144.0 to 144.1 MHz) are marked
"MCW, phone, image, RTTY, data." (page 640 of Volume 5, the
table above 97.307, 1 Oct 03 edition of Title 47 C.F.R.)

Thank you for the illuminating offer of explanation but the regulations
are easy enough to read. I'm not the one needing the explanation.

By the way, there's no indication of "SSB subbands" in the real
official regulations from the government. "Phone" is phone, meaning
the same as voice.

According to one Amateur Extra, "MARS is ham radio."

According to the Department of Defense, the U.S. Army, the U.S. Air Force, and the U.S. Navy, it is the MILITARY AFFILIATE Radio System. I gave the necessary document identification in here.

Once MARS got the AN/FRC-93 transceiver after 1965, MARS operators in Vietnam were making phone patches to the States at a rate of 40,000-plus per month. [that's four decades back in time] [source: Copy of "Communications-Electronics, Vietnam, 1964-1970," viewable/downloadable at the U.S. Army Center for Military History]

Can you identify the AN/FRC-93? You should be able to as it is a familiar radio to most U.S. amateurs. Need a TM on it? That's available for free download from LOGSA.

What's your point in your reply? I am familiar with several Parts in Title 47 C.F.R. Not difficult with Part 97, the shortest one in Volume 5 of the five published volumes (published biannually by the U. S. Government Printing Office).

I'm not any role-model for U.S. amateur radio public relations. That's the task of the Amateur Extra who keeps shouting that "MARS is amateur radio!" If you want better PR for ham radio then I'd suggest you have a long chat with that Amateur Extra. I'd say he reflects badly on U.S. amateur radio which is your avocation too.

He knows it, Robert.

He's just an antagonist. He has absolutely nothing left to offer, so
being argumenitive and idiotic are his methods of expression.

>Sure MARS is not ham radio, but are not most MARS operators also
>ham radio licensees? Hams that have been authorized by the military to
>operate on MARS radio systems using military owned stations for military
>traffic?

Yes, they are. And without the contibutions of those licensed Amateur
Radio operators, there'd be no MARS program today...At least not in it's
present form.

Sorry, Lennie.

Things changed since you were in uniform. Not in YOUR mind, of course,
but the rest of the world moved on.

And September of 2004 will be 30 years since I first went on Active Duty.
That's when you are eligible for full retirement. Up until then you are in the
"Fleet Marine Reserve"

> You can have a discharge any time you want. Some folks call
> that "physical abuse."

The last "discharge" I had was 25 years ago, and kinda looked like you do
now.

A shot of Penicillin took care of it, though.

>
> You really don't want to go there, little man.

Sure, Lennie.

YOU have suggested that you know something about child growth and development, and have suggested that there should be an age limit placed upon Amatuer Radio licensure based upon the supposed lack of maturity and responsibility of same.

That would presume that either (1) you have a degree in a health care or mental health discipline that would prepare you educationally to make such a suggestion, or (2) you raised to maturity an offspring or several offspring that allowed you to make an informed opinion.

You have no degree in ANY healthcare discipline that I am aware of.

You refuse to acknowledge any parenting experience.

Ergo you have ventured into yet another realm of human endeavor for which you have no knowledge or experience from which to make said suggestion.

> It should be obvious to you but you can't see it...

In as much as all I can see at this moment is the screen upon which these words appear, you'd be correct.

If you suggest that I draw some conclusion from your silence, well, that's already done.

"...below 30 MHz." is NOT what you said in the first post.

You insinuated that it was necessary to know Morse Code to use SSB.

SSB is used all throughout the VHF and UHF ranges by Amateurs.

Your exploits in 1954 are irrelevent, both to discusssions about Morse
Code examinations and the use of SSB by licensed Amateurs.

Lennie, YOU are the idiot that keeps jumping from trying to make some
analogy between your Army radio clerk days in the 1950's and the present day
Amateur Radio examination requirements, then jump to trying to tell me what the
MARS program is all about.

Seems to me YOU are the one in need of help.

Putz.

I am sure in your weak, irratic PuppetBoy mind this was supposed to "mean"
something, but it got lost between your (dubiously labeled) brain and your
fingers.

What an idiot.

Robert asks you a question about Amateurs operating on military
frequencies for military purposes and YOU respond with some assinine statement
about "most municipal radio operators" wearing police uniforms.

That in ITSELF is completely foolish since police departments are only a
fractional part of most municipal payrolls. There's the Fire Department, EMS,
Department of Sanitation, the utilities departments, roads and highways,
etc...all of whom hav SOME sort of radio service that they use.

Remember, Brain, YOU are the one who set the "precedent" that if there is
even ONE example to the contrary, you have been proven WRONG.

Now...HOW did you go from discussing operating on military frequencies to
"municipal radio operators"...?!?!

> pen.

Well, in as much as I know what would happen to me if it was determined
that I had falsified my logbook, I've never made an entry that wasn't preceeded
by an actual flight or logable training with a CFI or CGI.

And I've been a licensed pilot for thirty YEARS this August, and I have
NEVER heard the term "P-51 time" in any other term than that used by people who
actually logged time in a North American P-51.

Guess that's the difference between us, Lennie...You hang out with liars
and cheats.

I don't.

Perhaps that's why you find it easy to BE a liar and find it equally hard
to understand why others don't accept your conduct.

> If you were a REAL private pilot you would know such things.

Uh huh. You're welcome to review the FAA data base.

Putz.

> Nursie hasn't produced even ONE photo of his "seven hostile actions."

I had better things to do, Lennie.
>
> Nursie hasn't produced even ONE photo of his described duty with
> the 3rd Marine Division.

I've never described any duty with 3rdMARDIV. I was never a part of
3rdMARDIV. Never said I was.

Please get things right if you're going to TRY and "embarrass" me, Lennie.

> Nursie couldn't find the appropriate Directive or service branch
> Regulations of the Military Affliliate Radio System in order to back
> up his assertion about "MARS is amateur radio."

No "directive" was needed.

No Amateur Radio = No MARS.

> But, I'm not going to do so on command of some lying insulter
> who can't offer ONE shred of "proof" he actually did some of the
> lies he states.

I've already given you the "shred" you need, Lennie...

Sufficient information to verify my service record with VA...

Did it right here in THIS forum.

Now who's "lying", Scumbag?

>>> Those who live constantly in Fantasyland cannot be rational.
>>
>> You're right...and you DO have a California address, so I guess you
>CAN'T
>>be "rational".
>
> You really ARE an UGLY little person...mentally hateful and
> frustrated...resorting to insulting the entirety of the most populous
> state of the Union.

It's not an insult if it's true. Let's see...California has Charlie Manson, is home to the Crips and Bloods, has the largest (by far) percentage of drug abusers and is known as the worlds first drive-by shooting range. More cities in CA have smog and other pollution control issues than almost anywhere else in the United States, and typically has a tax burden on it's citizens that chokes any "lifestyle" benefits out of them.

And then there's you. California has you.

> You are mentally SICK. No "training" or "credentials" needed to
> show that.

No, Lennie...I am just very adept at proving what a liar and idiot you've become in your waning years.

That you don't like having your dirty laundry aired so frequently is YOUR fault for hanging it out there.

> But, you ARE an Amateur Extra, the very model of what manual
> telegraphy and too much RF exposure can produce.

If that's your best shot, Lennie, you've failed again.

"Snow" who?

There one who's "seriously deluded" here Lennie is you.

You seem to think that we can't see through you. You try to hide behind
YOUR false bravado, even being bullying and profane, but we, especially >>I<<,
don't accept it.

You are a liar. Documented and archived.

You continue to be an antagonist with no defensible argument.

Oh well....Sucks to be you.

> the same as voice.

Ooooops.

Another example of no practical experience in Amateur Radio.

The FCC has VERY clearly stated that "gentleman's agreements" and compliance with them IS "good Amateur practice". Persons who have violated these band plans have been censured and fined by the FCC even though the "sub bands" they may ahve violated were not exactly specified by the FCC.

Please refer to just about any current day training text and you will see that there ARE areas set aside for SSB communications in the VHF and above spectrum.

That you don't considerthem "valid" since they are not specifically delineated in Part 97 is irrelevent. Those 670,000+ licensed Amateurs >>DO<< consider them valid.

Back to sleep, Your Putziness.

> I have repeatedly encouraged you to take the Amateur Technician since it
> doesn't require a Morse Code examination.

Why, Steve?

Why do you encourage Mr. Anderson to get an amateur radio license,
given the way he behaves here towards anyone who disagrees with him?
Do you really *want* him to join the ARS?

Mr. Anderson told us way back in January of 2000 (almost 4-1/2 years
ago) that he was "going for Extra right out of the box". Didn't
happen, probably won't happen any time soon, if ever.

The Tech hasn't had a code test in over 13 years and medical waivers
for all code tests except 5 wpm were available in 1990. None of this
is news or any sort of secret. If Mr. Anderson were interested in
being a radio amateur, he would have gotten a license long ago. So
there's only one logical conclusion left.

Do you think that calling him "Lennie" or various versions of "scummy"
or "liar" will change his behavior, or opinions, or get him to admit
any of his many mistakes? Or do you think that maybe, just maybe,
getting *you* to behave in a manner similar to *his* might be one of
his real goals?

I snipped out all of the name calling and insults in the post I
replied to - and there wasn't much left. Nowadays I don't even read
most rrap posts past the first insult. Many I don't read past the
author line.
>
> However you still seem stymied byt the process. Actually, I think it's
> because you might have to actually demonstrate your REAL knowledge base...Your
> ego wouldn't allow you to expose yourself to the ridicule of failing the test
> in a room full of grade school kids who just passed it.

Did it ever occur to you, Steve, that Mr. Anderson could pass the test
if he wanted to - but that he doesn't want to? That his hobby is
something very different?

Look back over the past several years. Do you really think Mr.
Anderson will *ever* engage in civil debate here on *any* subject? Or
that Mr. Burke will answer any questions that he doesn't want to
answer (while at the same time asking all sorts of questions of
others)?

Meanwhile, Amateur Radio continues. OTA, not here. Will we hear you on 7037 next Monday night?

Look in volume 5 of the 1 October 2003 edition of Title 47 C.F.R. on page 640, the table accompanying 97.307.

Does it state "gentlemen's agreements" there? No, it says "Emission Types Authorized." Look at the 19 bands above 30 MHz. Does "SSB" appear anywhere? No? :-)

Gosh, I guess nursie always right but FCC wrong!

How about that? :-)

> Please refer to just about any current day training text and you will see
>that there ARE areas set aside for SSB communications in the VHF and above
>spectrum.

Okay, we'll just put you down in saying "current day training texts" authorize amateur radio and the FCC does not.

So, does MARS exist because of "current day training texts?"

> That you don't considerthem "valid" since they are not specifically
>delineated in Part 97 is irrelevent. Those 670,000+ licensed Amateurs >>DO<<
>consider them valid.

You did a poll of everyone?

[you missed about 50K or so licensed radio amateurs...]

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

DoD defines MARS.

FCC does not define MARS.

MARS is NOT amateur radio.

3rd Marine Division is based on Okinawa. You said you were there.

OK, so we've established you were never on Okinawa.

> Please get things right if you're going to TRY and "embarrass" me,
>Lennie.

You wouldn't admit to being caught LYING red-handed. :-)

FCC defines amateur radio.

FCC does not define MARS

DoD defines MARS

Nursie say "MARS is amateur radio."

Nursie very confused.

>> Nursie couldn't find the appropriate Directive or service branch
>> Regulations of the Military Affliliate Radio System in order to back
>> up his assertion about "MARS is amateur radio."
>
> No "directive" was needed.

Department of Defense says otherwise. :-)

> No Amateur Radio = No MARS.

OK, so you've redefined your original claim. [this one is wrong, too]

DoD does not define amateur radio.

FCC defines amateur radio.

MARS is NOT amateur radio.

>> But, I'm not going to do so on command of some lying insulter
>> who can't offer ONE shred of "proof" he actually did some of the
>> lies he states.
>
> I've already given you the "shred" you need, Lennie...

All shredded... :-)

> Sufficient information to verify my service record with VA...

Veterans Administration does not define MARS.

> Did it right here in THIS forum.

You've consistently tried to define MARS by saying "MARS is
amateur radio."

> Now who's "lying", Scumbag?

You are.

> It's not an insult if it's true. Let's see...California has Charlie
>Manson, is home to the Crips and Bloods, has the largest (by far) percentage

You've never heard the term "P-51 time?!?" :-)

You should get around more...when not flying all those "missions" for the CAP. :-)

> Perhaps that's why you find it easy to BE a liar and find it equally hard
>to understand why others don't accept your conduct.

Tsk, tsk, tsk. Looking in the mirror again? :-)

Have you read the DoD Directive on MARS yet, ace?

Are you still claiming the DoD Directive says "MARS is amateur radio?"

If you do, YOU are LYING.

Try the USN-USMC Communications Instruction. Does it say "MARS is amateur radio?"

If you do, YOU are LYING.

> Uh huh. You're welcome to review the FAA data base.

FAA doesn't define MARS. FCC doesn't define MARS.

Nursie defines MARS.

Nursie is not right in the head.

>responsibility of same.

You stubbornly insist on going into this non-subject. OK.

The DoD may have a directive on parenting somewhere (irrelevant to this subject) but there is NO connection of parenting to MARS activities or regulations.

You are attempting to misdirect the subject again. Stay focussed on the subject instead of letting your ADD take over again. [it does so often]

> That would presume that either (1) you have a degree in a health care or
>mental health discipline that would prepare you educationally to make such a
>suggestion, or (2) you raised to maturity an offspring or several offspring
>that allowed you to make an informed opinion.

You presume too much. While you may not be able to observe other humans, most of us are able to do so.

Proper mental health includes the ability to understand directives and regulations and not try to redefine them for the sake of making some message points in a newsgroup. You failed in that regard and refuse to acknowledge that. That's mental aberration by yourself.

There is no "degree" or "credential" required to be a parent. Human reproduction is done by unskilled people. Raising children to maturity is more akin to a trial-and-error process...where, if the original result is defective, there is no real hope of success. [that's life, tough as it is] Even with a good product, it takes sensitivity and observation and considerable compassion to raise a child to "maturity."

The degree of "maturity" is at question in your case. For example, you've been given the identification of DoD Directive plus Regulations of the Army, Air Force, and Navy in regards to MARS existance and activities. Still, you stubbornly insist "MARS is amateur radio." It is not.

> You have no degree in ANY healthcare discipline that I am aware of.

A "degree in any healthcare discipline" is NOT required to operate, design, or manufacture a radio.

A "degree in any healthcare discipline" is NOT required to obtain any sort of radio license, operator or station.

> You refuse to acknowledge any parenting experience.

Parenting is not a requirement to operate, design, or build a radio.

Parenting is not a requirement to obtain any sort of radio license, operator or station.

> Ergo you have ventured into yet another realm of human endeavor for which
>you have no knowledge or experience from which to make said suggestion.

The subject is the Military Affiliate Radio System.

It is not parenting.

>> It should be obvious to you but you can't see it...

The subject is the Military Affiliate Radio System.

It is not parenting.

Look at the top of your AOL mail screen display. It should say "Subject: Re: MARS >>IS<< "Amateur Radio"."

Fairly obvious to me...and anyone else using AOL software, even with other browsers.

> In as much as all I can see at this moment is the screen upon which these
>words appear, you'd be correct.

I have only to repeat the official documents of the DoD and the three
major U.S. military branches in regards to MARS. Nowhere do
these documents state that "MARS is amateur radio."

You MAY have seen those, but it is difficult to discern. You keep
saying contrary statements when not personally attacking people.

> If you suggest that I draw some conclusion from your silence, well,
that's
>already done.

I wasn't speaking - at any time - of producing damaged children.

>>>> What a cast of characters to convince anyone of "enjoying the

>> to do that on U.S. amateur bands below 30 MHz.
>
> "...below 30 MHz." is NOT what you said in the first post.

Don't try to quibble on words, you only dribble on the keyboard.

Part 97 of Title 47 C.F.R. is one of the smallest Parts and can
be understood by anyone...anyone without preconceived or
imaginary ideas.

> You insinuated that it was necessary to know Morse Code to use SSB.

U.S. amateur radio regulations state that all amateurs must
demonstrate manual telegraphy skill by test in order to receive a
grant having privileges below 30 MHz. That's straightforward and
applies to ANY allocated modulation type.

> SSB is used all throughout the VHF and UHF ranges by Amateurs.

Regulations say "phone" or voice communications.

When was the last time you used SSB on the 4mm band?

> Your exploits in 1954 are irrelevent, both to discusssions about Morse
>Code examinations and the use of SSB by licensed Amateurs.

Using SSB is a simple matter of operating, by adjusting the proper
radio controls. That can be done by NON-amateurs. :-) Some
private boat owners do it all time...just like I did in late 2003 from
a marina-moored sailboat. :-)

>>> Hasn't been for 13 years.

>analogy between your Army radio clerk days in the 1950's and the present day
>Amateur Radio examination requirements, then jump to trying to tell me what
>the MARS program is all about.

Tsk, tsk, tsk. Still on Fantasy Island?

I was NEVER an "Army radio clerk." My MOS was 281.6, Microwave
Radio Relay Operations and Maintenance Supervisor. That's what it
says on my DD-214. That's what I did...as well as being a Fixed
Station Radio Operations and Maintenance Supervisor plus a number
of other secondary (brevet) MOSs such as VHF radio relay and
carrier equipment.

I don't "jump to trying to tell you anything." [nobody can] Since you
FAILED to provide any references for your statements about MARS,
for three weeks time, I just did a simple Internet search and found the
appropriate documents and their identification and then posted that
here. I've downloaded all those documents for reference.

NONE of those downloaded documents says "MARS is amateur
radio."

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS frequencies are NOT in allocated amateur bands. MARS
callsigns are not legal to use as identification within amateur radio
bands and amateur radio callsigns are not legal to use as
identification outside of amateur radio bands.

MARS is not defined in the U.S. amateur radio regulations nor is it
regulated by the FCC.

MARS is NOT amateur radio.

> Seems to me YOU are the one in need of help.

The world is wrong but nursie is right? Tsk, tsk, tsk.

> Putz.

You keep on with filthy profanities as a salutation. Tsk, tsk, tsk.

You need another shot of penicillin. You are still discharging.

Nursie is still trying to bluff and bluster his way through an "argument."

:-)

DD-214s are still only a Release from Active Duty.

Military service discharges are a different form.

> And September of 2004 will be 30 years since I first went on Active Duty.

>That's when you are eligible for full retirement. Up until then you are in
the
>"Fleet Marine Reserve"

I'm not in any Fleet Marine Reserve. Never was. :-)

Nobody really cares how long you were some kind of murine hero
in the service of your country (or other self-defined patriotic crapola).

You never engaged in any military radio communications while in
the murines. You don't know the systems, you don't know the
procedures, you can't identify familiar pieces of equipment which
all real military communications people would know.

>> You can have a discharge any time you want. Some folks call
>> that "physical abuse."
>
> The last "discharge" I had was 25 years ago, and kinda looked like you
>do now.
>
> A shot of Penicillin took care of it, though.

Not quite. There is public evidence that your mind was affected.

All military activities are governed by directives and regulations.
MARS exists because a DoD Directive says it does. [not by the
FCC and not by the ARRL]

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio.

>>> If you're gonna presume to demonstrate knowledge of administrative
>>>proceeses of the Armed Forces, Lennie, ya need to spend some more time
>>>learning about them. Then you can plagerize those sites too.
>>
>> Apparently there's a gross lack of your understanding of military

>>
>> The "M" in MARS = MILITARY
>>
>> The "A" in MARS = AFFILIATE
>>
>> MARS is NOT amateur radio.
>
> No Amateur Radio = No MARS.

Incorrect in the real world. The MILITARY AFFILIATE Radio System
is NOT amateur radio.

Bluster, bluff, and bombast will not dissuade anyone and it certainly doesn't override any Department of Defense Directorate.

MARS is as MARS is directed and regulated. It is NOT amateur radio.

>> Nursie, get some mental therapy. You need it.
>
> Uh huh...right.

Agreement that you DO have a problem is an optimistic sign.

The next step is to act on that realization. Good luck on that.

Tsk, tsk, tsk. Still in the name-calling activity.

U.S. amateur radio regulations define the modulations and frequencies which radio amateurs are allowed to operate.

U.S. amateur radio regulations do NOT define the Military Affiliate Radio System.

Nursie is trying to misdirect the thread from the subject, MARS.

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio.

>>> You really CANNOT read Part 97 with any comprehension, can
>>> you?
>>>
>>> What part of Part 97 stumps you? Let us know and maybe one of

>
> He knows it, Robert.

There are NO "SSB subbands" on 6 and 2 meter bands.

Regulations state "phone" which is voice communications.

> He's just an antagonist. He has absolutely nothing left to offer, so
>being argumenitive and idiotic are his methods of expression.

No "antagonism," just an attempt to get stubborn mules to move
off of their Fantasy Island imaginations.

>>Sure MARS is not ham radio, but are not most MARS operators also
>>ham radio licensees? Hams that have been authorized by the military to
>>operate on MARS radio systems using military owned stations for military
>>traffic?
>
> Yes, they are. And without the contibutions of those licensed Amateur
>Radio operators, there'd be no MARS program today...At least not in it's
>present form.

Tsk, tsk, tsk, trying to equate a justification by a conditional.

Bad form, OM. Poor rationalization.

Throughout its existance, MARS has NOT normally "carried military
traffic." That is done by regular military communications systems
which are not recreational activities.

What is left of MARS is now realigned to be an additional radio
system for liason with real emergency agencies such as FEMA.
With the spread of the Internet (plus VoIP), service members can
now communicate with "home" directly...and do, even from field
locations in the Middle East.

What MARS did in the past was a very valuable service for the
morale of distant service members such as in Vietnam of 39 to
34 years ago. That is acknowledged and appreciated...but it WAS,
and is not a present-day large activity.

Without the Department of Defense Directive, there would be NO
MARS. Not in ANY "present day form."

>
>Did it ever occur to you, Steve, that Mr. Anderson could pass the test
>if he wanted to - but that he doesn't want to? That his hobby is
>something very different?

How could a hobby involving electronics be "different?"

Everyone "interested" in radio MUST get a ham license.

Everyone "interested" in communication by radio MUST
use morse code.

Etc., etc., etc...

>Look back over the past several years. Do you really think Mr.
>Anderson will *ever* engage in civil debate here on *any* subject? Or
>that Mr. Burke will answer any questions that he doesn't want to
>answer (while at the same time asking all sorts of questions of
>others)?

Oh, yes, by all means LOOK BACK. :-)

[rehash old arguments archived in Google, etc., etc.]

What "Mr. Miccolis" defines as "civil debate" is best described
as CAPITULATION to whatever "Mr. Miccolis" has stated.

No more, no less. If "Mr. Miccolis" defines "civility" as
AGREEING with him...in whatever he says. No problem.

Nice notes on drafting another Sermon On The Antenna Mount.

Will we hear the completed version Sunday from W1AW? :-)

Now wait just a minute. You idly stood by for years while Dick,
Larry, Steve, Steve, Bruce, Kelly, et all, grossly misbehaved, then
you beg them to join your CW nets.

Where were your words of caution then? Why do you intentionally
associate with such people?

They said they were good as gold because they made it through the
filter, and they wouldn't behave so horribly while on the air.

> Mr. Anderson told us way back in January of 2000 (almost 4-1/2 years
> ago) that he was "going for Extra right out of the box". Didn't
> happen, probably won't happen any time soon, if ever.

You told us just last week that you have no opinion of "Sorry Hans,
MARS >>>IS<<< Amateur Radio."

Jim does have an opinion. One day he just might voice it. But not
while whacked out Steve is doing his battle for him.

Just as Jim had an opinion of Bruce. An opinion that he sat on for
years and years, until Bruce's outrages became even too much for Jim
to bear.

> The Tech hasn't had a code test in over 13 years and medical waivers

I think Mr. Anderson is not interested in a VHF license. Just my
opinion. You'll have to ask him.

> Look back over the past several years. Do you really think Mr.
> Anderson will *ever* engage in civil debate here on *any* subject?

I don't seem to have a problem. And I've always been civil with the
other Jim, KH2D.

Gee!

Or
> that Mr. Burke will answer any questions that he doesn't want to
> answer (while at the same time asking all sorts of questions of
> others)?

You're free to disclose as much or as little as you like. For
instance, you disclosed no opinion when asked if, "Sorry Hans, MARS
>>>IS<<< Amateur Radio" were a valid statement. But worse, you lied
and said that you had no opinion.

Of course you have an opinion.

> Meanwhile, Amateur Radio continues. OTA, not here. Will we hear you on
> 7037 next Monday night?

Best of Luck.

Mike, it sounds like you are confusing band plans and regulated segment divistions. The HF bands have segments where only CW and data modes are allowed by regulation. Phone and slow scan TV cannot be used at all in those segments. However there is the "gentleman's agreement band plan" layered on top of that. For example, in the CW/data portion, RTTY is operated in certain segments by agreement. Up in the phone portions, the SST enthusiasts operate in certain segments by agreement. If new hams try to operate voice outside the voice segments on HF, they will not only be in violation of the bandplans but will be in violation of FCC regulations, which could cost them their licenses.

>you beg them to join your CW nets.

Dick, Larry, Steve, Steve, Bruce, Kelly et al, are PCTA.

That makes them "correct" and "civil."

PCTA can do no wrong. All others can do no right.

>Where were your words of caution then? Why do you intentionally
>associate with such people?

PCTA are PCTA. They need not be civil or correct.

They simply are. :-)

>They said they were good as gold because they made it through the
>filter, and they wouldn't behave so horribly while on the air.

They might not have said it openly in those words, but they
sure acted like it.

>> Mr. Anderson told us way back in January of 2000 (almost 4-1/2 years

>
>What might that be, Jim?

PCTA demand that all "interested in radio" take a code test.

It was so in the beginning and it will be so to their bitter end.

>
>I think Mr. Anderson is not interested in a VHF license. Just my
>opinion. You'll have to ask him.

I've HAD a VHF radio license. It wasn't amateur.

I was operating VHF and low-UHF back in 1954. PM, not FM.

>> Look back over the past several years. Do you really think Mr.

>and said that you had no opinion.
>
>Of course you have an opinion.

Of course. PCTA are the only ones "civil" and "correct."

That's a given in here.

All others are "lids," like tops of garbage cans.

According to the PCTA.

However, Dan has done something with Australians and I'm not sure
I want to hear more about that...

>> Meanwhile, Amateur Radio continues. OTA, not here. Will we hear you on
>> 7037 next Monday night?
>
>Best of Luck.

Interesting. The PCTA need a high-speed Internet forum in order to organize a schedule. :-)

Says something right there...

Steve, Dave, Bruce, Larry, Kelly, and Dick represented the very worst
in the ARS via their RRAP postings. They thought they meant well, for
the good of all involved, but it eventually evolved into war crimes.

Some people just don't know when to quit. Meanwhile, Jim is like the benevolent senior looking on as the thugs committed atrocities, but had "no opinion."

Please don't judge the rest of us by Steve's actions or even his seven hostile actions (of self abuse).

Good night.

In disability status?

Thought you were found unsuitable for further service, thus retired?

Then rehabilitated, now working a full-time, labor-intensive and
stressful job, while collecting a disability check and a paycheck?

Hmm. Any chance you could provide some citations for these
"gentleman's agreements"? I do not doubt their existence, I'd just
like to find some online pointers to them. Recently I had to ask
around where to find some RTTY so I could test my setup -- if I'd
known about these agreements, I'd have a better chance of finding it
on my own. Also, I'd like to avoid accidentally operating on a
portion of the band which is traditionally for a different type of
mode -- I'm more likely to get a response from a CW CQ if I'm not
calling on the RTTY portion, etc.

I was more interested in URLs to specific agreements. I've cruised
through the website from time to time but I hadn't happened to see
them. I lost my repeater directory in a car accident (how bizarre)
otherwise I'd check the front of that. I'm more interested in HF, of
course, so if you could point me to specific agreements, I'd be
dearly appreciative. Stuff like "weak signal work is done here,
beacons are done there, blah blah blah" are exactly what I'd like to
keep posted in my shack, and this kind of information should be
consolidated in a single source online.

I already referenced the web site of the ARRL. All you have to do is enter
the words "band plan" in the box to search the site. Then scroll down until
you see the listing for band plans. I will NOT do this for you. The type
of information you seek is contained on the web page.

I hope so, Jim. I am trying to put up a new attic loop right now. I am also experimenting with the MFJ version of the manual bandspanner as an "emergency" antenna. I am trying to see if it can be used in an NVIS configuration, or if it is too mechanically short.

Lennie...WHAT is the prefered voice mode for most of the satellites?

And what mode is prevelent below 144.400?

Especially between 144.100 and 144.250?

No experience = flawed opinions.

I see that.

That's what's wrong, PuppetBoy.

The police department does NOT constitute the "most" of any municipal pool
of employees. Even in the smallest towns that I have lived in the police force
represented, at the MOST, 1/4th of the municipal payroll.

YOU said that MOST "municipal radio operators (wore) police uniforms".

That is wrong. Even in YOUR community.

>Would you say that "most" means, "is" or "equal to?"

>> Now...HOW did you go from discussing operating on military frequencies
>to
>> "municipal radio operators"...?!?!
>
>How did you go from MARS to Amateur Radio?

MARS is dependent upon Amateur Radio. No Amatuer Radio = No MARS.

Welcome back. I recently rejoined the group here myself, after a
hiatus of several months due to getting fed up with trying to
participate using open servers.

Having just switched to a new ISP that has proper NNTP access, I've
been lurking for a few weeks, amusing myself by reading the running
battle between two of the regulars (you'll no doubt discover that
thread soon enough)...have noticed several of the regulars that I can
remember through the years seem to have vanished. In the case of one
or two of those, you'll probably find that a good thing.

Does it make them Policemen? Does it make them MARS Ops?

"Sorry Hans, Dispatcher >>>IS<<< MARS."

Hi hi!

No. It is not. It is not all inclusive, such as your use of the word
">>>IS<<<."

> The police department does NOT constitute the "most" of any municipal pool
> of employees. Even in the smallest towns that I have lived in the police force
> represented, at the MOST, 1/4th of the municipal payroll.

Oh, I see what you're desperately trying to do.

You're including all of the non-radio users in your computation in an
attempt to find a leg to stand on.

Grasping, grasping; and still sliding downward.

> YOU said that MOST "municipal radio operators (wore) police uniforms".
>
> That is wrong. Even in YOUR community.

No, it isn't. We're kind of heavy on LE here.

> >Would you say that "most" means, "is" or "equal to?"

> MARS is dependent upon Amateur Radio. No Amatuer Radio = No MARS.

Sure they are. They use up all them amateur frequencies and rely upon
Riley for enforcement. Subject to Part 97. Hi hi!

"Sorry Hans, MARS >>>IS<<< Amateur Radio."

Hi hi! Ho ho!

Best of Luck.

Wow Len, I didn't know that you were involved in Seven Hostile Actions
(of self abuse).

Better extract yourself from that pile.

NVIS prop is usually several db down ordinary skywave.

> There is no psk practical exam.

Well, whaddayaknow? You finally got it.

Since there is no psk practical exam, how can there be psk???

If the Morse Code exam goes away, how can there be CW???

> The ONLY PRACTICAL exam we have in ham
> radio is the CW TEST.

But it's become imPRACTICAL to continue to exclude people based upon a Morse Code exam.

> Most of the rest is mainly BS memorization, that for
> the most part is not even relevant to real world ham radio.

Which is exactly how you got into amateur radio. So now what???

If I said it once, I've said it a thousand times.

"What I fear most about the restructuring is a lack of enforcement, and what I fear most about maintaining the status quo is a lack of restructuring."

Most people are basically good. Some aren't. People like Riley are necessary.

You need to reconcile the hatred you have for your fellow ham.

This information is for quick reference only - refer to the
band plan listings in the Operators Manual, The FCC Rule Book
or the ARRL Repeater Directory for full details. For sharing
arrangements, see Section 97.303 of the FCC Rules. For
detailed packet frequencies, see QST, September 1987, page 54
and March 1988, page 51.

160 METERS (1.8-2.0 MHz):
1.800-1.830 CW, RTTY and other narrowband modes
1.830-1.840 CW, RTTY and other narrowband modes,
Intercontinental QSOs only
1.840-1.850 CW, SSB, SSTV, other wideband modes,
Intercontinental QSOs only
1.850-2.000 CW, phone, SSTV and other wideband modes

80 METERS (3.5-4.0 MHz): 40 METERS (7.0-7.3 MHz):
3.590 RTTY DX 7.040 RTTY DX
3.580-3.620 RTTY 7.080-7.100 RTTY
3.620-3.635 Packet 7.171 SSTV
3.790-3.800 DX window 7.290 AM
3.845 SSTV
3.885 AM calling frequency

30 METERS (10.1-10.15 MHz): 17 METERS (18.068-18.168 MHz):
10.130-10.140 RTTY 18.100-18.105 RTTY
10.140-10.150 Packet 18.105-18.110 Packet

20 METERS (14.0-14.35 MHz): 15 METERS (21.0-21.45 MHz):
14.070-14.095 RTTY 21.070-21.090 RTTY
14.095-14.0995 Packet 21.090-21.100 Packet
14.100 NCDXF Beacons 21.340 SSTV
14.1005-14.112 Packet

14.230 SSTV 12 METERS (24.89-24.99 MHz):
14.286 AM calling frequency 24.920-24.925 RTTY
24.925-24.930 Packet

10 METERS (28-29.7 MHz):
28.000-28.070 CW
28.070-28.150 RTTY
28.150-28.190 CW
28.190-28.200 New Beacon subband *
28.200-28.300 Old Beacon subband *
28.300-29.300 Phone
28.680 SSTV
29.000-29.200 AM
29.300-29.510 Satellite Downlinks
29.510-29.590 Repeater Inputs
29.600 FM Simplex
29.610-29.700 Repeater Outputs
* Note: The FCC states in 97.203(d) that automatically controlled
beacons may only operate on 28.20-28.30 MHz.

6 METERS (50-54 MHz):
50.0-50.1 CW, beacons
50.060-50.080 beacon subband
50.1-50.3 SSB, CW
50.10-50.125 DX window
50.125 SSB calling
50.3-50.6 All modes
50.6-50.8 Nonvoice communications
50.62 Digital (packet) calling
50.8-51.0 Radio remote control (20-kHz channels)
51.0-51.1 Pacific DX window
51.12-51.48 Repeater inputs (19 channels)
51.12-51.18 Digital repeater inputs
51.62-51.98 Repeater outputs (19 channels)
51.62-51.68 Digital repeater outputs
52.0-52.48 Repeater inputs (except as noted; 23 channels)
52.02, 52.04 FM simplex
52.2 TEST PAIR (input)
52.5-52.98 Repeater output (except as noted; 23 channels)
52.525 Primary FM simplex
52.54 Secondary FM simplex
52.7 TEST PAIR (output)
53.0-53.48 Repeater inputs (except as noted; 19 channels)
53.0 Remote base FM simplex
53.02 Simplex
53.1, 53.2, Radio remote control
53.3, 53.4
53.5-53.98 Repeater outputs (except as noted; 19 channels)
53.5, 53.6, Radio remote control
53.7, 53.8
53.52-53.9 Simplex

Note: The 6-meter band plan was adopted by the ARRL Board of
Directors at the July 1991 meeting. The band plan is
currently being studied by the ARRL Ad Hoc Spectrum
Management Committee.

2 METERS (144-148 MHz):
144.00-144.05 EME (CW)
144.05-144.10 General CW and weak signals
144.10-144.20 EME and weak-signal SSB
144.200 National calling frequency
144.200-144.275 General SSB operation
144.275-144.300 Propagation beacons
144.30-144.50 New OSCAR subband
144.50-144.60 Linear translator inputs
144.60-144.90 FM repeater inputs
144.90-145.10 Weak signal and FM simplex
(145.01,03,05,07,09 are widely used for packet)
145.10-145.20 Linear translator ouputs
145.20-145.50 FM repeater outputs
145.50-145.80 Miscellaneous and experimental modes
145.80-146.00 OSCAR subband
146.01-147.37 Repeater inputs
146.40-146.58 Simplex
146.61-146.97 Repeater outputs
147.00-147.39 Repeater outputs
147.42-147.57 Simplex
147.60-147.99 Repeater inputs
Notes: The frequency 146.40 MHz is used in some areas as a repeater
input. This band plan has been proposed by the ARRL VHF-UHF
Advisory Committee.

1.25 METERS (222-225 MHz):
222.0-222.150 Weak-signal modes
222.0-222.025 EME
222.05-222.06 Propagation beacons
222.1 SSB & CW calling frequency
222.10-222.15 Weak-signal CW & SSB
222.15-222.25 Local coordinator's option; weak
signal, ACSB, repeater inputs, control
222.25-223.38 FM repeater inputs only
222.40-223.52 FM simplex
223.52-223.64 Digital, packet
223.64-223.70 Links, control
223.71-223.85 Local coordinator's option; FM simplex,
packet, repeater outputs
223.85-224.98 Repeater outputa only
Note: The 222 MHz band plan was adopted by the ARRL Board of
Directors in July 1991.

70 CENTIMETERS (420-450 MHz):
420.00-426.00 ATV repeater or simplex with 421.25 MHz video

carrier control links and experimental
426.00-432.00 ATV simplex with 427.250-MHz video carrier frequency
432.00-432.07 EME (Earth-Moon-Earth)
432.07-432.10 Weak-signal CW
432.10 70-cm calling frequency
432.10-432.30 Mixed-mode and weak-signal work
432.30-432.40 Propagation beacons
432.40-433.00 Mixed-mode and weak-signal work
433.00-435.00 Auxiliary/repeater links
435.00-438.00 Satellite only (internationally)
438.00-444.00 ATV repeater input with 439.250-MHz video carrier
frequency and repeater links
442.00-445.00 Repeater inputs and outputs (local option)
445.00-447.00 Shared by auxiliary and control links, repeaters
and simplex (local option)
446.00 National simplex frequency
447.00-450.00 Repeater inputs and outputs (local option)
Note: The 440 MHz band plan is under review by the ARRL VHF-UHF
Advisory Committee

33 CENTIMETERS (902-928 MHz):
902.0-903.0 Narrow-bandwidth, weak-signal communications
902.0-902.8 SSTV, FAX, ACSSB, experimental
902.1 Weak-signal calling frequency
902.8-903.0 Reserved for EME, CW expansion
903.1 Alternate calling frequency
903.0-906.0 Digital communications
906-909 FM repeater outputs
909-915 ATV
915-918 Digital communications
918-921 FM repeater inputs
921-927 ATV
927-928 FM simplex and links
Note: The 902 MHz band plan was adopted by the ARRL Board of
Directors in July 1989

23 CENTIMETERS (1240-1300 MHz):
1240-1246 ATV #1
1246-1248 Narrow-bandwidth FM point-to-point links and
digital, duplex with 1258-1260.
1248-1258 Digital Communications
1252-1258 ATV #2
1258-1260 Narrow-bandwidth FM point-to-point links and
digital, duplexed with 1246-1252
1260-1270 Satellite uplinks, reference WARC '79
1260-1270 Wide-bandwidth experimental, simplex ATV
1270-1276 Repeater inputs, FM and linear, paired with 1282-1288,
239 pairs every 25 kHz, eg 1270.025, .050, etc.
1271-1283 Non-coordinated test pair
1276-1282 ATV #3
1282-1288 Repeater outputs, paired with 1270-1276

1288-1294 Wide-bandwidth experimental, simplex ATV
1294-1295 Narrow-bandwidth FM simplex services, 25-kHz channels
1294.5 National FM simplex calling frequency
1295-1297 Narrow bandwidth weak-signal communications (no FM)
1295.0-1295.8 SSTV, FAX, ACSSB, experimental
1295.8-1296.0 Reserved for EME, CW expansion
1296.00-1296.05 EME-exclusive
1296.07-1296.08 CW beacons
1296.1 CW, SSB calling frequency
1296.4-1296.6 Crossband linear translator input
1296.6-1296.8 Crossband linear translator output
1296.8-1297.0 Experimental beacons (exclusive)
1297-1300 Digital Communications

2300-2310 and 2390-2450 MHz:
2300.0-2303.0 High-rate data
2303.0-2303.5 Packet
2303.5-2303.8 TTY packet
2303.9-2303.9 Packet, TTY, CW, EME
2303.9-2304.1 CW, EME
2304.1 Calling frequency
2304.1-2304.2 CW, EME, SSB
2304.2-2304.3 SSB, SSTV, FAX, Packet AM, Amtor
2304.30-2304.32 Propagation beacon network
2304.32-2304.40 General propagation beacons
2304.4-2304.5 SSB, SSTV, ACSSB, FAX, Packet AM,
Amtor experimental
2304.5-2304.7 Crossband linear translator input
2304.7-2304.9 Crossband linear translator output
2304.9-2305.0 Experimental beacons
2305.0-2305.2 FM simplex (25 kHz spacing)
2305.20 FM simplex calling frequency
2305.2-2306.0 FM simplex (25 kHz spacing)
2306.0-2309.0 FM Repeaters (25 kHz) input
2309.0-2310.0 Control and auxiliary links
2390.0-2396.0 Fast-scan TV
2396.0-2399.0 High-rate data
2399.0-2399.5 Packet
2399.5-2400.0 Control and auxiliary links
2400.0-2403.0 Satellite
2403.0-2408.0 Satellite high-rate data
2408.0-2410.0 Satellite
2410.0-2413.0 FM repeaters (25 kHz) output
2413.0-2418.0 High-rate data
2418.0-2430.0 Fast-scan TV
2430.0-2433.0 Satellite
2433.0-2438.0 Satellite high-rate data
2438.0-2450.0 WB FM, FSTV, FMTV, SS experimental
Note: The 2300 MHz band plan was adopted by the ARRL Board of
Directors in January 1991

Note: The following band plans were adopted by the ARRL Board
of Directors in July 1988

3300-3500 MHz:
3456.3-3456.4 Propagation beacons

5650-5925 MHz:
5760.3-5760.4 Propagation beacons

10.00-10.50 GHz:
10.368 Narrow band calling frequency
10.3683-10.3684 Propagation beacons
10.3640 Calling frequency

All modes and licensees (except Novices) are authorized on
the following bands:
24.0-24.25 GHz 165.0-170.0
48.0-50.0 240.0-250.0
71.0-76.0 All above 300

But you MADE it the "SUBJECT", Lennie, right up until THIS post, in which
it's obvious that you once again found oput that you DON'T have all the facts
and you DON'T know what you are talking about.

Nice try to shift the focus off of your faux pas.

Caught again.

> It is irrelevant since none of it involved radio communications.

You're right, Lennie...It's NOT "relevant"...But YOU brought it up and YOU tried to use it against me.

You failed.

But what you got was your tail stepped on...And YOU did the stepping.

That HAD to hurt.

Putz.

Depends on who you want to talk to and where they are.

Yes, from my QTH to yours would probably present a several db difference.

But remember what NVIS is for. It's for using HF spectrum for local to
regional communications. It's NOT for continental or DX purposes. I have a
very specific need to have reliable comms on 3.5, 3.9, 4.4, 4.5, 4.6 and
7.9MHz. Especially within Tennessee and the Southeastern United States.

The SUBJECT is the claim that "MARS is amateur radio.

It is not. As per DoD Directive 4650.2 (26 Jan 98) -

The "M" in MARS = MILITARY

The "A" in MARS = AFFILIATE

MARS is NOT amateur radio.

That is repeated in AR 25-6, AFI 33-106, USN-USMC Communications
Instruction NTP8 (C).

> But what you got was your tail stepped on...And YOU did the stepping.
>
> That HAD to hurt.

No "hurt." MARS is NOT amateur radio.

MARS exists because the DoD says it does.

The FCC does not cause MARS to exist. The ARRL does not
cause MARS to exist.

MARS is NOT amateur radio.

I thought about putting that pile on my lawn to make the grass
grow better.

It didn't. A little test section just died off. :-(

We will never hear the where or when of all those "hostile actions."

They never happened...except on his Fantasy Island.

He might not have a Tatoo either...

Thank you for the useful information.

Out of curiosity, do you know how these agreements came about, and who
agreed to what? Is this something the ARRL just announced one day, or
did these band plans arise out of years of usage clustering, or what?
I figure you might know, considering your position in the organization,
or at least you'd be able to find out. :-)

Thanks again.

Jack.

SSB is one of the modes we see on VHF and above. It's not used as often as say, FM, but used nonetheless. A fellow in our club put on a nice Powerpoint presentation about his satellite ops a couple months ago. On one of the slides, we listened to a recording of a SSB contact he had with another ham via satellite.

There is plenty of 2 meter SSB also. I've listened to it at our mountaintop shack.

It's never a good idea to do a student's homework for them. It leads to laziness and dependency on other people for info that is easily found by checking basic references.. I'd already referenced the site and documentation he needed to check previously. Then I gave specific instructions on how to find the info. That is all that should have been required.

Attempting to answer a question in a condescending manner (and failing to answer the question correctly) does not imply a teacher-student relationship. Frankly, it's not clear to me that you have the capability to build or maintain such a relationship, based on what I've seen here. That's neither here nor there, however.

Dee> It leads to laziness and dependency on other people for info that
Dee> is easily found by checking basic references.. I'd already
Dee> referenced the site and documentation he needed to check
Dee> previously. Then I gave specific instructions on how to find the
Dee> info. That is all that should have been required.

You spent a thousand characters where twenty would have been acceptable. In fact, both you and KC2HMZ gave me information on "the band plans", not "the gentleman's agreements", which was the specific bit I asked about, repeatedly. It's not just "where can I find RTTY traffic?", it's "why is RTTY found there" that interests me the most.

You were so lost in your sophistry that you lost sight of the actual question being asked. Reread the original question I posed, your response, my response which included a restating of the original question, and your second response, and honestly tell me what you were trying to accomplish.

Now, if you have any information about the gentleman's agreements that led to the band plans, please, share with me and the others. I am interested in the actual content you may be able to provide, but I have no patience for attitude or condescension. The last thing I need is someone trying to teach me to fish when my question concerns how

night-crawlers on barbed hooks became the approach of choice.

Amateur Radio Newsline™ Report 1398 May 28, 2004

Amateur Radio Newsline report number 1398 with a release date of Friday, May 28, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Ham radio helps in the wake of an outbreak of tornadoes and a proposed California law could make operating a mobile station a driving distraction. Find out the details on Amateur Radio Newsline report number 1398 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: TORNADOES ACROSS THE MID-WEST BRING OUT HAM RADIO COMMUNICATORS

Dozens of tornadoes and severe storms hammered the northern Plains and Midwest in the past week. As phone lines went out and cellular systems got overloaded it was ham radio that was again called on to provide storm spotting and other communications. Amateur Radio Newsline's Don Wilbanks, AE5DW, is here with more:

--

More than a dozen tornadoes swept across southern Nebraska the weekend of May 22nd. According to news reports the tornadoes were part of three days of severe weather that knocked out telephone service and power to hundreds of thousands of people from Nebraska to Michigan to West Virginia.

Hardest hit was Hallam, Nebraska. Hallam is located 25 miles north to Lincoln and is where a 73 year old woman was killed from flying debris. Every building in Hallam was damaged or destroyed and all normal communications was cut off. This prompted the activation of local A-R-E-S units under the leadership of Section Emergency Coordinator Reynolds Davis, K-Zero-G-N-D.

In Lincoln, Joe Eisenberg, K-Zero-N-E-B, was active with the local ham radio Stormwatch. He described this as a terrible weather front and said that ham radio played a key role in the emergency:

--

Eisenberg: "We went out on Stormewatch early in the evening and had

spotters throughout the whole county and our spotters in the South part of the county began observing the extremely heavy rain, wind and hale, especially near the Hallem area. One of our spotters saw a semi that had been blown off the road."

--

Downed power lines and leaking propane tanks littered the Hallam, prompting the Nebraska National Guard to surround the community Sunday to keep people from entering. Newsline spoke to Sandy Ramsey of the Office of Emergency Management in Lincoln who had a lot of praise for the role that Amateur Radio is playing:

--

Ramsy: "The hams out there as storm spotters. They are just invaluable to us. They're our eyes and ears. We are in the E-O-C
and they're our eyes in the field and we just couldn't do this
without them. They are really an invaluable part of what we do."

--

But Nebraska was not the only place where hams were put on alert or activated. Iowa and central Michigan were also hard hit and the front also caused power and phone outages in southern Michigan, Wisconsin, northern Illinois and Iowa and northwest Ohio. On Monday night the 24th, Iowa was drenched by yet another wave of powerful thunderstorms, even as residents of the town of Independence waited for a flooded local stream to recede.

The wave of storms swept eastward early Tuesday. Illinois had high wind that damaged several structures near Jacksonville. State Police said a twister damaged a home south of Springfield.

And all across the region ham radio operators remained on alert. As we go to air their work is still ongoing and we will have more in future reports.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW in New Orleans.

--

A total of 81 tornadoes were confirmed to have touched down in the region on Saturday as a weather front stalled over the area. As we go to air, ham radio is still involved in the aftermath of the storms. (ARNewsline, K0NEB)

**

THE BPL FIGHT: MR. HAYNIE GOES TO WASHINGTON REDUX

ARRL President Jim Haynie, W5JBP, says his meeting with White House telecommunications advisors on B-P-L issues was both revealing and encouraging. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the
latest:

--
Haynie says he and ARRL representatives met with Richard Russell, the White House associate director of technology in the Office of Science and Technology Policy in Washington D.C.

Haynie knew going in that the Bush administration's policy was clear: B-P-L is something that's good for America. But Haynie says Russell did offer assurances, especially in light of the interference findings about B-P-L contained in the National Telecommunications and Information Administration report.

"He did emphasize the fact that they would address the interference issues aggressively," Haynie says. "And I'm going to take him at his word at that. That they will do that.

"And I'm sure the FCC has taken note of the interference issues that NTIA has raised and as the representative for the amateur radio community, I intend to stay on top of it.

"We're not going to let this thing slide from that standpoint. They have the rules and they're printed and they're there. And we're going to make sure that they abide by those rules."

Haynie says it was clear from the start that Russell is beholden to the political agenda of the Bush administration.

"Mr. Russell heard what we had to say all right, but I think he was already predisposed to the fact that to anybody on the street - and I'm talking about the uninformed person that doesn't know about technology, broadband over powerline, where you can just plug your computer into the wall ,any wall outlet -does sound like a good thing," Haynie says. "And, I understand that.

"But on the other hand, there are issues that have to be dealt with and one of the examples I gave Mr. Russell was the fact that we could all lower our electric bills if we could burn high-sulfur coal.

"And he said, 'Well the EPA wouldn't let you do that.' I said, 'That's my point exactly. The FCC should be standing there, overseeing the rules about spectrum pollution.' I think I made my point."

Haynie says, upon reflection, one reality in the whole B-P-L debate is becoming crystal clear.

"I honestly do believe there's a disconnect between the engineers in the field, the engineers at the commission who actually understand the physics of the issue versus the politicians who are driving it," Haynie says. " I'm convinced now that's what it is. This is no longer

a science issue, an issue of facts, it's an issue of politics and that disappoints me."

However, Haynie says in recent weeks certain admissions by utilities trying to work with the amateur community are significant.

"In the beginning, everybody said from the industry side that there was no interference," Haynie says. "Now they're actually saying, 'Yes, there is and we'll try to mitigate it, we'll try to work with you.' That in itself is a big step."

Haynie says there also are admissions that one major interference solution touted by B-P-L proponents - notching - just doesn't do the job across the board.

"Finally some of the people are admitting, 'OK we don't have a point-source radiator anymore, we have a continuous-source radiator such as a power line.' And they're saying that the notching techniques will work and we've actually found out that they don't work that well," Haynie says.

"The notches are not that exact. And, when it says that they notch something about 3db or 6db, that's still not enough. It has to be notched by at least 30 in order to get back down to where the amateurs can function. And that's going to be a big challenge for the industry."

Haynie says anybody studying the issue of broadband technology sees the B-P-L investment is not a good one because of the growing emphasis on creating a wireless network.

"Quite frankly, in my personal opinion, the broadband over powerlines is going to be a real flash-in-the-pan because other technologies are going to overtake it very quickly," Haynie says.

"Whenever people say they want to plug their computer into any outlet in the wall, then my question is: 'Then, why do you have a cordless phone?' And WiFi and WiMax enter that challenge by being able to go anywhere in your house and let your laptop down whether it be on your couch or in your easychair and operate broadband.

"And I think that technology is going to be the real answer to people that need that type of high-speed internet access."

Haynie says the B-P-L battle is far from over. He says the strategy now is to press regulators - especially the FCC - to enforce the interference rules.

"Hold everybody's feet to the fire on the rules," Haynie says. "And the encouraging sign I've seen in the last week or so is the fact that more and more utilities have said that they didn't think it was a viable option for them and have opted out.

"Interestingly enough, the city of Manassas now is advertising for another provider. I found that extremely curious and very interesting."

Finally, Haynie concedes the ARRL has spent hundreds of thousands of dollars on the B-P-L issue and it's looking to the amateur community to get behind the league and its work.

"People are working overtime," Haynie says. "We are burning the candle at both ends and all I would ask is the amateurs support the organization and what we're trying to do in this effort."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the fight to stop B-P-L in future Amateur Radio Newsline reports. (ARNewsline(tm), ARRL)

RADIO LAWS: CALIFORNIA TO FINE DISTRACTED DRIVERS

California drivers who are distracted for any reason and whose actions attract law enforcement may soon face fines by eating, combing their hair or talking on a cellular telephone. This if a bill passed on May 18th by the state senate and bend to the Assembly is eventually made law. Bill Pasternak, WA6ITF, has more in this report:

--

It was called S B 1800 when Senator Kevin Murray introduced it to the California State Senate back in February. It went unnoticed by the Amateur Radio community until about a week ago when the Senate passed it and delivered to the State Assembly for further action.
That's
when news outlets state wide ran banner headlines saying that the state legislature might make it a crime to be distracted in any way -- while operating a motor vehicle in the Golden state. And that is exactly what the measure would do.

As written, the Murray bill would make it an crime for a person to operate a vehicle in an unsafe manner that results from engaging in a distracting activity while driving. What is a distracting activity?

Well according to the Senator it is just about anything. Eating or drinking, smoking, reading or writing, interacting with children, animals, passengers, or objects in the vehicle, adjusting the controls of an audio or other entertainment device, or even talking on a hands free cellular telephone. And it is the last two items that could easily impact on ham radio operators or any other two way radio user that a police officer might regard as distracted just because he or she has a microphone in hand or is changing frequencies on a radio.

The bill does say that a law enforcement officer may not stop a vehicle when a driver is engaging in a distracting activity unless the officer observes that the vehicle is being operated in an unsafe manner. But it is left to the officer to decide what unsafe really is under other areas of California state law.

The proposed law does not single out or target Amateur Radio operators for enforcement, but it does not exempt hams either. In fact, the only exemptions are police, fire and emergency services but even this is limited. The measure states that an emergency service professional would be exempt from these restrictions when using a wireless telephone or other electronic device, but only as part of the course and scope of his or her duties.

What about penalties? The bill would require a first offense to be punished by a fine of $35, and a second or subsequent offense that occurs within 2 years of a prior conviction for the infraction to be punished by a fine of $150.

Also, being permitted to continue driving in California and get insurance means that you have to keep your violation points count low. Any person whose driving record shows a violation count of 4 or more points in 12 months, 6 or more points in 24 months, or 8 or more points in 36 months be presumed to be a negligent operator of a motor vehicle. This bill would prohibit a first-time violation from being given a point value, but would mandate that a 2nd or subsequent violation within 2 years to be given a value of one point. And even 2 points can cost a lot of dollars when you go to renew an auto insurance policy.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in
Los
Angeles.

--

Supporters of the proposed law cite studies blaming distractions for 25 to 30 percent of all vehicle crashes. Opponents say that the bill goes too far in meddling with the civil rights of individuals. This group vows a court fight if the measure gets signed into law. (ARNewsline(tm) from published news reports)

**

RESTRUCTURING: FCC CHAIRMAN SAYS RESTRUCTURING CONTINUING

FCC Chairman Michael Powell has told U-S representatives Greg Walden, W7EQI, and Mike Ross, WD5DVR, that the Commission will act 'as expeditiously as possible' on Amateur Radio restructuring. This, in response to a letter from Walden and Ross a month ago that urged the FCC to adopt the ARRL's restructuring Petition for Rule Making in its entirety along with rules changes needed to put it into place.

But in his response, Powell said the League's petition was one of many. There are 18 in all. An ARRL bulletin says that judging from the FCC Chairman's letter to Walden and Ross, it would appear as if
the regulatory agency plans to address all 18 petitions within the framework of a single rule making proceeding. (ARRL)

**

ENFORCEMENT: 75 METER IN INTERFERENCE BRINGS FAA REFERRAL

A California ham is under FCC scrutiny for alleged interference to ongoing Amateur Radio communications. The FCC's Daryl Duckworth, NN0W, is here with more:

--

Duckworth: "AE6QD, Steve L. Wingate, of Corte Madera, California, has
been sent a warning letter regarding malicious interference on 75 meters. This consists of jamming, making threats to other operators and to law enforcement officers, and broadcasts in which he appears incoherent."

--

The FCC warned Wingate that continued incidents of such interference will subject him to license suspension and revocation proceedings, as well as a possible fine of $7,500 to $10,000. And in an unusual twist, the FCC says that since Wingate also holds a pilot's license, this matter is also being referred to the Federal Aviation Administration as well. (FCC, RAIN)

**

ENFORCEMENT: FINES AFFIRMED AGAINST TWO ALLEGED PIRATES

Fines of $10,000 each have been affirmed by the FCC against Jason Green and Gary Feldman. The regulatory agency alleges that the two are pirate broadcasters in Florida who reportedly operated on 91.9 Mhz. The FCC says that neither filed a responses to the Commission's initial findings in the case. (FCC)

**

ENFORCEMENT: A "RADIO SUMMER CAMP" TO TRAIN MORE PIRATES

Now here's one that we know will interest the FCC enforcement folks.
Writers to the CGC Communicator report that budding radio pirates can learn how to buy or build FM transmitters and get on the air this summer. This at four-day "workshop" sessions, at least one of which will be bilingual.

Not only that. CGC readers also report that the event promoters will have transmitter and antenna kits available to attendees. For more on these strange educational check out www.freeradio.org. (CGC)

**

RADIO LAW: AIR FORCE JAMS GARAGE DOOR OPENERS

A new military radio system is jamming remote-control garage doors in communities near this Florida Panhandle base. During testing of the $5.5 million two-way radio system at Eglin Air Force Base, homeowners in Niceville, Valparaiso and the Crestview area reported that their garage door openers failed to work or went wild by themselves.

According to Air Force officials the contractor, Motorola Inc., will try to minimize the problem. Technicians will run the system on slightly different frequencies from those used by garage door openers when another test is conducted.

But an FCC spokesperson had some bas news for local homeowners. Lauren Van Wazer, said that if the Air Force has been running the system within its licensed frequencies then the users of garage door openers may have to change the operating frequencies of theirs.

By the way, the Navy says that a similar radio system has been requested for Pensacola Naval Air Station and other nearby installations. (Published reports)

**

NEW PRODUCTS: THE TNC WIZARD

Creative Services Software has announced the release of version 1.0 of the Kantronics and Timewave TNC Wizard. This program searches for your TNC and sound card on both serial ports and TCP/IP networks.

Creative's Rick Ruhl, W4PC, says that the TNC wizard works with built
in serial ports in the TNC, USB to serial adapters and TCP/IP to serial interfaces. It also has an option to detect the soundcard in the computer and add that information to the PacTerm or PkTerm startup files without any additional setup needed at install time.

The TNC Wizard requires Windows 98 or later, with TCP/IP installed. There is no cost for the TNC wizard and it can be downloaded from the CSS website at http://www.cssincorp.com (CSS)

**

NAMES IN THE NEWS: INDUCTEES NAMED TO THE CQ HALLS OF FAME

CQ Amateur Radio magazine has inducted fifteen people into its Amateur Radio Hall of Fame and two into the CQ Contest Hall of Fame.

Those elected to the CQ Amateur Radio Hall of Fame include Ned Carman, Ned, W0ZSW, and Sister Alverna O'Laughlin, WA0SGJ, who co founded the Handi-Ham System to aid the handicapped. Also inducted was Ten-Tec co-founder Jack Burchfield, Jack, K4JU. His partner Al Kahn, K4FW was made a member in 2002.

Others named include Bob Heil, K9EID, whose inventions revolutionized audio in rock music live performances and amateur radio and writer Tom Kneitel, K2AES and Amateur Radio Newsline's own Bill Pasternak,
WA6ITF. Bill as honored for his quarter of a century of producing these newscasts and for creating the "Amateur Radio Newsline Young Ham of the Year Award.

The new members of the CQ Contest Hall of Fame include Steve Bolia, N8BJQ. Steve is the longtime Director of the CQ World Wide W-P-X Contests and a pioneer in computer log-checking. Also inducted was Trey Garlough, N5KO. Garlough, who also holds the call sign HC8N is a world-class contester and the creator of two major contesting e-mail reflectors.

The CQ Amateur Radio Hall of Fame was established in January, 2001, to recognize those individuals, whether licensed radio amateurs or not, who significantly affected the course of amateur radio. The CQ Contest Hall of Fame was established in 1986 to recognize those amateurs who have made major contributions to contesting. The complete list of names is on line at www dot c q dash amateur radio dot com. (CQ)

CHANGING OF THE GUARD: ARNOLD O. BECKMAN S.K.

Arnold Beckman, whose invention of a simple method to measure the acidity of California lemons spawned a scientific instrument empire has died at the age of 104. Beckman passed away on May 18th at Scripps Green Hospital in La Jolla, California, after a long illness.

Arnold O. Beckman was born in Cullom, Illinois, on April 10, 1900. In 1934 he invented the pH meter that is sill used use in citrus processing plants worldwide. The following year he founded National Technical Laboratories, and later renamed he company Beckman Instruments. Over the years, Beckman and his electronic test gear became synonymous with high quality and extreme accuracy. In 1997 the company was acquired Coulter Corporation of Miami, Florida which renamed it renamed Beckman Coulter later that same year.

Arnold Beckman, is survived by his son, Arnold Stone Beckman, daughter Patricia Beckman, two grandchildren and three great-grandchildren. His wife Mabel Meinzer Beckman died in 1989.

A complete biography of this inventor, businessman and philanthropist can be found on-line at
http://www.beckman.com/hr/memorial/mem_news.asp (Beckman-Coulter)

HAM RADIO IN SPACE: ASTRONAUT TRAINING TO BECOME HAM

The AMSAT News Service reports that Astronaut Leroy Chiao is scheduled to train at the Johnson Space Center in early June. This, to prepare for his Amateur Radio license exam. Once he passes the test and receives his call sign, he will be able to participate in the ARISS program during his stay as Expedition 10 commander on board the International Space Station. He is scheduled to fly this October. (ARISS)

**

WORLDBEAT - IRAN: IARU TRAINING PRESENTED

Turning to international news, word that the I-A-R-U recently presented an Amateur Radio Administration Course in Iran. Amateur Radio Newsline's Jim Meachen Zed-L-2-B-H-F in Auckland New Zealand
brings the details:

--

PKG HERE: In response to an invitation from the administration of the Islamic Republic of Iran, Fred Johnson ZL2AMJ representing the IARU Region 3 and Daniel Lamoureux VE2KA representing the IARU International Secretariat visited Iran to present a three-day Amateur Radio Administration Course, 26 to 28 April 2004. Fred Johnson ZL2AMJ takes up his story:

ZL2AMJ:

Since the early 1980s this course has been conducted by IARU in various forms in countries all over the world and in response to invitations from administrations to train regulators and prospective regulators in the administering of the amateur service and amateur satellite service. Related objectives include managing disaster

relief communications and organizing an amateur radio society.

Our recent course in Tehran was arranged by Mr T. Shafiee and Mr M. Zomorodi of the Directorate General of Telecommunications. An excellent training room was provided for us with full support facilities including a data projector and access to a photocopier. Daniel and myself presented our course using PowerPoint displays prepared by IARU and each of the 16 participants received printed copies of the displays and many other documents and two CD-ROMs with documentation about amateur radio.

We had discussions with many radio amateurs in Tehran, some of whom attended the course. The course participants visited EP3PTT, a station established in the Ministry's office premises in Tehran. The equipment in this station was provided for Iran amateurs by from the IARU Region 3 Stars*** program and may be operated by licensed Iranian operators by arrangement.

There have been amateur radio societies in Iran in earlier years but there has not been an IARU member society. An amateur radio "club", a social meeting group, presently meets in Tehran.

ZL2BHF: ZL2AMJ reported the course as a most memorable experience. He said that Daniel and himself were warmly received.

From Auckland New Zealand I'm Jim Meachen ZL2BHF for Newsline.

--

Contact between the IARU and the amateurs and the administration of Iran is to continue with further Amateur Radio information to be provided. (ARNewsline(tm))

WORLDBEAT - ALBANIA: PROJECT GOODWILL AT DAYTON 2004

Len Geraldi, K6ANP, who is the President of the Northern California DX Foundation has announced that his organization is teaming up with Vertex Standard . The two will combine forces to donate ten complete Yaesu FT 840 stations to Project Goodwill Albania. The gear will be set up at the University of Tirana to boost the successful completion of the project.

The announcement was made at the recent Dayton D-X dinner in Ohio. At the same time Bob Ferrero, W6RJ, stepped forward on behalf of Ham Radio Outlet. He offered up a matching number of antennas. Bob Heil, K9EID, of Heil Sound said that he would supply the needed p sound gear. Other equipment was pledged by AA4XR, N3BNA, K3LP, K7JA, VE1JF, W3BTX, W4MYA, W6EUF, W6OSP, W6UM and W9JUV in addition to those already reported earlier. (Various)

**

ON THE AIR: NEW MID-AMERICA 6 METER BEACON

The Legion of Indianapolis DXers has activated a 24-hour a day 6 meter beacon. Operating as W9VW slash B on 50.069 MHz, the automated 12 watt station is located in the heart of Indianapolis in grid square E M 69 WT. The antenna is an omnidirectional horizontally polarized turnstile at 70 feet. Q-S-N reports go to W9VW, P.O. Box 18495, Indianapolis, Indiana, 46218. (W9IND, QRZ.COM)

**

DX

In D-X, word that IN3ASW and IN3DYG will be active as TU2WL. This, from Cote d'Ivoire or the Ivory Coast through the 1st of June. They plan to operate SSB and possibly PSK31 and RTTY. (GB2RS)

And SM0CMH will be active as SM8C portable SV5 from the island of Kalymnos in the Dodecanese group to the 5th of June. He will operate CW on 10 to 80 meters and perhaps even 160 meters. For both operations, please Q-S-L as directed on the air. (GB2RS)

**

THAT FINAL ITEM: BAY TO BREAKERS

And finally this week, the story of ham radio assisting in a truly fun public service event. It called the Bay to Breakers race and its held every year in the San Francisco. David Hirtz, KG6CEL, reports from the City by the Bay:

--

Audio Only: Hear it at www.anewsline.org
--

By the way, it's called the Bay to Breakers Race because it starts
in the financial district not far from San Francisco Bay and ends at the western most edge of Golden Gate Park overlooking the mighty blue Pacific. More information on this event is on line at www.baytobreakers.com. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff for
nominations this year is midnight on Tuesday, June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim
Damron, N8TMW, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

Another method is to just scan a band until you find another ham calling
CQ in
a mode you want to operate in, and respond to him. Be careful in that,
on HF,
some foreign hams can operate SSB on a frequency the FCC rules say CW/data
only. Conversely, there's no point in calling CQ using CW in the middle
of a SSB
subband. It's legal, but you are not likely to find another ham to QSO
with there.
As ham radio is about 2 way radio, people need agreements, formal or
informal,
as to where to do what mode. Otherwise it starts sounding like CB...
And no,
despite no code licenses and "extra lite" licensees, ham radio doesn't
sound anything
like CB except for a few spots (14313) and even that is by informal
agreement.

Although not a regular in this forum (any more, any way) John is well
known in various CB radio and scanner NG's, usually for his overwhelming desire
to be king of the hill and lack of regard for how he gets there.

His "debating" techniques have cost him a couple of ISP's, I understand,
and got him in trouble with local law enforcement. He was also listowner of a
fairly well populated Yahoo group that went ka-put due to his escapades.

As you can see, Dee, he's got a bit of the same "See, I Know More Than
You" streak in him that Lennie has...

Welcome back, John. Worn out your welcome elsewhere again...?!?!

Remember who manufactured a very libelous "home page" on AOL?

Lasted for all of three days before AOL removed it. Nearly removed nursie from its subscribers, too. :-)

> As you can see, Dee, he's got a bit of the same "See, I Know More Than
>You" streak in him that Lennie has...

Poor baby. Nursie has to understand that MANY know more than he
does. :-)

There's the "MARS is amateur radio" claim...which remains just a
claim since the DoD defines MARS, not the FCC or ARRL.

No one goes to as great lengths as the gunnery nurse in trying to
damn others. Nursie DOES have top honors in that. :-)

Your intelligence is "THAT simple." :-)

If MARS required amateur radio to exist, then it would not need the military documents creating it and regulating it.

The FCC doesn't define MARS or regulate MARS or anything else about MARS.

MARS is MILITARY. The Department of Defense has explained it.

Have you found out what an AN/FRC-93 is yet?

[we know you haven't seen, let alone read DoD Directive 4650.2, much less NTP 8(C)...quit trying to bluff your way out of this]

MARS is NOT amateur radio.

[except in your imagination...]

Dismissed.

Always a problem to the well-endowed...

> No Amateur Radio = No MARS.
>
> Your strict dependence upon published directives would have made you very
>popular in the Third Reich, Lennie, but it's no good here.

Okay, so explain the 35 print pages required by Part 97, Title 47 C.F.R.

Nowhere in those printed - and very official - U.S. amateur radio
regulations
is MARS (Military Affiliate Radio System) defined by the FCC.

MARS isn't authorized to use amateur radio frequencies.

The "M" in MARS stands for MILITARY.

MARS exists through DoD Directive 4650.2 with particular military
service branch regulations AR 25-6, AFI 33-106, USN NTP8(C).

MARS nets and stations can communicate directly with other
MARS stations and with federal authorities using military radio
equipment and military radio personnel.

Without Directive 4650.2 there would be NO MARS.

MARS is NOT amateur radio.

> Now...YOU brought up my USMC service and made insinuating comments
>vis-a-vis same. I gave you MORE than enough information on now to verify that

>which YOU claim is UNverified.

No. Tell us all about those "hostile action" incidents, the where and when.

No one can "verify" things that don't exist. Outside of your imagination, that is... :-)

> So NOW you're ducking out from acknowedging the FACTS.

"Facts?" Fantasy facts?

Of course. If you imagined it, it HAPPENED! :-)

> Putz, liar AND coward ! ! ! !

Tsk, tsk, tsk... still acting the schoolyard bully all the way to your mid-life crisis...:-)

>
> Your intelligence is "THAT simple."
>
> If MARS required amateur radio to exist, then it would not need the
> military documents creating it and regulating it.

Sure it would.

Any authorized interaction between the Armed Forces and any civilian entity requires that it be authorized by appropriate headquarters. The Red Cross, Civil Air Patrol, US Coast Guard Auxiliary, etc etc are "civilian" organizations, yet there are MILITARY regulations that enable interaction between the Armed Forces and those entities.

Are you telling me that those organizations wouldn't exist without a "military document creating and regulating it"...?!?!

I understand that YOUR point is that MARS is a program promulgated BY the Armed Forces.

The FACTS are that MARS needs those civilian operators to make the program work.

The FACTS are that almost all of the persons running the program are NOT military personnel and are NOT on the payroll of DoD to be there.

> The FCC doesn't define MARS or regulate MARS or anything else
> about MARS.

It doesn't have to.

> MARS is MILITARY. The Department of Defense has explained it.

Sure it is.

And without licensed Amateur Radio operators to "staff" the program with, it wouldn't be able to function. It would be "defunct".

> Have you found out what an AN/FRC-93 is yet?

Have you been issued an NNN0xxx/T callsign yet?

How about a KG6xxx callsign?

How does it pertain to Amateur Radio and it's interaction with the MARS program...???

Why do you find it necessary to try and redirect when you know you are in a corner?

> [we know you haven't seen, let alone read DoD Directive 4650.2,
> much less NTP 8(C)...quit trying to bluff your way out of this]

I am not trying to "bluff" my way "out" of anything, Sir Scumbag.

No Amateur Radio = No MARS.

It really is THAT simple.

> MARS is NOT amateur radio.
>
> [except in your imagination...]
>
> Dismissed.

Not by a documented pathological liar like you, Lennie. Not in this life or forum, nor any other.

Now...How's that MARS application coming?

Passed that "Extra Lite" out of the box yet?

How about that Part 15-legal station you were going to put on 20 meters?

Or perhaps you'd like to regale us with more of your exploits as a student pilot in the 50's? You certainly got your tailed rocked on when you tried ot demonstrate your knowledge about current NAVAID systems and CAP's active aircraft inventory, yet you continue to denigrate my licensure as a pilot. That's available on the Internet.

Then we can move along to your investigation as to wheter or not my "service claims" are valid or not. You've certainly been provided more than enough information to get THAT right by now. That's available on the Internet, too.

And while you're at it, please tell us once again how many pieces of traffic YOU were directly responsible for handling in 1953 while assigned as a rear area radio clerk? "1.2 million", was it...?!?!?

Putz.

Various? There is only one CB newsgroup, rec.radio.cb - and if I'm well-known there it's because of telling certain regulars there what I thought of their blatant disregard for Part 95.

Any of the folks in the scanner newsgroups who know me, know me from material published in Popular Communications, or from when I was a member of NYSING, or both.

> His "debating" techniques have cost him a couple of ISP's, I understand,
>and got him in trouble with local law enforcement.

That what KF2TI told you? That's bull. I've never had an account yanked by an ISP, nor had any trouble with local law enforcement. On the other hand, I've been known to work *with* local law enforcement on occasion.

> He was also listowner of a
>fairly well populated Yahoo group that went ka-put due to his escapades.

At the time I owned it, it was not a Yahoo group, it was a onelist.com group, and it did not go kaput - it became a Yahoo group when onelist.com and Yahoo merged, and it still exists - the current list owner is Al Stern of Satellite Beach, Florida who is an old buddy of mine from the #monitor channel on IRCNet.

he only reason you're pissed about all of this is that I refused to let you and KF2TI join that list, which I did because after observing your antics in rec.radio.amateur.policy - particularly your penchant for trading personal attacks with Len Anderson and others in this NG, which has been going on for years now - I decided I did not want people of your ilk polluting the Radiomonitors list.

> As you can see, Dee, he's got a bit of the same "See, I Know More Than
>You" streak in him that Lennie has...

If you wish to draw that conclusion based on the fact that I responded to a request for information by posting information, it's no skin off my fanny, Steve. Besides, somebody in this NG has to post something besides personal attacks on other users, or the whole NG will consist of nothing but half a dozen trolls such as yourself, and the hobby deserves better than that.

> Welcome back, John. Worn out your welcome elsewhere again...?!?!

Actually, I just switched to a different ISP, which has an NNTP
server, among other things that my old ISP did not (the old one was a
dialup and an e-mail account, period).

AOL thought it was VERY libelous and cancelled that alternate screen name you used then.

You went ballistic on that "home page" and were clearly deep into libelous personal attack. AOL concurred.

> You are a lair.

A "lair?!?" :-)

Do you imagine yourself in some sort of jungle surrounded by carnivorous animals? :-)

>
> No Amateur Radio = No MARS.

Still incorrect. MARS is MILITARY, not civilian.

Haven't you understood that yet?

Just read DoD Directive 4650.2 and then USN-USMC Communication
Instruction NTP 8(C).

MARS can and does function solely with military personnel.

It's nice that amateurs have volunteered to help in MARS, but MARS
is a MILITARY radio service. By definition.

Source record: 92450

Almost 10 years ago I got my Tech Plus license. Figuring I'd play it safe, I put the original in a 'safe' place, and have copies of it here and there. Now, I want to upgrade instead of simply renewing. Two questions: Is a copy sufficient when I go for the exams? (That 'safe' place remains safe from ever finding it again, I think). Is the 'Plus' in the Tech Plus, sufficient proof that I have taken and passed the 5 wpm code?

Thanks.

The United States government put up a web page referencing nursie's "military career?!?" [I think not...can't find one]

The Veterans Administration has a web page referencing the "hero of hostile actions?!?" [I think not...can't find one]

Has ANY government agency put up a web page all about nursie, the "hero of hostile actions?!?" [I think not...not there]

"Provided more than enough information?" Hardly. We don't know squat about the date and location of those "hostile actions."

Lots of bluff and bluster, shouting, hollering, and nursie name-calling. Tsk, tsk, tsk...

> And while you're at it, please tell us once again how many pieces of
>traffic YOU were directly responsible for handling in 1953 while assigned as
>a rear area radio clerk? "1.2 million", was it...?!?!?

Now, now, you're still doing the personal attack thing. I was never a "radio clerk." :-)

MOS 281.6, Microwave Radio Relay Operations and Maintenance Supervisor [the dot-six in that old MOS nomenclature stood for supervisor]. Also brevet to Fixed Station Operations and Maintenance Supervisor as a team leader at ADA before the microwave equipment arrived. The Pacific Stars & Stripes military newspaper checked up on that when they did an interview on me for their 10 November 2002 edition (in their archives section on the 'web).

ADA relayed about 220 thousand TTY messages a month in 1955. Since ADA had 36 to 43 transmitters on at any one time, some of them SSB with 8 to 12 TTY circuits and three transmitters were doing 4-TTY-channel time-division multiplexing, the total estimate I wrote long ago is still an estimate based on 9-out-of-12 days at the station and 8 hour shifts. Any way you slice it, nursie, that's a LOT of message traffic...and every shift supervisor is responsible for keeping those messages going out.

Had you ever done any military communications, you would understand that. But, you didn't, so you don't. All you can do is try to intimidate others, bluff and bluster to make yourself far more important than you were in real life. Not good, not healthy to do that, nursie.

But, you can't control yourself, can you? [no emotional stability] Lack of control is very bad for emergency work.

Memorable. And I'm not refering to Memorial Day.

MARS exists as a MILITARY radio service. It can continue to
do so on its own, without civilian volunteers.

The FCC doesn't define MARS, never has. MARS is MILITARY.

>>> Now...YOU brought up my USMC service and made insinuating comments
>>>vis-a-vis same. I gave you MORE than enough information on now to verify

No. We really don't know what nursie did with any credence.

The "hostile action" brags have never ever been detailed as to
place and date.

> Still waiting for you to substantiate THAT claim!

It's not up to me to "verify" YOUR bragging.

You made the "hostile action" claim. YOU reference it.

>>> Putz, liar AND coward ! ! ! !
>>
>> Tsk, tsk, tsk... still acting the schoolyard bully all the way to
>> your mid-life crisis.
>
> It ain't bullying if it's true.

Okay, verify, by references and proof, those "hostile actions."

Your imagination doesn't count. [nature abhors a vacuum...]

You really can't verify what you did through any third-party
sources, can you?

All you do is demand others "call up the VA" or some other
bogus source, never supplying any factual data or any
names of associated parties who were also in those
"hostile actions."

All you can do in response is holler and swear at others,
typical bully behavior.

That doesn't work, doesn't stop anyone else from challenging
your brags.

Memorial Day is coming up. Try to remember the where and
when of those "hostile actions" and then state it in here.

Otherwise, retract that brag of "hostile actions." Memorial
Day is for REAL heroes, not the big-mouth bass jumping for
attention in this little pond.

> You are a putz, you are a liar, and you ARE a coward.

Tsk, tsk, tsk. More hollering and swearing. Wipe off your
monitor, the saliva is running down the faceplate. What
will Mrs. Nursie think?

Nursie is on his usual smearing of snit routine again. :-)

Adell has been - gratefully - not present, leaving only a few
of the PCTAs to attempt attacking others. [he might be
trying to sort out which of the several personalities he's used
in this newsgroup]

>> He was also listowner of a
>>fairly well populated Yahoo group that went ka-put due to his escapades.
>
>At the time I owned it, it was not a Yahoo group, it was a onelist.com

True facts interfere with obsessive hatred. Disagree with him
and you will be added to the top of his snit list. [nothing much
changed in the last 5 or so years]

>he only reason you're pissed about all of this is that I refused to

>deserves better than that.

The hobby DOES deserve better than what they are, but,
according to them, they do no wrong, can never do wrong,
for they are privileged (because they say they are).

This particular newsgrope has become nothing but a giant
flamefest.

Pity that, the forum polluted by those wanting only to FIGHT.

It's worse, actually. The politicians at the FCC want to permit
BPL to continue on and truly pollute HF and low-VHF for ALL,
not just amateurs. The fighters such as nursie only want to
fight, fight, fight with others for newsgrope supremacy, thinking
they will "win" something. They only win emotional candy for
the moment, unable to understand that others don't agree
with them. <shrug>

Add to that the spectre of even more radical revisions with
Part 97 restructuring and the loss of international regulation
on manual telegraphy testing and this newsgroup has become
nothing more than a chat room for a small group nattering
about everything but Policy as They See It.

>> Welcome back, John. Worn out your welcome elsewhere again...?!?!
>
>Actually, I just switched to a different ISP, which has an NNTP
>server, among other things that my old ISP did not (the old one was a
>dialup and an e-mail account, period).

Explanations of what you actually did are irrelevant and just waste your time replying.

I don't think it matters really what anyone says, the "fighters" will manufacture some kind of "cause" and then say their imaginary product is "fact." :-)

On the other hand, Brian Burke (screen name of "BillyBeeper" now) thinks that the PCTA are becoming tired and impotent. There IS something to that faced with the revision of 25.5 and their inability to control the newsgroup content.

The tide is turning but the old cliches' of the PCTA are littering the beach, drying up instead of washing back out to sea, losing their threats, imprecations, and "superiority" (as amateur telegraphers).

Have fun here if you can, John. :-)

Actually, if you were honest (and why start now, John...?!?!) I was already a "member" of your OneList (later YahooGroup) list and you deleted my membership as a reprecussion of THIS newsgroup...NOT anything that was said in the other. As a matter of fact, I received several e mails from others of the scanner list which stated that exercising your "clout" in such a manner is routine.

Guess they knew you pretty well...eh?

Unless the archives have been deleted (which can be done with YahooGroups) I imagine what few exchanges that ever transpired are still there.

>> As you can see, Dee, he's got a bit of the same "See, I Know More Than

>of nothing but half a dozen trolls such as yourself, and the hobby
>deserves better than that.

If this newsgroup actually DID do anything about Amateur Radio's policies, John, you might be right. Several of us have submitted occassional comments to FCC NPRMs, etc, but nothing as a group, and certainly not as the result of any concerted, responsible effort.

As for "personal attacks", well, you've got a long history of that, predating anything I have ever said or done in this forum. Please don't be shy about taking a bow when it's due, John.

And now that you're back with us, it a half dozen plus one.

>
> Poor baby. A simple mistake and you go BALLISTIC!

"Ballistic"...?!?!

Hardly. I simply find it incomrehensible that an alleged "professional"
in electronics makes such idiotic "errors" as you tried to pass your escapade
off as.

It only served to substantiate my position that you are not only the liar
I had suggested you were (witness your offer to do one thing but then do
another), but then you compounded it by claiming it was an "error"...One that
any 10 year old with a week's worth of web-surfing experience would ahve not
made.

> It's nice that amateurs have volunteered to help in MARS, but MARS
> is a MILITARY radio service. By definition.

It is a program sponsored by the Armed Forces, "staffed", for the most
part, by civilian volunteers.

No Amateur Radio = No MARS.

It really is THAT simple

The bluffing, bluster, shouting and hollering are yours, Lennie.

Guess you'd rather get your nose rubbed in your weakness and inability to
confirm my having served in the Armed Forces than to acutally do the research
and find out that you were, once again, proven wrong.

>> And while you're at it, please tell us once again how many pieces of

>>a rear area radio clerk? "1.2 million", was it...?!?!?
>
> Now, now, you're still doing the personal attack thing. I was never
> a "radio clerk."

Sure you were.

You claimed that YOU were responsible for handling "1.2 million" pieces of traffic during your tenure at ADA.

Technicians and maintenence personnel do not handle traffic. They fix the boxes that the radio clerks use to pass the traffic.

> MOS 281.6, Microwave Radio Relay Operations and Maintenance...(SNIP)

YaddaYaddaYadda.

If YOU handled the traffic, then you are misleading us as to what your real MOS was.

> Supervisor [the dot-six in that old MOS nomenclature stood for
> supervisor].....(SNIP TO>>>)

> I wrote long ago is still an estimate based on 9-out-of-12 days at
> the station and 8 hour shifts. Any way you slice it, nursie, that's
> a LOT of message traffic...and every shift supervisor is responsible
> for keeping those messages going out.

Still doesn't wash Lennie.

You were either responsible for the maintenence of the equipment or you were responsible for the operation of it, ie: traffic handling.

> Had you ever done any military communications, you would under-
> stand that. But, you didn't, so you don't.

I did and I do.

You were either a radio clerk or a technician...now which was it?

> All you can do is try to
> intimidate others, bluff and bluster to make yourself far more
> important than you were in real life. Not good, not healthy to do
> that, nursie.

Hey, Lennie...YOU set the precedent, fella! That paragraph RIGHT THERE sums up your entire RRAP career.

> But, you can't control yourself, can you? [no emotional stability]
> Lack of control is very bad for emergency work.
>
> Memorable. And I'm not refering to Memorial Day.

What's memorable is your lack of ability to follow your own mantra, Lennie.

> MARS exists as a MILITARY radio service. It can continue to
> do so on its own, without civilian volunteers.

Oh...Really?

Lennie, how many MARSGRAMS have you ever delivered?

How many phonepatches have you conducted for AFLOAT units?

How many MARSGRAMS have you initiated?

I ask because I had the opportunity to handle a LOT of MARSGRAMS over the years, and almost every one I sent wound up being delivered by a volunteer member. I know this since most of the ones I ever sent usually generated a reply message...And the initiating station was almost always an individual's station.

Also, I had the opportunity to be on the AFLOAT end of the patches. Don't suppose you'd care to guess who handled the Stateside end of the patches, would you?

> The FCC doesn't define MARS, never has. MARS is MILITARY.

I am still trying to figure out why you keep trying to reference the FCC when I've never said WHAT the FCC's "definition" is.

>> Still waiting for you to substantiate THAT claim!
>
> It's not up to me to "verify" YOUR bragging.
>
> You made the "hostile action" claim. YOU reference it.

Who's talking about "hostile action", Lennie...?!?! YOU said that I never served PERIOD. That was only a few days ago.

Afterall I WAS able to "substantiate" some of YOUR claims about your "CV"...it didn't take much...Your windiness and brogaddacio led me to the doorstep of people I knew and who could verify your claims.

It wasn't a pretty picture.

> All you do is demand others "call up the VA" or some other
> bogus source, never supplying any factual data or any
> names of associated parties who were also in those

> Day is for REAL heroes, not the big-mouth bass jumping for
> attention in this little pond.

I do remember who that day is for, Lennie.

It's NOT for rear-area radio clerks who tried to embellish thier one-tour
Army hitch on the sacrifices of men who died three years before you were even
in Boot Camp.

Specifically one Leonard H. Anderson.

>> You are a putz, you are a liar, and you ARE a coward.

>>
>snip

> The FACTS are that MARS needs those civilian operators to make the program
>work.

For interest's sake, I did a bit of research on the Web, and found the
following information on the home page for the US Military Alliliate
Radio System:

http://www.asc.army.mil/mars/default.htm

******

"MARS is a Department of Defense sponsored program, established as a
separately managed and operated program by the Army, Navy, and Air
Force. The program consists of licensed amateur radio operators who
are interested in military communications on a local, national, and
international basis as an adjunct to normal communications."

"MARS has a long and proud history of providing world-wide auxiliary
emergency communications during times of need. The combined three
service MARS programs (Army, Air Force, and Navy-Marine Corps)
volunteer force of over 5,000 dedicated and skilled amateur radio
operators is the backbone of the MARS program. The benefit of MARS
membership is enjoying an amateur radio hobby through the
ever-expanding horizon of MARS. Our affiliate members' continued
unselfish support of our mission keeps Army MARS Proud, Professional,
and Ready."

Note the phrase "The program consists of licensed Amateur Radio
Operators" above.

******

"How to Join Army MARS

Eligibility

The applicant must -

Be 17 years of age or older. (Signature of parent or legal guardian is required when an applicant is under 18 years of age.)
Be a United States Citizen or resident alien. (Possess a valid amateur radio license issued by the Federal Communications Commission (FCC) or other competent U.S. Authority.)
Possess a station capable of operating on MARS VHF and/or HF frequencies.
Agree to operate a minimum of 12 hours per calendar quarter with 6 hours being on VHF and or HF networks."

Note again the requiremant for participants to be licensed US radio amateurs.

******

"Benefits of Membership

Add to the enjoyment of your amateur radio hobby through the expanded horizon of MARS.

Join a group of dedicated fellow radio amateurs participating in meaningful public service.

Become part of the Army, Navy-Marine Corps, or Air Force MARS worldwide communications system. There are Army MARS stations in Japan, Korea, the Trust Territories, Hawaii, the Virgin Islands, Puerto Rico, Central America, Alaska, Germany, Africa, and the continental United States.

Increase your communications skills and capabilities. Selected correspondence courses in communications - electronics subjects are available free to MARS members from their respective affiliated service after completion of six months active membership. Qualified Army MARS members may apply for such courses at the Army Correspondence Course Program web site.

Operate on specially assigned military radio frequencies in voice, teletype, and packet modes of communications."

Once again, note the references to the amateur radio hobby above.

******

From these paragraphs, and the remainder of valuable information on this web site, I'd conclude that the MARS program relies upon the Amateur community to make it work, as it is currently defined. Without amateur operators, the MARS program would have to affiliated with some other communications group to carry their traffic.

This thread is, however, hopelessly mired in a battle over semantics.

Is MARS amateur radio? Well, no, No more so than Amateur Radio is MARS. It is a military radio service, defined and mandated by the military and operating on military frequencies outside of the Amateur bands..

But, without amateur operators to affiliate their communications resources with, the MARS program would not be able to operate as currnetly defined - it exists as a partnership between the military operators and their 5,000-plus volunteer Amateur operator counterparts.

Quite similar to the CFARS program in Canada, and perhaps others around the world.

Just my $.02

Yes - even if the license is expired. Any Novice license document, Technician Plus license document, or before-February-14-1991 Technician license document carries credit for Element 1 (5 wpm code).

So all you need for a General is your Tech Plus license and a passing grade on Element 3 (General written).

Try to find the original though as it is always a good idea to take both the original and a copy if possible. Be sure you have a spare copy at home as the VEs will keep one to attach to your upgrade application.

writes:

>> The FACTS are that MARS needs those civilian operators to make the
>>program work.

Actually, no. :-) See the Army Communicator write-up on "Grecian
Firebolt 2002" at -

www.gordon.army.mil/AC/Wntr02/MARS.htm

Army Communicator is the Signal Center's quarterly magazine,
distributed only to Signal Corps folks but archives are open to the
public on the 'net.

>For interest's sake, I did a bit of research on the Web, and found the
>following information on the home page for the US Military Alliliate
>Radio System:
>
>http://www.asc.army.mil/mars/default.htm

That one is maintained at Fort Huachuca, AZ, the NETCOM Hq
for MARS for the U.S. Army. For the other branches -

www.dtic.mil/whs/directives/corres/pdf/d46502_01298/d46502p.pdf

for the current (21 Nov 03) issue of Directive 4650.2 from DoD, PDF
version. That Directive spells it out for all U.S. military branches.

http://public.afca.af.mil/LIBRARY/MARS.HTM

for the Scott AFB USAF Communications Agency Hq.

http://www.navymars.org/ for USN-USMC

There's a bunch more, such as a brief mention on the bottom half of
page 128 of "Vietnam studies Communications-Electronics 1962-1970"
monograph by Major General Rienzi at the U.S. Army Center For
Military History (CMH). That shows a photo of an AN/FRC-93 in use
in Vietnam, making a phone patch back to the states. Rienzi says
that 42,000 phone patches a month were being done by MARS
stations in Vietnam at the close of that period. That's an excellent
record and something to be proud of, but it was also over 30 years
ago when the U.S. had about a third of a million military serving in
southeast Asia.

Closer to date, Grecian Firebolt 2002 was an exercise of 600 MARS
stations (all branches of the military) simulating a terrorist attack on

the USA. That is reported to have gone off well in liason with several civilian emergency services. [Army Communicator issue cited] The article doesn't specify that civilians were involved although it mentioned several Guard units (National and Air, not independent state "guard" units).

The quick timeline of MARS -

1925 AARS or Army Amateur Radio Service organized, small, Army only, never more than 5600 up to 7 Dec 41.
1941-1946 pause for WW2.
1946 AARS resumes operation.
1948 Reorganization, includes new separate AF, renamed MARS.
1962 USN-USMC joins MARS, all military branches now in MARS.

In the overall U.S. military picture, MARS was never a significant communications service. It was, in the '65 to '70 period, very good as a morale-boosting service for servicepeople such as those in Vietnam (who could get to a 'Nam MARS station...not always possible). MARS facilities were never required to support, let alone supplant the very large communications structure of the U.S. military and most MARS stations used (to be delicate) cast-offs for their station equipments. The exception was the procurement of the AN/FRC-93 HF transceiver, the commercial version (full crystal bank) of the Collins KWM2. [I have the TM on it and can tell where to get it for free PDF download...even for Canadians... :-)]

The Army Communicator is a good source of information on U.S. military land radios and is open to public access. So are older issues of Signal (monthly) published by AFCEA at that website. Army Communicator is found at Fort Gordon, GA, website at

http://www.gordon.army.mil/

AFCA (Air Force Communications Agency) has a nice website out of Scott AFB (near St. Louis, on the Illinois side of the Mississippi). There's a nice small museum there at the public lobby of AFCA but their standout is their publications. For an overall history of Air Force oriented communications, the free download of "From Flares To Satellites" is most informative, well-written, good illustrations of past to present. [rather a large download, good for a coffee break while it rolls in]

Note: At the end of the 1950s, the USAF started phasing into taking over of land-based HF communications while the US Army phased slowly into implementing the DSN (Digital Switched Network) and higher-speed data communications. Army was still the mainstay of field communications by radio in southeast Asia from Saigon to all other parts by everything from UHF radio relay through underwater cable to troposcatter relay for 200 to 300 mile shoots over all terrain. Army pioneered the communications satellite use on a 24-hour, multi-channel basis in the mid-60s,

linking southeast Asia with Hawaii. Advancement, breaking new ground. Things changing, new paradigms in all communications.

Something to remember on our national holiday of Memorial.

>Radio "career".

"Transleate?!?" :-)

"Career in amateurism" is necessary?!?

Poor nursie, still hurting. Never did work in military communications, therefore no one else is worth anything... :-)

By Directive, by definition, MARS is MILITARY, not amateur.

MARS can stand on its own, netting with other government radio services.

Yes, MARS did good for morale using lots of civilian amateur radio volunteers, doing phone patches from places like Vietnam and other overseas locations. That time has passed with the advent of the Internet and ability to access the 'net in most world locations. That's been proven in the second Gulf War.

MARS is NOT amateur radio.

Try to get used to it. Get another flag to wave.

Thanks for the replies guys. I did go in there cold this morning, and flubbed the dub for General. What was good about 10 years ago isn't good enough today. I was surprised by all the questions about radiation protection, some digital questions, plus probably a few that I simply forgot. Can't say I'm too disappointed as what I feel I missed was all brand new to me (wish I could have seen which questions I missed, but guess that is verboten). As long as I'm studying, guess I'll practice the code again too. CW was neat, though I haven't touched a key in over seven years and couldn't copy today if I tried. (I'm told that code comes back rather quickly--is that so?) Another surprise was the $12 to take the test. Wasn't it about $3 or so 10 years ago? Anyway the interest level has gone back up, so I'll be back.

Cheers.

Actually, yes.

Withdrawl of Amatuer assets would result in an overall loss that would cripple the program. Without those participants there'd be nothing to be "affiliated" with.

> Something to remember on our national holiday of Memorial.

It's enlightening to see what you consider memorable, considering that you seem to forget honor and respect the rest of the year.

Thanks for the historical piece on MARS. Your cut-and-paste skills are at an all time high.

No Amatuer Radio = No MARS.

It really is THAT simple.

The VEs simply don't know what questions you missed. Telling you that it was question 4, for example, doesn't tell you the topic. On one version of the exam, it might be radiation safety and on another it might be band limits.

By the way the question pool canges on July 1 of this year, so either get the current study guide and take the test before then or get the new one and take it after that. Although if you actually learn the material rather than just memorizing the answers, the subjects covered in the pool generally don't change that much so you would still be able to pass if you use the "wrong" study guide.

MARS never worked with "amatuer assets." :-)

You've never read DoD Directive 4650.2 (21 Nov 03) have you?

MARS was never created, implemented, or directed to be a PART
of regular military tactical or strategic communications. It was
created - essentially - for morale and public relations activities, a
link between civilians and military. Over the years the role of MARS
has shifted from the morale and PR aspect to being a "go-between"
between established military communications and government
emergency and aid agencies.

> No Amatuer Radio = No MARS.

Again, MARS never worked with "amatuer radio." :-)

Your original assertion was (see thread title) "MARS is amateur
radio."

That original assertion is WRONG.

MARS is (obviously) MILITARY.

MARS was originally created BY the military. It exists today on its own as organic with the military structure and can function by itself. The 2002 exercise of Grecian Firebolt over four weeks back two years ago proved that.

You try to backpedal by changing your assertion that "No amateur radio = no MARS." That too is WRONG.

MARS hasn't had the word "amateur" in its acronym since 1948.

The FCC didn't create MARS nor does it regulate it. Department of Defense authorizes MARS (see Directive 4650.2).

> It really is THAT simple.

Yes, what I've explained IS simple...but you REFUSE to accept reality outside your imagination. Twice, really, first in the original assertion and then in the revised form, both of which are incorrect. You stubbornly insist you are right, almost in outrage (once again misspelling "amateur" twice, as done in previous postings).

That's a sign of a disordered mind (along with refusal to accept reality and constant displayed sociopathy). Get mental help.

Hello, Ron

Dee had an excellent answer concerning theory. The reality is that if you have a good grasp of theory, you can miss a lot of the other stuff (like band edges) and still pass quite handily.

Code does come back; a lot has to do with what speed you obtained in the past. I've seen it posted (but am not sure, myself) that if you got past 10 or 12 words per minute in the past, you'll be rusty - but it comes back quickly. I had, in the past, memorized the land-line morse and even used it; however, I was using a mental look-up table for the characters that were different. I have totally forgotten it (with the exception of the letters "c" and "q" LOL). First licensed as a novice in 1962, I obtained my extra and commercial telegraph (2nd class) in 1966. In 1967 I copied, without any errors, 40 words per minute cw on a typewriter. My last cw contact was either late 1969 or early 1970, just before I left the service. I let my licenses expire.

I decided to get my amateur license back in 1993. I found out when and where the test was given (the Rochester Amateur Radio Association starts in the fall and ends sometime around May or June, I'm not sure) about 5 hours before the test. I had neither sent nor received Morse in well over twenty years. I passed my extra. It wasn't pretty (likely no more than 15 to 20 characters/numbers in a row), but was enough to answer the questions. After that, I wrote some software to send and receive Morse. Not wishing to debug

at 15 or 20 words per minute, the writing and debugging (and trying) the software got me up a bit. I'm not back to 50 over the air and perfect copy at 40, but would likely have little trouble at 30. Regardless, if you have copied cw before, it will come back. More rapidly if you had gotten to 12 words per minute or higher. If you still know all the letter/number/prosigns/punctuation, I can assure you it will come back quite quickly.

Best regards from Rochester, NY
Jim

> MARS hasn't had the word "amateur" in its acronym since 1948.

Doesn't matter.

In order to accomplish it's tasked goals, MARS needs those lincesed
Amateurs in order to function.

> The FCC didn't create MARS nor does it regulate it. Department
> of Defense authorizes MARS (see Directive 4650.2).

Why do you keep trying to make an issue of this, Lennie? I've never
mentioned the FCC in any of these exchanges?

>> It really is THAT simple.
>
> Yes, what I've explained IS simple...but you REFUSE to accept
> reality outside your imagination. Twice, really, first in the original
> assertion and then in the revised form, both of which are incorrect.
> You stubbornly insist you are right, almost in outrage (once again
> misspelling "amateur" twice, as done in previous postings).

You've only quoted from published manuals and directives. It still does
not accurately reflect the true character of the MARS programs.

There's nothing INaccurate in what you've QUOTED when you've quoted it,
it's just that YOU refuse to accept that CURRENT MARS PRACTICE AND NEEDS are
DEPENDENT upon LICENSED RADIO AMATEURS to fulfill.

> That's a sign of a disordered mind (along with refusal to accept
> reality and constant displayed sociopathy). Get mental help.

What YOU have demonstrated is that YOU are trying to express an opinion
based upon purely theoretical or stricty "by the book" definitions and DO NOT
understand the actual functionings of ANY of the programs.

I again ask you how many MARSGRAMS have YOU processed?

How many phonepatches for AFLOAT units have you ran?

How's that Navy-Marine Corps MARS application going?

Please, Lennie...show us what PRACTICAL EXPERIENCE you have in ANY MARS program....Of course you can always regale us with your exploits of 63 years ago...

Steve, K4YZ

You wrote "amatuer" twice instead of the proper word "amateur."

Neither MARS nor the FCC has used "amatuers."

You have a near-constant tendency to misspell "amateur" in the
haste you seem to have (or possibly outrage, anger) to attempt
"cutting me off at the knees." :-)

>> You've never read DoD Directive 4650.2 (21 Nov 03) have you?
>
> You've never been a member of those programs and have PRACTICAL
>EXPERIENCE in what makes them tick, have you...?!?!?

Actually, I've operated one MARS transmitter allowed at the ADA
site long ago. Otherwise, no, I've never "operated MARS."

Closest I got to interplanetary communications was with the ALSEP
stations placed on the moon. Did supervise unmanned spacecraft
assembly that (eventually) orbited Mars.

On Terra, I've not been required to be an attorney of any kind in
reading and understanding of various laws from the government,
nor did I need to be any kind of commissioned officer in the
military to read and understand military specifications.

Not at all.

You've said "MARS is amateur radio."

That's false. MARS is MILITARY.

>>> No Amatuer Radio = No MARS.
>>
>> Again, MARS never worked with "amatuer radio."
>
> And again, your ignorance is showing!

MARS likes to get volunteers from amateur radio, NOT "amatuer radio."

There's no such thing as "amatuer radio." :-)

>> Your original assertion was (see thread title) "MARS is amateur
>> radio."
>>
>> That original assertion is WRONG.
>
> That you cannot think in the abstract is flamingly obvious!

I'd say it is a case of you not being able to "think" at all.

MARS is MILITARY by DoD Directive, by regulations from all
three military branches.

The FCC doesn't define MARS, doesn't and cannot regulate it.

>> MARS is (obviously) MILITARY.
>
> A "military" program that DEPENDS upon licnesed Amateurs to run.

No. MARS is "run" by military personnel. U.S. Army MARS Hq
is NETCOM at Fort Huachuca, AZ. They use military radio
equipment for MARS there.

>> MARS was originally created BY the military. It exists today on its
>> own as organic with the military structure and can function by

>
> Doesn't matter.

It did to the U.S. Army. It created the predecessor of MARS in
the AARS or Army Amateur Radio Service in 1925. Newly-
created USAF joined in 1948 and the AARS was renamed
MARS.

> In order to accomplish it's tasked goals, MARS needs those lincesed
>Amateurs in order to function.

MARS doesn't use "lincesed amateurs."

VOLUNTEERS for MARS operations come from "licensed amateurs."

>> The FCC didn't create MARS nor does it regulate it. Department
>> of Defense authorizes MARS (see Directive 4650.2).
>
> Why do you keep trying to make an issue of this, Lennie? I've never
>mentioned the FCC in any of these exchanges?

MARS is MILITARY.

Radio amateurs are licensed (not "lincesed") by the FCC. FCC
can only license (not "lincese") CIVIL radio, not military.

>

Your "reflections on true character" exist only in your mind.

MARS is adequately described by MILITARY directives and
regulations. Some MARS operations have been written up in
the Army Center for Military History.

If you wish to imagine that your volunteerism with any MARS
makes you a part of the military service, that is just your
imagination working too hard.

> There's nothing INaccurate in what you've QUOTED when you've quoted it,
>it's just that YOU refuse to accept that CURRENT MARS PRACTICE AND NEEDS >are
DEPENDENT upon LICENSED RADIO AMATEURS to fulfill.

No again. MARS can operate by itself, using just military personnel.

It did that in Grecian Thunderbolt 2002 for four weeks according to
the quarterly Army Communicator.

> What YOU have demonstrated is that YOU are trying to express an opinion
>based upon purely theoretical or stricty "by the book" definitions and DO NOT
>understand the actual functionings of ANY of the programs.

No. I've merely stated the reality of MARS along with some of its
known history.

As a licensed radio amateur (not a "lincesed" one) you have to
both operate and conduct yourself "by the book" of Part 97 in order
to retain your amateur radio license (not "lincese") grant.

> I again ask you how many MARSGRAMS have YOU processed?

I've tried to send three of those MARS messages through the
local FEC Hq. MARS detachment. They never got forwarded.
Surface mail was far more reliable. :-)

> How many phonepatches for AFLOAT units have you ran?

"AFLOAT?" Is that some kind of MARS auxilliary? :-)

> How's that Navy-Marine Corps MARS application going?

Why are you so concerned about "applying to Navy MARS?"

I've never said that I wanted to participate in MARS.

> Please, Lennie...show us what PRACTICAL EXPERIENCE you have in ANY MARS
>program....Of course you can always regale us with your exploits of 63 years
>ago...

"Regale exploits of 63 years ago?!?" :-)

63 years ago would make it the year 1941. I was 8 years
old then.

You didn't exist in 1941. Your parents were never able
to bear children in 1941.

They should have stayed with that ability. :-)

Temper fry...

Why do you need disability if you've been rehabilitated?

Why do you draw two checks, but only work for one of them?

I see.

You make idiotic replies based solely upon a typo.

Which makes you even MORE idiotic, considering your alleged education.

> VOLUNTEERS for MARS operations come from "licensed amateurs."

So other than your attempt to "undermine" my points based upon a
transposed letter, we can again assume that you agree with me that MARS depends
upon these licensed Amateurs to run the program.

> If you wish to imagine that your volunteerism with any MARS
> makes you a part of the military service, that is just your
> imagination working too hard.

If YOU wish to try and suppose that, then you are welcome to.

It seems to me that you have an unwavering hatred of anyone who's done
anything you HAVEN'T done, or HAS done, only better.

>> I again ask you how many MARSGRAMS have YOU processed?

Uh huh.

>> How many phonepatches for AFLOAT units have you ran?
>
> "AFLOAT?" Is that some kind of MARS auxilliary?

Yet another demosntration of your lack of experience.

>> How's that Navy-Marine Corps MARS application going?
>
> Why are you so concerned about "applying to Navy MARS?"

You said that N/MC MARS regualtions didn't specify a need for licensure
in the Amateur Radio Service to be a member. You said you could do it. I was
waiting to see if you could/would, if only to prove you could.

You didn't, obviously, which is exactly what I would expect of you.

A lot of blustery brogadaccio with no net effect.

> I've never said that I wanted to participate in MARS.

Under current circumstances, you won't be allowed to.

Oh? You know my parents? You know when they married? You know that I am
the youngest/oldest of the family?

Forgive my math error. I forgive you many of yours. None the less, it
remains that the ONLY "military" communications experience you have was over
half a century ago. NONE of it in any MARS program.

> They should have stayed with that ability.

As should have yours.

Speaking of which, when are we gonna get the scopp on YOUR child rearing
experiences? Still waiting on the source of your background for the assertion
that Amateur licenses should be age-limitied

> Temper fry...

Not here...

>
>So what. I didn't take all of one group and say that it is equal to
>another group, just because there may be a relationship. You did.

"So what", indeed.

YOU said that "MOST" municipal "radio operators" wore police uniforms.

I (accurately) pointed out that that police force is only one segment of
municipal workers that use two-way radios, and do NOT comprise "most" of the
municipal work force.

Also, >>I<< did not make ANY analogy to municipal workers in this or any
other thread.

You did.

Now...try as you might, it's already archived that you did this. Now you are trying to wiggle out of it.

STILL sucks to be you.

>> >> YOU said that MOST "municipal radio operators (wore) police >uniforms".

The Armenian judges gave this a 9.8 on the Olympic Troll-O-Meter, but they were over-ruled by the umpires in instant replay, who award it a 1.4.

The Armenian judges lodged a formal protest!

It was sufficiently trollish, of course, but way too obvious. It was poorly written, poorly executed, and was so incredibly lame as to lack the true drawing power of a really masterful troll.

Maybe as high as a 1.6 for the intense stupidity of the premise, but a 9.8? Never!

The Armenian judges tear their hair out, throw their balalaikas down in dismay, and perform the traditional Armenian Dismay Chant!

They demand a recount!

Yes, I and can see a lot of 2 meter gear being sold/modified for use - where?

I personally see no need for Morse, but do have a concern about the continuing movement to reduce technical requirements. This would include grandfathering techs to general. Folks have been killed trying to erect towers. Perhaps everyone believes that if you have a license you actually know something.

Just my opinion ;)

Best regards from Rochester, NY

Brian, don't try to discuss anything with nursie. He/she will get
it wrong and waste anothe rmonth trying to state he/she is right
when he/she is not right. :-)

>Steve, I know exactly what NVIS is for.
>
>I was trained by the inventor of the whip-tilt adapter at Hurlburt Field, FL.

NVIS (pronounced "neviss") has been in U.S. military HF-low-VHF doctrine for communications for over two decades. Nursie never worked any military communications so is unaware of that.

Nursie just learned about NVIS from reading this newsgroup. :-)

Nursie failed to provide a single government document name or other identification in trying to argue that "MARS is amateur radio" and will now try to "prove" he/she is right about NVIS, whatever he/she says. :-)

MARS is a military radio service. Has always been so since 1925.

We will only see nursie "in Vegas" as a victim on CSI. :-)

[Autopsy report states "unknown causes, might have been due to stubborn insistence of being correct when proved wrong...]

Gil Grissom will eventually determine stubborness as the cause of death. No real mystery to viewers, but interesting lab gadgets and procedures.

Temper fry...

>
>>> "Hi hi" indeed, Brain.
>>>
>>> I am sure you hear quite a bit of laughter.
>>
>>I do.
>
> No doubt.

We are all laughing at your constant refusal to admit your statement ("MARS is amateur radio") was wrong. :-)

>>"Sorry Hans, MARS >>>IS<<< Amateur Radio," you keep insisting.
>
> No, Brian...YOU keep insisting.

The Department of Defense Directive 4650.2 defined it. AR 25-6, AFI 33-106, NTP 8(C) of the three major military branches regulated it. MARS is military.

> I said it metaphorically, and explained my rationale for it.

"Metaphors be with you?" [are you now Luke Skywalker? :-)]

["Use the phors, Luke, use the phors!" - Obi Wan Kenobi]

> You have based a whole months worth of trolls on that, and have yet to
>disporve any other assertion I have made.

Tsk, tsk, tsk. Nursie Luke keeps insisting he/she was right.

MARS is military. The DoD defined it.

> Suvks to be you, PuppetBoy!

"Suvks?" How does one do that? :-)

Admit you are wrong, nursie.

Quit trying to put words in DoD documents that aren't there.

> Now...try as you might, it's already archived that you did this. Now you
>are trying to wiggle out of it.

The only one "trying to wiggle out" is nursie.

Nursie is not man enough to admit it he/she is wrong.

> STILL sucks to be you.

Show us the military documents that define "MARS is amateur radio."

Show us the FCC documents that define "MARS is amateur radio."

You cannot because they don't exist. MARS is a MILITARY radio
service, has always been so since 1925.

You are a puppet of your own mixed-up imagination. Tsk, tsk.

> What a FREAKIN' SCUMBAG you are!
>
> Geeeze-Loweeze, Burke! You sink just a bit lower EVERY TIME YOU POST!

Personal insults don't make you "correct."

MARS is a military radio service. The DoD defines that.

Do you wish to personally insult the Department of Defense?

> Keep laughing, Burkie. It's the only thing funny about you. The rest
>is just plain pitiful.

What is pitiful in here is nursie's stubborn insistence that he/she is
"right" when the government has defined MARS as a military radio
service.

Nursie is WRONG.

Temper fry...

>
> I see.

It's about time... :-)

> You make idiotic replies based solely upon a typo.

I just reply to your idiocy of claiming "MARS is amateur radio."

MARS is military, by directive, by definition.

> Which makes you even MORE idiotic, considering your alleged education.

No. The only thing that could be considered "idiotic" is the vain
hope that you could understand government directives and
regulations.

You do not.

>> VOLUNTEERS for MARS operations come from "licensed amateurs."
>
> So other than your attempt to "undermine" my points based upon a
>transposed letter, we can again assume that you agree with me that MARS

>depends upon these licensed Amateurs to run the program.

No, "we" cannot. MARS has worked okay by itself, such as in
the four-week exercise Grecian Firebolt 2002.

You have constantly stated an obvious error that "MARS is amateur
radio." It is not. MARS is military.

>> If you wish to imagine that your volunteerism with any MARS
>> makes you a part of the military service, that is just your
>> imagination working too hard.
>
> If YOU wish to try and suppose that, then you are welcome to.

You have constantly stated that "MARS is amateur radio."

It is not. MARS is militrary.

Everyone can come to the conclusion that you wish to associate
yourself with the military even though you your military service
was terminated. One way to do that is make the false, misleading
statement that "MARS is amateur radio."

> It seems to me that you have an unwavering hatred of anyone who's done
>anything you HAVEN'T done, or HAS done, only better.

Tsk, tsk, tsk. Correcting a false statement (such as your "MARS
is amateur radio") is nothing involving hatred.

Your stubborn and ill-tempered attempt to convince all that you
are "correct" makes you want to misdirect the "argument" into
personal attacks on others or that others are "incorrect."

MARS is military. By directive, by regulation.

> You said that N/MC MARS regualtions didn't specify a need for licensure
>in the Amateur Radio Service to be a member. You said you could do it. I
>was waiting to see if you could/would, if only to prove you could.

Anyone can look at USN-USMC Communications Instruction
NTP 8(C) and see that for themselves.

No one has to "join" a USN MARS group (by volunteering) in order
to read that.

> You didn't, obviously, which is exactly what I would expect of you.

Incorrect. I found the appropriate USN-USMC regulation, named it,
gave a website for others to get it and read it.

Nothing has changed in the interim.

> A lot of blustery brogadaccio with no net effect.

Nothing of the kind. I presented information.

That information, indeed all sources of MARS information, makes
your statement "MARS is amateur radio" false.

You need to admit your statement was false and carry on.

Refusal to deny your falsity fools no one...except yourself.

>>> Please, Lennie...show us what PRACTICAL EXPERIENCE you have in ANY MARS
>>>program....Of course you can always regale us with your exploits of 63 years
>>>ago...
>>
>> "Regale exploits of 63 years ago?!?" :-)
>>
>> 63 years ago would make it the year 1941. I was 8 years
>> old then.
>>
>> You didn't exist in 1941. Your parents were never able
>> to bear children in 1941.
>
> Oh? You know my parents? You know when they married? You know that I
>am the youngest/oldest of the family?

Tsk, tsk, tsk. Another case of refusing to admit you made another
wrong statement or error in typing. :-)

A marriage ceremony and legal papers thereto is not a requirement
to have a child. [nature and biology have their own rules...]

Are you now saying you are illegitimate? :-)

> Forgive my math error. I forgive you many of yours. None the less, it
>remains that the ONLY "military" communications experience you have was over
>half a century ago. NONE of it in any MARS program.

Incorrect. One of the 43 transmitters at U.S. Army radio station ADA
was allowed second priority in use for the U.S. Army MARS group
attached to Headquarters, United States Forces, Far East in 1953
to 1955. That MARS group (approximately four service personnel)
obtained their own HF radio station moved to Hardy Barracks in
1955 after ADA transmitters had moved from Tsukishima to Kashiwa.
They had a nice multiband beam, rotatable, on a tower at Hardy in
1955.

> Speaking of which, when are we gonna get the scopp on YOUR child rearing
>experiences? Still waiting on the source of your background for the
>assertion that Amateur licenses should be age-limitied

Tsk, tsk, tsk. [the word should be "scoop" not 'scopp.' :-)]

Misdirection. The six-year-old ranting about my Comment on
Docket 98-143 is not a part of this subject thread and has nothing
to do with MARS. That other thread was ranted by long-timers
two years after my Comment had been made public. Sore heads.
Can't let dead horses be, have to beat them incessantly. :-)

"Necro-equine flaggelation." :-)

Temper fry...

You ought to go. Be sure to wear your Civil Air Patrol uniform with
real rank on it.

> Sere you in Vegas, Brain?

I hope not. I'd rather not cross paths with you. I don't think
you're mentally stable.

Or do you have another Boy Scout camp-out that
> weekend?

I don't know what weekend the reunion is, so I don't know if I have a
Scout trip or not. But I did have an enjoyable Memorial Day weekend
camping with all of my sons, without the Scouts.

Do you realize that I was never in a comm career field? Do you know
that I resigned from the BST when I left Illinois, and have not
rejoined MARS at this new location?

What qualifications would I attend under?

4433. What is the deal with the MARS stuff?

Newsgroup: rec.radio.amateur.policy
Date: 2004-06-02 02:07:47 UTC
From: Mike Coslo <mcoslo@adelphia.net>
Message-ID: <a-KdnVBL2-TuqyDdRVn-ug@adelphia.com>
Source record: 92497

After listening to the MARS argument going on in here, I did a little looking around.

If you wish to participate in Army Mars, the qualifications are:

Eligibility

The applicant must -

* Be 17 years of age or older. (Signature of parent or legal guardian is required when an applicant is under 18 years of age.)
* Be a United States Citizen or resident alien. (Possess a valid amateur radio license issued by the Federal Communications Commission (FCC) or other competent U.S. Authority.)
* Possess a station capable of operating on MARS VHF and/or HF frequencies.
* Agree to operate a minimum of 12 hours per calendar quarter with 6 hours being on VHF and or HF networks.

Source: http://www.asc.army.mil/mars/join.htm

Navy/Marine Corps MARS

Eligibility to Join NAVMARCORMARS
An applicant must:

1. be 18 years of age or older,
2. be a United States Citizen or Legal Resident Alien,
3. possess a valid amateur radio license issued by the Federal Communications Commission or other competent U.S. authority -- Technician class or above, and
4. possess a station capable of operating on the MARS HF frequencies (2.0 - 30 Mhz).

Source: http://navymars.org/

Notes from the Washington State Army MARS webpages as to what MARS is:

Welcome to the Washington State Army Military Affiliate Radio System (MARS) Website.

The Military Affiliate Radio System (MARS) is an organization of FCC licensed Amateur radio operators who work with military stations for the furthering of professional communications and electronics. Washington State Army MARS is part of US Army MARS.

Source: http://wa.mars.hfradio.org/

Plus,

MARS is used as a training ground for use of Military communications procedures THe MARS operators provide a pool of trained operators for communications alternatives.

Many people look at MARS as a morale booster for sending MARS grams to military personnel, but besides their obvious use, the messages serve as training for operating skills.

If a person doesn't like or agree with that statement, they can take it up with the website owners, I just paraphrased from them.

I couldn't get to the Air Force MARS site, but the localized AF sites said basically the same thing.

In looking at the purposes and the qualifications for MARS service, a person needs to be a licensed Radio amateur to participate as part of the group that are training their skills in the desired operations.

No doubt that on the Military side of things, there is a trained operator or operators that may or may not be a Ham. I'm not certain of the details of this, but these people are already trained in the protocols needed, so that is just a part of their job. They are the connection point, as it were.

If we try to distill what exactly MARS is, it is a training ground for non-military operators in military technique. These operators in training are licensed Amateurs.

In that light, it becomes pretty evident that the Amateurs are what it is all about. Without licensed Amateur Radio operators there might be an analog of the service, but it would almost certainly be called something else, the the operators would already be trained in operations, which would call into question the need for such a program at all!

The only thing left is to examine the statement that Steve is continuing to get his chops busted over:

"Sorry Hans, MARS >>>IS<<< Amateur Radio,"

Strictly speaking, One is not necessarily a member of MARS by virtue of having an amateur license.

However, if a person was a civilian, they might be hard pressed to be a member unless they had such a license.

Certainly, the amateur radio operator receiving training in the proper traffic handling is the purpose of MARS.

So where one might want Steve to add "a part of" between "is" and "amateur", I would remind everyone that this was in the context of a reply to our good Hans, who has been known to engage in a bit of hyperbole his own good self.

So whatever you think about that statement, It is pretty hard to imagine a program without the intended participants.

In other words.............

- Mike KB3EIA -

I actually have an "amateur" version of the whip-tilt adapter. It uses 3/8x24 threads rather than military fittings. It runs a hamstick or 102" whip in the normal vertical position, and then has an angle off of vertical (probably 15 or 20deg) for NVIS use. It was given to me by a long-time colleague of the inventor.

I suppose now I'll be commanded to provide names and dates, patent numbers, and a portfolio of 8x10 glossies with circles and arrows. But I won't.

After all, "Sorry Hans, MARS >>>IS<<< Amateur Radio." Hi, hi!

70 tree, bb

Yeah, he was the best repairman anbd courier boy to the cashew capital
of Africa, where they send the dregs of the State Dept. Sort of like
how they traded useless baseball players to Japan.

> Moreover, Dave is
> respected, something no one has for Woger.

Say Dave, you writing your own press releases again, or is your shill
LARDASS Lloyd Davies N0VFP the no code tech of over 10 years because
he can't pass 5 wpm morse code doing it for you??

> And Wogie, that ample body weight of yours is unhealthy,

Which ample weight is that? Since I don't even weigh close to 190
pounds, dumbass!
While davey is overweight and his belly makes his wrinkled shirts
strain their buttons. And his butt buddy Bertie is a real fatass, he
looked like he needed a wide load on his fatass in that computer
store.

> especially with your 5' 6" frame.

Too bad I'm taller than 5'6" dumbass.

You are the one 5'6 and 280 pounds, Davies. Want me to post those
christian retreat pics that prove what a fat hog you are?

That's in USN-USMC Communications Instruction NTP 8(C).

Please read the fine print on "who may be a member." :-)

>said basically the same thing.

You can get USAF MARS Air Instructions at AFCA, Air Force Communication
Agency, Scott AFB. The number ID is AFI 33-106.

At the AFCA website you can get a very good history of Air Force
communications titled "From Flares To Satellites." If you don't
mind a 12+ MB download, then I'd recommend it for history of
communications in the Air Force.

> In looking at the purposes and the qualifications for MARS service, a
>person needs to be a licensed Radio amateur to participate as part of

Mostly, I think, they are just having fun playing around. :-)

Like grown-ups playing at being sojers (or swabbies or whatever).

> No doubt that on the Military side of things, there is a trained
>operator or operators that may or may not be a Ham. I'm not certain of
>the details of this, but these people are already trained in the
>protocols needed, so that is just a part of their job. They are the
>connection point, as it were.

You may not be aware of it, but there are a whole bunch of DoD Directives and individual service branch Regulations which are intended PRINCIPALLY for Public Relations work, to promote the "good" side of the military with/without radio amateurs.

If you read the Army Communicator write-up on "Grecial Firebolt 2002" then you will understand that MARS can function quite well on its own without civilian radio amateurs.

DoD has been highlighting Emergency Preparedness since before 11 Sep 01 and MARS, as a Military Affiliate structure, can circumvent some of the normal protocols required with regular, organic military units communicating with other government agencies. "Grecian Firebolt 2002" was one such exercise and involved Guard units as well as MARS.

> If we try to distill what exactly MARS is, it is a training ground for
>non-military operators in military technique. These operators in
>training are licensed Amateurs.

Not for manual telegraphy... :-)

Face it, Mike, MARS is basically for inter-government communications so that military can talk to everyone else in government without going through the usual channels.

Once upon a time, way back three decades ago, MARS was excellent on providing phone patches for Vietnam service personnel in Vietnam being able to talk to their friends and loved ones. MARS was handling about 42,000 such phone patches a month back then.

Was there "training" in making a phone patch? Did MARS teach the civilian members how to dial a telephone? :-)

All the "training" is simply Following Procedure which is amply provided in examples in many different military training manuals. Don't make it into some BFD because it isn't. Procedure is simply organization to get a message through to the recipient by the most expeditious means.

> In that light, it becomes pretty evident that the Amateurs are what it
>is all about.

Public relations.

>Without licensed Amateur Radio operators there might be an
>analog of the service, but it would almost certainly be called something
>else, the the operators would already be trained in operations, which
>would call into question the need for such a program at all!

The "A" in MARS stands for AFFILIATE, not 'amateur.'

Back in 1925 when the U.S. Army organized the immediate predecessor of MARS, the AARS, there weren't many "radio operators" around, especially those with manual telegraphy skills. The psychomotor skill of manual telegraphy does need lots of training

to become proficient at it...but MARS no longer uses manual
telegraphy.

If "MARS is amateur radio," then it should have civilian head-
quarters such as Newington. But, the Army Hq is at Fort
Huachuca, AZ, under NETCOM and the USAF MARS Hq is
at Scott AFB.

If "MARS is amateur radio," then it should be defined somewhere
in Title 47 C.F.R. and thus regulated by the FCC. It isn't.

> The only thing left is to examine the statement that Steve is
>continuing to get his chops busted over:
>
>"Sorry Hans, MARS >>>IS<<< Amateur Radio,"

Nursie "busted his own chops" when he REFUSED to yield on
a WRONG statement.

> Strictly speaking, One is not necessarily a member of MARS by virtue of

>having an amateur license.

MARS "membership" (six-month voluntary "duty") is voluntary.

MARS callsigns are distinctly different from civilian amateur radio
callsigns.

MARS doesn't operate IN the civilian amateur radio bands.

> However, if a person was a civilian, they might be hard pressed to be a

>member unless they had such a license.

Who cares? :-)

Military communications function just dandy WITHOUT any MARS
structure. They don't use any manual telegraphy, either...:-)

> Certainly, the amateur radio operator receiving training in the proper
>traffic handling is the purpose of MARS.

Okay, "proper traffic handling" to keep an RTTY net up and running?
Dialing a telephone for a phone patch from some distant military
outpost that doesn't have any DSN or Internet connection? :-)

"Proper traffic handling" is for Military Police units.

> So where one might want Steve to add "a part of" between "is" and
>"amateur", I would remind everyone that this was in the context of a
>reply to our good Hans, who has been known to engage in a bit of
>hyperbole his own good self.
>
> So whatever you think about that statement, It is pretty hard to
>imagine a program without the intended participants.
>

>In other words.............

The "M" in MARS stands for MILITARY.

The "A" in MARS stands for AFFILIATE.

MARS is a military radio service.

See Department of Defense Directive 4650.2 dated 21 Nov 03.

Don't forget the QSL cards to "prove" you used a tilted whip
to work somebody...AND the signature of your authorizing
officer plus the appropriate directive/regulation! :-)

>After all, "Sorry Hans, MARS >>>IS<<< Amateur Radio." Hi, hi!

Don Rumsfeld and company might take some issue with that,
but then someone here "knows" all about MARS.

Maybe he/she went there... :-)

"QRM Interplanetary" is the title of a short story by George O.
Smith, appeared in Astounding Science Fiction of the late
1940s. It was part of the "Venus Equilateral" series, had very
little to do with Mars. :-)

Actually based on the material you quoted, Steve's statement, based on the rules of logic, is correct as it stands. However, one must keep in mind that under the rules of logic, a statement that is true as written, is not necessarily true in the reverse direction. In this case, the statement "MARS is amateur radio" does NOT imply that it is the only element of amateur radio and does NOT imply anything about the characteristics and activities of amateur radio. That is to say, one cannot legitimately turn the statement around to say that "amateur radio is MARS."

Uh, don't look now, but each new recent General has to first take the
enty level Technician examination. Since tower safety is a basic
requirement for any class operator it is tested on the basic test.
Wouldn't make a whole lot of sense to ask the same questions on both
tests, so the General examination does not repeat the same material.
Kinda puts the lie to your assertion about "virtually no difference"
though, doesn't it!

With all kind regards,

de Hans, K0HB

What Hans said was not only logical, but 100 percent correct. I took a
Technician's exam, then I took a General exam, then I took an Extra
exam. All three were needed to get to Extra. And the tests were quite
different.

>
> Man! Don't you fools have ANYTHING better to do with your lives?

Your progress is defined as what? Progress for me is increased knowledge
and improved skills, while for you it appears to be allowing Technician
tested people to have what were once General tested priveliges.

All this has been very interesting. And Lenny has it right, for a change.

Now for my two cents worth. I have been involved in MARS, all three branches at one time or another, for nearly 40 years. This is as a individual station, which required me to be a licensed amateur operator. Or as a assigned operator at a military MARS station, both stateside and overseas. Which did NOT REQUIRE I have a amateur license. But it made being assigned to a MARS station more likely if you did.

I of course had a license, but those working for me did not. This was at Hanau Germany, Frankfurt Germany and Ft. McClellan Al.

Hope that helps.

>"Sorry Hans, MARS >>>IS<<< Amateur Radio!!!" Hi hi

That statement is rather like Fantasy Fiction...not enough science
to be Science Fiction, though.

George O. Smith was a ham also, spent WW2 as a civilian on
the first proximity fuse production and development as an
engineer. His "Venus Equilateral" series was based on a future
communications relay station in solar orbit between Earth and
Venus...not knowing as we found out later that Venus is un-
inhabitable for humans.

So, we have nursie being a MARS volunteer thinking that "MARS
is amateur radio." Unlike Smith, he should have known from
DoD documents that MARS is a military radio service. MARS,
as such by name, existed since 1948, rather before nursie's time.

Hi hi hi. :-)

>Actually based on the material you quoted, Steve's statement, based on the
>rules of logic, is correct as it stands.

Based on the "rules of logic" on Fantasy Island, perhaps. :-)

The statement was "MARS is amateur radio."

IFF that were true, then MARS would be defined somewhere in
Title 47 C.F.R. It isn't.

["IFF" is not a typo...it stands for "If and only if"]

IFF that were true, then the Department of Defense would not
have bothered to issue Directive 4650.2. It did and the current
version is dated 21 Nov 03.

>However, one must keep in mind
>that under the rules of logic, a statement that is true as written, is not

Tsk, tsk, tsk...misdirection. No one was "turning a phrase around."

A statement was made that "MARS is amateur radio."

That was it.

That statement is WRONG. MARS is a military radio service.

MARS does have civilian radio amateur volunteers. Despite the
volunteers, MARS is a military radio service. It exists by
military Directive and Regulation. Without those documents,
MARS would disappear but amateur radio would continue.

MARS is a military radio service.

> >
>
> Actually based on the material you quoted, Steve's statement, based on the
> rules of logic, is correct as it stands.

Actually, No. But you're thinking in the right direction.

Using logic, where ">>>IS<<<" means ">>>EQUAL TO<<<," MARS is not
equal to, or the same as Amateur Radio. The statement is false.

If Steve were to say that some (few, many, most, 99%, 90%, more than
80%, and/or 98%) MARS operators are also amateur radio operators, he
would have been correct. But he's switched his position on it so many
times, without ever having rejected his original statement, "Sorry
Hans, MARS >>>IS<<< Amateur Radio," that we cannot tell where he
really stands on the subject.

A good first start to clearing up his position would be for him to
admit that MARS >>>IS NOT<<< Amateur Radio.

However, one must keep in mind
> that under the rules of logic, a statement that is true as written, is not

> necessarily true in the reverse direction.

It must be true in both directions. If it is not, then Algebra
contains only false statements. Is this the case?

In this case, the statement
> "MARS is amateur radio" does NOT imply that it is the only element of
> amateur radio

It does imply that. Nothing about a subset was uttered or implied.

> and does NOT imply anything about the characteristics and
> activities of amateur radio.

It does imply that. It implies that MARS is Amateur Radio. Even if
Steve were to have merely said that , "MARS >>>IS<<< _Exactly Like_
Amateur Radio," he would still have been wrong. He said that they
weren't exactly alike, he said that they were the very same thing!

That is to say, one cannot legitimately turn
> the statement around to say that "amateur radio is MARS."

For the statement to be true, "turning the statement around" must also
be true. Transitive property.

Thanks, Dee, for setting the record straight.

Yup, I noted in my original post that:

>> No doubt that on the Military side of things, there is a trained operator
>> or operators that may or may not be a Ham. I'm not certain of the details of
>> this, but these people are already trained in the protocols needed, so that
>> is just a part of their job. They are the connection point, as it were.

I would imagine that already being a Ham might help you get that job,
but there are no doubt plenty of trained operators in the service that
aren't Hams, and some of them are the connection points for the Hams.

Math rules on IS being the same as EQUALS do not apply to logic statements.

One can say that "Marigolds are flowers" yet cannot say that "Flowers are
marigolds." The statement is NOT true in both directions because it is NOT
math.

It turns out it is necessary to define "is" as it does NOT always mean
"equal to". As noted in the post I just sent, one can say "Marigolds are
flowers", which is a true statement but you cannot turn it around and say
"Flowers are marigolds" as this latter isn't always true.

Appears one participant from Fort Huacucha used a "flyaway" hf radio.
The Transworld TW100-F briefcase radio was one of the components of
the Quick Reaction Communication Terminal (QRCT) used by weather
forces to communicate weather data within a deployed theater. Imagine
that!

MARS is NOT amateur radio.

If MARS were amateur radio, it would have rules defining and
regulating it in Title 47 C.F.R. It does not.

If MARS were amateur radio, the Department of Defense would
not have released Directive 4650.2. They did, so that defines
MARS as a military radio service.

If a seventy tree falls on a florist, will he cry "Marigolds?"

>Math rules on IS being the same as EQUALS do not apply to logic statements.

DoD didn't rule on MARS. MARS is a military radio service.

The "A" in MARS stands for affiliate, not amateur.

MARS is NOT amateur radio.

>One can say that "Marigolds are flowers" yet cannot say that "Flowers are

"Losing battle with "non-logic"...?!?!

You're the flaming idiot that wants to populate the 70cm band with kiddie channels, and NOW it appears that you you have absolutely NO understanding of the current licensing/testing structure, yet you are making assinine assertions in a public forum about it.

There's a "non-logic" here, alright, Teaze, and it has to do with why a person would make such idiotic statements in the face of evidence to the contrary...?!?!

Go back to your VHF CB group. It's where you belong...All five channels of it.

WHOA! Don't let Lennie the Lame know he's wrong again...He stated right
here in this forum that there was NO requirement for an Amateur license to be a
member of N/MC MARS.

> The only thing left is to examine the statement that Steve is
>continuing to get his chops busted over:
>
>"Sorry Hans, MARS >>>IS<<< Amateur Radio,"

Mike, my comment was meant to be that the MARS program is the very essence
of what being an Amateur is all about, and my later statements further exemplfy
that one cannot be a part of MARS without Amateur Radio.

Of course Brain and his mentor have been trying to use a literal
definition of it, but I've tried to redirect them. Guess I've exposed thier
dirty laundry one time too many and they will hold on to any tidbit that they

think will give them an opportunity to "get back" at me.

Oh well.

>All this has been very interesting. And Lenny has it right, for a change.

Only that which he has cut-and-paste direct from directives, Dan.

I am still awaiting to hear the status of his application to the N/MC MARS program which he asserted that he wouldn't need an Amateur license for.

He's left a lot of holes in there. Most of those as a direct result of having no practical experience in ANY MARS or Amateur Radio related program.

>Now for my two cents worth. I have been involved in MARS, all three
>branches at one time or another, for nearly 40 years. This is as a
>individual station, which required me to be a licensed amateur operator. Or
>as a assigned operator at a military MARS station, both stateside and

>being assigned to a MARS station more likely if you did.

Agreed on the lack of need for a license if you are in a MILITARY unit and assigned to a MARS unit for duty. I was CHOP of NNN0MOC/MOF and had several Marines assigned to me under exactly those circumstances. All except two eventually DID get a license, though.

>other entitlement programs.

I'm not "dipping" into Workman's Comp either. Nor am I being disbursed
any funds from ANY "entitlement" program.

Care to try again?

>You're so defensive about your separation from the USMC.

I don't know why you think this, Brain. All my paperwork says "Honorable" on it.

Also, it seems the ONLY person who brings it up is Lennie the Loser. Lennie, who often feigns disgust at any perceived sleight towards Veterans and claims to "support and respect any Honorably seperated veteran regardless of the nature of thier seperation."

However everytime I get His Scumminess backed into yet another corner with his OWN words, he rolls this out, thinking it's some supermarket tabloid headline announcing some great abuse of government funds.

If it is, then there's about 3 or more MILLION veterans who are "abusing" the system.

Leonard H. Anderson is a scumbag, Brian. He decries as "patriotic buffonery" anyone who dares to even remotely mention ANY "service" at ANY level, yet he also signs many of his posts with an Army service number, the type of which the Armed Forces hasn't used in almost forty years.

His verbosity and ability to wordsmith his posts does NOT make him right...It just makes him LOUD.

He's an idiot...but YOU have voluntarily linked your fortunes to him, which makes you even MORE laughable.

Kerplunk.

However, it meant >>>EQUAL TO<<< in Steve's use of the word.

As noted in the post I just sent, one can say "Marigolds are
> flowers", which is a true statement but you cannot turn it around and say
> "Flowers are marigolds" as this latter isn't always true.
>
> Dee D. Flint, N8UZE

Welp, if we were to use a subject a little closer to the task at hand, and say,

"MARS Ops >>>ARE<<< Amateur Ops" it would be false, and if we were to say,

"Amateur Ops >>>ARE<<< MARS Ops" it would again be false.

I don't recall him stating that he was applying for N/MC MARS. I
think that is something that you made up.

> He's left a lot of holes in there. Most of those as a direct result of

Yep, its amazing how many holes are left on the application form when
you aren't applying.

Did you ever find those sites that Len posted? They were clickable,
so you shouldn't have had too much trouble.

> You have disproved nothing, Brain.

Brian (not "Brain") has disproved every statement you made that "MARS is amateur radio."

> You have argued the litteral translation of what I said.

There's NO "translation" necessary. DoD Directive 4650.2 establishes MARS as a military radio service...and does it in English.

> I have expounded and explained myself thouroughly.

You've backtracked, backpedalled, rationalized, and outright LIED trying to make your statement true. Didn't work.

MARS is a military radio service.

You never once referenced the DoD, USA, USAF, or USN documents to prove your statement.

One reason is that the DoD, USA, USAF, and USN don't agree with your statement.

MARS is a military radio service.

>That you do not seem
>to be able top accept anything other than a Kindergarten-level definition is
>not my problem.

Incorrect. YOUR problem is that you cannot face reality and
understand the Directives and Regulations of the military.

Shame on you, big burly (but medically-discharged) veteran
of "seven hostile actions."

> I don't know why you think this, Brain. All my paperwork says
"Honorable"
>on it.

Then why did you claim a "medical discharge" in this very newsgroup?

You've never offered to scan and distribute your "official paperwork"
to prove one way or the other. All we have is your "word" on it.

Given that you can't understand DoD Directives and "interpret" things
to fit your agendas (you call that "lying" but won't admit it of yourself),
nursie's "word" has very little value.

> Also, it seems the ONLY person who brings it up is Lennie the Loser.
>Lennie, who often feigns disgust at any perceived sleight towards Veterans and
>claims to "support and respect any Honorably seperated veteran regardless of
>the nature of thier seperation."

[it's "their" and "separation" hostile action hero...]

You are constantly denigrating other veterans that don't agree with
your views of amateur radio. That's not "respect" for others.

As an example, you consistently lower my Army military occupation
specialty to "radio clerk" despite being given the proper MOS and
summary description. I not only have documentation which can be
scanned and forwared in e-mail to interested parties, but I have a
withness in Eugene Rosenbaum, a veteran who served in my Army
unit at the same time I did, plus an interview with Rick Chernitzer
written up in the Pacific Edition of Stars and Stripes military
newspaper in their 10 November 2002 issue on Hardy Barracks,
one of the few remaining U.S. military locations in Tokyo today.
[it's in their website archives] I have no reason to "lie" about any
of that verifiable experience, yet you constantly denigrate that
service.

You consistently denigrate Brian Burke's USAF meteorological
experience and claim his activity in Somalia while on USAF
assignment was "illegal." Everytime you disagree with Brian
Burke, you attempt denigrating him and call him nasty names.

For three weeks you failed to come up with any documents,
even if only ID or nomenclature on your claim that "MARS is
amateur radio." I had to do it for you.

You have consistently displayed ignorance of military
communications by not being able to name one single piece
of communications equipment, either by official nomenclature
or familiar name, things which are well known to those who

have been engaged in that. Both I and Brian Burke have given some of those names. Your only response has been vague and insulting along with specious claims that "it is classified." What we have given is NOT classified and is public knowledge.

> However everytime I get His Scumminess backed into yet another corner with
>his OWN words, he rolls this out, thinking it's some supermarket tabloid
>headline announcing some great abuse of government funds.

Nursie compares himself with some newsstand publication. The public is not interested. Nursie stated that he was medically discharged due to a service related accident, his military career terminated. Stated in here.

However, nursie claims having passed a flight physical to obtain a private pilot license and made other claims of physical strength such as "hiking with [considerable] load" and then claimed on top of that his medical discharge was disavowed.

We readers don't know what to think anymore since all claims seem to be contradictory.

> If it is, then there's about 3 or more MILLION veterans who are
>"abusing" the system.

Numbers from WHAT source? Fantasy Island Hall of Records?

> Leonard H. Anderson is a scumbag, Brian. He decries as "patriotic
>buffonery" anyone who dares to even remotely mention ANY "service" at ANY
>level, yet he also signs many of his posts with an Army service number, the
>type of which the Armed Forces hasn't used in almost forty years.

I've given my ARMY Service Number assigned to me as RA16408336.

At that time each military branch had their own service numbers, did not, as miltary does now, use Social Security numbers.

ASN prefixes denote the kind of service for the Army. An "RA" prefix (standing for Regular Army) was for those who volunteered. A "US" prefix (for army of the United States) was for those who were drafted. An "NG" stood for National Guard. An "O" prefix was for commissioned officers or commissioned reservists [the First Sergeant of C Company, FEC Sig Svc Bn, was a reserve Captain and his ASN stood out among all the other NCOs].

The draft ended in 1975, 29 years ago. The U.S. military is entirely voluntary now.

> His verbosity and ability to wordsmith his posts does NOT make him
>right...It just makes him LOUD.

By showing the proper references, that makes me CORRECT.

MARS is NOT amateur radio.

MARS is a military radio service.

There are no MARS regulations in Title 47 C.F.R. Had it been amateur radio, it would have been so noted in Part 97. It is not.

Department of Defense causes MARS to be a military radio service through Directive 4650.2, effective 21 Nov 03.

> He's an idiot...but YOU have voluntarily linked your fortunes to him,
>which makes you even MORE laughable.

Nursie is continuing with consistent personal insults and attempted denigration of anyone who disagrees with his fantasies and opinions.

Nursie should admit that he was wrong in his statement that "MARS is amateur radio." It is not. Nursie is wrong.

Nursie is without honor. QED.

The Department of Defense "makes it so" with Directive 4650.2 effective 21 Nov 03.

DoD has final say in what MARS is.

MARS is a military radio service.

MARS is NOT amateur radio.

>
>There are numerous examples of how your statement is false.
>
>Why do I always have to go back to the beginning with you???

Probably because he never STARTED at the beginning. :-)

MARS began officially in 1948 (renamed from the original
AARS started in 1925). Nursie wasn't born yet in 1948,
therefore he not "in" it from the beginning...except in the
alternate reality his mind inhabits. :-)

On the other hand, he might have a "green card" obtained
as a Man From Mars, infiltrating us earthbeings and
causing dissention so that Forces From Mars can
conquer Earth. That may take "seven hostile actions."
[it all comes together...? :-)]

Nursie makes up a LOT of things...but they are very real to him
on his Fantasy Island.

Nursie "cuts and pastes" things not realizing that the material is
from his imagination. After each "cut" there is a slight loss of
neurons available for thinking.

>> He's left a lot of holes in there. Most of those as a direct result of
>> having no practical experience in ANY MARS or Amateur Radio related program.
>
>Yep, its amazing how many holes are left on the application form when
>you aren't applying.

The only problem with nursie's little fantasy is that I did indeed, relay
some MARS TTY messages as part of my duty at ADA 1953 to
1955. Army MARS in Tokyo got their own full station at Hardy
Barracks early in 1955. [Army was the starter of MARS with the
AARS in 1925, that being renamed MARS in 1948 when the USAF
was formed as a separate service branch...USAF also getting
involved in MARS at the same time...took the USN-USMC 14
more years to get involved in MARS]

Other than that, I've only been involved with Mars on the Mariner-67
unmanned spacecraft and seeing the JPL Deep Space Network
control room at Jet Propulsion Laboratory.

>Did you ever find those sites that Len posted? They were clickable,
>so you shouldn't have had too much trouble.

Nursie is afraid they contain "pornographic material" if its a link
I posted. Poor guy is soooooo sensitive... :-)

Careful, Brian, Dee might send you a bouquet of marigolds.

Nursie can't reply with bouquets, only brickbats. :-)

[well, he IS bats and the thinking is on the order of brickwork...]

Correct Mike. As an example....when I was chop (Chief operator) at the ARMY MARS Station AE1AYY in Frankfurt Germany I had several assigned operators. None had a license but me. But....to be NCOIC (Sergeant in charge) or CHOP I would not have HAD TO have a license. As long as there was someone in the unit that had the callsign with the German authorities and we had Army authorization as a MARS station. I am sure these rules would vary depending on the country however. But the above would be basically the same I am sure.

Well of course Steve. You can't get a MARS station license stateside
without having a ham radio ticket. That is obvious.

I didn't know that the FCC exams covered driving vehicles. My concern is
that people have little idea of rf safety, lightning safety (proper earth
ground), conductor sizing and many other nifty items that might become
somewhat important.

Reminds me of the time we had to run a 115 volt , 30 amp circuit some 250
feet one way. One fool couldn't understand why we needed wire heavier than
10 gauge. "gee, 10 gauge wire will handle 30 amps). Yep, IR loss. Then
there was the guy at work that took some 16 gauge wire to run a 12 volt 25
amp circuit. I tried to explain. Another knucklehead said it would work.
He was lucky; the wire melted and didn't start a fire.

I also don't want some idiot running 200 watts into a 5/8 wave groundplane
on 2 meters next door to me. He may be ignorant, but I am not.

So, back to your statement and my question: what does driving a car have to
do with radio/electronics/rf/ac/dc and safety?

Best regards from Rochester, NY

> http://groups.yahoo.com/group/MURS-OPEN

Hello, Stewart

Ok, let me pose a simple question for you. Assume you have a base and a mobile MURS station. Both have very good antennas and you have a minimum 10 mile solid range of communications. You are talking to your wife. She is 7 miles away from you. 11 miles away, another mobile MURS station comes over a hill and is now in your range. He has a base station 8 miles further away that you can't hear. He is using the same channel that you and your wife are using. He is running a 5/8 wave on his car. Oh, and he is using a modified 50 watt 2 meter rig (both at his base and in his car).

Do the math. He can be on the opposite side of you from your wife in the mobile. His electric field is 5 times your wife's (and likely at least twice yours). Can we spell "capture effect"? Without extensive f layer propogation that exists on 11 meters at times, these problems won't become apparent until there are more MURS users and even then, most of the problem will be in urban areas .... but .... meanwhile, you won't be able to communicate with your wife (most likely).

I darn well think that amateurs should be tested in at least basic rules and safety for an entry level class license. I tend to get nervous when I see questions about SWR and coax lengths from amateur extra class licenses.

As far as the old timers wasting their time, there is one older guy around here whose repeaters won't go down easily. One is windmill powered; the other is solar powered. Then there are a *ton* of others in his system. All interconnected and cover 10 meters to 1.2 GHz.

We have lives beyond both this newsgroup and Morse code ;)

Message-ID: <Xns94FDF25FD2CA5teletech1212@207.69.154.203>
Source record: 92608

I used to be active on the air about 12 years ago. I will be moving out of my assigned call area. I'd like to get back on the air when I move.

What is the accepted practice relative to identifying the call area when one has moved permanently, given that the FCC does not assign a new call when one moves out of their area?

For example, if I was visiting W4 area from W3, I would identify as W3--- "portable W4" or W3---/W4. Do people put the /W4 on their QSL cards, etc? Is this a big deal these days?

Thanks.

Greetings, and welcome back.

Unfortunately too few folks still observe the call districts in thier callsigns. Thier "point" is that ""...I don't HAVE to do it, so I won't...". The requirement to identify which area you ae operating from was dropped quite a long time ago.

I am a "4" living in 4-land, but when I still had my 8 call, I always signed "/4" on CW or stated "mobile" or "portable" on phone. I don't like it when I am looking for a specific area only to find out that the "W1" I just called is actually in in San Francisco.

Some contests (and of course, Field Day) require it, but that's just for the contest rules, not "regulations".

Hope to catch you on the air some day.

My suspicion is that this is the first time that one has heard of the capture effect. Remember, nothing makes for a solid and simple argument like ignorance of the details.

I'm not sure what can be done about that one, Jim. When the increasing Morse code speed requirements were in place, the prospective Extra was likely on the air and learning more about things as he or she went. It was simply a slowing of the process that enabled knowledge gain and practical experience in the interim. Now with 5wpm and testing, those brakes aren't there.

I became an Extra "too quickly" and I know of others that got it much more too quickly than me! 8^)

I've wanted to propose a waiting period between General and Extra, (2 years) but I seem to be the only person that thinks that is a good idea.

The point was, "We'll never know (if they knew the material).

Some of you OF's try to make it sound like getting to the FCC office
for an examination was inconvenient at best, or even dangerous. So
you petitioned your government to let you get a mail order license, or
to have some other local ham(s) test you. Lots of hand wringing and
whining.

When away from the permanent station location, a lot of us do the
"mobile 3" thing. I do it so that people know I'm mobile or portable,
and will understand if I don't respond to a call or my signal drops
out.

But at the permanent station location, most hams just use their
callsign even if their call doesn't match the callsign district.

With the current regulations, you can choose your callsign by means of
the vanity call program. So if you want a call that matches your
location, you can have one (for a fee).

> Do people put the /W4 on their QSL cards, etc?
> Is this a big deal these days?
>
No and no.

It's not a new thing, either. Here's my story:

I was licensed in 1967 and got a six-character 3 land callsign, which
I kept until I moved to New York State in 1977. This was a permanent
move, and under the rules back then I could request a 1x2, 2x1, 1x3,
2x2 or 2x3 callsign - sequentially issued, no fee and no choice other
than the format. So I asked for a 1x2 and got N2EY.

Then in 1979 I moved back to 3-land. But in the 2 years that had
elapsed, the FCC had changed the rules. I could have gotten a 3-land
call, in any of the above formats, but if I gave up N2EY the FCC would
not reissue it to anybody. So I kept it, rather than deny another ham
a 1x2 or 2x1 call.

Eventually the rules changed and they began reissuing old 1x2 calls.
But by then I was so used to N2EY that I just kept it. Never been a

problem on the air.

Amateur Radio Newsline™ Report 1399 June 4, 2004

Amateur Radio Nerwsline Report number 1399 will follow in a few moments. First, this important announcement from our Support Fund Administrator Andy Jarema, N6TCQ:

--

The following is not necessarilly for retransmission. I guess you already know that if you are hearing my voice on a closed-circuit advisory it means that Newsline is again facing a financial crisis.

Well, you're right. The funds are so low that we may not be able to pay the bills from May. Worse, for the first time in our history, we even do not have the money to send a representative to Huntsville this
summer to present the 2004 Young Ham of the Year Award. And in two words --- "that's bad." "Real bad."

The solution to both of these problems really lies with you. Our world-wide all volunteer staff produces these newscasts for you. The all volunteer Young Ham of the Year Committee labors tirelessly each year to select a youngster to receive the Award. Joe Eisenberg, K0NEB, oversees the Newsline sponsored Roy Neal, K6DUE, Amateur Radio Mentoring Project database, doing so at no cost. The list goes on and on.

I too am a volunteer, but I have to be the realist. I'm the accountant
who has to look at the bottom line and when it turns red, I have to say -- hold on -- there is no more money to continue. And that's about where we are right now.

So, here's the bottom line. If you want the newscasts to continue. If you want the mentoring program to continue and the Young Ham of the Year Award to continue, we need you to show it now -- right now -- through your financial support of Amateur Radio Newsline.

Remember that Amateur Radio Newsline is a federally chartered 501(C)(3) and California state not-for-profit corporation. This makes your donations tax deductible, whether you're an individual or a club.
The address to send them to is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California 91066. If you missed the address don't worry. It will be repeated at the end of this week's report.

For now I thank you for listening, for responding and offer you this weeks newscast which follows immediately.

--

Amateur Radio Newsline report number 1399 with a release date of Friday, June 4, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio on alert on a stormy Memorial Day
weekend, a BPL deadline is extended, another country says goodbye to Morse code and June is Amateur Radio month. We'll tell you where on
Amateur Radio Newsline report number 1399 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS AID AS TORNADOES CONTINUE

Strong storms with funnel clouds raced across Indiana during the Memorial Day holiday forcing thousands of Indianapolis residents and race fans alike to take shelter from tornadoes. Jack Parker W8ISH was
tracking the storm that left behind a train of devastation while putting radio amateurs on alert.

--

For the city of Indianapolis, the Race Day storms could not have happened at a worse time. Hundreds of thousands of people were in town for the 88th running of the Indianapolis 500 mile race and for the NBA Playoff game between the Indiana Pacers and the Detroit Pistons. The rain delayed race was nearing the end when race officials threw out the checkered flag and warned nearly 400 thousand race fans to immediately take shelter.

Accordling to early reports an F3 tornado passed just south of the Indianapolis Motor Speedway and began its destructive path across the south and east side of Marion county. Hundreds of central Indiana amateur radio operators were kept busy from Sunday morning until late Sunday evening tracking the funnel clouds and reporting ground truth observations back to the National Weather Service office in Indlianapolis.

While the Pacers took on the Detroit Pistons, tornado sirens blared outside, motorists got stuck in traffic jams, and tree limbs and debris were tossed into roadways. A funnel cloud described as two blocks wide, tore the roof off a nursing home leaving nearly fifty bed-ridden patients without shelter. They spent over an hour out in the pouring rain as rescue personel attended to their injuries. Downed
power lines, flooded streets and massive amounts of debris from damaged homes made it difficult for Indianapolis police and fire

personnel to reach those in need.

According to the National Weather Service more than a dozen tornadoes had touched down in 10 Indiana counties. This was the third time in three years that powerful tornadoes have ripped across central and southern Indiana.

Reporting from Indianapolis, for Amateur Radio Newsline, this is Jack Parker W8ISH

--

Marengo in southern Indiana was hard hit, with at least one fatality, four injuries and numerous homes damaged or destroyed. But Indiana was not alone in dealing with weather related problems. According to news reports several people in Kansas and Nebraska were injured by the
weekend's tornadoes which also ripped through parts of those states. Ham radio was on alert there as well. More on this ongoing story in future Amateur Radio Newsline reports. (ARNewsline(tm), W8ISH)

**

THE BPL FIGHT: REPLY COMMENT DEADLINE EXTENDED TO JUNE 22

The FCC has extended the deadline to file reply comments on already filed responses in its broadband over power line Notice of Proposed Rule Making ET Docket 04-37. The FCC granted the extension based on requests from the National Antenna Consortium and the Amherst Alliance.

The two organizations had sought to have the FCC postpone the filing comment deadline until either September 1 or two months after the public release of the NTIA's Phase 2 study -- whichever was later. The Commission responded that in its view an additional three weeks should be ample time to respond to any NTIA submission.

The FCC does not routinely grant such time extensions, and it denied earlier petitions, including filings from the ARRL. Now it has relented and has set a new Reply Comment deadline of Tuesday, June 22nd. (ARRL)

**

RESTRUCTURING: MORE COUNTRIES DROP CW

More restructuring has taken place in Europe. The GB2RS News Service reports that Finland has now officially dropped the Morse code requirement for that nations hams to have access to the High Frequency
bands. GB2RS says that Finland actually deleted the Morse requirement
on the 1st of November of 2003. Now, with the latest rules revisions there are now there are only two classes of amateur license in that

European nation.

Also from GB2RS word that former French Class 2 licensees with F1 and F4 callsign prefixes are now being heard on the High Frequency bands.
According to the French national amateur radio society, this change was implemented on May 16th.

But C-W is far from dying or dead on the other side of the Atlantic. In fact the fourth European High Speed Telegraphy Championships take place the 15th through the 19th of September in Montenegro and Serbia.
(GB2RS)

**
RESTRUCTURING: NEW ZEALAND SAYS GOODBYE TO MORSE

Finland and France are not alone in saying goodbye to Morse code testing. So has a nation down-under.

On June 4th New Zealand's Telecommunications regulators issued a decree that says Morse proficiency testing has ended and thatNew Zealand Limited Class operators will soom have access to the high frequency bands. In fact, regulators have decided to upgrade Limited Class operators to the New Zealand General Class.

According to the notice, operators will not be required change their callsigns or take any other action.. The new rules go into effect on June 17th. (ZL2BHF)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N5JGX repeater serving Austin Texas.

(5 sec pause here)

**

ENFORCEMENT: POLICE JAMMER GETS 8 YEARS IN PRISON

A man convicted of jamming a Wisconsin emergency service radio system will spend the next 8 years behind Federal prison bars. Amateur Radio
Newsline's David Black, KB4KCH, is at the south-east bureau with the
details:

--

University of Wisconsin graduate student Rajib Mitra faces eight years

in prison after being convicted of intentionally jamming public safety
radio communications. The 25-year-old Mitra was sentenced by a federal judge as a domestic terrorist under the Patriot Act which punishes substantial disruption of a critical public infrastructure.

The computer science student converted a radio receiver to transmit tones that interfered with the 800 MHz emergency radio system used by Madison police, fire and paramedics. In all, Mitra was accused of interfering with public safety communications 37 times last year. He told a federal judge the incidents were accidental--the result of a loose wire. But the judge likened that to a fairy tale, and increased
Mitra's sentence for perjury. The disruptions happened between January and October, 2003.

Assistant U-S Attorney Tim O'Shea says Mitra's crime stems more from immaturity than ideology. O'Shea says the case was about domestic terrorism, not like what happened in New York City September 11th 2001, but by the immaturity of the defendant.

Testimony included reports about disruptions that prevented police officers from communicating with each other while making arrests, keeping paramedics from getting patient information to hospital staffs
and decreased safety for firefighters while on calls.

In one incident, Mitra was accused of interfering with communications for three hours on Halloween night. He was also convicted of downloading pornographic sounds from the Internet and broadcasting them over police channels.

Mitra could have been sentenced to two years in prison. He also faces
three years probation and has been ordered to pay more than 6-thousand
dollars to the Madison Police Department.

From the South-East bureau in Birmingham, Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

Its not known if the government will use Mitra's conviction under the
Patriot Act as the basis of prosecution of others acused of the same type of crime. (ARNewsline(tm) from Capital Times, others)

**

ENFORCEMENT: RESTERAUNT FINED $10,000 FOR USING 2 METERS

Remember the case of Best Wok? The New Jersey resteraunt that was warned by the FCC to stop using an illegal high power 2 meter

cordless
telephone to coordinate deliveries but which continued to do so
anyhow?

Well, that decision by the store manager is going to cost the company
$10,000. Thats the amount of the fine that the FCC has levvied
against Best Work for transmitting on 145.8376 MHz without Commission
authorization. The resteraunt was given the customary 30 days rto
pay
up or to file an appeal. (FCC)

**

ENFORCEMENT: RIGHT APPLICATION - WRONG BURTON

The FCC admits that it made a mistake when it announced that it had
sent a warning letter to a former California ham and designated his
GMRS radio service application for a hearing. What happened?
Amateur
Radio Newsline's Bruce Tennant, K6PZW, tries to sort it all out:

--

The FCC recently announced that it had sent another warning letter to
Richard A. Burton, the ex-WB6JAC. This, warning him about operating
without a license and designating his GMRS application for review.

Only one problem. The regulatory agency had the wrong Richard A.
Burton.

It turns out that it was a Richard A. Burton in another state who,
this time, applied for a GMRS license. It was not the Richard A.
Burton who lives in California.

Complicating thins further the California Richard A. Burton had filed
for a GMRS license over a year ago. He voluntarily rescinded his
application after the FCC set it aside for review.

So what happened? According to a note in the ARRL Letter, the FCC
was
acting on the belief that the latest GMRS application had come from
the California Richard A. Burton. And mistakenly, the regulatory
agency designated it for hearing.

For the Amateur Radio Newsline, I'm Bruce Tennnant, K6PZW, in Los
Angeles.

--

By the way, we did a search on the QRZ.com callsign supersite. We
found that there are 12 hams that have the name Richard Burton living
in North America. Of these one is a Richard A. Burton but he does
not
live anyplace near the Richard Burton who was seeking the GMRS

license. (ARRL, others)

**

ENFORCEMENT: TO MANY CALL SIGN CHANGES

The FCC is asking a New York, ham why he has filed over a dozen call sign change requests with the agency in the past four years. Since August 29, 2000, Kiyoshi L. Nakamura of Buffalo has held the call signs K3DJ, KJ6UZ, AD1L, K3DJ again, KH6DJ, AD1L again, K3DJ for a third time, AD2R, AD1L for a third time , AD2R, WH7S, AD1L for a forth
time and AD2R for a second time. And on May 4th, he again filed a call sign change request. This time he wants to give up AD2R and get back to K3DJ for the fourh time.

In its letter to Nakamura, the FCC says that his numerous call sign change applications raise questions about apparent abuse of the licensing system. This says the FCC that with limited exceptions, each call sign would be blocked by Commission rules from being reassigned to another licensee for two years.

So, the FCC gave Nakamura 20 days from the date of its inquiry letter to respond. He was told to state his intentions regarding the filing
of these applications. He was also told to coose one and only one call sign that he actually wants to keep. (FCC)

**

RADIO HONORS: AMATEUR RADIO MONTH IN NH

June is now Amateur Radio Month in New Hampshire. This, as Governor Craig Benson issues a proclamation honoring the states radio amateurs for their dedication and the service for its almost 100 year history of contributions to the advancement of communications technology.

First issued by the New Hampshire State Legislature in 1985, each succeeding Governor has recognized the role of the states Amateur Radio operators during the month of June. 2004 marks the 19th consecutive year that these proclamations have been issued. (Via e-mail)

**

TECHNOLOGY: IS IT BYE-BYE TO VHS?

Home recording using tape as a medium seems to be on its way out. According to the Consumer Electronics Association, in 2003, movie watchers rented more DVDs than VHS tapes. Also, DVD sales increased by 30% while the sale of VHS VCR's dropped by an unexpected 50% in
2003.

Whats replacing the venerable VHS system? Hard disk recorders like TIVO which have been dropping in price over the last twelve months. When combined with satellite or cable TV, these devices make delaying a program to watch later as easy as 1-2-3. (Science OnLine)

**

THE SOCIAL CIRCUIT: HAM-COM IN DALLAS TEXAS IN JUNE

Turning to the ham radio social calander, if you will be in the Dallas., Texas area the weekend of June 18th and 19th, make it a point to attend Ham-Com 2004. This is the ARRL West Gulf Convention held at the Arlington Convention Center in the Dallas suburb of Arlington. This years features include indoor and outdoor flea markets, numerous commercial exhibits, a D-X luncheon, an APRS workshop and much more.

Information on this one is on line at www.hamcom.org or by writing to Ham-Com 2004. P.O. Box 12774, Dallas, Texas, 75225. The phone and fax number is area code 214-361-7574 (Ham-Com)

**

THE SOCIAL CIRCUIT: KNOXVIOLLE TN. IN JUNE

And the 38th annual Knoxville Hamfest and Electronics Exposition is slated for June 11th and 12th. The venue is the Knoxville Exhibition, World's Fair Park in Knoxville, Tennessee. The theme this year for the event is "Promoting Youth in Amateur Radio." More information is on-line at www.w4bbb.org (K4PZT)

**

THE SOCIAL CIRCUIT: A TALE OF HAM RADIO AT NAB

Also, if you want to read more about ham radio at the recent National Association of Broadcasters Convention in Las Vegas, take your web browser over to www.haleisner.com. Then click on the column titled "The Other Side of the Control Room Glass" by our own Bill Pasternak, WA6ITF. This month Bill not only takes reads to the N-A-B show but also tells of his recent exploits at the Dayton Hamvention. Again, its all on-line at www.haleisner.com (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to

the
world from our only official website at www.arnewsline.org and being
relayed by the volunteer services of the following radio amateur:

**

RADIO LAW: FREQUENCY COORDINATION FOR THE 2004 NATIONAL POLITICAL
CONVENTIONS

Remember a few years ago when the ARRL became the FCC's
"single Point
of Contact" or spoc on repeater related matters? Well how about
one
for this years political conventions? Well that honor has gone to a
New York based consulting engineer. Bill Pasternak, WA6ITF, has more:

--

At the request of the Frequency Coordinating Committee for the 2004
Political Conventions the FCC has designated Louis Libin, as the
single point of contact -- or spoc -- for coordinating broadcast R-F
operations. This, under Section 74.24 of the agency's Rules.

Libin will oversee all RF operations for broadcasters in Boston from
July 26th through July 29th and in New York City from August 30th
through September 2nd. Nor is this the first time for him to do so
either. Louis Libin is considered one of the worlds foremost
authorities in the area of RF compatibility and has worked on
numerous
televised events over the years.

For the Amateur Rafio Newsline, I'm Bill Pasternak, WA6ITF, in
Los
Angeles.

--

More on this story is at the cyberspace at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1494A1.doc
(FCC, CGC)

**

RADIO LAW: 811 PROPOSED AS A NATIONWIDE CALL-BEFORE-DIGGING NUMBER

The FCC is asking for comments on a proposal to adopt "811" as a
nationwide call-before-digging number. The regulatory agency
believes
that this will give excavators one simple number to call to avoid
cutting buried cables, gas lines and other important infrastructure.

Currently there are 70 nationwide "One Call" centers that serve
different geographic areas. They are generally accessed by dialing

toll-free or local telephone numbers. The FCC however believes that having one simple number to call like 811 should promote safety and lead to fewer utility outages.

Want to know more? It's all on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-247171A1.doc (CGC)

**

RADIO LAW: COURT UPHOLDS CABLE RULING

Meantime, the FCC is considering a Supreme Court appeal in cable Internet access dispute. This, after a federal appeals court says that it is standing by its October ruling that cable TV operators should open their lines to rivals who also want to use them to sell high-speed Internet service.

The Federal Communications Commission asked the 9th U.S. Circuit Court
of Appeals to revisit the decision, but the court declined to do. If upheld, the circuit's decision would likely subject cable operators to
the same rules as local phone companies, who are forced to lease their
lines to rival providers of phone service and D-S-L Internet access. (Published reports)

**

WORLDBEAT-UK: 2004 AMSAT COLLOQUIUM IN THE UK

Turning to news from around the world, the 2004 AMSAT-UK Colloquium will be held on Friday, July 30th through Sunday, August 1. This, at
the University of Surrey, Guildford, United Kingdom.

A feature of this year's meeting will be a talk and Question and Answer session with Professor Colin Pilinger of the Beagle 2 project. More information is on-line at www.uk.amsat.org. (AMSAT-UK)

WORLDBEAT-ALBANIA: TIRANA ALBANIA FOR DX'ERS IN JUNE

And Albania's first ever DX Convention, is scheduled for 19th to the
20th of June in the city Tirana. Attendees will get to meet many figures from the DX community who donated equipment to put Albania on the air. This includes G3LQP, W6UM, OH2BH and T93Y. United States Amateurs should contact K2WR, at k2wr@njdxa.org for advice how to travel to this gathering. (Via e-mail)

**

ON THE AIR: FRENCH RULES CHANGE SPAWNS DX OPERATION

FT1ZL is on Amsterdam Island and is expected to become active soon. This, after the French have change their licensing structure to grant holders of that nations VHF only license operating privileges on the High Frequency bands.

French stations with the numeral 1 or 4 in their prefix can now operate the low bands using all modes except A1A, A2A, F1A and F2A. FT1ZL will use his new found privileges on 20, 17, 15, 12 and 10 meters SSB during his Amsterdam Island stay. (Internet)

**

DX

In D-X, IK4RUX says that he plans to operate portable IF1 from Favignana. He will be found on SSB and C-W from the June 19 to the 26
th. QSL this operation direct or via the ARI Bureau. (GB2RS)

And K8AQM reports that his upcoming trip to Samoa will take place July
7th to the 21st. He will operate as 5WZ0TR from the Samoan Village Resort on 160 though 10 meters. Modes will be CW, SSB, RTTY and PSK. All QSLs are via K8AA at his callbook address. (OPDX)

**

THAT FINAL ITEM: BANNED BY ONE WORD

And finally this week, the tale of why hams in Thailand were not allowed to talk to hams in other parts of the world for a number of years. The truth be known, it was all because of a three letter word. Here's Q-News Graham Kemp. VK4BB, with the rest of the story:

--

Audio report only. No text available. Lisen on-line at www.arnewsline.org/

--

And for those of you who do not speak French, the word oui -- sometimes pronounced as the English word "we" -- means "yes."

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain,
the RSGB and Australia's Q-News, that's all from the Amateur Radio

Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official
website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff for
nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don
Wilbasnks, AE5DW, saying 73 and we thank you for listening."

Huh?

I thought most of the OFs were trying to get the tests a bit more difficult.
You can't have it both ways.

Next, you'll blame the OFs because your washing machine is over-sudsing LOL!

The reality is that the real flamers on both ends of the spectrum are the hold up. That mention of a trip to the FCC being dangerous had no relation to the material on the test. We could say the same thing about sending our kids to school. A very few have been killed and/or raped. That is hardly a reason for not attending school.

These newsgroups get sillier every month, if not every week.

Hello, Steve

Most folks that invent or discover something are doing something they enjoy. We can likely look at almost anything and most folks are having fun and only a few are actually "inventing" something. Of course, it is totally ignorant to assume than no ham is doing anything constructive any more than it would be to assume that no NASCAR racer, or baseball player, or any other person in a given field is "doing" anything ;)

Best regards from Rochester, NY

There was NO "rant." Since nursie didn't include either a link or
enough of the news article, here it is -

==========
URI physics employee invents new antenna technology
Media Contact: Jan Wenzel, 401-874-2116
KINGSTON, R.I. -- June 2, 2004 -- Rob Vincent, an
employee in the University of Rhode Island's Physics
Department, proves the adage that necessity is the
mother of invention.

An amateur radio operator since he was 14, Vincent has
always lived in houses situated on small lots. Because
he couldn't erect a large antenna on a confined
property, he has been continually challenged over the
years to find a way to get better reception.

"I was always tinkering in the basement. Thank
goodness, my parents were tolerant. I can still
remember my poor father driving up our driveway after
a hard day's work to see wires wrapped around the
house," Vincent recalls.

"The Holy Grail of antenna technology is to create a
small antenna with high efficiency and wide
bandwidth," explains Vincent. "According to current
theory, you have to give up one of the three - size,
efficiency, or bandwidth - to achieve the other two."

After decades of experimentation, combined with a
30-year engineering career and Yankee ingenuity,
Vincent has invented a revolutionary antenna
technology. The distributed- load, monopole
antennas are smaller, produce high efficiency, and
retain good to excellent bandwidth. And they have
multiple applications.

With this technology it will be possible to double, at
minimum, the range of walkie-talkies used by police,
fire, and other municipal personnel. Naval ships, baby
monitors, and portable antennas for military use are
other applications. An antenna could be mounted on a

chip in a cell phone and be applied to wireless local area networks. Another application deals with radio frequency identification, which is expected someday to replace the barcode system.

"It could even make the Dick Tracy wrist radio with all the features, such as Internet access, a possibility," Vincent says.

The inventor pursued his quest to build a better antenna in earnest eight years ago when he and his significant other moved into a house situated on a 50-foot by 100-foot lot in Warwick. There was nothing on the commercial market that could fit the lot that would provide the performance Vincent needed to be heard in distant lands and that would be acceptable to his neighbors. All the small antennas being sold were inefficient and lacked bandwidth, which resulted in low performance and high frustration.

Vincent looked at the techniques that were currently used to reduce antenna size and realized something was missing in the way everyone was approaching the problem.

He began to model various combinations into a computer program called MathCad. His first attempt produced a 21 MHz band antenna that was 18 inches high. Normally, antennas for this band are 12 to 24 feet high.

Vincent installed the antenna in his back yard. The legal limit that amateurs can operate is 1,000 watts with the norm being 100 watts.
The amateur radio operator experimented with 5 to 10 watts. He reached a station in Chile and made contacts in various European countries. Meanwhile he kept adding power until it reached 100 watts. That's when things suddenly went bad. Walking outside in the backyard, he understood why. The antenna had melted.

After examining the molten matter, Vincent wasn't discouraged. This was only a small model and not designed to handle much power. The part of the antenna that failed proved to be the key to the design. After analyzing the failure, Vincent realized that he was able to transform a lot of current along the antenna with even relatively low power.

"Antennas radiate by setting up large amounts of current flow through various parts of their structure," he says. "The larger the current the more radiation and the better the output of the antenna."

Vincent went back to the drawing board and continued to improve the technology. Relying on his nearly 30 years at Raytheon Co. and at KVH Industries in Middletown R.I., which provided him with a diversified background in electronics and electronic systems, Vincent overcame a myriad of problems and succeeded.

He established three test sites for various prototypes. Antennas were placed in Westport, Mass. in a salt marsh, the best ground for transmission and reception. Another set of antennas was placed on rocky ground in Cumberland, R.I., the worst kind of site, and at a Warwick site which is in between the two in terms of grounding. The antennas, which resemble flagpoles, worked well at all locations.

Tests confirmed that Vincent has created antennas at one third to one ninth of their full size counterparts. Normally smaller antennas are only 8 to 15 percent efficient. Vincent's antennas achieved 80 to 100 percent efficiency as compared to the larger antennas.

A patent is pending on Vincent's technology. The inventor has made the University of Rhode Island and its Physics Department partners that will benefit from any revenue his invention earns. "The University and its Physics Department has been very supportive and given me time and space to work on this project," says Vincent who was recently presented the 2004 Outstanding Intellectual Property Award by URI's Research Office. "I couldn't have done this without the University's support. It's only fair that it share in the profits."

Copyright ï¿½ 2002 University of Rhode Island
(Disclaimer)
==========

Firstly, the "article" was published by the University of Rhode Island and all such things from all organizations and schools are in the "self-love" category or better known as PR/Public Relations.

Secondly, Rob Vincent is a PRO with 30+ years working for a salary and has access to MathCad tools (any of the NEC programs could have done it...such as Roy Lewallen's EZNEC).

Thirdly, small antennas aren't new...they've been used for a half century and more. The USMC-contract T-195 (via Collins) had a built-in HF antenna tuner to work with any vehicular whip. The AN/PRC-104, a manpack HF transceiver (Hughes Ground Sys. Div., early 1980s) has an automatic antenna tuner built-in for the

single manpacked whip antenna. SGC has been building and
selling HF antenna tuners for many and various radio services,
ham included. The Navy Postgraduate School has some slightly
old double-whip antenna designs on the web (PDFs) intended for
shipboard use on HF.

Fourth, one has to note who made everyone notice this piece,
as well as the lack of link or other references other than having to
go to the University of Rhode Island site and go down two levels
to get it. Nursie's qualifications as an antenna "expert" are in
question since he went gung-ho on the "ham" part and seriously
neglected the other facts of the invention.

Fifth, the URI must have funded the application for the patent since
a patent search (required by patent office to show any prior art) is
going to cost somewhere between $4K and $6K nowadays. [why
would Vincent set up some experimental antenna on a salt marsh
plus two ohter places unless it was for some URI project?] That
little squib has "PR" written all over it. Might work, though, but
lots and lots of folks be working on small antennas trying to get the
golden "100% efficiency" qualification.

Jim Hampton was right. Newsgroups ARE getting sillier and
sillier, with such gems as "MARS is amateur radio." :-)

No need to do either. Just use your FCC assigned call. Course it helps to let folks know the general area your in, so they can point the antenna at you.

Perhaps still today, but it used to be allowed to get into MARS with a
Novice ticket. That was a long time ago, when a Novice ticket really had
to be earned.

Of course now-a-days there is no Novice ticket. And those that still have
one are of no importance to worry about in the scheme of things.

Yep, now that they got theirs, they're trying to make things more
difficult. Can you recall when Amateur Radio got mail order upgrades
and hams testing hams?

> You can't have it both ways.

I never have.

> Next, you'll blame the OFs because your washing machine is over-sudsing LOL!

Stay away from my washing machine.

Wow! I hope that didn't happen because of frustrated amateurs on
their way to an exam.

> These newsgroups get sillier every month, if not every week.

Actually, No. Fewer and fewer PCTA post each month, and the newsgroup
is improving.

Maybe, maybe not. Depends if the portable designation makes you a
different "country." If you were portable KL7 or KH6 or even KP4, I'd
definitely put that on my card. Even if it weren't antoher country,
I'd still put it on my card.

Source record: 92627

My 2 cents -- When DXing give your present district as a cw slash or on phone -- slant district. Folks calling you want to know where you are at.

In a DX pileup calling by district -- same as above and call when the DX station calls for the district you are in. Some DX stations get very upset when they call for sixes and a Ham in NY calls who has a 6 call

When operating a repeater that is in your home area -- no need for the /district -- folks will know you are local.

When travelling or a visit away from your home state -- give a /district so folks know you are a visitor and might invite you to some Ham activities or assist with directions etc.

When on 6M and no skip --- just your call

For 6M skip give the /district you are in. I've called several W1 and W2's only to find they were in a western state. Not good for WAS hunting and band openings can be very short

For QSL cards a /district would be in order so the incoming ARRL burro cards will go to your present district. Some QSL cards may not include the /district and the card will go to the old district -- best have envelopes in both districts I would suppose.

Keyboard In The Noise

Opinions are the cheapest commodities in the world. Author unknown but "right on"

But according to Heyle and apologists, we must remain ignorant of
other countries operating priveleges and licensing requirements by
class. This is so that we can continue to work out of band Frenchmen
on 6M or anywhere else we find them. QSL?

Hello? No comments? Anyone?

Why am I not suprised?

Here we have a whole class of radio amateurs being barred from MARS
participation. Maybe there was a speck of truth in what Steve said
about MARS being the essense of Amateur Radio. It's exclusionary!

"Sorry Hans, MARS >>>IS<<< Amateur Radio!"

Hello, Len

I won't even go into the MARS is amateur radio since you won't find their signals inside of any amateur band (at least I don't think so, but I am not very familiar with Military Affiliate Radio Station).

The gentleman in question with the antenna may well have been professional; my point is that most inventors are doing something they enjoy. Come to think of it, how many folks are continually involved in something they *don't* like?

As far as small antennas, we know that magnetic monopoles (loops) are quite efficient. If very small, the conductor must be quite large as there will be large circulating currents (and this also puts demands on the capacitor). Generally, it has been difficult to make a *very* small loop efficient simply due to IR losses; however, loops can be quite small compared to a half-wave dipole and still run at 90% efficiency.

What with the crossed-field antenna, e-h antenna, fractal antenna, and more, I'm interested in finding out what this guy has. What I'd love is a 6 inch antenna that is 90% efficient with a 1.1 SWR on 160 meters on up. LOL, wouldn't we all? Of course, even if we had such a beast, we must remember that where the thing is mounted (height, in terms of wavelength) will likely affect its' performance considerably. The ground type also comes into play. Come to think of it, there were some arguements over the published "efficiency" of the cross-field antennas at one point too.

Of course, this particular newsgroup is not really the place to discuss antennas; I'd just like something beyond the code vs no code arguements and the flame wars.

Mike,

I wish I was going to be there. I dunno, but some friends are going to be over here tomorrow so I suspect that I won't. I haven't had a chance to talk to Tim, WB2KAO and see when he may be there .... sigh .... I made it to the hamfest perhaps 4 years ago :(

Military Affiliate Radio SYSTEM... :-)

>The gentleman in question with the antenna may well have been professional;
>my point is that most inventors are doing something they enjoy. Come to
>think of it, how many folks are continually involved in something they
>*don't* like?

Irrelevant. Another stressed that the "invention" was because of his
being a radio amateur. Solely so, so much that nearly all of the
URI news release was omitted.

There have been TWO significant amateur radio related inventions
(or innovations, the line is blurred in reality) in Dan Tayloe's unique
CMOS switch mixer which is capable of making a direct-
conversion receiver for a sensitive QRP rig that receives either
on-off keyed telegraphy signals or SSB signals...and the several
who publicized the relatively-easy-to-make crystal filter using only
matched-measured individual quartz crystal resonators (which may
have been unpatented trade secrets in the relatively small crystal
filter biz).

For everything else in hardware, the radio world came up with it
and used it in commercial-military equipment and also in some of
the amateur radio stuff.

It's fun and personally satisfying to receive a piece of paper saying
one is an inventor. Nice brag item for those not in the biz. :-)
However, being one (an inventor that is) is not a guarantor of
big smarts or of the guru-dom since a lot of really weird (and
usually unworkable) stuff has been patented. Besides that, in
electronics, the patent search costs are rather stiff on the order
of 6 grand average and may wind up showing that someone else
invented the whatever the inventor is trying to patent. Patent
searches are NOT a part of the patent office but the office requires
some sort of showing...if you want the patent within 6 or so years
from now.

Mine is U.S. number 3,848,191, granted in 1974 and assigned to
RCA Corporation. The only reasons that RCA bothered with the
patent at all are: (1) RCA began in the radio-electronics business
to keep "radio" patents in the USA back in the late 1920s; (2) My
project group was on a company-funded R&D program at the time
with some potential for the Corporation. At least a dozen patents
were granted out of that one project, an aircraft collision avoidance
system.

Most corporations simply don't bother with the patent work since
radio-electronics is still on such an up-slope of changing state of
the art that a typical 2 or 3 year wait for a grant plus another year
to arrange rights, etc., may not be worth the cost. Industry makes
do with the "trade secret" policy and, if someone copies an un-
patented thingy, will go to the attorneys and their expensive billing
at that time.

Also, in a typical HF transceiver of today, there may be as many as
a hundred different patents applying to the circuitry and subsystems
and keeping all that straight requires more personpower on the
payroll to keep track of which patent is still in force and which has
lapsed.

>As far as small antennas, we know that magnetic monopoles (loops) are quite

A wideband, two-mast HF antenna has already been developed
for the U.S. Navy, extensively measured, plotted, etc. There's a
paper on it in PDF floating around. I downloaded it about a year or
so ago out of curiosity. Covers the whole HF territory...but does
need an antenna tuner to maximize RF power into the antenna.
[getting as much RF as possible INTO the antenna is the REAL
"efficiency"] You've still got Maxwell's Equations to contend with
and the fact that the antenna size and pattern will determine how
much signal gets to a far, far-field receiver. Most of the other
propaganda on antennas is mostly BS to convince others to buy
a product.

If the U.S. military wants to use HF in the field, the standard little
20 W RF out AN/PRC-104 is good for it. ONE whip plus an
internal automatic antenna tuner is good enough there, has been
since before 1986. SSB with synthesized tuning, no-sweat use.
[it could do on-off keying CW but the military don' do dat no more]

>What with the crossed-field antenna, e-h antenna, fractal antenna, and more,
>I'm interested in finding out what this guy has. What I'd love is a 6 inch

>that where the thing is mounted (height, in terms of wavelength) will likely

>affect its' performance considerably. The ground type also comes into play.
>Come to think of it, there were some arguements over the published
>"efficiency" of the cross-field antennas at one point too.

Back around 1960 (give or take a couple), Northrup Corporation
came out with the DDRR (Directional Discontinuity Ring Radiator).
Was ideal for limited bandwidth, VERY small size v. wavelength
provided there was a handy conductive ground plane the ring was
mounted above. In terms of "effective antenna area" it wasn't too
swift but you could make it within 25 foot circle or so just a
couple feet above the ground plane at 3 MHz. Omnidirectional.

The Discone had already been invented in 1960 and the log-
periodic was close on its heels. Muy wideband, great for those
who needed almost-instant QSYs anywhere in VHF-UHF
(discone) or HF (log-periodic)...like military folks.

The software to simulate an antenna structure and to analyze it
for 3D pattern, gain, impedance, etc., came out courtesy of the
Navy again...the Numerical Electromagnetic Code or NEC. Free
for anyone to use but commercial software houses write their
own softstuff to display patterns, etc., all based on the free NEC
kernel. Roy Lewallen, a long-time ham, does this with EZNEC.

Anyone can find out more about antennas and NEC packages
at website Antennex. Interesting stuff even if some of it looks
like Chalabi's electronic brother is putting stuff over on everyone.
:-)

However, there are thousands of little PR pieces put out as "news
releases" each year in the overall electronics industry. They have
a terrible sameness about them...like literary con-jobs. Whatever
they tout has got to be the "most" the "best" the "wonderful new"
the "new concept" or other BS which usually doesn't mean squat.
Those "news releases" are just come-ons to get folks to investigate
and see products or (in the case of universities) people. The
Nobel Prize committee isn't going to be swayed by those things.

>Of course, this particular newsgroup is not really the place to discuss
>antennas; I'd just like something beyond the code vs no code arguements and
>the flame wars.

Some folks have no real interest in anything BUT flaming. Whatever
the general newsgroup topic line is is just used for them to express
their anger, frustration, or whatever they gots inside to relieve them-
selves (both psychologically and physiologically as in waste
relief). Those will try to monopolize a particular thread and bring it
up (as in vomitus interruptus) in other threads as well. They like
the noteriety, apparently.

The newsgroup focus could be anything and they would get angry
and abusive over anyone daring to defy them with some opposite
viewpoint. That happened way back on ARPANET, then USENET

(that came after ARPANET), branched over to BBS networks, and finally on the Internet. Seen it all for three decades. Some of it is funny, most of it is tragic with all the self-pitying and so-called psychological trauma of the angry and irritated who are very busy abusing others. <shrug> Way of life in all computer-modem communications that isn't fully monitored and moderated 24/7.

"Mankind invented language to satisfy his need to complain!" - anon.

:-)

The rest of the post was irrelevent since the antenna itself was
not of importance.

What WAS of importance was that a non-Amateur Radio media source
felt compelled to mention, early on I might add, that the person
responsible for this project was a licensed Amateur.

The POINT being that Sir Scummy of Lanark was once again proven
wrong...Amateurs ARE still involved in "advancement of the radio art",
and someone felt stongly enouhg about it to emphasize it in a news
release.

Lennie often raves in this forum about how Amateurs don't do this
kind of thing.

And of course he can't stand it and will spin this into the
ground.

Too late. The egg's already been cracked and he's wearing it.

Sorry Lennie. Proven wrong by example again.

From the ARRL Letter:

VIRGINIA CITY, BPL PROVIDER PART WAYS; PEPCO OPTS OUT OF BPL INVESTMENT

The City of Manassas, Virginia, and broadband over power line (BPL) franchisee Prospect Street Broadband have parted company, and the city is seeking a new business partner. The decision to terminate the joint venture was mutual, according to city officials, and the city has acquired Prospect Street's interests. Manassas was planning to open bids from prospective replacement BPL providers June 7.

ARRL CEO David Sumner, K1ZZ, called the failure of the Prospect Street-Manassas deal just another example of a BPL deployment decision gone awry. He also predicted that BPL would not prove to be the revenue generator the city anticipates. Under the franchise agreement, Manassas receives 10.5 percent of BPL revenue and is responsible only for the relatively small cost of equipment installation. The failure of the franchise agreement leaves the city with obligations that far exceed revenues, however.

The first municipally owned utility to offer citywide BPL, Manassas has changed the name of its project from the Broadband over Powerline Enterprise to the Telecommunications Services Enterprise. City budget documents indicate that Manassas is prepared to loan $400,000 to the Telecommunications Services Enterprise Fund "to finance operating expenses" in Fiscal Year 2005.

The city's small BPL field trial involved fewer than a dozen homes and businesses in an area with underground utility wiring and no nearby Amateur Radio licensees. "Results of the eighteen-month pilot program were favorable and demonstrated BPL as a viable technology for the delivery of data services," the city's bid invitation declares. The city approved full-scale BPL deployment last October and started offering the service in February. The contract with Prospect Street Broadband apparently was terminated several weeks later.

The city's glowing pro-BPL comments on the FCC's Notice of Proposed Rule Making in ET Docket 04-37, filed May 3, neglect to mention the cancellation of the Prospect Street agreement.

The comments also say the city "remains sensitive" to Amateur Radio's interference fears. Manassas Utilities Director Allen P. Todd, W4VUB, has met with members of the Ole Virginia Hams (OVH) Amateur Radio Club to address their concerns, the comments note, and a BPL connection was set up in the home of OVH member Bob Zaepfel, K4HJF. The city made a letter from Todd describing its efforts to cooperate with local amateurs part of its

comments to the FCC. That letter says that during informal tests in early April, OVH members were "unable to identify any interference in the amateur bands being caused by BPL installation." Todd's letter did not provide test details.

The Manassas Journal Messenger reported this week that two neighborhoods now are fully equipped for the service, and, to date, 200 customers are using the service, although the bid proposal says the city's deployment of BPL "passes more than 2000 homes with the fiber infrastructure passing more than 4,000 homes, and fiber construction continuing each day." Manassas charges $28.95 a month for its BPL service. The city is supposed to complete its citywide BPL rollout by this fall. City officials told the Journal Messenger that the Prospect Street contract termination will not affect BPL delivery.

Elsewhere, Pepco, a utility serving 700,000 Washington, DC, and Maryland customers, and its parent company, Pepco Holdings Inc, have decided to forgo any investment in BPL. Pepco continues to operate a BPL field test in Potomac, Maryland. The utility is continuing discussions with BPL partner Current Technologies and has indicated it's open to proposals to lease access to their power lines to deliver broadband service.

Pepco was said to be less interested in delivering broadband than in finding ways to improve its billing systems. A company spokesperson said the decision not to invest in BPL applies to all Pepco Holdings Inc companies.

Additional information on BPL and video clips from field trial sites are on the ARRL Web site <http://www.arrl.org/bpl/>.

```

>
>Huh?
>
>I thought most of the OFs were trying to get the tests a bit more difficult.
>You can't have it both ways.

It wasn't the "OF's" who were trying to get the tests thinned out. It was
the Johhny-come-lately 10-4 Good Buddy crowd that wanted NO code test and
written questions that were "in the public domain".

>Next, you'll blame the OFs because your washing machine is over-sudsing LOL!

He'll blame anyone for anything as long as it means defering any
responsibility from himself.

>The reality is that the real flamers on both ends of the spectrum are the
>hold up. That mention of a trip to the FCC being dangerous had no relation
>to the material on the test. We could say the same thing about sending our
>kids to school. A very few have been killed and/or raped. That is hardly
>a reason for not attending school.
>
>These newsgroups get sillier every month, if not every week.

I had high expectations that there would be some sort of meaningful
exchanges here.

Boy did I ever get my bubble broken.

It's a nice place to get that "stomping in the mud puddle" thing out of
your system so you can wash up and go back to "the real world".

Oh, my! There was no rant, and the invention/patent is not of
importance.

So what we have is is a lie wrapped up in a lack of judgement.

Exactly why did you post anything at all except to troll and flame?

> What WAS of importance was that a non-Amateur Radio media source
> felt compelled to mention, early on I might add, that the person
> responsible for this project was a licensed Amateur.

People everywhere lack judgement, including those in media. Bless
your heart, you're not alone.

> The POINT being that Sir Scummy of Lanark was once again proven
> wrong...

Wrong?

I saw him make no "assertion of fact" for you to refute, and the only
ranting is your own.

> Amateurs ARE still involved in "advancement of the radio art",
> and someone felt stongly enouhg about it to emphasize it in a news
> release.

What are you doing in "state of the art?" Bandspanner?

> Lennie often raves in this forum about how Amateurs don't do this
> kind of thing.

They do it first as paid employees of someone else. They just happen
to be amateurs.

> And of course he can't stand it and will spin this into the
> ground.

You're doing a good enough job of that.

> Too late. The egg's already been cracked and he's wearing it.

Insanity. There was no rant, and then you claim the invention was of
no importance. You're wearing the egg.

> Sorry Lennie. Proven wrong by example again.

In another galaxy far, far away... "MARS >>>IS<<< Amateur Radio."

hihi

Sorry, Steve, but my head is not up Len's rectum. More like your head
is up your own rectum. If you should ever pull it out, it will become
the "POP" heard round the world!

If you cannot produce the rant, you'll just have to troll elsewhere.

"Sorry Hans, MARS >>>IS<<< Amateur Radio."

Maybe - or maybe not.

Fact is that without more info we're not in a position to judge the thing one way or another. Maybe it's a breakthrough, maybe it's one of things that is great in theory but totally impractical, or maybe it's a dud. Without more info, any judgement is just raw speculation. And since a patent application is involved we're not going to see much real data for a while anyway.

One point to watch for, though: What matters in practical antennas is the performance of the entire antenna system, not just the antenna itself. For example, a short (in terms of wavelength) whip antenna can be quite efficient - it's the matching network and ground system losses that reduce antenna system efficiency, and bandwidth, to low numbers.

How can I remove articles from Google's archive?

Google will honor requests to remove messages that you have posted
yourself (known as nuking a post). You may even be able to do this
yourself using our Automatic Removal Tool. Please find the
circumstance below that applies to you and follow the instructions
there.

Messages posted from your current e-mail address
If the email address you used to post your message(s) is still active,
we recommend you use our Automatic Removal Tool. This is the fastest
and easiest way to have your posts removed. Note- that in order to use
this option, you must be able to send and receive email using the same
account from which your messages were originally posted to Usenet.

Messages posted with an e-mail address that is no longer valid
If you would like to request the removal of posts made by you, but the
email address from which you posted is no longer valid, you may send
an e-mail to groups-support@google.com that contains the following
items:

your full name and contact information, including an email address
that can be verified;
the complete Google Groups URL (or message ID) for each individual
message you would like to have suppressed;

a statement that says "I swear under penalty of civil or criminal laws that I am the person who posted each of the foregoing messages or am authorized to request removal by the person who posted those messages."; and
your signature (electronic).

To prevent articles from being added to the Google Groups index in the future, add 'X-No-Archive: yes' in the header of the article when you post. If your news posting software does not allow you to edit headers, type 'X-No-Archive: yes' as the first line of your post.

Messages posted by other people
By its very nature, Usenet consists of information posted by many people. Google does not monitor or control the content of this information. Instead, we simply provide access to the public forum in which people post their comments.

Accordingly, if you are concerned about a message that someone has posted, you need to resolve that problem directly with the person who posted it. Except in extreme circumstances, Google will not act upon an individual's request to remove another person's messages. We firmly believe it is not Google's role to resolve disputes among the users who have posted millions of messages on Usenet, nor would it be possible to fulfill that role if we chose to undertake it.

It is Google's policy to respond to notices of alleged infringement that comply with the Digital Millennium Copyright Act in an appropriate manner under such Act and other applicable intellectual property laws, including the removal or disabling of access to material claimed to be the subject of infringing activity. For more information, see our Terms of Service.

Hello, Jim

Your point about matching network and ground losses is well taken.

We keep hoping for that "perfect" antenna. An IEEE publication back in 1995 pointed out that the Northern Lights are caused by ions that are far too small to be efficient radiators of light - and yet they radiate light. In theory, an antenna can be vanishingly small and yet be efficient - and even possess gain!

If any one has a 6 inch whip with a 3 dBi gain on 75 meters, let me know. I'd like to try it first, however. Don't ask for money up front like all of the notes I receive about transferring $10,000,000.00 US for which I receive $1,000,000.00 - uh, but have to send someone some up front cash to ensure the account is good :))

I ask again, are you out of your gourd? You make some absurd claim
about what I'm supposed to have stated about veterans. There is nothing
to back your claim in archives. Therefore I'm supposed to defend against
that what does not exist.

Under like circumstances, why not defend yourself against the obsession
you have with Cher? Can't find it? Obviously you've deleted it from
Google.

We don't know that the logbook exists. We don't know that T5/N0IMD
existed. No one seems to have worked it. It doesn't show up in packet
cluster records. It doesn't show up in DXCC applications. You must
have cancelled everything through Google.

> I could send you another N0IMD/KH2 card, though. You're a legit contact there.

I didn't ask for the first one. You requested one of mine through my
QSL manager.

>written questions that were "in the public domain".

By definition, AMATEUR radio is not professional. Ergo, a HOBBY,
done for personal recreation, enjoyment, without accepting any
money for communications services rendered anyone.

As such, the rules and regulations need only to reflect the radio
environment, other radio services, and, of course, the international
radio world effect (which involves some politicking). Hobbies don't
need any professional guild-union-craft structure of apprentice-
journeyman-master kind of hierarchy...except in the imagination
of those who use an amateur license to merely show off.

The public question (and answer) pool came about through other
government regulations as Phil pointed out years ago. In reality,
such public data has been around for over a half century
beginning with the "Q&A" books that were once on the market
right after WW2. The Dick Bash material came later and was
not the start of such things. Bash did better marketing,
combining his radio schools with the books, plus some
noteriety, all added up to his being "known" better. The "Q&A"
books began it with commercial radio operator licenses plus
the amateur radio operator licenses.

The "no code movement" existed over four decades ago and
has grown in that time, finally achieving organizations (NCI is
the largest to date) which emphasized that. The use of manual
telegraphy has continued to decline in non-amateur radio for
half a century and the hoary old maxims of "a good radio op
is a good telegrapher" went out of date long, long ago...every-
where but among the greying heads of old amateurs.

>>Next, you'll blame the OFs because your washing machine is over-sudsing LOL!

>>These newsgroups get sillier every month, if not every week.
>
> I had high expectations that there would be some sort of meaningful
exchanges here.
>
> Boy did I ever get my bubble broken.

Tsk, tsk, tsk, you broke it yourself.

You can't have "meaningful exchanges" when you soil the
communications environment with personal attacks of any kind
on those who do not agree with you.

"Meaningful exchanges" do not equate with capitulation to your
personal ideas of what amateur radio is (fantasy or otherwise).

> It's a nice place to get that "stomping in the mud puddle" thing out of
>your system so you can wash up and go back to "the real world".

That's just the opposite of what you just said about "meaningful
exchanges."

You DO play in lots of mud. If there isn't any mud, you hose down
the ground and MAKE mud...then whine and complain that all
others are being so nasty to poor little you.

Poor nursie...no TLC received because of throwing all that mud.

You broke the levees over five years ago along with all the
other mud bulldozers in here and think you are mighty and powerful
for saying what's on your mind...and then getting angrier when
anyone throws the mud right back at you. Tsk, tsk, tsk.

On top of that, you can't get government regulations straight or
what they mean, such as "MARS is amateur radio," a statement
that is incorrect.

Stewart started off this thread with some rather vague generality
that wasn't any "rant" but just a general comment. I really don't
know, nor can I decrypt what Stewart meant (from many possible
choices). I can see that the Personal Attack mode has been
turned on by yourself. Again. On specifics of what certain others
say so that you can claim bulldoze rights of breaking the
behavior dam to add more troubled waters over calm land.

There must be MANY "rants" floating around in his troubled
personal mind waters.

So much so, that a link or meaningful part of the URI news release
was never quoted. Nursie took only the part about Rob Vincent
being a ham as important, then trying to connect it with some old,
imagined insults against his person-as-a-ham that only he can
think up.

Nursie must consider this newsgroup as His Own Battleground
where he can Fight His Battles and avenge his self-definition
of something or other.

In reality, a small (less than quarter wavelength), efficient, wide-
band antenna concept IS important to radio amateurs working
in HF bands. THAT should be the focus, not a bunch of pain
from individuals' bruised egos.

Lots of different groups/organizations are working such antenna
problems and coming up with some (usually) different solutions.
Such solutions ARE of importance, not the petty squabblings of
a few individuals.

>"Sorry Hans, MARS >>>IS<<< Amateur Radio."

:-)

>>
>> The rest of the post was irrelevent since the antenna itself was
>> not of importance.
>
>Oh, my! There was no rant, and the invention/patent is not of
>importance.

According to the University of Rhode Island, an academic
institution that includes paid, professional electronic engineers,
the whole topic of Small Antennas was the point of the news
release.

Nursie's interpretation went off into some personal dialect of
"ranting" (and raving) when there was no actual rant going on.

We know nothing yet on the details of this small antenna
with patent pending (?). Actual patent grants might not occur
until 1 to 3 years after submission of the application and the
patent search information (seprate from the patent application
itself). Once the patent is granted it becomes public
knowledge, available for a modest fee from the patent office.

But, patent applications aren't available for full disclosure so
we don't know the details of this "invention."

If the patent application is denied, then it is NOT a "new
invention." [there is lots of prior art in this field and may have

been done by others, therefore making it not patentable]

>So what we have is is a lie wrapped up in a lack of judgement.

Well, I think of it more like a festering (perhaps gangrenous)
ego wound from long ago. :-) It must personally hurt a
great deal and thus cause a new "rant" to be done.

>Exactly why did you post anything at all except to troll and flame?

That seems to be his reason for being in here. All the angries
on display for all to wonder and praise... :-)

>> What WAS of importance was that a non-Amateur Radio media source
>> felt compelled to mention, early on I might add, that the person
>> responsible for this project was a licensed Amateur.
>
>People everywhere lack judgement, including those in media. Bless
>your heart, you're not alone.

Thousands and thousands of "news releases" of new technologies
appear every year in many, many electronic industry publications.
The subscription-free "controlled circulation" periodicals have
regular columns containing nothing but them. Academic
institutions started on that trend years ago.

>> The POINT being that Sir Scummy of Lanark was once again proven
>> wrong...
>
>Wrong?
>
>I saw him make no "assertion of fact" for you to refute, and the only
>ranting is your own.

It is...but that isn't the brake for the bulldozer driven levee-breaking.

It only adds more diesel to push the bull dozing harder into whatever
ground the bull thinks is fun to throw more mud.

OHSA needs to be informed about this. :-)

[it ought to be "Sir of Sun Valley" to complete the nastygram and
be correct with the USPS...very sibilant that way...good for the
nastygrammers to hiss between their teeth on reading newsgroups]

>> Amateurs ARE still involved in "advancement of the radio art",
>> and someone felt stongly enouhg about it to emphasize it in a news
>> release.
>
>What are you doing in "state of the art?" Bandspanner?

Advancing the state of the art in insulting all those without amateur
radio licenses. :-)

>> Lennie often raves in this forum about how Amateurs don't do this
>> kind of thing.
>
>They do it first as paid employees of someone else. They just happen
>to be amateurs.

Licensed amateur radio operators DO advance some of the radio
communication arts. I named Dan Tayloe specifically, plus the
several authors of articles in QST on do-it-yourself crystal filter
theory-measurement-construction. There are others, such as the
various amateur-specific multi-band antennas on the market.

My point - lost on the very angry nursie - is that amateurs do NOT
get credit for ALL of the radio communications advancements and
those few (out of 710K total licensees) who DO innovate and
invent are a decided minority among the constantly-advancing
state of radio arts just in the HF region. The ARRL's claim of
"amateurs advancing the state of the radio arts" is specious in
light of ALL the radio advancements done in the last half century.

>> And of course he can't stand it and will spin this into the
>> ground.
>
>You're doing a good enough job of that.

As usual. Old bitterness of losing newsgroup discussions
lingers on. Tsk, tsk, tsk.

The evidence is Out There...beyond the ARRL publication
dominance for radio amateur information.

>> Too late. The egg's already been cracked and he's wearing it.
>
>Insanity. There was no rant, and then you claim the invention was of
>no importance. You're wearing the egg.

He took a trip to Fantasy Island again...without "da blane."

>> Sorry Lennie. Proven wrong by example again.

Poor nursie. Tries to rant and rave, can't even copy enough of
the news release or give the link to the URL...then claims it
"refutes some (nonexistant) rant."

Insanity.

>In another galaxy far, far away... "MARS >>>IS<<< Amateur Radio."

I don't think George Lucas has that planned for any future
Star Wars sequels-prequels. :-)

Physics is physics is physics and we all know the implications of short antennas *and* we've read the similar hype which surrounded the farcical CFA and EH antennas to name just a couple of this thing's predecessors. I'll stick with my "snap judgement", the thing is guilty until proven innocent.

>We keep hoping for that "perfect" antenna.

I just hope for a better one.

>An IEEE publication back in 1995
>pointed out that the Northern Lights are caused by ions that are far too
>small to be efficient radiators of light - and yet they radiate light.

If it happens, it must be possible.

>In
>theory, an antenna can be vanishingly small and yet be efficient - and even
>possess gain!

>
Sure. But try to match to it!

>If any one has a 6 inch whip with a 3 dBi gain on 75 meters, let me know.
>I'd like to try it first, however. Don't ask for money up front like all of
>the notes I receive about transferring $10,000,000.00 US for which I receive
>$1,000,000.00 - uh, but have to send someone some up front cash to ensure
>the account is good :))

If it was easy, anybody could do it.

OTOH we don't have anything to go on other than "continuously loaded monopole".
Maybe he's got a real advance, maybe it's all just hype. I'll reserve judgement
until there's some real info available.

If somebody told you, back about 1975, that in 25 years you'd have a computer
on your desk that had a 500 MHz CPU, over 100 MB of memory and 10 GB of disk
space, and cost about $200 complete (1975 dollars) what would you have said?

Maybe. Or maybe it's for-real.

Without detailed info it's all academic anyway.

But I remember a time when it was said that "physics" would not permit microprocessors faster than about 25 MHz. Nor with more than a few thousand transistors. Etc.

There was also a very learned "professional in radio" who, when informed of the intent of the 1921 ARRL Transatlantic Tests, proclaimed that it was physically impossible for a kilowatt input 200 meter transmitter to be heard at that distance. Waves were just too short, doncha know. Physics wouldn't allow it.

I think it did.

>No one seems to have worked it. It doesn't show up in packet
>cluster records. It doesn't show up in DXCC applications. You must
>have cancelled everything through Google.

Maybe.

Or consider this:

Suppose you and I found ourselves in a place with no functioning government.

Suppose we had radio sets capable of operation on amateur frequencies. Say on 2
meters, or 440, or 6 meters, or whatever.

Suppose whatever authority existed there at the time said it was OK for us to
use the radio sets.

Could we not work each other and use our stateside callsigns?

Could we not keep logbooks and exchange QSL cards?

Carl,

Please read the thread from the beginning to see the context of the comments.
Note the claims and tone of the person who started the thread.

Jim is *supporting* the idea of meaningful written tests for all - including
the entry-level license, whatever it is.

He is not saying all or even some techs are "dimwits" - just that we need
appropriate technical testing in place.

Whatever works for you. The FCC has implicitly acknowledged that we
are a mobile society and that we become 'attached' to our callsigns
sort of as a second name, so changing calls just because we've moved
makes no more sense than changing our name just because we've moved.
Just sign your call as issued without 'attachments'.

Never quite understood it, but it used to be that a callsign belonged to
the "station" and
not the operator, or something like that. Once it happened many years
ago that two
brothers got licenses but the FCC gave out only one callsign, as they
used the same
"station". The FCC recently decided to change that theory to one that
more closely
matches the way hams think of their callsigns. That a ham "owns" a
callsign and uses
it on whatever ham equipment he happens to be using at the moment. If I
borrow your
ham shack, I would still use my callsign. Once I'm satisfied that your
equipment works
correctly. "Looks like a kenwood TS440SAT, receives like one, and seems
to transmit
like it should."

I think you are pulling this out of context, Carl. The original poster said that (paraphrasing here) the people opposed to the upgrade are wrong in part because the Technician and General tests are nearly identical.

Oddly enough, in a later post that same poster went on to note how many Tower questions there are on the Tech test, yet not on the General test - a seeming contradiction for nearly identical tests.

I am a "new" Ham, having taken all my tests in modern times. There are significan differences between the Technician test and the General test and the Extra test.

Jim was merely supporting adequate testing. As do I. Of course there is a wide gap in what people consider adequate.

I know I do not consider the Technician test adequate to be classed as a General. And I doubt I'll ever apologize for thinking that knowledge is good.

Well, I've had my ticket since 99, but I really don't have any idea of what to do with it. Some friends asked me to recommend a 2-way radio set for them, and in looking I stumbled back into the old ham web sites. The sad truth is that I really don't know what I'm doing.

Sure, I've googled, but what do people in the know like as a good online source of the nitty-gritty information like band usage and such? I'm not all that clear as to where I can transmit what, and what best practices are.

If I wanted to operate on a US military camp in Iraq, does anyone know who I would contact for a license? Is it even possible?

Sorry, Brain...No need to waste that much bandwidth with material
that Lennie already wasted bandwidth on in the first place.

Now, try and find something you KNOW something about to talk
about, Brain. So far you can discount DXpeditions, reciprocal
licensing, MARS, and emergency communications. You've failed
miserably in ALL of these subjects.

Sure there has been, Lennie.

From my own experience, over six years of assertions of how
Amatuers are allegedly NOT involved in any kind of research. Goggle
archives attest.

I don't care about the intimate details of the project. The
POINT was (and still is) that Amateurs ARE involved in research and
they ARE recognized for thier contributions AS Amateurs by entities
OTHER than Amateur Radio-related sources.

You have asserted on numrous occassions that since no one except
ARRL sources routinely report on such things, they obviously don't
occur.

You were (again) proven wrong.

The rest of your "more smoke = less credibility" spin deleted.

Try again, Grampa Lennie...

Had nothing to do with "physics", had to do with musings posted by a
few gloms who were clueless about how rapidly developed chip
manufacturing technologies could leap past the limits of their own
imaginations. Hoof. Mouf. Classic.

This is not 1921. 83 years later the physics of antennas has been
milked to the extent that the probability of anybody inventing an
antenna which does not utilize long-applied physics lies somewhere
'way out the asymptote of the curve.

Per previous I'll stick.

Sure you can...ie: Antarctica

However even there there are international agreements on who can grant what
authority, to whom, and under what circumstances.

Brain was allegedly in a military unit under United Nations auspices, and
it seems he did NOTHING to get the PROPER authorizations to do what he CLAIMED
to do.

He won't even provide us with the callsign of ONE station he "worked"
while in Somalia.

No proof = Didn't happen.

Well, there you have it. It could have happened, and all of the above-named conditions would have been met.

> However even there there are international agreements on who can grant
>what authority, to whom, and under what circumstances.

Of course. I didn't say such operation would be 100% in agreement with international requirements, just that it could happen.
>
>Brain was allegedly in a military unit under United Nations auspices,
>and
>it seems he did NOTHING to get the PROPER authorizations to do what he
>CLAIMED to do.

Maybe. But that has no bearing on whether the alleged /T5 operation took place, whether logbooks existed, and whether QSLs were exchanged.

Remember that all it would take to meet all of these conditions would be one QSO in a ham band using stateside calls and portable designation.
>
>He won't even provide us with the callsign of ONE station he "worked"
>while in Somalia.

Of course not. Same goes for bands/modes/antennas/rigs used. But the lack of detail doesn't mean the alleged operation didn't happen.

The lack of detail is a different issue completely.

> No proof = Didn't happen.
>
Not at all.

No proof = Reasonable doubt.

Nothing more or less.

Only on nursie's side... :-)

[poor person thinks his every utterance is "truth"...]

> From my own experience, over six years of assertions of how
>Amatuers are allegedly NOT involved in any kind of research. Goggle
>archives attest.

No "amatuer" is involved in any kind of research.

A few amateurs are.

What is a "goggle" other than an eye shield?

Do you get little archives on your helmet goggles while flying?

Try GOOGLE instead.

[no, you don't grow archives in the garden to put on salads...]

> I don't care about the intimate details of the project. The
>POINT was (and still is) that Amateurs ARE involved in research and
>they ARE recognized for thier contributions AS Amateurs by entities
>OTHER than Amateur Radio-related sources.

You "don't care about the intimate details" because you can't
get intimate with basic electronics enough to understand what
is being talked about. Not the newsgroup's problem...except to
to see your blabbering of injured ego...

> You have asserted on numrous occassions that since no one except
>ARRL sources routinely report on such things, they obviously don't
>occur.

I don't make a career of such "numrous occasions" but the
"research" into radio technology is still, overwhelmingly, done
by corporations and academicians...VERY little by licensed
radio amateurs.

Of course, if the only source of your information is the ARRL, then
you will appear thoroughly brainwashed into believing them and
that hams are busy, busy, busy "advancing the state of the
radio art" all over the place.

Yoda asks, "What state of any art has nursie advanced...hmmm?"

> You were (again) proven wrong.

"Wrong?" By a news release from URI that gave NO details on
this wondrous new antenna other than more snake-oil sales
pitching? Hundreds of those news releases appear every month.

Those inventions assume some legitimacy when they appear as
papers in known publications or presentations at conferences.

The fields on your antenna are crossed but you are still not
a Stone's Throw from Antennex.

[a pun for those who know Jack...]

[nursie won't understand]

> The rest of your "more smoke = less credibility" spin deleted.

I gave up smoking a long time ago. :-)

You didn't. Your "hostile actions" claim is still on fire.

So is "MARS is amateur radio."

Smokey the Bear say, "Only YOU can put out forest fires..."

> Try again, Grampa Lennie...

That's GREAT in front of that to be a "meaningful discussion" thing.

Now show us your logs on working Rob Vincent in RI on one of
the URI micro-antennas.

Remember...No proof = Doesn't exist.

Poor baby. So far, not a single "meaningful discussion." :-)

Example is just following...

> You are the epitome of newsgroup antagonist and troll. You laid waste to
>your own name and "character" a long time ago. You are a documented liar and
>deceiver.

"Liar?" In one way, to one pair of eyes, that is true

I disrupt the fantasies and wish-fulfillment of someone with reality.

That can be a distinct ego blow.

"Deceiver?" In what way? Not following your imaginations and fantasies as "truth?"

Reality can be harsh. Try to accept reality as it exists.

> YOU "soiled the communications enviroment" when you started in with the
>"jackbooted thugs", "elitists" and other demeaning adjectives and then followed
>it up with ream after ream of cowardly, spiteful anti-Amateur rhetoric.

Your jackboots wear out? :-)

If being a "ham" means living in a fantasy world of great derring-do in radio, then I'm certainly not one of those deceivers.

> Putz.

Tsk, tsk, tsk...still into cussing and personal attacks as "meaningful discussions?" [not at all a good image of an amateur extra...]

This ain't Don Miller time, the topic is the imaginary T5/N0mind.
There are no "suppositions" about his case. There *was* a radio
licensing authority in Somalia throughout that operation and there
was a long-standing clearly prescribed procedure other members of
the U.S. military followed in order to obtain perission to operate a
ham station in Somalia when he was there. The procedure is a matter of
long-standing gummint policy which existed long before Brainiac landed
in Somalia and all the legit YIs who are popping up today are
following the same policy requirements.

Quite some time ago I posted a copy here of a detailed e-mail written
by another member of the U.S. military who was also in Somalia during

that military expedition, followed the procedure and got official
hard-copy permission to go on the air. He went on to work scads of
stations, kept his logs and passed out piles of ARRL-acceptable cards
for a new one. Brainiac did none of the preceding = **bogus**.

Brainiac's excuse at the time was something like "well, he was later
than I was".

Yeah, right . .

Maybe it is. Ol' Don *was* on the air using various exotic callsigns.

Sometimes he actually was where he said he was, too.

> the topic is the imaginary T5/N0mind.
>There are no "suppositions" about his case.

Sure there are.

>There *was* a radio
>licensing authority in Somalia throughout that operation and there

>in Somalia and all the legit YIs who are popping up today are
>following the same policy requirements.

I'm not saying the above supposes would result in a legitimate operation. I'm
just saying that it could be done, and if the operation were confined to a
couple of local VHF/UHF QSOs the people involved might not get in any trouble.
>
>Quite some time ago I posted a copy here of a detailed e-mail written

I'm simply saying what *could* be done. I'm not saying it would be legit, or
that anyone other than those directly involved would know anyhting about it.

Jim,

In 1976, I purchased a Heathkit H-8. With 16 big K of ram (and I ordered a
12 K memory board from another vendor - a total of 28 K in the computer),
and a text only monitor and tape recorder for mass storage, the thing set me

back way over $2,000.00 - *in 1976*!

The theory behind the exams is run a rough check on an individual's
competence to operate therefore reducing perceived assorted problems
on the bands. What's missing from the Tech written which would lead to
problems on the low bands if they were simply grandfathered to HF as
Generals? What problems?

-or-

What's the difference between Techs running 1.5 kW of ssb on 6M which
they're allowed to do under the current regs and the same individuals
running 1.5 kW of ssb on 20M which they're not allowed to do? Besides
the positions of the station's bandswitches.

It's not a "could be", it's already out there all over the world all
over the RF spectrum. We call it "freebanding". Which, is exactly what
Burke was doing if he actually did get on the air from T5 without the
paperwork.

The last thing I'd do is keep logs and send cards if I went freebanding.

Just what is that anyhow? a 50 ohm resistor on the end of a pole?

> Maybe he's got a real advance, maybe it's all just hype. I'll reserve judgement
> until there's some real info available.

Extraordinary claims require extraordinary proof. I'll not only reserve
judgment, but am highly skeptical about it at the same time. This sort
of thing is almost like the audiophile stuff I posted the other day.

And what I have seen so far on this breakthrough is feelgood stuff. I
just wonder why an 80 to 100 percent efficient antenna melts when hit
with a "whopping" 100 watts of power?

> If somebody told you, back about 1975, that in 25 years you'd have a computer
> on your desk that had a 500 MHz CPU, over 100 MB of memory and 10 GB of disk
> space, and cost about $200 complete (1975 dollars) what would you have said?

First I would have said "kewl" or whatever I was saying in 1975.
(probably more like "Far out, Dude!")

I wouldn't have seen any mechanical limitations however. I would have
marveled at getting so much stuff on one integrated circuit, noting that
the size was limited by the limitations of light. I don't think I would
have thought of X-ray lithography at the time. But I would have believed
that such a thing could be done.

The areas that I would be most surprised at would be that the computer would have a single CPU that did all the processing. I would wonder why on earth we weren't using massively parallel processing. In fact, I still do. Love my G5 dual processor!

The most mind boggling thing to me would have been the software and applications for the computer of 2000 or 2004. Soundcard applications, GUI's, graphics and all that other stuff was simply not on my radar screen at that point.

Hf type questions? I also have a question along these lines. I
personally think that not having Technicians take and pass a test that
was considered to prepare the applicant for operation on HF is ripping
them off! The question is "Why would anyone support screwing over half
the Ham population out of something they should have?

Honest, Folks, knowledge is good!

Well, the Techs are vetted on safety issues, so I'm not all that
worried about letting them use QRO. But specifically, I think that RFI
problems are different between HF and VHF and above.

As opposed to the "nolege is bad" folks, that simply want to reduce
power to levels considered "safe" so that we don't upset the applicants
with silly questions about RF safety.

20 meters is the hangout for the 11 meter types who happen to have valid amateur licenses. 14.313 has been a favorite haunt of theirs. In fact, I shouldn't put down CBers by even comparing some (not a lot, but some) 20 meter operators to 11 meter operators.

Can't help but remember calling from the US Naval Hospital (KG6NAC) with phone patch traffic - the frequency was clear and I had checked - and some idiot from Hawaii told me to take my phone patch traffic elsewhere as there was an important DX contest going on. Yep, you youngsters go get shot up in Vietnam and leave me and my DX alone.

So much for amateur "service". Maybe Len is correct in some of his observations. Unfortunately, there were a couple of patients, a doctor, and a nurse present to hear that idiot. I did offer to give him the phone number as I wanted to tell him what I thought of him but didn't want to say it over the air as I didn't want to loose my license. He didn't take me up on it :)

About the only thing that has no limits is stupidity.

That's you. Others might not be so concerned. And if the "logbook" consists of a few local QSOs and the cards delivered in person, all of the above would still be true, wouldn't they?

Heck, I could jam the door interlock on a microwave oven, bring it out in the back yard and point it at the sky, power it up and proceed to call CQ by opening and closing the door. Then I could claim I was "operating high power UHF" and it would be true, wouldn't it?

A term that can mean all sorts of things.

>a 50 ohm resistor on the end of a pole?

HAW!

No.

Here's one implementation:

Imagine a large vertical helix. The length of the helix is such that resonance
occurs at the operating frequency. The wire size, diameter, and spacing of the
helix is such that efficiency is maximized. Whole thing is operated as a
vertical against ground. Not a new idea at all, but perhaps some new tricks
were applied.

(I don't know if that's what the guy invented, just that it's one form of
continuously loaded monopole).
>
>> Maybe he's got a real advance, maybe it's all just hype. I'll reserve

I don't see the need for "extraordinary proof" - just proof! I won't rush to
judgement either way.

And in real life, this development has no effect at all - yet. We cannot go out
and buy these antennas, nor obtain the needed info to build them ourselves. We
don't even know if and when such will be available. So they're unobtanium.

>And what I have seen so far on this breakthrough is feelgood stuff. I

Lots of problems with parallel processing. For example, you still need a single
control processor or its equivalent to run the show. Second, parallel
processing only helps when the tasks can be split up efficiently between
processors. Thsi is true in some situations and not true at all in others.
Third and most important, the cost climbs faster than the benefit. All else
equal, a 1 GHz computer doesn't cost ten times as much as one with ten 100 MHz
processors and the supporting circuitry.

Almost all of which was in existence back then, due to work at Xerox's Palo
Alto Research Center.

ARRL has no direct control over testing standards.

Don't you just hate it when someone spoils your rant/bash with a fact?

Nothing against K5KSR but it says something about the level of QST readers when they vote his article "Use the Right Phonetics" as the best article in our national Journal for May.

'Nother piece of nonsense. Any number of EEs who worked with HV for a living have killed themselves on the job and in ham shacks over the years professional experience and ham radio test questions aside. I never had to answer any questions on tower climbing or RF exposure topics to get my Extra. I've dangled by my whatchmacallit up towers at 150+ feet more times than I can recall and I'm no more RF brain-fried than any of the rest of you RRAP lurkers.

> so I'm not all that

Vince,

We've always had a few brain dead. W2OY (not the current holder, the guy back in the 60s) comes to mind. A good theory test won't filter 'em out (nor a cw test either). Unfortunately, there are no mental exams required to obtain a license ;)

I wish I was running on 160 again. I've never witnessed poor operation on the top band. It seems the quantity of lids is proportional to the propogation.

>>>
>>>I think it did.
>>
>> Why? Because he "said so"...?!?!
>
>That's one reason. Lacking any proof to the contrary, I'm not going to call
>someone a liar.

Then you're a bit more liberal than I am, I guess! =)

I figure after two years of being asked yet proactively dodging the ante
earns Brain the title.

>> Sure you can...ie: Antarctica
>>
>Well, there you have it. It could have happened, and all of the above-named
>conditions would have been met.

And I have yet to meet anyone who WAS "there" that didn't have SOME
memento of the occassion. I know three guys who were /KC4 who at least had
pics taken at the McMurdo and Little America signs outside the outpost's
complex.

>> However even there there are international agreements on who can grant
>>what authority, to whom, and under what circumstances.
>
>Of course. I didn't say such operation would be 100% in agreement with
>international requirements, just that it could happen.

Sure it could...and J.Lo might leave her NEW husband and show up on my doorstep begging for me to pleasure her...

I ain't holding my breath. However if she DOES show up, you can be darned sure I will have SOME sort of proof before making outlandish claims!

>>Brain was allegedly in a military unit under United Nations auspices,
>>and
>>it seems he did NOTHING to get the PROPER authorizations to do what he
>>CLAIMED to do.
>
>Maybe. But that has no bearing on whether the alleged /T5 operation took
>place,
>whether logbooks existed, and whether QSLs were exchanged.

It has all the bearing in the world, Jim.

How can you say that a lack of proper authorization to operate DOESN'T ahve bearing on the operation...?!?! There's not a single Amateur Radio award by any organization that I am aware of that is not predicated on the legitimacy of the operating credentials of the claimant.

He can "operate" all he wants to and exchange a ton of QSL cards, but no license (or authorization or permit or certificate...what ever you want to call it...) and all that operation is worthless.

>Remember that all it would take to meet all of these conditions would be one
>QSO in a ham band using stateside calls and portable designation.

As long as the legal criteria was met.

In Brain's case, it appears as though it wasn't. He was not in Antarctica...he was allegedly in Somalia.

>>He won't even provide us with the callsign of ONE station he "worked"
>>while in Somalia.
>
>Of course not. Same goes for bands/modes/antennas/rigs used. But the lack of
>detail doesn't mean the alleged operation didn't happen.

Please tell me you're just playing "Devil's Advocate", Jim...!

>The lack of detail is a different issue completely.

You've GOT to be kidding me.

I can tell you in INTIMATE detail the sation I had set up in my barracks on Oki in 81...Equipment, antennas, I even still have the log. Although I don't have my copy of the AMRS authorization, I can give specifics about who/what/where, callsign, and even have a couple of QSL cards from folks I worked...

He can't even TELL us ONE callsign of anyone he worked...?!?!

>> No proof = Didn't happen.
>>

>Not at all.
>
>No proof = Reasonable doubt.

No proof on short notice = reasonable doubt.

No proof after two years = didn't happen.

>Nothing more or less.

His "nothing more" can't be much less than what it's been, Jim!

Unlike Brain, I can refer you to 15th Air Force Auxiliary Military Radio
Service station callsign KA6CM, issued from Yakota, Japan, in August of 1981.

> Where are nursie's other claims?
>
> No proof = Nothing happened.

You were provided adequate information to inquire directly of the
Veteran's Administration, Lennie.

Since you didn't do it, your assertions of "no proof" are your own
undoing, Putzster.

If the archives of the federal government aren't good enough for you,
Scumboy, I don't know what else I can do.

Same here. But I don't accept some blowhard(s) on r.r.a.p. as a
competent authority for me to have to produce proof for.

Best of luck.

Nonsense? There is no doubt that an engineer can fry themselves. But
that really isn't the point. There is no level of education that can
insure complete safety.

What the idea - and the point is - is to provide the exposure to some
relevent material, and hope it sinks in. It is an excercise for the
student to use or not to use.

> I
> never had to answer any questions on tower climbing or RF exposure

"Dodging?" :-)

Nursie, the Hero of "seven hostile actions?"

[as yet unidentified as to where and when... :-)]

Nursie who stated (flatly): "MARS is amateur radio?"

Nursie who knows all about electronics engineering whose entire
electronics career has been a few months at a mid-sized TN
set-top box maker as a Purchasing Agent?

>>> Sure you can...ie: Antarctica
>>>
>>Well, there you have it. It could have happened, and all of the above-named

>ahve bearing on the operation...?!?! There's not a single Amateur Radio award
>by any organization that I am aware of that is not predicated on the
legitimacy
>of the operating credentials of the claimant.

Oh, my, there he goes...drinking and deriving... :-)

Ah...there was NO mention of any "awards" or even "dxpedition"
or anything like that.

Brian was THERE, on assignment, in the military, and subject to
military authority.

But, nursie doesn't seem to want to obey any military since he
stated "MARS is amateur radio" and never once admitted that
the military (from DoD downwards) stated that MARS is a
military radio service.

> He can "operate" all he wants to and exchange a ton of QSL cards, but no
>license (or authorization or permit or certificate...what ever you want to
call
>it...) and all that operation is worthless.

Nursie be da Final Authority.

Nothing in radio takes place without he be da Judge! :-)

>>Remember that all it would take to meet all of these conditions would be one
>>QSO in a ham band using stateside calls and portable designation.
>

>>detail doesn't mean the alleged operation didn't happen.
>
> Please tell me you're just playing "Devil's Advocate", Jim...!

Running out of support for your nastygram statements? :-)

>>The lack of detail is a different issue completely.
>
> You've GOT to be kidding me.

Nursie obviously cannot take any view opposite of his. :-)

> I can tell you in INTIMATE detail the sation I had set up in my barracks
>on Oki in 81...Equipment, antennas, I even still have the log. Although I
>don't have my copy of the AMRS authorization, I can give specifics about
>who/what/where, callsign, and even have a couple of QSL cards from folks I
>worked...

Okay, tell us. In "INTIMATE" detail. [dreams about J.Lo. don't have
to be included]

FULL DETAIL. Official permission, da whole magilla.

> He can't even TELL us ONE callsign of anyone he worked...?!?!
>
>>> No proof = Didn't happen.
>>>
>>Not at all.
>>
>>No proof = Reasonable doubt.
>
> No proof on short notice = reasonable doubt.
>
> No proof after two years = didn't happen.

Proof on "seven hostile actions?" [didn't happen]

Proof on "MARS is amateur radio?" [DoD says otherwise]

>>Nothing more or less.
>
> His "nothing more" can't be much less than what it's been, Jim!

Poor nursie, still hating and raging, meanmouthing everyone who
doesn't believe him...and then wanting "meaningful discussion" !

Fine example of an amateur extra class radio amateur.

Too bad the ARRL doesn't have a "Cover Plague" award. :-)

LHA / WMD

>everything you say, you still insist that your putrid lies are valid.

1. Nursie hasn't "directed" anyone...except AWAY from here.

2. Nursie hasn't given any "countless sources of data."

3. That (supposed) data does NOT "contradict" anything I've
written in here.

4. Nursie's "meaningful dialogue" consists of nothing more
that personal insults.

5. I "spew" NO "lies" about amateur radio. I give some
personal opinions on subjects...which nursie can't abide.

6. Too bad for nursie.

>> That can be a distinct ego blow.
>
> There's been no blow to MY ego over anything you've "presented" in
>this forum. I get aggitated that someone can so overtly lie and
>attempt to mislead people without some sort of resounding recourse,
>but hey, every creep eventually ahs his day...you will too.

"aggitated?" "ahs?" :-)

Tsk, tsk, tsk...when aggravated into another rage, nursie begins
confusing spellings again...:-)

>> "Deceiver?" In what way? Not following your imaginations and fantasies
>> as "truth?"
>
> "I am going to get my "extra lite" out of the box".

Why should I do that? :-)

> "I am only here to civilly debate the Morse Code test issue"

That's what I originally thought way back when...but then all
those OFs of the morse persuasion got so evil, wicked, mean
and nasty towards anyone who didn't love, honor, and cherish
telegraphy. :-)

> "I'll send a scanned image of my FCC License to anyone who asks
>for it"

I did that already. :-)

>> Reality can be harsh. Try to accept reality as it exists.
>
> That's not my problem, Lennie...Accepting that mere mortal,
>non-engineer lay persons with an FCC license can do more with a radio
>than you ever THOUGHT about doing is YOURS.

Nursie is a "mere mortal?" Good grief...I thought nursie was a
Warrior of the Newsgroup, able to benchpress a KWM2,
faster than a speeding ballot, leap tall pileups at a single bound...

I'm still trying to invent antigravity...but something is holding me
down... :-)

>> > YOU "soiled the communications enviroment" when you started in with
the

>see just how much it takes to wear them down...How's that, Lennie?

I'll get the group down at the Burbank HRO store to notify the
newspapers that you will give them a photo opportunity. :-)

You DO know what's right next door to that HRO store, don't
you? :-)

>> If being a "ham" means living in a fantasy world of great derring-do in
>> radio, then I'm certainly not one of those deceivers.

>
> You've never been in ANY world of radio operating, Lennie...You
>have been around them, used them as a tool, maybe even played with one
>on a bench, but you're incompetent when it comes to OPERATING one.

Love all nursie's "meaningful dialogue." :-)

I could recite again my experience, but nursie gets SO upset
about that! Tsk, tsk, tsk.

Actually, I began in radio by doing some operations of military
transmitters...and receivers...and FSK exciters...and teleprinters
...and handheld transceivers...and Jeep-mounted transceivers...
and manpack transceivers.

Then I got out of active duty, got the commercial First Phone
and operated broadcast transmitters and all the other electronic
stuff around a TV studio. Came out west and did some radar
and missle transmitting-receiving. Got a personal radio on CB
(for fun communications), even designed and built a couple of
CB transceiver prototypes for a company that went Chapter 11
a rather long time ago. As time went on, I did real civil airways
radio operating from a real cockpit, handled UHF two-ways,
got into a partnership which installed and used a VHF two-way,
communicated with a station ON the moon, did a bunch of
DoD and military radio field work, and eventually communicated
on HF from a moored sailboat in a marina.

That's just a quick summary of things I did since 1952. There's
other little things that will make you angry because your mighty
morphing hamradiolicense forbids you to do those. :-)

Never once since 1952 have I needed or been required to use
manual telegraphy to "work" anyone on any radio frequency
from VLF on up to 25 GHz.

Never once did I have to "QSL" anyone that "contact work" had
been done. Never once did I have to join any ARRL in order to
verify anything I did in radio-electronics. But...I've written a lot
of reports on radio performance which were all accurate and true.

>> > Putz.
>>
>> Tsk, tsk, tsk...still into cussing and personal attacks as "meaningful
>> discussions?" [not at all a good image of an amateur extra...]
>
> It's not my image, Lennie. It's yours. You're the putz.

You don't have an image? Tsk, tsk, you should swear and cuss
some more then... :-)

Other readers of this newsgroup have an "image" of nursie. :-)

>> LenAnderson@ieee.com
>
> They ought to sue you for defamation by association.

IEEE is a professional association. I joined them late, like in
1973. By now I've become a Life Member in the IEEE with all
the benefits of regular working members after 31 years in
the electronics engineering profession.

Life Membership in the IEEE is automatic, no extra dues,
no one-time charge, nothing extra once you have so much
membership time plus age. There's about 220 thousand IEEE
members all around the world. It is truly international.

You want to suggest legal action by the IEEE against me?
The quickest way for you to contact them is to go to
www.ieee.org and get an address or send them some of
your filthymouth e-mail. IEEE has automatic virus detection
software to detect badness in e-mail...they just don't always
detect badasses in e-mail. :-)

Yeah, but I mean was it filament wire or maybe number 40 or something?
100 watts is only so much energy, and an antenna that melts when faced
with 100 watts must be pretty fragile. I could have accepted maybe that
the antenna caught one of the local trees on fire, or something like
that, but we're talking about total destruction of the antenna, (as an
antenna anyhoo) with 100 watts of power!

Yup, and each processor can loaf right along. Year ago, the Commodore
Amiga had it right. All those dedicated chipsets in it were
co-processors, not specifically parallel processors, but the concept was
valid and very sound.

> Second, parallel
> processing only helps when the tasks can be split up efficiently between
> processors. Thsi is true in some situations and not true at all in others.

I've been using dual processor computers since y2K, and it is truly
amazing just how superior they are. I do understand that the PC world
may be different archetecture-wise, in a way that makes multi processor
computers work less well for that platform. But that should not be
confused with parallel computing being not very efficient.

Intel-centric is the concept I think! ;^)

>
> - Mike KB3EIA -

Hello, Mike

You stated that very well. The question of "what is adaquate testing?" will likely be a big bone of contention between a lot of folks. Certainly there are many *very* well qualified techs. A friend of mine was a tech for something like 25 years until they lowered the code for general to 5 words per minute. He then got an automatic upgrade to general. His theory test, however, was identical to a general back when he took his test. He does have a degree in electronics and is *highly* qualified; that does not assure me that all techs are *highly* qualified for an automatic promotion to general. That was my only point.

Amateur radio should not be elitist; however, certain basic fundamentals should be known before issuing a license (at least in my mind).

Most likely, since the tech license is to be phased out, the ARRL doesn't want to upset more people than necessary (whatever decision is made, some folks are not going to be happy).

Of course, if the FCC started cracking down hard on some of the "problem children" of 75 and 20 meters, things might fall in line a lot better. There exists no sanity test for an amateur license, unfortunately ;)

>Actually, No. I fear that you'll go postal and people will get hurt.

Only if you raise your hands above your waist with a blunt object in it.
And that would be " a person"...not "people".

Otherwise I'll just point and snicker...Kinda like I have been doing for
the last two years. That I can do from here.

>So you want me to travel across the country because I used to be a BST
>volunteer at SAFB?
>
>Sheeeeeeesh!

Only if you thought that your being at a social function with other
like-minded radio afficiondoes was something you'd find rewarding. The
solicitation invited all persons who had some past participation/interest in
the program. Obviously you weren't that interested or dedicated to the
program.

But since I doubt that you were much more help to that BST than you've
been to the "DXing Community" with your T5 experiences, no, I doubt that your
being at a convention of past or present MARS participants would be
appropriate.

Now that doesn't answer the question he asked, Brain.

He didn't ask "..did I?"

He asked "..who did?"

Nice try.

From you, Brain.

On more than one occassion you've insisted that you "can't find" your
"logs".

THAT says "lost".

>> How inept.
>
>What a stupid assertion. I think you've already used up this month's
>quota. Better go easy.

Hey Brainy...YOU made the "stupid assertion".

So NOW you're insinuating that you HAVE the logs that you have previously
told us you either don't have, can't find or were otherwise lost or misplaced.

I think YOU are the one who had better "go easy". You are getting tied up in your own mistruths.

Whoi said anything about MARS, Sir Putzy?

I said AMRS.

AMRS was the program underwhich US Armed Forces personnel were "licensed"
to operate those 2-by-2 KA callsigns in Japan until Japan finally created a
reciprocal licensing program for foreigners.

Lardass Lloyd's fatass "Rant" <rant@rantscoms.net> whined in message
news:<ca2cal$m49$0@pita.alt.net>...
> Wogie,

Lardass, you really should quit trying to suck Roger's "woger" you've
got quite a cocksucking lisp!

> You were retested by the FCC because *Evidence* <lies flushed>

Oh, so you are speaking for the FCC, now Lardass? Funny how the retest
letter doesn't give a reason except that the FCC has the authority to
retest.
But you don't let the truth stand in the way of your lies, do you?

Here's the letter, where does it say *anything* about interference?

July 11, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47 C.F.R.
Section 97.519(d)(2), the Commission has the authority to
re-administer any
examination element previously administered by Volunteer Examiners
(VE's).
The Commission may either administer the examination itself, or under
the
supervision of a Volunteer Examiner Coordinator (VEC) or VE designated
by
the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur
Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an
American Radio Relay League Volunteer Examiner Coordinator. This
examination
must be completed on or before September 11, 2000. The required code

speed
that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present a
photo
identification. Pursuant to Commission rules, your license will be
cancelled
if you do not appear for re-examination. You will be granted an
Amateur
Radio license consistent with the elements you pass upon
re-examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

Oh, that's right, you got it from the ARRL Enforcement log releases on
the subject. You string together that release that states that Roger
got a warning letter which may or may not indicate inappropriate
activity occuring
(despite this disclaimer, posted along with the logs, which you
somehow "forgot" to include with your retelling:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC
has what it believes to be reliable evidence of possible rules
infractions and not necessarily that the recipient has violated FCC
rules. The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the
rules to readminister any examination element previously administered
by a volunteer examiner.) a preemtive letter to Wiseman and
Gopherface Tunder and the above retest letter, which gives no
indication that interference had ANYTHING to do with the letter being
sent out. BTW, explain why Wiseman PASSED the retest and the code test
(while you couldn't the first time) and even upgraded.
(space reserved for your backpedaling)

Agreed.

> What the idea - and the point is - is to provide the exposure to some
> relevent material, and hope it sinks in. It is an excercise for the
> student to use or not to use.

Where in the charter of the FCC does it state that one of it's
missions is to provide any form of education as part of it's radio
operators licensing processes?? The FCC is a federal regulatory
agency, not an academic institution at any level. In the context of
ham radio it's *sole* missison is to take a reasonable poke at
maintaining law and order within the portions of the RF spectrum
allocated for ham radio operations. It does this via testing the
technical and operating competence levels of ham radio license
applicants. Period.

I've long held the view that peripheral issues like HV and tower
climbing safety questions creeping into the tests are for the most
part out of place because they have no implications with respect to
the public interest in the RF spectrum. I disagree with the concept of
the FCC trying to "teach" personal safety as part of the licensing
process. RF safety questions on the other hand are germain to the
testing process because the public does have a stake in radiation
exposure issues.

My bottom line in all this is that the FCC is testing for subjects
which have nothing to do with it's role as a regulator and is failing
to include topics which should be included in the tests like emergency
communications procedures and others I could dredge up.

> > I
> > never had to answer any questions on tower climbing or RF exposure

You're lecturing the choir . . . I've spent over a half century in the manufacturing sector much of it out on the production floors in various roles in the bowels of smokestack America. I've seen the blood and gore up close and personal, nobody around here supports safety education any more strongly than I do. The question is where that education should come from.

Twisting your comment a bit "Personal safety education in ham radio should be
left as an exercise for the individual".

I'm not exactly sure what you're trying to say, Alun? Just come on out and say it, if you'd please. Any licensed ARO who is familiar with the current bandplans (Including all "gentlemen's" agreements.) should easily surmise

that this is indeed a CW net.

Perhaps we could do a phone net on 7237? Not tonight, though.

Couldn't have. I've never said that.

> On more than one occassion you've insisted that you "can't find" your
> "logs".
>
> THAT says "lost".

You've got 24 hours to Google that up, or you will forever be branded
a LIAR.

> >> How inept.
> >

> >What a stupid assertion. I think you've already used up this month's
> >quota. Better go easy.
>
> Hey Brainy...YOU made the "stupid assertion".

No, you did. You've asserted that I "lost" my /T5 logs, or that I
"can't find" them. That is false. Completely false.

Now Google up where I said that.

> So NOW you're insinuating that you HAVE the logs that you have previously
> told us you either don't have, can't find or were otherwise lost or misplaced.

I have logs. I've always said that I have the logas, and know that
you're not in them. I know exactly where the logs are. I've never
said that my logs were "lost" or that I "can't find" or that I
"misplaced" them.

You have made a false assertion.

You have been challenged to Google up the post where I've said the
things that you say I've said.

> I think YOU are the one who had better "go easy". You are getting tied up
> in your own mistruths.

Absolutely not. I know exactly what I've said. So Google it up, you
peddler of mistruths.

> Steve, K4YZ

By the way, did you know that "Sorry Hans, MARS >>>IS<<< Amateur
Radio?"

Hihihi!

Perhaps gunnery nurse should safe her M-16 and understand the bit of humor Brian wrote? :-)

I'm still waiting to hear how nursie "pleasured J.Lo on his doorstep." But, I realize that was overt imagination on overdrive with nursie.

Has the gunnery nurse read and understood DoD Directive 4650.2 (effective 21 Nov 03) yet?

MARS is NOT amateur radio.

Beep, beep.

No guts, gunnery nurse? Don't you need to "strike some blow
for freedom" or other patriotic sloganeering about keeping
hum radio as you know it?

You HAVE flipped off the edge of sanity.

>>So you want me to travel across the country because I used to be a BST
>>volunteer at SAFB?
>>

Tsk, tsk, tsk...if gunnery nurse isn't at this convention, then she
isn't really interested or dedicated to the program! :-)

[it's "afficionadoes" nursie...try keeping some typing control there]

> But since I doubt that you were much more help to that BST than you've
>been to the "DXing Community" with your T5 experiences, no, I doubt that your
>being at a convention of past or present MARS participants would be

The state of the art of military ordinance would be greatly in debt
to the gunnery nurse's secrets on exploding random sayings into
nuclear-style blasting! :-)

That and the USOC on such prodigious Leaps of subjects...greater
than Bob Beamon's record-setting long-jump performance in
Mexico City.

It must be nursie's "seven hostile actions" experience... :-)

No, you did NOT write "AMRS" (therefore you did not "say anything").

You sound like you are making up things as you go along. Not
a new thing with nursie...

> AMRS was the program underwhich US Armed Forces personnel were "licensed"
>to operate those 2-by-2 KA callsigns in Japan until Japan finally created a
>reciprocal licensing program for foreigners.

Sounds like you are describing "underwhich odor," nursie.

Better practice aespsis more. Your words be getting stinky.

Let's have some REAL "references" to this "AMRS" like from
governments.

>> An whut it say on dat "referral?" Is it hidden from view again?

Yes we do. It would explain your "seven hostile actions."

It would explain your REAL discharge type.

It would also give your REAL MOS.

> Be my guest. Of course you won't...The answers would put a cork in YOUR
>silliness.

Knowing all about the gunnery nurse's heroic military career is
not high on anyone's agenda. :-)

>> You can try by reading and UNDERSTANDING DoD Directive
>> 4650.2 data 21 Nov 03. It don' say no ham be da hole MARS.

>
> Lennie what did you do with that 14 years of college-level night school
>you claim to have attended...?!?!

I got paid better. :-)

Here's a clue: Night school remedial English would help you
(touch typing in adverse stress environments doesn't hurt, either)
understand government and military directive/regulation wording.
However, none of that works if there isn't any intelligence behind
the squinty, reddened eyeballs to process the information.

DoD Directive 4650.2 explains MARS. MARS is a military
radio service. MARS is NOT amateur radio. [hasn't been so
since 1948] No amount of schooling, classes, whatever seems
to have any effect on your understanding a rather simple DoD
Directive.

> Another lie?

No lie. <sigh> Poor nursie, still can't keep from tossing snit
at those who have done things nursie hasn't done? :-)

Tsk, tsk, tsk...I have to repeat my resume in here (again) plus
giving references of (still living) radio amateurs who can attest
to that? Gunnery nurse would go even more ape-snit about
"CV" and yelling everything was a "lie." :-)

All these "meaningful discussions!" :-)

Go back and sit down, you aren't finished...

> So NOW you're insinuating that you HAVE the logs that you have previously
>told us you either don't have, can't find or were otherwise lost or misplaced.

Poor nursie, still trying to make a mountain out of a little pile of
dust (that fell out of his overloaded imagination).

> I think YOU are the one who had better "go easy". You are getting tied
>up in your own mistruths.

"Seven hostile actions."

"MARS is amateur radio."

The medical discharge that turned "honorable" and so marked on
his DD-214.

Knows exactly where the Burbank, CA, HRO store is because
he "shopped there with some friends" yet he can't recall anything
of the surroundings before the store moved there.

Knows all about Naval Air Development Center because he was
assigned there (long after NADC was moved) which was really
Warminster NAS (across the road).

Has tutored "countless" newbies and "broken bread" with
more (countless?) visiting hams. [one has to wonder why he
has never been caught after trashing all those bakeries...]

Thinks all military radios are classified and therefore can't talk
about them...even though they've not been so for decades.

That's just a partial list of nursie's claims made in five years.
He has yet to make good on all that because nursie never
ever makes any "untruths." :-)

Aren't all these "meaningful discussions" fun? :-)

According to the political aspects of regulation, the safety of
OTHERS reared its anxious head.

RF exposure safety is involved at reducing the amount of RF
energy radiated towards others not directly involved in radio.

>I've long held the view that peripheral issues like HV and tower
>climbing safety questions creeping into the tests are for the most
>part out of place because they have no implications with respect to

>exposure issues.

Quite true...from the political context of regulations.

In the history of radio communications, there are no real physical
threats of RF damage to humans from communications RF
radiation. The RF safety levels regulated by the Commission
are well below any danger observed by scientists and researchers
for years and years of radio communications.

>My bottom line in all this is that the FCC is testing for subjects
>which have nothing to do with it's role as a regulator and is failing

>
>Twisting your comment a bit "Personal safety education in ham radio
>should be left as an exercise for the individual".

It should be common sense. :-)

But, given this place is full of "barracks lawyers" all involved in
"legalities," the public RF exposure safety issues got all
changed around to "personal safety of the amateur" with all the
blabbering about RF burns and assorted physical accidents
not really involving radio per se.

Thousands and thousands of military personnel have cycled
through tours of radio communications facilities where far more
than 2 KW of RF was being radiated and they haven't been
harmed in any measureable way.

[I'm not talking about mental harm from just listening to too
much telegraphy...BTASE :-)]

>> detect badasses in e-mail.
>
> Obviously.
>
> They also "don't always detect" who is bruising thier propfessional
>reputation by association.

Speaking of associations, I was a member of the Association
for Computing Machinery (ACM) for three years as a courtesy of
the IEEE membership. ACM is the first and the biggest of the
professional associations on computing and information
technology.

Ever written any computer code, nursie? I have. Taught myself how to write FORTRAN through Jim McCracken's book on FORTRAN IV. Used it to write six engineering-analysis programs that became a part of the RCA Corporate Software Library. Used it to write five more programs that became shareware on the 'net and are now freeware. [McCracken later became president of the ACM]

Ever get down to Assembler level? I learned Morotola 6800 Assembler first, then 6502 Assembler (thanks to the nice macro assembler program from Call-A.P.P.L.E., the Apple Puget Sound Program Library Exchange that was based in Seattle), got published in the Call-A.P.P.L.E. monthly magazine (but I don't count that as part of my professional resume). See also Microcomputing and BYTE magazines for more of the same. I've done some 8051 and Intel Assembler programming but not a great deal of it despite having MASM in the PC.

Writing computer code is lots of intellectual fun, sort of like a super crossword but the end product is very useful for lots of things. Sending and receiving telegraphy code is old stuff, outdated, no real usefulness except for some OFs to brag about in their boasts of "superiority."

I've been an IEEE member for 31 years. It is a professional association involved in reality, of pushing the technical envelope constantly outwards, advancing the electrical and electronic arts. I'm proud to have been a member of that distinguished group and continue to be involved and still learning with each technological plateau jump after reaching Life Member status.

IEEE doesn't require any morse code knowledge for any membership level. :-)

Nope. A liar is someone who intentionally says things he/she knows are
untrue in an attempt to deceive. For all we know, the statements made
about the alleged operation by the alleged operator could all be true.
>
> >> Sure you can...ie: Antarctica
> >>

Not at all. Either it happened or it didn't. If it was unauthorized,
yet it happened, it still happened. It just doesn't count for any
awards.

> How can you say that a lack of proper authorization to operate DOESN'T
> ahve bearing on the operation...?!?!

I'm saying it doesn't have any bearing on whether it happened or not.

There's not a single Amateur Radio award
> by any organization that I am aware of that is not predicated on the legitimacy
> of the operating credentials of the claimant.
>
Sure. And to our knowledge nobody has claimed any QSOs with the
alleged operation for any awards.

> He can "operate" all he wants to and exchange a ton of QSL cards, but no
> license (or authorization or permit or certificate...what ever you want to call
> it...) and all that operation is worthless.
>
Of course. But the *claims* that there was an operation would still be
true.

> >Remember that all it would take to meet all of these conditions would be one
> >QSO in a ham band using stateside calls and portable designation.
>
> As long as the legal criteria was met.

Even if they weren't, it would still be an operation. Just not a legit
one.

> >Of course not. Same goes for bands/modes/antennas/rigs used. But the lack of
> >detail doesn't mean the alleged operation didn't happen.
>
> Please tell me you're just playing "Devil's Advocate", Jim...!

I'm simply being accurate.

Folks keep focusing on the wrong things.

What has actually been claimed? Operation from /T5, nothing more. No
mention of modes, bands, rigs, number of QSOs, etc.

Can't you see that if even *one* QSO was made, on *any* ham band, over
any distance, it would constitute "operation from /T5"? Even if said
operation was not in agreement with international agreements?
>
> >The lack of detail is a different issue completely.
>
> You've GOT to be kidding me.

Not at all.
>
> I can tell you in INTIMATE detail the sation I had set up in my barracks

> worked...
>
That's you.

Being secretive isn't lying. It's...being secretive. Of course the
lack of detail reduces credibility, but it doesn't make the secretive
person a liar.

> He can't even TELL us ONE callsign of anyone he worked...?!?!

Not can't.

Won't.

Big difference.

> >> No proof = Didn't happen.
> >>
> >Not at all.
> >
> >No proof = Reasonable doubt.
>
> No proof on short notice = reasonable doubt.
>
> No proof after two years = didn't happen.

Not at all, Steve. Objective reality states that if a thing happened,
it happened whether anyone believes it happened or not.
>
> >Nothing more or less.
>
> His "nothing more" can't be much less than what it's been, Jim!
>
Of course.

Don't you realize by now that you won't get answers to your questions?

That can't be done in this newsgroup. Newsgroup nabobs, ever vigilant on keeping hum radio as it was when they were young, forbid any sort of nasty words in regards to "CW."

It's perfectly permissible for Them to cuss, swear, and generally talk down to those not favoring telegraphy...it just CANNOT be done in return. SOP.

[Alun is not fond of telegraphy in case you wondered...]

It's the OF double standard (as usual).

Tsk, tsk, tsk...are you saying nasty about Dan? He has STATED that a "dipole is always a half wavelength." :-)

You are being overly sensitive to criticsm, catapult kellie. :-)

And stay away from "humor-laced e-mail." Some of it might make sense. We can't have such corruption of the CW.

Beep, beep.

Welp, its nice to see that at least somewhere on r.r.a... that people
can seperate their disagreements from their hatreds. But several
years ago, it really didn't look that way.

Holy Cow! PCTA refer to backward thinking people as "gloms."

From this point forward, I must refer to PCTA as "CW Gloms."

> > There was also a very learned "professional in radio" who, when informed of the

>
> This is not 1921.

As Len Anderson has pointed out repeatedly. But you didn't need him
to point that out. You could see it published on the front page of
any daily newspaper. Even the ARRL puts it on the front cover of QST,
just prior to launching another edition of memory lane.

83 years later the physics of antennas has been
> milked to the extent that the probability of anybody inventing an
> antenna which does not utilize long-applied physics lies somewhere
> 'way out the asymptote of the curve.

Are you sure it's not back at the inflection point?

> Per previous I'll stick.

Ditto my opinion of the CW Gloms (previously known as PCTA).

None of which matter, according to the FCC. There will be no more Novice issued. And when the present holder dies, its over. Unless they 'upgrade' of course.

Course you know that.

It's quite sad that an quasi-adult (ok, ok, so he's closing in on 50)
has to continually scramble for recognition from some kind of uniform
or badge or license or callsign.

That would probably indicate some kind of insecurity or lack of
self-worth.

Welp, Dave, The World's Greatest DXer, your initial comments were so far off base that it took "little ole me" to educate you re: amateur operations from places without a government.

And all without a single "thank you."

You might as well go back to working out of band Frenchmen for all the good it did.

Best of Luck.

Your first correct statement in about four years.

> Only your own reputation. YOU made the claims.

I stand by my claims. I know they're true. It's enough for me.

> That you fight so hard to keep from validating them only further

"Fight so hard???"

Hi, hi, hi.

It's easy, really. You're no authority.

> substantiates my suspicisions that you made the whole thing up

Your daily posts substantiate that you're nuts.

in order to be
> able to say "ME TOO...ME TOO! ! !"

I was one of the first. No need to say, "ME TOO..." Everyone after
Jan 1993 is "me too."

> It's your bed, Brain. Comfy?

I'm quite comfortable. Thanks for asking.

Your bed must be tormented.

Make an appointment.

Accept help.

Get rest.

Come back human.

Best of Luck.

>> "logs".
>>
>> THAT says "lost".
>
>You've got 24 hours to Google that up, or you will forever be branded
>a LIAR.

I could wade through Google for days through one manifestation of "lost"
or another of yours, Brain.

>> >> How inept.
>> >
>> >What a stupid assertion. I think you've already used up this month's
>> >quota. Better go easy.
>>
>> Hey Brainy...YOU made the "stupid assertion".
>
>No, you did. You've asserted that I "lost" my /T5 logs, or that I
>"can't find" them. That is false. Completely false.

Then why can't you provide us with any information from them?

You said you couldn't find them.

Now you say that's not true.

Are you a pathological liar or are you inept?

>Now Google up where I said that.

And if I do...?!?! I've "Googled up" other assertions by you and the Lame One before and you just tried to spin out of those too. What's the use?

>> So NOW you're insinuating that you HAVE the logs that you have
>previously
>> told us you either don't have, can't find or were otherwise lost or
>misplaced.
>
>I have logs. I've always said that I have the logas, and know that

>
>You have made a false assertion.
>
>You have been challenged to Google up the post where I've said the
>things that you say I've said.

You've said you "can't find them".

THEN when pressed on that, no one is IN your logs.

Then you won't tell us ANYONE who was in your logs.

>> I think YOU are the one who had better "go easy". You are getting
>tied up
>> in your own mistruths.
>
>Absolutely not. I know exactly what I've said. So Google it up, you
>peddler of mistruths.

Nice try on the reversal, Brain...but you've had two years to make good on your claims.

You've not done it.

Brian Burke is either a liar or grossly inept.

It really is THAT simple.

Steve, K4YZ

>Hey Les.....stop putting lemon extract on that thumb of yours. Your getting
>too sour.

"Les?"

My wife and I have a wonderful lemon tree in the back yard. I planted
it over three decades ago. Continues to produce great lemons.
Great with salmon cooked in Puget Sound barbecue style.

Wife got a recipe for candied lemon peel from a French food store
next to the airport. Delicious. REAL lemon, not that "phoney"
lemon extract one buys in the market in a plastic bottle trying to
look like a real lemon.

Sort of like the old futz "REAL ham" that knows nothing more
than beeping telegraphy. "Real" state of the art THAT is. Whenever
someone invents a time machine to go back to 1920 and stay there,
you ought to be first on the line to go.

Les Besser is a known name in RF design, was the one that sparked
the computer analysis program that ARRL couldn't sell (and dropped).

Too bad you beepers can't bring yourself to USE computers. Nothing
like that in the 1920s when telegraphy meant "real hams." Now polish
up that Spark transmitter and get ready to send...

Beep, beep.

Looks like more of the gunnery nurse's "meaningful discourse."
Are you related?!?

The "P" in PCTA is what is Phoney. Don't "P" on us.

Pardon us while the rest of the world continues to advance. You
stay back there in the 1920s and have lotsa fun.

And ante up for a new pad of "official ARRL Radiograms." Your
old one is getting rather yellow with age.

Beep, beep.

The PCTA claim they aren't elitist.

One more posting showing how old-fashioned and ELITIST they
really are.

Dan, get a new eyeshade and little garters to hold up your
shirtsleeves. Be a good little telegrapher. The 1920s may come
again and you will be ready as ever for that time...polish up that
Spark transmitter...

>Steve is only here for meaningful discourse.

Of course. All us newsgrope readers can SEE that. :-)

By the way, that Burbank HRO store is right next to a Radio
Shack store. Ain't dat sometin? :-)

Betcha da gunnery nurse didn't know that, too busy "shopping
with friends" there...like back at a time when that HRO store
wasn't there! Amazing. Like Quantum Leap wasn't a TV show,
it really existed! :-)

>> And that would be " a person"...not "people".
>
>I don't think it would take that much to get a violent reaction from
>you, so please stay away from me.

You'll only get a "violent reaction" if you brandish a weapon.

As for staying away, I doubt that will be a problem...You seem to haev a
strong aversion to doing anything in a positive interactive manner with other
Amateurs.

You do, however, seem to prefer the company of young boys.

>> Otherwise I'll just point and snicker...Kinda like I have been doing
>for
>> the last two years. That I can do from here.
>
>I offer you some constructive criticism (get mental health help), but
>you point and snicker? You libs are all alike.

I am sure you wish I was a liberal.

And I am still awaiting your presentation of credentials that would
substantiate your recommendation for seeking "mental health help".

I on the otherhand DO have experience in dealing with people who have
various mental problems, and you seem to manifest examples of those problems.
Telling tales that can't be validated is one of them.

Making excuses for failures is another.

>
> Distinctly REwarding.

No badges for cussing at others using languages you can't understand?

How about a badge for "Official Log Inspector?"

How about a badge for enforcement of amateur radio in a country which doesn't have a government?

Lots and lots of badge possibilities there...could cover the whole jump suit...wouldn't need any cloth.

How about a nice shiny Badge of Authority on who can say what and where in newsgroups? You'd shine there along with a couple more PCTAs.

Here, have a whouff-hong...and maybe a rittysnitch.

>assertions about your alleged Somalia operation....?!?! Or what can we do to
>get you to back up your assertion about unlicensed devices playing a "major
>role" in "emergency comms", etc etc etc....?!?!

Oooooo...trotting out the old "lack of truth" again?

Where, when those "hostile actions" you claimed, big hero?

Where was the HRO store again when you visited it "with friends?"

What "emergency comms" has the gunnery nurse done in amateur radio? When? [sorry, lots and lots of times doesn't count]

Gunnery nurse wasn't in Somalia. Not enough "hostile action" there for the big hero?

Tsk, tsk, tsk, TSK!

Not so. The only one agreeing with the gunnery nurse is the Dill Instructor. [two different personalities in same corpus]

> You've been very resillient to accepting the truth, but in doing so you'd
>have to admit you were wrong, and we know THAT would never happen.

Ah! It's Mirror Time again!

Let's see..."hostile actions"...invents radio services...won't accept documentary proof in terms of e-mailed scans...doesn't know the language he cusses others out in...wrong data entries on government forms...all those blunders besides typos.

>>And all without a single "thank you."
>
> For what? Giving him bogus information? For trying to make your tall
>tale SOUND valid?

Brian's remarks were FAR more plausible than the whiny, angry, wants-to-fight-all-the-time gunnery nurse ever wrote.

Everyone that doesn't agree with the gunnery nurse is described by her as a "liar" and gets cussed at in a language she doesn't know. That's a mental case syndrome if there ever was one.

> Brain Burke trying to tell Dave Heil about DXing skills is like The
>Three Stooges trying to tell Fred Astaire how to dance.

Too bad there's NO "Brain Burke" here.

Sucking up to your SS commander, gunnery nurse?

How do you clean his monocle? [don't answer, none really wants
to know...]

You trying to tell the experienced in HF communications "how it is
done" for 24/7 ops is a very bad silent comedy when the projector
has its lamp burned out.

So, big fella, how was Somalia when you were there supervising
amateur radio and checking everyone's logs? Were the logs
properly placed in the latrines? See any "hostile action" there?
Or were you as openly hostile there are you are in here?

[I just love these "meaningful discussions" nursie does...]

Tsk, tsk, tsk...still with the "meaningful discussion" thing, nursie?

No real problem. Everyone knows that any disagreement with your holiness will result in personal attacks and charges of "lying."

Scanned documentation sent you in e-mail is ignored and you continue to call those who send it for "liars."

Government documents, such as DoD Directive 4650.2 (effective 21 Nov 03) are disregarded so that you can make weird, wired statements of "truth" which are quite wrong.

You get totally pissed when someone has some REAL experience
and demand all kinds of "proof" which you then ignore and proceed
to attack the person very personally (and using cuss words from
languages you don't know...in weird belief that "makes it okay").

>>> >> How inept.

>on your claims.
>
> You've not done it.
>
> Brian Burke is either a liar or grossly inept.
>
> It really is THAT simple.

Gunnery nurse has totally flipped out.

Tsk, tsk, tsk. Nursie needs mental therapy for all that hatred and
desire for revenge burning deep. Straightjacket and rubber room
is a good start, followed by a real MD prescribing an appropriate
medication to calm the raving beastie within.

It's amazing how FAR from the original topic some of these threads
achieve once the gunnery nurses are let loose to roam and cuss
and call everyone "liars!"

Not quite what I'd call a good feeling for getting a ham license.

Yeah, why not ssb and CW versions?

Getting past the usual RRAP nonsense and getting a bit serious for once I'd like toss out a thought. RRAP on-the-air getogethers have a (very short) history and some lessons came out of that history. In the first of these sessions a few years ago it turned out to be something of a "long distance" CW round table. PA to CA, MN to TX, everybody copied everybody Q5 at 0130Z +/-. Almost. Helluva lot of fun. But copy this: Both N2EY and I are both in the Philly area. AC6XG didn't exactly overload the front end of my RX but nearby N2EY was even weaker and I had a bad time with copying him. There wasn't much groundwave propagation between Jim and so poof, he skipped right over me. No surprise there considering the freq and time of day.

So I have a suggestion. Or two. From what I can tell all the current crop of parties interested in pulling off another one of these sessions be it CW or ssb or both are all rather close together in the mid-Atlantic states. Without further droning on on my part here you guys might consider moving the effort to 80/75M if you try it after dark or maybe on 40M during some weekend mid-afternoon when the gods of propagation usually smile more favorably on medium and short haul HF comms.

So, was there a lot of gunfire and gore in all your "hostile actions?"

Was J.Lo any good at begging? How was she?

Did nursie sign into the RRAPnet at 9 PM eastern? No? Got your code key hand battered doing all that "public service work?"

Did you "tune your frequency so carefully that you 'deserve' that extra class"? Missed them, ey? Too bad.

No problem. You've got all those "credentials" and "awards" and your full "honorable" service record to fall back on...

Still off the meds, huh? Not good.

Sewing on all those patches and badges takes skill and perseverance.
Of course it is an accomplishment for all that sewing!

"As ye sew so shall ye rip" or something like that.

See? Your all tied up in nuts and can't move anything but snarly
lips muttering angry comments...and sometimes in languages
you can't understand.

[such a goyim, such a schmuck...oy, gevalt!]

It must be this wonderful nature of "meaningful discussion" going
on... :-)

Too bad no one is really "discussing" amateur radio, only other
personalities. Tsk, tsk.

>
> You'll only get a "violent reaction" if you brandish a weapon.

Tsk, tsk, tsk...getting angry because someone interrupted your time "pleasuring J.Lo as she begged you to?" :-)

You've opened the bottle of brandish again, haven't you?

Don't drink and newsgroup...

> As for staying away, I doubt that will be a problem...You seem to haev a
>strong aversion to doing anything in a positive interactive manner with other
>Amateurs.

Whoa! It's Mirror Time!

> You do, however, seem to prefer the company of young boys.

And the gunnery nurse prefers the company of his fantasies and dreams of "pleasuring Jennifer Lopez as she 'begged' him to."

...and then getting in here when unable to play well with others.

>>> Otherwise I'll just point and snicker...Kinda like I have been doing for
>>> the last two years. That I can do from here.
>>
>>I offer you some constructive criticism (get mental health help), but
>>you point and snicker? You libs are all alike.
>
> I am sure you wish I was a liberal.

Most of us wish you were a homo sapiens. :-)

You DO act like you are homogenized hatred in a bottle.

> And I am still awaiting your presentation of credentials that would
>substantiate your recommendation for seeking "mental health help".

No problem. No "credentials" needed to see someone rant and
rave, misspell words in the rage of angry reply typing, refuse to
accept military directives and government regulations when they
are explained to you, cuss out others in languages you don't
know, pretend to know so much about "radio" but demonstrate
you know squat, tell tall tales of derring-do that can't be proved
by anyone, calling everyone that disagrees with for "liar" and
lots of other nutso behavior.

Not even an AA in psychology is needed for "diagnosing" mental
instability on the part of the gunnery nurse.

> I on the otherhand DO have experience in dealing with people who have
>various mental problems, and you seem to manifest examples of those problems.

Yes you do, as is proved by your "J.Lo at your door begging you to
pleasure her." [weird...]

It must be Mirror Time!

[the glass is cracked...]

>Telling tales that can't be validated is one of them.
>
> Making excuses for failures is another.

"Failures?" What "failures?"

You still looking into that cracked mirror?

"MARS is amateur radio!" "Hostile actions" in your records!

Nursie do da commissioning of amateur radio on Fantasy
Island? Did Mr. Roarke appoint him as chief Ham hocker?

Lots of disturbed, angry folks on that Island. Not at all like
the TV version. Must be some "TVI."

Meaningful Discussion = Nursie cussing out all who disagree.

4707. KPH Morse To Air July 13 @ 0001 UTC

Newsgroup: rec.radio.amateur.policy
Date: 2004-06-09 13:45:24 UTC
From: Radio Amateur KC2HMZ <kc2hmz@wzrd.com>
Message-ID: <632ec0tgpv8j9ammg2372hsjo7etbgkged@4ax.com>
Source record: 92771

OM's and YL's,

I have received a heads up via the Worldwide Utility News reflector on oth.net that historic commercial Morse radio station KPH will return to the air for the fifth annual "Night Of Noghts" commemoration of the last commercial Morse message sent in the United States.

According to an announcement posted to the WUN list, KPH, the ex-RCA coast station located north of San Francisco, will return to the air for commemorative broadcasts on 12 July at 1701 PDT (13 July at 0001 UTC), 5 years and one minute after the last commercial Morse transmission in the US. This on-the-air event is intended to honor the men and women who followed the radiotelegraph trade on ships and at coast stations around the world and made it one of honor and skill.

Transmissions are expected to continue until at least midnight PDT, or 0700 UTC.

According to Richard Dillman, W6AWO, a member of the Maritime Radio Historical Society, work is now under way to repair an antenna so that one frequency for station KFS might also possibly be activated. Dillman indicated that veteran Morse operators, including former KPH staff members, will be on duty at the receiving station at Point Reyes, CA listening for calls from ships and sending messages just as they did for so many years before Morse operations were shut down.

For those interested in listening for KPH/KFS, the transmitters are located 18 miles south of Point Reyes in Bolinas, CA at the transmitting station established in 1913 by the American Marconi Co. The original KPH transmitters, receivers and antennas will be used to activate frequencies in all the commercial maritime HF bands and on MF as well.

KPH will transmit on 4247.0, 6477.5, 8642.0, 12808.5, 17016.8 and 22477.5kc on HF and 500 and 426kc on MF. If KFS is activated, transmissions will be on 12695.5kc. These frequencies have been made available through the cooperation of Globe Wireless, the current owner of the KPH and KFS station licenses.

Dillman notes that many of the transmitters will be 50s vintage RCA sets. Power output will be 4 to 5kW. The transmitting antennas include a Marconi T for MF, double extended Zepps for 4, 6 and 8Mc and H over 2s for 12, 16m and 22Mc.

Operators will listen for calls from ships on 4184.0, 6276.0, 8368.0, 12552.0, 16736.0 and 22280.5kc on HF and 500kc on MF.

KPH, and KFS if activated, will send traffic lists, weather and press broadcasts as well as special commemorative messages, many of which will be sent by hand. At other times the KPH and KFS "wheel" will be sent to mark the transmitting frequencies.

Reception reports may be sent to:

Ms. DA Stoops
P.O. Box 381
Bolinas CA 94924-0381
USA

Ms. Stoops is a former KPH operator and was the first female telegrapher hired at the station.

Members of the public are invited to visit the receiving station for this event. The station will be open to visitors beginning at 1500PDT (3:00pm). The station is located at 17400 Sir Francis Drake Blvd. and is on the route to the Point Reyes lighthouse. Watch for a cypress lined driveway on the right about a mile past the entry to Coast Guard station NMC.

KPH is operated by the Maritime Radio Historical Society in cooperation with the Point Reyes National Seashore, part of the National Park Service.

Further information may be found on the Maritime Radio Historical Society Web site at http://www.radiomarine.org or by contacting Richard Dillman at +1 415-990-7090 (email: ddillman@igc.org) or Tom Horsfall at +1 510-237-9535 (email: wa6ope@hotmail.com).

4708. Old call sign was W10XEG ???

Newsgroup: rec.radio.amateur.policy
Date: 2004-06-09 14:24:52 UTC
From: Keyboard In The Noise <KITN@cat.net>
Message-ID: <U4Fxc.480$tI2.74@fed1read07>
Source record: 92772

Had an inquiry that sed his Dad's call was W10XEG

Before 1946 -- I think there were just call areas one thru nine.

Sometime around 1946, the 10th call area was established -- the zero district, but was this ever the W10 area ??

Also the X in the suffix -- I thought was for experimental stations ???

Any old timers recall what this callsign indicated ???? Special event, shipboard ???

Thanks

Post any answers here please

Leonard, you don't seem to be discussing amateur radio and you do seem quite involved in discussing personalities. You have nothing to do with amateur radio but you've chosen to entertain us with your IEEE tales. A short sampling of some of your output for just the past week may be found below:

"Sewing on all those patches and badges takes skill and perseverance."

"So, was there a lot of gunfire and gore in all your 'hostile actions?'"

"Did nursie sign into the RRAPnet at 9 PM eastern?"

"Still off the meds, huh? Not good."

"Let's all hear it for Amateur Astronaut Captain Buck Video!"

"Gunnery nurse has laid lots of logs out in this newsgroup."

"Nursie needs mental therapy for all that hatred and
desire for revenge burning deep. Straightjacket and rubber room
is a good start..."

"The only one agreeing with the gunnery nurse is the Dill
Instructor. [two different personalities in same corpus]"

"Sucking up to your SS commander, gunnery nurse?"

"Might not last too long, that job. About as long as the "Purchasing
Agent" job did. "

"Dan, get a new eyeshade and little garters to hold up your
shirtsleeves. Be a good little telegrapher."

"Too bad you beepers can't bring yourself to USE computers."

"You are being overly sensitive to criticsm, catapult kellie. :-)"

"Did nursie put on his Colonel Jessup uniform again?"

"Heap big nutso nursie need mental therapy."

"Did you invade Fantasy Island again?"

"Several newsgroup fully-licensed blowhards have demanded
proof, nursie. You be one of them."

You are to amateur radio what a nine iron is to a basketball game.

Dave K8MN

No, the FCC never routinely issued amateur calls with "10" as the
numeric portion.

However, when ITU held their plenipot meeting here in 1998, we were
assigned the special-event calls N98ITU and W98ITU. Those are the only
examples I know which included two numeric characters in a US amateur
callsign.

>
> Also the X in the suffix -- I thought was for experimental stations
???
>

Our company holds several experimental (non-amateur) callsigns in the
WB2X-- and KA6X-- formats. These callsigns are assigned from the
KA2XAA-KZ9XZZ and WA2XAA-WZ9XZZ 2x3 blocks which are not assigned to
amateurs. Note that amateurs **can** get calls with an "X" as the
leading character in the suffix any other call format (ie, W9XAA, K2XA,
WA2XA, etc.) or with a "1" or "0" numeric character (ie, KA0XAA,
WB1XAA).

Yep, Ryan

10 years ago I went for a civil service exam. They asked both phonetic alphabets (alpha bravo charlie delta echo foxtrot ... and adam baker charlie david edward ... etc). I scored 100% with no veterens' points. I wasn't even called. I assumed it had something to do with age.

I figured something out. About 1 year ago, a shift supervisor asked me if I could copy one of his report's resume into the computer. As I proceeded to type the resume into the computer he was flabbergasted. "What the heck! You aren't even looking at the monitor!" Yawn.

Of course. I have typed 65 words per minute on a manual typewriter and over 90 words per minute on a 100 word per minute teletype machine. I have copied 40 words per minute perfect copy for a number of minutes (a full page of typewritten copy) in the Navy on a manual typewriter (the fastest speed they had on tape at Bainbridge, MD).

I was asked when I was looking for a job some years ago if I had ever used a computer. I won't repeat what I said. Well, maybe. I asked "did you read the f*ck*ng resume? I've been programming PCs and mainframes for three years! I walked out on them. I have come to the conclusion that I no longer care.

I was even called "elitist", which I am not. I am just fed up with certain things that are happening. I wish we all could just get along ....

One guy had a problem on a repeater. He was squawking about the need for CW. So .... I switched to F2 emission (or whatever they want to call it ... I no longer worry about it). I was gentle. I only sent about 40 words per minute. I could have sent 55. Maybe 60, but it wouldn't have been good code at that point.

My new attitude is "do whatever you want, just make sure you want it". Raise, call or fold.

BTW, I've never heard of "boy" being one of the recognized phonetics.

I think I'm developing an attitude ;)

BTW, no slam intended. I just would like some of the folks in the newsgroup to understand what is going on with some of us older folks who are still to young to retire. This is absolutely *not* aimed at you.

Best regards from Rochester, NY
Jim AA2QA

Thanks Hans -- way back when --- amateurs had the X suffix for expermental and Y for college and schools

What I have found is as follows:

In the 1920's and the 1930's, Stations in the 48 States had a 1x2 or 1x3 call sign beginning with W and containing a numeral from 1 to 9. Stations in Alaska, Hawaii, or other US Possessions had a K prefix. See Pre WWII K calls. The zero numeral was not available. Boundaries were considerably different than today - for example the western sections of New York and Pennsylvania were in the 8th call district. See Old District boundaries 4 Note that the suffixes beginning with X was reserved for experimental stations.

In the 1954 callbook -- there are no listings in any district with the letter X as the first letter of the suffix.

Eventually, the FCC relaxed their position on the 1x2 and 1x3 X suffix calls, but the 2x3 call signs (such as KB6XYZ) are still reserved for experimental use. W#X** calls were also portable calls - a separate authorization was needed for portable operation and their suffixes began with X. Apparently there was a very limited "vanity call" program - if a ham wanted a 1X2 call and met several criteria, such a call would be issued. If a ham moved to a different call area, he/she had to get a new callsign that matched the district of the new location. Unlike today, you could always tell where a ham station was located by the callsign.

At one time in the 1920's and 30's, college club stations were issued W#Yx calls. So W6YX (1922) is Stanford, W9YB (1920) is Purdue, etc. Many of these are still extant -- try QRZ.com for your college.

Nonsense. Even if people were still required to change their calls when moving, in many call areas you cannot tell where someone is located by their numerical character. An 8 call can be anywhere from the upper peninsula of Michigan down through West Virginia. Someone with a zero call can be anywhere from the Minnesota northern border down through Missouri.

For those who say that it helps them point their beam, once again nonsense. If someone in Illinois hears an 8 call, the range of possibilities for pointing that beam goes from NNE to SW.

I was pretty good in Mrs. Scheiders geography class, but if we include
only normal great circle routes (and exclude long-path propagation and
KH8 stations) I can't find any part of of W8-land which lies on an
azimuth SW from Illinois.

Come on Dee -- if a W8 came on the air back then -- I knew the general
district and certainly knew he/she wasn't in California
was my point. Helpful for chasing WAS

Now a W1 comes on a California repeater and turns out he/she has had
residence in CA for 10 years.

And the DX stations have no idea who is where over here (;-(

Message-ID: <5f81cec2.0406090947.4bf882f9@posting.google.com>
Source record: 92781

Just a curious question. During public service events is it manatory the net control keep logs? I myself keep logs as it is very helpful during the event to know what has transpired. But was wondering if this an FCC requirement? Some of other net controls I know do not keep logs.

Thanks
Mike

In this day and age with the majority of hams having internet access, they can look it up easily.

Also keep in mind that these days in the US we are all out of sequentially assigned 1x3, 1x2 and 2x1 calls. Any General or Tech who moved out of the area would either have to settle for a 2x3 call or PAY for a vanity call if they could find one not taken. Similarly Extras would have to settle for 2x2s beginning with A or PAY for a vanity call. And it wouldn't be too many years before these 2x2 calls are gone.

I was licensed in Ohio in 1992. Got my 8 call there. Then I moved to Illinois, then South Dakota, and then finally to Michigan. If I had been required to change, I'd have had 4 calls in 10 years ending with an 8 call different than what I have now. That would have been quite a nuisance.

However, the solution is simple. Simply sign /x instead of requiring call sign changes. If you think this is truly an important issue, petition the FCC to make it a requirement instead of voluntary.

Dee D. Flint, N8UZE

Badges? I don't need no stinking badges.

I put on a hat so that the other parents can see that they have
someone to come to if they have an issue. Not into the whole
"authority" thing. Your mileage absolutely varies.

> >That would probably indicate some kind of insecurity or lack of

Yep agreed

Re: running out of callsigns There is always WAA6X -- hey its a 3 by one for extras (26x26= 676 new calls) bring back the 20wpm code test for extras and they will last a lot longer (:-)

And there are tons of 1x3's available from silent keys and upgraders - Check QRZ

And every Ham gets 9 sunspot cycles (if they are careful) so recycled calls will be available

Now back to W10XEG any ideas what this call was ???

In article <40C72981.FCE61D45@earthlink.net>, Dave Heil <k8mn@earthlink.net>
writes:

>> Too bad no one is really "discussing" amateur radio, only other
>> personalities. Tsk, tsk.
>
>Leonard, you don't seem to be discussing amateur radio and you do seem
>quite involved in discussing personalities.

They dis-cuss me, now they get dis-cussed right back. Very
easy..."it just seems to write itself," those replies... :-)

I didn't start the cussing of personalities, big state honcho.

If you don't like this "dis-cussing" then cancel everyone's access.
You seem to think you have the Power. Go for it. Just don't
cry and whine about others when your power is ineffective.

>You have nothing to do with
>amateur radio but you've chosen to entertain us with your IEEE tales.

Awww...poor baby...doing the "dis-cussing" think yourself, aren't
you? Tsk, tsk, tsk.

Now you are going to start a whole other series of thinly-disguised
personal attack messages all about how you are some kind of
"moral authority" on newsgroup manners and all those not talking
specifically on your approved mode of amateur radio should be
excluded from this newsgroup!

Go for it, big ex-state honcho. Waste bandwidth for all I care.
You DO waste everyone's time with all that preaching of old-tyme
"moral amateur authority."

If you are going to turn your collar around, try to get your head to
go with it, okay?

I have many friends and acquaintences who are professionals, IEEE
members, and also licensed radio amateurs. KD6JG is one of
those, so is W6MJN. N2JTV may not be an IEEE member but his
with another professional group of FAA employees.

Gene Rosenbaum, N2JTV, was assigned to the same military job
I had at Army station ADA, same duties initially but on a different
shift. Our billet was at Hardy Barracks, one of the last of the old
U.S. military sites (much reduced in size) in Tokyo. That was "big
time radio communications" on HF with a 24/7 schedule...which
you said "never happened." Tsk, tsk, tsk. Army disagres with you.

You've FAILED to correct another personal attack percussionist in here who said "MARS is amateur radio." MARS is a military radio service and so defined by the Department of Defense in Directive 4650.2 effective 21 Nov 03.

You should keep better control over those who are under your command, Herr Robust.

Gruss gott.

LHA / WMD

No, it is more a matter of principle. I have a perfectly nice 1x3 call. If I had to change it when I moved, the call that would be sequentially assigned would have been a 2x3. The FCC would NOT have assigned a 1x3. At the times of my first two moves, the vanity program did not even exist so I would not even have had the option of getting a 1x3 to replace my old 1x3.

You've done it before, doing and after.

> I didn't start the cussing of personalities, big state honcho.

Actually, you've done such since your appearance in r.r.a.p. West
Virginia, by the way, is actually a small state. I've not been elected
to public office--but it's early.

> If you don't like this "dis-cussing" then cancel everyone's access.
> You seem to think you have the Power. Go for it. Just don't
> cry and whine about others when your power is ineffective.

Your lament was: "Too bad no one is really "discussing" amateur radio,
only other personalities. Tsk, tsk." Shouldn't you be the individual
to request cancellation of access? Just don't cry and whine (as you've
been doing) when your power is ineffective.

> >You have nothing to do with
> >amateur radio but you've chosen to entertain us with your IEEE tales.
> >
> > Awww...poor baby...doing the "dis-cussing" think yourself, aren't
> > you? Tsk, tsk, tsk.

Poor Leonard, I'm drawing your attention to that which you decry in
others but in which you are a constant participant.

> Now you are going to start a whole other series of thinly-disguised
> personal attack messages all about how you are some kind of
> "moral authority" on newsgroup manners and all those not talking
> specifically on your approved mode of amateur radio should be
> excluded from this newsgroup!

Talking on my approved mode of amateur radio? You aren't talking via amateur radio at all.

> Go for it, big ex-state honcho.

West Virginia is a currently a state. I'm not a honcho. I just live here.

> Waste bandwidth for all I care.

Bandwidth? Tell us how the bandwidth is wasted. It is either there or it isn't.

> You DO waste everyone's time with all that preaching of old-tyme
> "moral amateur authority."

Everyone hasn't spoken on the topic, Len. That must be your opinion but then, you aren't involved in amateur radio so it shouldn't be your concern.

> If you are going to turn your collar around, try to get your head to
> go with it, okay?

Izzat how you do it?

> I have many friends and acquaintences who are professionals, IEEE
> members, and also licensed radio amateurs. KD6JG is one of
> those, so is W6MJN. N2JTV may not be an IEEE member but his
> with another professional group of FAA employees.

That's fine. They are involved in amateur radio. You aren't.
>
> Gene Rosenbaum, N2JTV, was assigned to the same military job
> I had at Army station ADA, same duties initially but on a different
> shift. Our billet was at Hardy Barracks, one of the last of the old
> U.S. military sites (much reduced in size) in Tokyo.

Super. Gene is a radio amateur. You are not.

> That was "big
> time radio communications" on HF with a 24/7 schedule...which
> you said "never happened."

That's quite incorrect. I wrote that you've never worked 24/7.

> Tsk, tsk, tsk. Army disagres with you.

To my knowledge, the Army hasn't issued an opinion of whether you ever worked 24/7.

> You've FAILED to correct another personal attack percussionist
> in here who said "MARS is amateur radio."

Since when is it my responsibility to defend and protect you?

> MARS is a military
> radio service and so defined by the Department of Defense in

> Directive 4650.2 effective 21 Nov 03.

Without radio amateurs, there'd be no MARS program worth implementing. You go on writing what you believe to be truth, Leonard. You are no more involved with the MARS program than you are with amateur radio.

> You should keep better control over those who are under your
> command, Herr Robust.

Ummm....Len? I don't have a command. Do you have a command?

> Gruss gott.

To this point, you've had difficulty deciding whether I am a "gott" or am not a "gott".

Be that as it may, you are to amateur radio like a motorcycle to a rodeo.

A cycle is eleven years in duration.

Nine cycles is a pretty long time. That's 99 years. Average human life
is still only about 76. Be very liberal and "assume" every Amateur get's
licensed at 16. That's only 6 cycles, and then that's stretching it.

Don't know that I'd want to actrually be able to witness all 9 of those!
=)

Sorry Steve, you don't get one either. You've got to get on the air once in a while to snag the good ones. As it is, you're NIL.

Best of Luck.

You should write an auto-reply script.

Start with a standard statement such as, "That's not true," which is invariably correct whenever referring to anything Steve says. Then write a search script to find and quote the misquoted part, and then close it with "Best of Luck" or "Temper Fry" or "Hi, hi."

A military commander has the authority to approve amateur operations
in a country where there is no other legal authority.

Eat it.

> Brain Burke trying to tell Dave Heil about DXing skills is like The Three
> Stooges trying to tell Fred Astaire how to dance.

But the Three Stooges never worked out of band Frenchmen on 6 meters.
David Heil did and he knows it.

>> You'll only get a "violent reaction" if you brandish a weapon.
>
>Open carry is legal.

More ignorance, Brain.

Do you not know the difference between "brandish" and "carry" as it
pertains to firearms in the State of Ohio?

I do, and I ahven't lived there for 30 years!

>> As for staying away, I doubt that will be a problem...
>
>Just keep it that way.

No. I'll come and go as I please.

>> You do, however, seem to prefer the company of young boys.
>
>In an Akela sort of way.

More like in a NAMBLA kind of way.

>idea those two boys were nuts," and others stood around saying, "I
>told you those two were nuts."
>
>In any case, no one in a position of authority took notice.

Yes, they did.

The problem was one of those Constitutional nightmares. Do they "do
something" BEFORE the fact, violating their "civil rights", or do they wait
until some actual infraction of civil or criminal law takes place? This has
been discussed thouroughly vis-a-vis Columbine.

America has been hamstringed for decades by this problem.

The same circumstances existed prior to September 11th. All of the "intelligence" agencies had information that "something" was going to happen, but no one thing done by any of the plotters had violated anything serious enough to get them arrested pre-emptively.

If, on September 10th, the President had announced the arrest of those 20 plotters and thier "alleged" plot, the ACLU, the Arab-American League, etc etc would have been screaming bloddy murder, claiming the "plotters" were only being harrassed due to thier nationality or religion.

>Which of your personalities told tales of seven hostile actions?

The one who told you in private of some of them, only to have you discuss those private e mails in the NG.

Just like Lennie, you are not to be trusted.

>> Making excuses for failures is another.
>
>Failure? I don't recall any failure, except for you to show how,
>"Sorry Hans, MARS >>>IS<<< Amateur Radio."

No Amateur Radio = No MARS.

And I am sure that you beleive every word you say, no matter how unfactual they are.

>> Perhaps you'll find it within you to own up to your claims.
>
>I claim that MARS is NOT Amateur Radio.

Congratualtions. Other than your name and callsign, you've got ONE thing you can claim as being correct. However you have yet to DISprove my assertion that without Amateur Radio, MARS, as it presently exists, would not be able to function.

(Lennie jumps in at this point to cut-and-paste various military directives, none of which disprove the assertion made.)

>> I doubt it, but there's always hope.
>
>I just proved you wrong again.

Hardly. The other evidence to the contrary is overwhelming.

Sorry, Brain. I already have DXCC. You're welcome to peruse ARRL
archives to determine that for yourself. As for the rest, not all endeavours
in Amateur Radio are "DXing"...

I am "on the air" almost daily.

And you STILL haven't answered the question.

Putz.

>Please post legal credentials for making such a request?

None are needed.

I keep asking you to do so for your own good. You continue to make
yourself look like a liar and tall-tale-teller with your assertions of
accomplishment, yet without any evidence that what you say is true.

That you continue to run and hide makes it even worse.

>Just because a stalker wants to look in my windows doesn't mean I have to
>open them.

No one's stalking you, Brain. You littered the NG with your mistruths
voluntarily.

I just keep trying to get you to own up to your lying and get the facts
out in the open.

Steve, K4YZ

Doesn't matter. I've made no claims to be a child molester, or not.

Yet you have made claims to sanity, and I see no evidence of it.

If you behave yourself and quit calling everyone that you disagree
with a liar, at least you can hide your problem.

What if the criteria were "set foot on their territorial grounds *and*
made at least one QSO on a ham band"?

Note that the criteria doesn't specify *which* ham band, mode,
distance, rig, antenna, etc. Nor does it specify accordance with any
regulations, agreements or nongovernment criteria. Just "I was there,
and I made at least one ham band QSO"

Wouldn't that count as "operation"?

A logbook with only one entry is still a logbook, isn't it?

4765. W10XEG -- new info

Newsgroup: rec.radio.amateur.policy
Date: 2004-06-10 14:12:55 UTC
From: Keyboard In The Noise <KITN@cat.net>
Message-ID: <H%Zxc.27959$tI2.9651@fed1read07>
Source record: 92829

The originator of the W10XEG question supplies the following new info:

Actually, the W10 call is most likely a commercial call. There were several 'repeaters' that were used very early in the establishment of the radio, and then commercial television networks - it may be one of those. The X is for experimental, no doubt. My Dad was very active with RCA very early on. The first experimental TV signals in NYC were on 21 MHz, broadcast from the Empire State Bldg - my Dad was chief engineer for the transmitter. One of the many experimental transmitters he put on the air was W10XEG - I just have no data about it at all.

Nope don't think so as the W10XEG dates back to the 1930's
Latest is it was probably an experimental commercial call issued for a
station in NY. Holder worked for RCA

I am sure you are correct, but I am wondering if the person(s) operating this pirate know something about radio history and want to be nostalgic. Seems they have an axe to grind agains the commission and are in fact operating right under the nose of a local office......wonder why they haven't been shut down yet?

Now THERE's the "really profound, mature response" used many, many times by nursie in here...almost a signature.

[we could go to really far adventures with nursie's use of the word "suck" so much, but that's another story entirely (BTASE)]

Eat DoD Directive 4650.2, nursie.

Digest it. Regurgitate it and eat it again if you can't digest it.

Or call on the UN Security Council to pass a Resolution saying "MARS is amateur radio" if you can't stomach correction.

[too bad we can't babble on ham radio policy in here for all the
"hostile actions" mounted by nursie and herr robust]

>write a search script to find and quote the misquoted part, and then
>close it with "Best of Luck" or "Temper Fry" or "Hi, hi."

Sounds like a plan!

I once tried something like that with Herr Robust's arrogant
ordering in here but the script editor program just froze with
an error message box appearing stating that the "program was
in comedy mode, must wait for Saturday Night to make a Live
restart." That was on a Sunday afternoon and the wait was too
long.

If it was a movie script instead of a DOS script it might sell.
Hollywood producers buy all kinds of fiction, even SF that
isn't scientific or logical. Nursie sure isn't logical, only rock-
bound, rock-anchored Twilight Zone material. Too bad Rod
Serling is long departed..."At the signpost up ahead, MARS
is amateur radio!" [has a catchy ring to it, I think...:-)]

Hi hi and a J.Lo begging...

>
>Flat out wrong, not poorly worded.

Nursie did NOT "explain his intent" in the beginning.

Nursie backpedalled AFTER the proper documents were
identified and locations given to him after three weeks of
stating "MARS is amateur radio."

Nursie's "intent explanation" was ALSO poorly worded.

Nursie will never ever admit he do wrong.

>> That you won't acknowledge that and move on is evidence that this is
ALL
>> you have to try and deflect attention from your every expanding list of NG
faux
>> pax.

"MARS is amateur radio" statement is not a faux pas?

Nursie never once in three weeks of arguments identified or located
the documents which define and detail the Military Affiliate Radio
System. It took two others only a short search to find them on the
Internet and post that here.

Nursie has never once acknowledged that MARS is a MILITARY
radio system, not even when the predecessor, AARS, was

shown to be the Army Amateur Radio System. [he must not
think the U.S. Army is a military branch...a bad case of murine
brainwashing]

>> It's apparent that this is ALL you have to "argue" about, Brain.
>>
>> Sucks to be you, Brain.
>
>You're stupid words being shown to you again and again must finally be

>Hi, hi.

Brian, one might as well give up trying to make a chunk of igneous
rock understand anything, much less agree to have made a wrong
statement any time in his alleged life. [rock as a sentient life form
has only been portrayed as "life" on science-fiction shows...]

If nursie say MARS is amateur radio, then that is all he (or she)
understands as "correct." It is nothing else. That's why there isn't
any definition or regulations on MARS in Part 97.

<shrug> Decomposed granite cannot be argued with... :-)

>I owe you no proof.

Nursie say all who disagree with him MUST show "proof."

Nursie ignores such proof and say disagreer is a "liar."

Nursie define all that is "right" in his fantasyland domain.

>> I could "claim" operation from TA, 9K, HZ, DU, HR, VP2, VE, SU and
several
>> other places
>
>What other places?

Fantasy places. "At the signpost up ahead, the Twilight
Zone..."

>> if the criteria was just having set foot on thier territorial
>> grounds at least once.
>
>Setting foot on "thier" territorial grounds doesn't make for hostile
>actions either.

Nursie "sets foot" on territorial grounds LOOKING for hostile
action! [sort of like he does in here... :-)]

>> No Proof = Didn't happen.
>
>Liar Steve, you could even show us some of those medals that you have,
>but didn't earn. Walter Mittyism at its very finest. Get help.

It's quite easy to scan a photo (nursie wearing some kind of
uniform...SOP for that) and send it as an attachment in
e-mail. Nursie no do dat.

Medals can be identified by their general shape and color of
the ribbon if the photo quality is poor.

However, that doesn't explain his not understanding the DoD
Directive 4650.2 (21 Nov 03) which defines MARS. [MARS is a
military radio service] Therefore nursie be making up own
medals and calling them true...

Another prime example of modern U.S. amateur radio
operators for others to follow and learn from...?

There's only one correct international set of phonetics -

Alpha Bravo Charlie Delta Echo Foxtrot Golf Hotel India Juliet Kilo Lima Mike Novenber Oscar Papa Quebec Romeo Sierra Tango Uniform Victor Whisky X-ray Yankee Zulu

I have a P at the end of my US call, and that is the one letter that causes me problems. Papa is supposed to be pronounced the British way, not the American way, so as to be correct (don't blame me, all the phonetics have only one official pronounciation, and that happens to be it). As a Brit operating from America, I find that when I do so, people copy it as 'Japan', hence converting my call from N3KIP to N3KIJ in the mind of the DX.

Now, I understand that anyone is free to use whatever phonetics they like, but 'Japan' is a bad one, as it sounds too much like the official way of saying 'Papa', at least through QRM, although not like the way Americans say it. Unfortunately it is common to use country names as phonetics. No doubt 'Papa' was a bad choice originally, as there is more than one way of saying it, but I can't do much about that.

I have tried using 'Pacific' or 'Peter', both of which seem to be common. I have also tried saying 'Papa' the American way, although there is considerable irony in that, i.e. for me that is both putting on a foreign accent and departing from the official way of saying it, which happens to be the way that is natural for me to begin with!

I'm going to start a new fenetic alfabet:

ahoy
boy
coy
dee
eee
flew
glue
hoy
igloo
joy
koi
lew
moo
noy
oy
poise
quoi
roy
soy
toy
upper
viceroy

```
double upper
ex
why
zee
```

Using your fenetics
Ahoy Boy Why Toy

with a perfectly good well accepted international phonetic set

Quoi Soy Lew

Available at all Chinese resturants and B & W Root Beer Stands

Kellie should note that the U.S. MILITARY adopted the NATO phonetic alphabet in 1955, not 1956. [as one who was IN the U.S. Army at the time, and in radio communications work, I am quite familiar with that adoption, about as first-hand as one can get (without shooting off his catapult)]

1955 was 49 years ago.

Is Kellie POSITIVE the ARRL adopted the NATO phonetic alphabet 49 years ago? Or even 48 years ago?

The ICAO (International Civil Aviation Organization) may also have selected the NATO phonetic alphabet in 1955, rather than 1956, but I expect a lot of outraged protests on that... :-)

I do know it is NOT the "ICAO phonetic alphabet" except for a bunch of anti-military peacenik hardliners will never admit to the existance of NATO, therefore they want to rename it for "ICAO."

Kellie will now start mumbling "putz" and other Yiddish endearments... :-)

No problem Jim, I am one of those that is required to use the APCO (or damned close similarity) phonetics in both of what I do for a living. As a ham I am required to use the ITU phonetics.......

I am first to admit, every once in a while the two different phonetic groups do get intermingled...... not on purpose though. :)

Actually during a public service event or an actual emergency event, keeping some form of log or at least a "message log" is actually a good idea. If there is some type of problem discovered later on, at least having a record of what occurred can possibly help to save the proverbial posterior....

Keeping a personal log is not required anymore, but can serve to help in some regards. I only log now new contacts/first time contacts. If I kept a log for each contact, regardless of how many times I chatted with each person, I would be killing a ton of trees.

I had heard that the early "Channel 1" TV stations in NY and
Chicago were in part of the later 6M amateur band; 48-54 MHz
if I remember correctly. That is why there is no TV Channel
1 today. After WWII, the 6 M band was carved out about the
time the VHF TV channels were allocated. Do you have any
hard info about the use of 21 MHz for TV Ch-1?

No you're not.

Regardless of the article in QST, there is no requirement for hams to
use the ICAO phonetics. You are free to use whatever phonetics you
wish, or none at all if that strikes your fancy.

I often don't. I don't know about other hams, but I can make out a person's call better if they just SAY it. Of course that only goes for the languages I recognize.

Absolutely! Under most conditions the use of phonetics isn't much
needed.

Interestingly, in the amateur radio activities where speed and
readability under marginal conditions count the most (contesting and
dx'ing), the predominate phonetic set mostly uses international place
names.

A......AMERICA
B......BRAZIL

That's true as long as the phonetics used don't obscure the meaning of words or
the actual callsign.

Source record: 92869

Richard -- this all started when an inquiry was made by a gentleman whose Dad worked for RCA and had license W10XEG in the 1930's

It appears he worked for RCA conducting early TV experiments and the following quote heralds the early TV experiments on top of the Empire stae building

Quote from URL: http://www.earlytelevision.org/pendletonpaper.html

"The first all-electronic American systems in 1932 used only 120 scanning lines at 24 frames per second. This produced a blurry image with visible, thick scanning lines and a noticeable amount of flicker. RCA transmitted from both their Camden, New Jersey laboratories as well as from atop the Empire State Building to a handful of experimental television receivers located within a few miles of both areas.14 "

Also note that some early TV experimental stations operated around 2 Mcs -- see URL:
http://members.aol.com/jeff560/chronotv.html
Quote:
"Mar. 30, 1929. Radio Service Bulletin lists these new stations: W9XAO Chicago IL (Nelson Brothers Bond and Mortgage Co.) 2.0-2.1 MHz, 500 watts; W2XCR Jersey City NJ (Jenkins Television Corporation) 2.1-2.2 MHz, 5000 watts; W2XCL Brooklyn NY (Pilot Electric Manufacturing Co.) 2.0-2.1, 2.75-2.85 MHz, 250 watts; W2XCO New York (RCA) 2.1-2.2 MHz, 5000 watts; W2XR New York (John V. L. Hogan), 500 watts (visual broadcasting and experimental); W2XCW Schenectady (General Electric) 2.1-2.2 MHz 20,000 watts."

So I suspect that the sender meant 2.1 Mcs not 21 Mcs

You are correct about the later TV allotments which can be seen at URL:
http://members.aol.com/jeff560/jeff.html

Also What happened to Channel one at
http://members.aol.com/jeff560/tvch1.html

No, FORTUNATELY!

Glad you made it! Now the FUN begins. :-)

After you've lived and experienced a few eras in anything, you'll
find lots and lots of "experts" in that anything, who either "know
all about (from reading a book or seeing a movie)" or are some-
how so gifted in their relative youth that they are divine
messengers sent to enlighten all the hoi polloi and the koi.
:-)

Just the same, in 1955 we in the U.S. military got some mass-
mimeos on the "new" NATO phonetic alphabet to memorize
since it would become effective in a few months from that issue.
[the xerocopy machine wasn't a thing then and all orders, etc.,
were done in mimeograph form...which were "cut" on a type-
writer...hence the term "cutting orders (for this or that)."]

Good for some guffaws in discussion...like "foxtrot" for "fox"
(even the term "fox trot" had gone out of style in dancing in
favor of Latin American dances in that year...the "twist" had
several years to appear and Chubby Checker was probably
still thin). We learned "love" was out and "lima" was in (a lot
of beans that). Since we all knew "how," the "H" still became
"hotel." "Quebec" was a nice touch favoring the Canadians.
We learned a bit more respect for "mama" and "papa" and
"juliet" (for those of us who knew here, too).

"Zulu time" entered the military jargon (for the Z time zone equal to GMT) and eventually entered TV entertainment through the series "JAG." Scientists and metrologists were just then beginning to argue UTC or Coordinated Universal Time (instead of Zulu...smarts folks thought they were too good for the military or something, which we would see in the 60s).

I sort of liked the old phonetic alphabet since my initials came out Love How Able! "Lima Hotel Alpha" just doesn't have any zing to it. (hi, hi...hotel india, hotel india...)

Hang in there for 50-plus! :-)

And highly unlikely that I ever WILL be, Brain.

In most cases when I am on HF, it would take you a moderate amount of skill or dedicated software to communicate with me.

Even if you had the software, you'd still have to be able to know what to listen to. I don't think you have either.

People who are trying to berate others over thier choice of words should
take a couple of seconds to proof read what they write BEFORE they send it,
Brain.

What a PUTZ!

Brian, you're an idiot. It really is THAT simple.

But hey, THANKS for making my job that much easier!

Hmmmmmm.....

That's funny...

APCO calls it the ICAO phonetic alphabet.

The FAA calls it the ICAO phonetic alphabet.

It's refered to as the ICAO phonetic alphabet in about a dozen different
military aeronatutical publications that I recall including the FLIP charts.

I've seen it refered to as the ICAO phonetic is several European radio
hobby magazines.

Ya figger all them folks know something YOU don't, Lennie...?!?!

The ICAO and the ITU globally and the FAA, ANSI and the ARRL inside
the U.S. all agreed upon the same phonetic alphabet and it lives on
today. That's a documented 100% correct statement. What's your point
Putz?

Answer: "I'm just the local neighborhood putz, I don't have a point, I
never did and I never will".

Back when my call was w3yik and I used Washington Thuree Yokohama Italy Kilowatt the guy on the other end of the pileup often worked three whilst waiting for me to finish my long-winded ID speil. Hideous phonetics. Whiskey Thuree Yolk Ida Kilo worked much better. I think those were some sort of ancient military standard phonetics.

Then I "transitioned" from ham radio to a bit of flying. Early in that experience I called Philips Army on Unicom and used "my" phonetics to ask permission to pass thru their control zone at 1200. The freq lit up like the tower of babble, Philips tower simply ignored me so I had to wind a couple spot 360s up to 3500 and climb over the control zone instead getting their permission to fly thru it.

I dunno how many others reamed me a new one good for using squirrely phonetics. It didn't get any better when I got back on the ground and to deal with the hanger bums who also heard it all.

I ain't never going thru anything like that again no way nohow.

Today "Romeo Victor" cuts thru the crap like a knife. You couldn't pay me enough to use "radio victoria" if the guy is a new one. And "we" don't much bother with our prefixes in the pileups these days huh Hans?

So from all this one can asume that W10XEG was a portable experimental
station -- probably for early TV

Experience trumps theory, and in my experience using "Jamaica" as
phonetics for "J" would call for an instant fill and put a 3dB
down-spike on my rate meter.

If it's all the same with you, I'll just run down to the clinic and get
a plague shot and then continue my sinful ways.

Wow! It has been so many years since I worked at WROC AM/FM/TV and WOKR (TV). Their microwave links had some weird call signs. I don't recall, but remember thinking at the time that they resembled amateur call signs. Note I said "resembled". They wouldn't be assigned a call that could possibly be issued to an amateur, but your example of W10 would be a distinct possibility.

The calls you list appear to be remote links for radio back when. Thanks for an interesting post!

Best regards from Rochester, NY
Jim AA2QA

Steve, no thanks for the private email, even though I've asked you repeatedly not to communicate with me privately. I really do prefer to keep all comms with you strictly public. You broke the rules, but certainly in keeping with your mode of operation.

So how is it that you can call people liars all day long, give people a deadline to produce some google search, hound and hound those who disagree with you, and in general be the sweetheart pariah of the PCTA?

But when someone else calls you a liar, when you have lied, you threaten a summons. Are you nuts? No. Don't answer that question. I don't want any more lies out of you.

So congratulations on earning persona non grata. You've truly worked hard at ii. Earned, Never Given.

And FWIW, the fenetic alfabet was a joke, but leave it to the mentally impaired to think is was a serious effort.

Sayonara and have a great life.

Certainly took a lot of explanation and I'm still not satisfied with
any of his answers.

But something else is not satisfactory. He started this thread from
scratch, and claimed there was a "Rant." I didn't see the rant. I
asked where the rant was. Apparently, there was no rant.

I'm searching for a word used to describe a person wha says there was
something when there was not.

> Nursie backpedalled AFTER the proper documents were

Hmmm? How can you shop at a store before it was there, but then say
that you did it anyway?

They put him on a "need to know" basis. All Steve needed to know was
that everyone else outranked him. Everything was much simpler that
way.

They would convene a committee of ITU and Security Council members.
There would be lots of meetings, lots of trips to Paris and Zurich,
lots of pizza and beer. In the end they would ask, "What idiot
suggested that MARS and Amateur Radio are the same thing or even could
become the same thing?"

It's his insinuation that I might be molesting cub scouts that I
resent. He's a sick man.

Welp, I'm going to go call CQ on a MARS freq. Might as well use my
ham call too, since I don't have a MARS call anymore. Shouldn't make
any difference ayway. After all, "Sorry Hans, MARS >>>IS<<< Amateur
Radio." Hi, hi.

I especially liked the time he said that a Morse Exam was a disincentive to CW use.

You can do whatever you like, but it is precisely _because_ you and others
use 'Japan' as a phonetic that I have problems with people who think that
was what I said when I correctly pronounce the correct phonetic for the
letter P. This sucks!

Suck it may, but "Papa" and "Japan" do not sound alike to me. If you
say "Papa", I'll never type "J" into my log.

"Bravo" and "Papa" are much more often confused in my experience, and
both of them are on the "approved" phonetic set. "Oscar" and "Bravo"
are similarly often copied one for the other.

I've never known anyone to confuse "Portugal" for "Japan", "Brazil" for
"Portugal", or "Ontario" for "Brazil". Perhaps that's why this set is
so widely preferred over the ICAO set.

Gee, Len, that's interesting....

You mean like someone who's never held any class of amateur license, nor been involved in radio regulation in any way, yet loudly and repeatedly proclaims what changes should be made to the amateur radio regulations?

Or someone who has never been directly invoved in the raising of children, yet proclaims what they can and cannot do at various ages - even to the point of not allowing them to be amateur radio operators before a certain age?

Or someone who has never really learned or used Morse Code, yet loudly and repeatedly denies its usefulness - even to the point of denying its historical importance?

Or someone who claims a desire for "civil discussion", yet will not carry on a civil discussion with someone of differing opinions, and instead refers to the other parties by ad-hominem insults to their age, work, gender, license class, education, name, ethnicity, and military service?

You forgot a few, Jim:

Like someone who has never been a licensed aviator who tries to advise
current aviators on navigation aid functions and techniques.

Like somone who has no training, certification or licensure in ANY healthcare profession trying to one-upmanship those who are.

Let us not forget those who have attempted to embellish thier military service record with the sacrifices of Soldiers who were KIA three years before the commenter was ever IN the military.

And there are those who make scathing comments on the nature and character of various volunteer organizations although they themselves have never been in any of these organizations, and in one case where they hadn't even reached puberty when they made thier "observations" on those organizations.

The list goes on.

>I don't want any more lies out of you.

I've not uttered any lies here, Brain.

You've made THAT accusation before and never substantiated it. Just like you've never justified ANY of the claims YOU'VE made.

You make accusations and claims you don't justify then cry "foul!" when you get spoon fed your own silliness.

Sucks to be you, Brain. Seems it's a well worn path, though.

>So congratulations on earning persona non grata. You've truly worked
>hard at ii. Earned, Never Given.

According to YOU...?!?!

HAH!

>And FWIW, the fenetic alfabet was a joke, but leave it to the mentally
>impaired to think is was a serious effort.

I KNOW it was a joke. I have yet to see a whole lot come out of you that I could take seriously. How could I?

>Sayonara and have a great life.

As long as I have folks like you and Lennie against which I can benchmark what is bad as compared to what is good, it IS a great life.

You REALLY don't get it, do you?

I didn't insinuate you're molesting scouts, Brain.

I said it's apparent you prefer the company of little boys to adults.
That is true. When asked about several Amateur Radio related activities, you
are always predisposed.

>Welp, I'm going to go call CQ on a MARS freq. Might as well use my
>ham call too, since I don't have a MARS call anymore. Shouldn't make
>any difference ayway. After all, "Sorry Hans, MARS >>>IS<<< Amateur
>Radio." Hi, hi.

And I am sure you'll get an appropriate QSL card for the effort, Brain.

Maybe you'll show us THAT QSL card...You don't seem to ahve any others to
show off....

Maybe you'll work Lennie and his Part 15 station that he's going to put on
20 meters.

Steve, K4YZ

You forgot to add:

"Someone that has a main purpose here of antagonizing people into
e-battles as a master troll." And in this case, his lack of experience
in certain areas only serves as more bait.

I for one, am impressed by just how GOOD Mr. Anderson is at this! You
(or anyone here) know what will happen when you rise to the bait, you
know pretty much what the resulting exchange will be, and yet it is
irresistable.

Whereas most antagonists eventually find no one to write to in a news
group, Len has managed to generate enough interest to make himself and

those who would spar with him into some of the leading posters.

This is no small accomplishment. I for one have to respect that.

- Mike KB3EIA -

Poor baby. Still fretting over AOL tossing off your private home page that was totally libelous? :-)

And all because of a simple mistake in private e-mails which nursie complained long and loudly about in public in here? :-)

PCTA Exta double standard at work. QED.

Nobody does. Nursie's personal reality is there and this is
it for him.

Meanwhile, DoD Directive 4650.2, AR 25-4, NTP 8(C) are still
there, defining and regulating MARS for the Military.

NATO did adopt its phonetic alphabet in 1955...the next to the
last year I was on active duty in the U.S. Army.

None of that happened according to nursie. All of us "Lie."
The real truth is in his imagination. Tsk, tsk.

Temper fry...

Tsk, tsk, tsk. It should be an easy recall for anyone with fabled Recon Marine training to describe the location, the general vicinity, background, etc. That HRO location isn't in a large mall at all. [it's off the intersection of Victory Blvd and Buena Vista, major streets]

The old HRO in Van Nuys is, by comparison nondescript for locality. However, the new location has many noticeable features. But, WHICH location of HRO was nursie talking about? There's three, not two. :-)

> Just another LennieLie, now propagated by Son of Lennie.

Ah...here we go with the nursie-style "meaningful discussion" thing.

As I explained in another message, nursie's concept of a "rant" is whatever is in its personal fantasyland.

Nursie must have taken out a long lease and had the rant all paid up until next year or later...

>>I'm searching for a word used to describe a person wha says there was

> You and Lennie. Only one of you who as any "experience" in MARS at all,
>and neither of you who knows how MARS operates.

Tsk, tsk, tsk. MARS is a military radio service. Army MARS Hq is
in Fort Huachuca, AZ. [a bit too hot and dry for me, having been
there] That's also home for the Army's Military Intelligence school.
[it's obvious who wouldn't be allowed to enter that school...:-)]

>>> "MARS is amateur radio" statement is not a faux pas?
>>
>>Not only is it wrong, it's not true.
>
> When quoted out of context, it is. You ignore the rest hoping it won't
>be fed back to you.

"Quoted out of context?!?" Nursie write "Sorry Hans, MARS >>IS<<
amateur radio!"

If MARS were amateur radio, then Part 97 would define and regulate
it. Part 97 does not.

If MARS were amateur radio, then there would be no need for DoD
Directive 4650.2. But there IS that Directive.

Ergo, MARS is a military radio service.

> Too bad for you.
>
> No Amateur Radio = No MARS.

Untrue. Read DoD Directive 4650.2 if at all possible. It defines what
MARS is. MARS can and does exist without amateur radio as is
witness to the reporting of exercise Grecian Firebolt 2002.

Nursie's second statement (trying to backpedal from the first one) is
as invalid as the first.

>>> Nursie never once in three weeks of arguments identified or located
>>> the documents which define and detail the Military Affiliate Radio
>>> System. It took two others only a short search to find them on the
>>> Internet and post that here.
>>
>>Deliberate stupidity (playing dumb).
>
> Nope. Those "documents" were not needed.

They were for the sake of reality of the rest of us. In nursie's case,
an alternate reality exists.

> No Amateur Radio = No MARS.

This second statement, not identical to the first, is as incorrect as
the first.

>>> Nursie has never once acknowledged that MARS is a MILITARY
>>> radio system...(SNIP)
>

>
> Keep trying, Brain. You MIGHT get SOMETHING right one day.
>
> Not likely, but you might...

Poor nursie, still harboring rage and resentment at not being believed.

Goodbye, meaningful discourse.

Hello, alternate nursie reality.

In nursie's personal reality, "the rant" is on-going and is done by
anyone disagreeing with nursie.

He thinks that every subject thread is involved in "a rant" against
him and therefore is compelled to yell, cuss, swear, and say cute
little Yiddish nasties (he not speak or understand Yiddish, the goy)
against his pet enemies.

>I'm searching for a word used to describe a person wha says there was
>something when there was not.

In any other venue, that is a four-letter word spelled L-I-A-R.

In here, a "liar" is simply anyone who disagrees with nursie.

It's that simple. :-)

>> Nursie backpedalled AFTER the proper documents were

>anything.
>
> Uh huh.

No, it's Fantasy Island stuff with nursie. Nursie just say he do and it was done. Proof is irrelevant. In our reality. In his personal reality it really happened.

> At least the medals I didn't earn ARE in a box and were clearly reported
>as such. SOME people in this forum have a habit of reporting that they did
>things and went places that they have no proof for.

Does Western Costume know you have those movie props?

Or did you get them from some southeastern US scab movie company that went bankrupt?

> THOSE people are the liars.

Everyone who disagree with nursie are the liars. :-)

True, but he is an Extra and therefore can say anything he
wants in full protection of the something-or-other.

If nursie wants to call you a NAMBLA member, then you ARE
one and that's okay. In his fantasy reality. Anyone speaking
against that is a "documented pathological liar." :-(

Nursie "never lies." Not in his fantasy reality.

Tsk, tsk.

Awww...poor Mike got his ego perceived as stepped on?

Mike, I've been involved with radio communications since the beginning
of that in early 1953. That's 51 years.

The subject thread is supposed to be on phonetic alphabets. No
problem, I've used those since 1953 and the NATO phonetic
alphabet since 1955 (49 years for that). Is that "lack of experience?"
:-)

> I for one, am impressed by just how GOOD Mr. Anderson is at this! You
>(or anyone here) know what will happen when you rise to the bait, you

your own preferences and cannot stomach an opposite viewpoint?
:-)

Whhhooooo...you guys are in the WRONG venue to have such an
attitude on the Internet!!! :-)

> Whereas most antagonists eventually find no one to write to in a news
>group, Len has managed to generate enough interest to make himself and
>those who would spar with him into some of the leading posters.

"Leading posters?" :-)

You mean all those wonderful folks who yell "PUTZ" and "Son of
Lennie" and "Sucks to be you" or the snarly types tawkin tuff and
trying to stuff opposite opinions into the ground?

Yup. "Leading posters." Like the ads for some up-coming horror fantasy movie showing blood, agony, and gore all over the wall. :-)

> This is no small accomplishment. I for one have to respect that.

The only ones asking for "respect" are the telegraphy gods of hum radio, demanding all love, honor, and cherish their "superior" mode of modes, and thus Rule over all "inferior" beings. :-)

But, the subject title was "phonetic alphabets," wasn't it?

Got a tad off the subject into Personal Hatred, dintcha? :-)

"These things just seem to write themselves" - another hum god

Oooooo...der CAP Ace SPEAKS! :-)

[single-engine rated private pilot tries to sound like multi-engine air
transport rated commercial captain or some figher jock...]

Tsk, tsk, tsk. Poor nursie, the wonderham doesn't understand that
air navigation, radio navigation aids, and techniques are NOT a part
of the NATO phonetic alphabet use. :-)

No problem. I know how TACAN, VOR, Localizer, Glideslope,
Marker Beacons, ATCRBS Transponders, Airborne radars all work
because I've been intimately involved with such hardware in design
engineering...in the labs as well as the fixed bases (airports to
civilians). Nursie doesn't know ARINC from an earache, has never
met Bill Cairns of ARINC, doesn't know what an "ATR box" is but
probably (after years of military study) got to know what a "station"
on an aircraft is...:-)

None of that really involves the NATO phonetic alphabet because
nursie is too deep in his hatred of individual personalities to be able
to distinguish right from wrong.

ICAO did adopt the NATO phonetic alphabet and made it a part of
the Air Traffic Control language...which was adopted as English
internationally back in the mid-1950s. I've used that on civil aviation
radio in voice communications about 1960 for the first time. No
biggie, but nursie can't let his hatred die and must tell a bunch of
LIES about my past experience. :-)

> Like somone who has no training, certification or licensure in ANY
>healthcare profession trying to one-upmanship those who are.

Nursie, trying to masquerade as Dr. Killgore, Knows All, thinks he
wrote "Gray's Anatomy" or the "Physicians' Desk Companion." :-)

Nursie can't stand being "one-upped" on ANYTHING. :-)

> Let us not forget those who have attempted to embellish thier military
>service record with the sacrifices of Soldiers who were KIA three years before
>the commenter was ever IN the military.

Two years. My assignment was to the 71st Signal Service Battalion,
8235th Army Unit. The "71st" lost 20 members on 1 Jul 50 in an air
crash in Korea, en route to bolster U.S. Army communications there.
I honor their memory and of that military unit. Hardy Barracks, the
last surviving U.S. military location in Tokyo, was named for one of
those 20, Corporal Elmer Hardy. I was billeted at Hardy Barracks.
The new transmitter site at Kashiwa was, in 1956, renamed Camp
Tomlinson in honor of one of the "71st" officers on that fatal crash.
I was in the first of C Company to move into the Kashiwa site and
help enabling the start of HF radio operations for station ADA.

I don't "embellish" anything. I was there, as assigned, did my work,
and honored those who went before. I would dishonor the names of
all 23 of my unit if I did not mention them or keep them in my heart.

> And there are those who make scathing comments on the nature and
character
>of various volunteer organizations although they themselves have never been in
>any of these organizations, and in one case where they hadn't even reached
>puberty when they made thier "observations" on those organizations.

Poor baby. Still in need of mental counsel. His obsessional hatred
abounds. "Meaningful discussion" isn't possible.

>
>You mean like someone who's never held any class of amateur license, nor been
>involved in radio regulation in any way, yet loudly and repeatedly proclaims
>what changes should be made to the amateur radio regulations?

Poor baby. Got your ego all in a dither because you aren't the
"renowned historian" and truthsayer in all things amateur?

Well, heck yes and gosh darn, Rev. Jim are all upset again.

This could be the start of REAL truthtelling in reply which would last
(probably) months and result in long, long, "refutations" that Rev. Jim
never ever tells any untruth and speaks with the voice of the gods.

>Or someone who has never been directly invoved in the raising of children, yet
>proclaims what they can and cannot do at various ages - even to the point of
>not allowing them to be amateur radio operators before a certain age?

Yup, Rev. Jim, the "renowned pediatrician" has to voice an old, bitter
"cause" of his left over from 6 years ago. :-)

[see last item in my Comments on docket 98-143...which the teen
avenger was Hot and Heavy in denunciation of...(still in the ECFS
under 13 Jan 99 filing date)]

>Or someone who has never really learned or used Morse Code, yet loudly and
>repeatedly denies its usefulness - even to the point of denying its
>historical importance?

Rev. Jim got his BP up over 200/100 again on manual telegraphy.

Tsk, tsk, tsk...then manufactures a falsehood that I "denied its historical importance." In any other venue that would be a LIE. :-)

In the first days of ALL radio, the ONLY way to use it for any sort of communication was by on-off keying telegraphy. That first demo of radio was in 1896, in Italy and in Russia. The telegraphy codes used were the "morse code" (presumably with some local country variants for some characters, unknown to exact details). The first Morse-Vail Telegraph (commercial) service was in 1844 or 52 years before the first radio-as-communications medium demonstration.

There's no question that "morse code" has historical significance. It does. But, the first radio demo was 108 years ago...roughly five generations in the past. Today, the only real use of manual telegraphy codes is in amateur radio where its advocates go on angry benders of denunciation of anyone who even frowns on its "usefulness." All the other radio services just dropped "morse" as being too slow, too error-prone, and requiring comm specialists at each end that weren't useful anymore.

>Or someone who claims a desire for "civil discussion", yet will not carry on a
>civil discussion with someone of differing opinions, and instead refers to the
>other parties by ad-hominem insults to their age, work, gender, license class,
>education, name, ethnicity, and military service?

I should "show respect" for those self-empowered paragons of pride who insist (to the point of angry jumping up and down) that all must respect those olde-tyme manual radio telegraphers? Because telegraphy is Their Favorite and all should honor Their favorite?

Wow, ol' Rev. Jim really got cooking on his Hellfire-And-Brimstone denunciation of all who don't Believe in the True God of Radio, Morse!

Tsk, tsk, tsk. Hell Hath No Fury Like A Telegrapher Scorned! :-)

Uh, Rev. Jim, send me your TS Card. I'll punch it. Save everyone all the time and trouble of reading your raving of madness.

You DO know what a "TS Card" is, don't you? No? Tsk, tsk, an old military service term-phrase. You weren't IN the military, were you? Tsk, tsk. You did NOT work any military comms or even any civilian comms, did you? No? Tsk, tsk.

Gosh, golly, and heckanddarn, all this fuss and Fury over some NATO phonetic alphabet that went in force in the NATO militaries of 1955 and was the forerunner of such adoption worldwide. Even in the ICAO...whose working air carriers were, in the majority, in NATO-member countries back in the mid-1950s. :-)

Beep, beep

>Putz?

Not quite the "100%" you state, but you will cuss and swear and
act real tuff about it. As you did here. :-)

NATO started it in 1955.

I was a member of the U.S. Army when NATO started it and the
U.S. military made the directives that had the military change over
and use it. Kellie wasn't. Kellie was never a part of the United
States military.

>Answer: "I'm just the local neighborhood putz, I don't have a point, I
>never did and I never will".

Tsk, tsk, tsk. Following your "NCOIC" in "meaningful discussions,"
are you? :-)

> That's funny...
>
> APCO calls it the ICAO phonetic alphabet.

APCO isn't a military organization.

Police agencies had the "10 codes" before CBers did. :-)

> The FAA calls it the ICAO phonetic alphabet.

FAA is (through the USA) part of the ICAO. :-)

Where did the ICAO get their phonetic alphabet? :-)

NATO had it first in 1955. Tsk, tsk, tsk.

> It's refered to as the ICAO phonetic alphabet in about a dozen different
>military aeronatutical publications that I recall including the FLIP charts.

You've "FLIPed" out, nursie.

Ain't no "aeronatutical publications." Lots of aeronautical ones... :-)

> I've seen it refered to as the ICAO phonetic is several European radio
>hobby magazines.

You've also said "MARS is amateur radio" despite DoD Directive 4650.2 (effective 21 Nov 03). :-)

You NOW refer to amateur radio as a "hobby?" Tsk, tsk, tsk.

Where is that enormous pride and esprit de corps in that very special "service" you honor by keeping it like a quasi-paramilitary something or other?

Remember, "ham radio" doesn't work like all other radios. It is
very different in your reality, extra special and never, never, ever
"just a hobby" in that fantasyland.

> Ya figger all them folks know something YOU don't, Lennie...?!?!

NATO knows. The made the NATO phonetic alphabet a reality
in 1955. Hasn't changed any since that year.

>> Kellie will now start mumbling "putz" and other Yiddish
>> endearments... :-)
>
> If it fits, Lennie...
>
> Ya PUTZ!

Tsk, tsk, tsk. More of that "meaningful discussion?" :-)

I find that people have a high error percentage in getting my call correct even with a clear, strong FM signal unless I give it at least once phonetically. While my call is N8UZE, the Z is frequently repeated back to me as B, C, D, G, P, T, or V. The only people who don't make that mistake are those who have known me for a while and are familiar with my call.

Dee D. Flint, N8UZE

There's often quite a good reason for it. Many DX stations only have a
minimal grasp of English and departing from the ICAO phonetics can cause
them real problems in getting the call sign correct.

In addition, if everyone is using the same phonetics, the brain becomes
trained to them and can pick it out even if mispronounced, heavily accented,
or incompletely heard due to noise or interference.

Do they really have that bad a grasp, I wonder? Language barrier would argue in favor of the "country" type phonetics instead of the ICAU versions. In the short time I have been a ham, I have made use of the languages I have learned in the past, and worked at picking up others. I sure as anything would work hard at picking up English if I was planning on working DX.

p.s. no Anglo-centrism here - I would pick up Swahili if need be.

We have an individual (respected old-timer at that) who, when he
takes his turn-in-the-barrel as net control of our daily ARES/RACES
check-in, gets confused over people's call signs regardless of
whether phonetics are used or not, and even if one identifies with
phonetics, he will acknowledge with some ad-hoc inconsistent mixture
of ITU, old military, and old telco (cities) phonetics.

For one, it drives me nuts even though he's a nice guy.

And on another score, the last letter in my call is "P", and how can
"pa-PA" - or even the popular pronunciation "poppuh" be confused with
"Japan" ??

Likewise, without phonetics my call is often copied as N3KRP or N3KAP
instead of N3KIP. Unfortunately, using international phonetics my November
3 Kilo India Papa is often copied as November 3 Kilo India Japan (see the
argument above with Hans who favours the alternate set that uses Japan
instead of Juliet).

> on working DX.

>

It actually is not rare for a DX station to know practically no English at all (it is even more true in a contest that includes DX). Some are simply interested in running contacts. All they can handle is a signal report and call sign. So using the phonetics THEY want or are accustomed to is the polite thing to do.

Keep in mind that the ICAO phonetics were developed with certain criteria in mind. One of these is that they be relatively easy to pronounce even if the person doesn't otherwise speak English. Another criterion was that even if mispronounced, listeners could still ascertain what letter was intended. For example, the French may actually pronounce "Charlie" as "Sharlie" but the listener is still able to get the right letter. Germans may pronounce "Whiskey" as "Viskey" but we still get the letter correct. Americans will mispronounce "Quebec" and "Papa" but again the other station has a very good chance of getting it correct. Another criterion was that the words be of reasonable length, neither excessively short or excessively long. Although the ICAO phonetics sometimes are poor in meeting all the criteria, the country name approach is often poorer in this regard (e.g. Zanzibar is just way too long).

Now I have used phonetics other than the ICAO upon occasion. However I always start with the ICAO and switch only if they can't seem to understand, which happens on shortwave with the noise and interference. Fortunately that is rare for me. My call seems to work quite well with the ICAO phonetics. On the other hand, my OM sometimes finds it necessary to use "Sugar" instead of "Sierra" and "Germany" instead of "Golf". The soft, sibilant sound of "Sierra" often gets lost in the hiss of noise and the throaty "Golf" seems almost to get "swallowed" when spoken and sometimes doesn't come through well. Still this does not mean one should disregard the ICAO set.

The objective is always clarity of communication. Standardization of approach generally helps this. That is why the ICAO developed its phonetics and why amateur organizations encourage the use of this set.

Again it goes back to what the brain has been trained to do. To someone who is accustomed to using "Zulu", the phonetic "Zanzibar" can cause the brain to momentarily stumble in getting the letter. Then a repeat is required. Would you rather repeat the phonetic several times or use one that the station is accustomed to so they can get it on the first try?

In looking at your call, you are fortunate (just as I am) to have one composed of letters that comes across easily using the ICAO phonetics. There should be no need to use any other set with a call such as yours and other phonetics could actually be confusing.

If they don't know much English, it's a bit rough on them to use non-
standard words, and even if they do, it increases the chance of a busted
call in the log.

I hear tell that those air raids on Tokyo in the fifties were exercises in sheer terror. I have to admit to being a little puzzled by what appears to be a reference to the writer's multiple sphincters (in the next to last paragraph).

Len, I've always said that my /T5 logs are in storage. A simple 5
minute google search could have borne that out. But Steve had to make
up stories. Untrue stories. They're not lost, never have been. And
I know that Steve and Kelly aren't in them because I didn't work any
USA stations.

It would be even better if we had rules that say exactly what we can say during the contact. 8^) Yer getting a tad rigid here, Alun.

The idiot said my T5 logs were lost. They've been in storage since my
move to Ohio. 5 minutes on Google would have shown him that. But he
refused to look it up and continued to spread falsehoods.

I agree with the list of three names above.

Quite possibly. I use the so called "proper" phonetics myself (though
prefering plain callsigns).

I'm just not terribly into telling people what they can or can't say on
the air as long as it is decent language.

Those replies "just seem to write themselves..." :-)

About two decades ago I started computer-modem communications.
I've seen and met lots of discussors and just dis-cussers in person
via the BBS gatherings. How folks write here is indicative of how
they really feel, up close and personal. :-)

>
>> Got a tad off the subject into Personal Hatred, dintcha? :-)
>
> I hate almost no one. Whether you like it or not, I like you.

Tsk, tsk, tsk, Mike. Your words in other messages betray you...

It is totally irrelevant whether anyone is "liked" or not. This is
computer-modem comms and the in-person social rules don't
apply here. The SUBJECT is the thing, but so few beginners
can't grasp that. [so few have been in real debate so they are
inexperienced]

The SUBJECT title is about phonetic alphabets. It isn't about
"being liked" or "being disliked." On the phonetics, some folks
don't like phonetic alphabets, others think they belong...a sort of
quasi-jargon to hang with all the others. Me, I got them way,
way back as part of the military procedures, used them, and
the NATO set has become standard for me and I think nothing
more about it.

Perhaps one exception: "One-three-whiskey at the brewery"
has two sets of meanings to anyone on normal downwind leg
at VNY. [Anheiser-Busch brewery is just across the runways
from the VNY tower...controllers know it, so do all the local
pilots...:-)]

Dunno...haven't been in Google for months and months. No reason
to go there for this newsgroup. :-)

>Can't blame him what with such a litiguous society.

I doubt he understands that he could be sued. In his reality, he
is absolutely and totally "correct" and any opposition is terribly
"wrong." Ergo, he is not ever going to be sued by anyone.

AOL knows that. :-) They took down his libelous Home Page
as soon as I made them aware of it... :-)

...and he will continue to do all that spreading. :-)

Nursie thinks it is fine and dandy for him to say anything he wants
but others can't talk back to him...those others are "liars" and

"putzes." And Rev. Jim is on his hellfire/brimstone bicycle, busy pedalling as fast as he can without getting tripped every foot of the way on a nursie nasty. :-)

>I agree with the list of three names above.

There's a far richer panopoly of Yiddish phrases which could be used but those are good only for those who understand that curious hybrid language...and none of the three names would fit such profiling. :-)

We now return everybody to the personal attack modes of the PCTAs hell-bent on smiting the unbeliever NCTA. Morse Evangelism rules! :-)

> Everyone who disagree with nursie are the liars.

Nope.

Only those who tell tales that can't be substantiated by some
third party source of some presentation of documentation.

So far YOUR only "point" is that I won't discuss the details of
actions I was involved in in the Marines. The fact is I mention the
Corps only when it's brought up by you, and then only because you
can't seem to get things right.

No wonder you're no longer an "engineer working regular hours".

Judging from what I've been able to ascertain from people who
actually knew you, your best skill was getting away with mediocrity
until you were given the "opportunity to expand your horizons" with
some other employer. That you invested your monies wisely is your
only milestone.

You can continue to make your silly assertions and feign
indignation at the berating you receive in this forum. Obviously it
wasn't the first time anyone was able to see through you and your
ineptness. It's just that in this forum you can get away with it and
claim "First Amendment" privilege.

Putz.

Y'know, with all this discussion about different phonetic alphabets, people confusing "Papa" with "Japan" and DX/contest folks using a completely different set and being cornfuzed by anything else, it makes me wonder.

Doesn't all this add up to 'phone modes being "slow", "limited" and "error-prone"?

I'll probably find my storage unit broken into and the contents
scattered over hells half acre. Those logs have become quite valuable
to the Gang of Four.

Actually the DX station is not so much trying to tell people what to say as telling them what works for him so that those calling the DX can maximize their chances of getting through and the DX can maximize his results. I personally would look at it as simply trying to facilitate communication.

In many languages, the English unaccented sound of a as in the first
syllable of Japan and the hard, short sound of a as in the second syllable
of Japan simply don't exist. Those learning English have to make a special
effort to learn to pronounce them. I've heard several foreign stations
pronounce it more like "jaw-pawn" than the standard English pronunciation.

Me too.

However, if you pay close attention, Mike, you'll see yet another
LennieTroll in this exchange.

You see Lennie spends a great deal of time berating anone in this forum
that dares to express ANY degree of "experience" in ANY communications related
discipline. He then gets off in a tangent about how anyone who discusses
anything older than an hour is "archaic" and otherwise backwards.

However it's obviously not against HIS rules for HIM to do the very same
thing.

I haven't figgured that out yet...Seems a bit two-faced to me.

But then nothing about pathological liars is easy to understand.

I LOVE this, Mike!

If this isn't a cut-and-dried effort by His Scumminess to dig his heels in
and create yet another bloodbath in the NG, I don't know what is.

Sir Putzy did essentially the same thing with me. No amount of "thanks
for your opinion but I don't agree" satisfied him. He dug in with the Nazi
epithets and cries foul when it is visited back upon him.

>Len Anderson
>ex-RA16408336

It never fails to amaze me how Lennie the Lame always finds a way to
insinuate that he has some insight or knowledge about topics that he will, at
some other time, try to deminish the experiences in...

Of course the obvious question for His Creepiness is "What practical
experience do you have in being the recipient of "incomming" artillery...?!?!"

But Lennie's attempt to lambaste Jeff was colorful...right out of a Clancy novel.

Then there's the comment about his "bro-in'law".

That creates two more questions...First of all is WHAT did this have to do with ANYTHING about Morse Code, Amateur, military or "professional" radio, and TWO, Lennie had an ethnic relative...?!?!

Lastly we can ask Lennie what his service number has to do with anything. He was never in combat. He was never anything more than a rear area radio clerk, babysitting a handful of RTTY positions that were not his to decide how to operate.

Please, Lennie...TELL US how you were in a foxhole, taking "HE" mortar rounds, and how despite not peeing your pants, you still managed to pass 1.2 million messages at ADA...

Leonard H Anderson is one of the biggest, most prolific liars and antagonists in NG history...Isn't there a medal for THAT we can recommend him for? It will be the ONLY thing he ever earned honestly.

Putz.

There may be a legitimate reason for that, Mike...It's not that the other guy is particularly "anal', but English may not be his native language. You start throwing "cute" or non-traditional "phonetics" at him and he is lost...

Len, it's kind of interesting what Steve thinks his job is. He is
here to call people "PUTZ," and "idiot." Wonder how much it pays?

Steve thinks he can brag about 7-Hostile Actions, but never
substantiate it. He is as pure as the driven snow. Steve can make an
assertion of fact that I lost my T5 logs, but never substantiate it.

Everyone else is a LIAR. 'cept Steve. He's here for meaningful
discourse.

I am aware of that but am not used to it, not having grown up around
speakers of French or people from Canada or near the Canadian border.
Besides, I like to make absolutely sure that someone I've never spoken to
before gets it right. Occasionally the "E" also causes problems.

Steve,

What's the problem?

You never worked T5/N0IMD.

I never worked T5/N0IMD

Nobody else has yet come forward and said they worked T5/N0IMD. Nor has anyone claimed they didn't get a QSL that for such a contact.

And Mr. Burke has confirmed - repeatedly - that various people are not in his logs.

All of which is quite consistent and logical. Makes perfect sense.

After all, "/T5 logs" could be pieces of wood. I don't recall the word "logbook" being used by Mr. Burke in that connection.

Also, a logbook with no entries in it is still a logbook, isn't it?

So what's the problem?

How does one PROVE anything to a nursie who can't accept any evidence? :-)

"Storage unit" of Brian's is NOT a "garage."

DoD Directive 4650.2 exists, as does NCP 8(C), yet nursie keeps on stating that "MARS is amateur radio!" :-)

> (knock knock...because they are not...)

Knock, knock...knock it off. Go pay your "rant," nursie.

Time for nursie to take his medications...the ones prescribed by a real MD.

Temper fry...

This is "debate?!?" :-) Hardly.

Somewhere, someplace, someone is actually discussing NATO phonetic alphabets and other phonetic alphabets. Not here.

Here there be only the on-going outraged "rants" of der gunnery nurse. :-)

Must be the "new amateur radio" too... :-)

> Those days were something by comparison. Phone cradle modems and >slow
as molasses. Can't say as I'm all that sorry they are gone.

In the beginning of BBSing, everyone was limited by modems
which, in 1970 had 300 WPM as "fast" rates. Ten years later
they had gotten past 1200 WPM. By 1990 modems could go
better than 28,800 WPM. It was relatively easy for the computer
to keep up on single-user lines. For 30 MHz clock computers,
some better software and interrupt-handlers could handle two
dozen callers simultaneously at BBS terminals.

I got access to the RCA corporate net in 1972 and generally
used the 100 WPM Model 33 TTY terminals. Good for moderate
character-plot "graphics" in black on white paper. Saved lots of
engineering time once one knew how to program in FORTRAN.
No inkjet printers then (Sanders Associates was just beginning
the first ones) so we just pasted printouts on backing paper and
xerocopied them. :-)

IBM's ECAP was king in 1972 for circuit analysis and it was
good. Don Pedersen's group at Berkeley was thinking about
the first SPICE (based on several other time-domain programs

such as Ohio State's OSUCAD and more), but had not yet thunk up the acronym SPICE. RCA used LECAP, a frequency-domain-only short version of ECAP and it was terrific for the limited user storage of 256K space. :-)

The first HP pocket scientific calculators were on the market (HP-35) and the programmable (!) version (HP-45) was just being packaged up. At an NADC visit in '72 I talked to an H-P rep whose territory included Bell Labs...the Labs had ordered 700 (!) to be GIVEN to staff. RCA corporate arranged a bulk order staff purchase for selected employees to buy the $395 calculator for $200. Three of us at EASD in Van Nuys (myself, Ken Adam, another in EW) got reimbursed for the difference...a relief since all three were constantly pestered by other staff wanting to "borrow" them. :-)

>> I've seen and met lots of discussors and just dis-cussers in person
>> via the BBS gatherings.
>
> Yeah, me too.

The first BBS I joined was Lynzie Flynn's "Motherboard," in December, 1984. A social BBS, the "Motherboard" had monthly Gatherings of subscribers, usually at the popular 945h Aerosquadron (restaurant) at Van Nuys airport. "Talk Channel" BBS soon opened, followed by "KBBS" and all had fun competing for subscribers and social events. I was on "The Ledge" which sysop Joe Sheppard made into an international network (!) once the higher-speed modems got really fast. "US Pompeii" was networked with "Pompeii" in Holland and run by my Talk Channel buddy Zippy Manus (managed by husband Stan Manus). Regular Gatherings at the Manus house in Hollywood Hills and there were two large Gatherings combining the Motherboard and US Pompeii at Warner Center (300+ in attendance). One of the ten oldest BBSs in the USA was "Mog-Ur's EMS" (for Electronic Message System) run by double Emmy-winning Tom Tcimpidis.

At least three amateur radio oriented BBSs existed in the northern Los Angeles region but none of them got large before the Internet went public in 1991. With the advent of the Internet, all the BBSs (all subscriber funded) had to close due to competition. Lynzie's Motherboard was sold after owner became Lynzie Flynn Zimmerman, Talk Channel's prime owner Gary died, and the KBBS sysop took his computers and subscriber funds and skipped town! :-) Three Motherboard/Pompeii competitor BBSs started up very late, notably Karen's "Modem Butterfly," all on the social themes but those could not hold up financially when the Internet grew.

>> How folks write here is indicative of how
>> they really feel, up close and personal. :-)
>
> You are 100 percent correct.

One gets further insight by private messaging on BBSs. Users
think they are absolutely private, but every terminal software
written allows sysops to constantly monitor communications
live. I was co-sysop on two of the BBSs.

Some get VERY into their computer personna. One guy on Talk
Channel had two subscriptions, one for himself and one for his
"girlfriend" (non-existant) who also "wrote public messages." :-)
There existed some feuds and weirdos on the BBSs which makes
this newsgroup look pale by comparison. I had the displeasure of
being in the group that "fired" one user who was on all known
social BBSs in the immediate area, causing trouble for most other
subscribers. A real closet sociopath. One was a real attorney
who adopted a completely opposite personna of an outgoing, rather
outrageous person named "Floyd," but done in humor, not spite.

>> Tsk, tsk, tsk, Mike. Your words in other messages betray you...
>
> I'm sorry you feel that way.
>
>> It is totally irrelevant whether anyone is "liked" or not.
>
> 100 percent correct. That doesn't change the fact that I do like you.

Anyone "looking for love" on either BBSs or the Internet is deluded
or too imaginative. I say that from observation even though I know
at least four local couples (besides sysop Lynzie) who met and got
married via BBSs. It happens on the Internet, too, but with mixed
results. Everyone is subject to their ability to write words for that
is solely how anyone first "meets" them.

The beginner at computer-modem communications tends to get
lost in their personal screen which contains only the words of the
other person. They want to interpret what they read into their own
thoughts and expectations. Only slightly better than monotonic
telegraphy, the words-on-a-screen have nothing else for normal
social clues, no tone of voice, no body language, no expressions
to read. Combine that with those who are intensly competititive
(or want to assume superiority) and you get the Flame Wars where
winning message points is the ultimate game.

The time and distance displacement afforded by computer-modem
comms has an inherent "safety" feature for those who want to be
"ruler" (in any way). They can toss aside their social inhibitions
and be as outrageous or superior or whatever in relative safety.
Sometimes those slip off the edge and start getting libelous. One
case that many have seen is the special angry home page done
by one of those here who went beyond the bounds of propriety. :-)

Some are just too righteous for words and Their words must be
taken as the Ultimate Truth...regardless of the subject. Irritation
(using that term very kindly) by those with such righteousness at
not being respected-for-Their-existance-as-Superior will result in

all kinds of nastygrams sent, regardless of the subject thread. :-)

>> This is
>> computer-modem comms and the in-person social rules don't
>> apply here.
>
> If you do not wish them to apply to you, they don't have to. You are
>the master of what you say and do in person or in a newsgroup.

Yes and no. :-) The time-and-distance separation of computer networking, plus the vast spread of the Internet internationally, can give some a sort of god-hood on their righteousness (and using themselves as role models for all of homo sap.) As I said, some fall off the edge and go totally libelous in other venues. Those who've not seen or experienced such a build-up of intense outrage will be influenced by the one-sided libel...and then the victim is unfairly judged.

In most browsers, a simple Return/Enter key will skip to the next message. Some newsgroupies can't seem to find that key. :-)

> - Mike KB3EIA -
>
> Kiki-Bueno-3-Encarta-Insipid-Autogyro
>
> hmmm, that's beginning to sound like some of the spam I've been getting

>lately! 8^)

:-) BTASE (But That's Another Story Entirely) but me, too.

This has gotten off the subject of phonetic alphabets. Most threads do that, given enough Flame Warriors chomping on their bits ready to do message battle to the death, unable to skip a single message. :-)

NATO came up with the original "international" phonetic alphabet and released it in 1955 to all members. A lot of thought and quite a bit of study and research went into that to fit a lot of the western languages of NATO members.

Some communicators want-desire-need-demand "special" jargon for Their way of doing things. Human territorial imperative, their "turf." English-speaking radio hums seem to think that English as she are spoke is "international" just by using capitol city names. They don't realize that such capitol city names are NOT pronounced or spelled as they are in English. :-)

The ICAO decided that standard international spoken language for air traffic control shall be English. That was in the mid-1950s when, coincidentally, the surviving air carriers mostly came from English-speaking countries (as well as the aircraft makers). Just the same, the ICAO adopted the NATO phonetic alphabet as part

of that spoken language regulation. It works. Even if some public safety organizations use different phonetics such as "One Adam Twelve." :-)

Poor nursie. Suffers from all that time and trouble on looking up posts. Valuable time that could be spent doing productive work like ethnic cleansing of this newsgroup of what he calls "undesireable elements" (those he cannot cow into submission to his wishes). :-)

Nursie can't be "shown" anything contradictory to his original statements. Never mind that at least four publicly-accessible documents on the Military Affiliate Radio System exist, nursie said "Sorry, Hans, MARS >>IS<< amateur radio!" :-)

>>I agree with the list of three names above.
>

>
> It doesn't.

True, it detracts from the "three names:" Steven, James, and Robeson. :-)

Well, so far, there's been very little amateur radio policy brought up by nursie. It's all been about nursie and her, excuse me, his mighty rep as a "meaningful discourser." :-)

Tsk, tsk, tsk, that sound like nursie. :-)

> So far YOUR only "point" is that I won't discuss the details of
>actions I was involved in in the Marines.

Tsk, tsk, tsk...are the murines involved in hum radio?

"Sorry, Hans, MARS >>IS<< amateur radio!" :-)

>The fact is I mention the
>Corps only when it's brought up by you, and then only because you
>can't seem to get things right.

Oh, my, "only when others bring it up!" :-)

Tsk, tsk, tsk.

> No wonder you're no longer an "engineer working regular hours".

Tsk, tsk, tsk..."regular hours" are getting to work on time on a regular employer's schedule.

Have you heard of something called "retirement?" No?

Call the VA, maybe they can explain it to you...in short, easy-to-understand syllables...

> Judging from what I've been able to ascertain from people who
>actually knew you, your best skill was getting away with mediocrity
>until you were given the "opportunity to expand your horizons" with
>some other employer.

Oh? You can actually "ascertain" something? From "people who actually knew me?" Who might those folks be? Hmmm?

I've given you three long-time radio amateur's names in here.
There's others I haven't mentioned.

Just WHO are those radio amateurs - or anyone else - that
"actually knew me?" Until nursie fesses up with some ID on
them, we readers can only assume nursie be LYING again.

>That you invested your monies wisely is your only milestone.

Poor baby. Drawing all the disability-and-retirement military
pay plus a (steady?) job as a nurse, you get all fussy about
"money?" Tsk, tsk, tsk. Not enough there for your elegant
tastes?

Poor baby. I've spent a bit over a half century on fairly steady
employment (as "steady" as the aerospace industry is). Doesn't
take any Wall Street smarts to prepare for and enjoy comfortable
retirement.

> You can continue to make your silly assertions and feign
>indignation at the berating you receive in this forum.

"Berating?!?" What, from some sociopath who can't take the
mild environment of a newsgroup? :-)

Been there, seen them, got lots of T-shirts. :-)

>Obviously it
>wasn't the first time anyone was able to see through you and your
>ineptness.

"Ineptness?!?" Poor baby. Too much return fire getting through
your armor, big sojer in da woods? :-)

Tsk, tsk, tsk...you're taking lots of hits. Quit painting the target
all over yourself.

>It's just that in this forum you can get away with it and
>claim "First Amendment" privilege.

Tsk, tsk, tsk. Poor baby. Can't get away with one-sided libel,
can you? [thank you, AOL... :-)]

> Putz.

Wow! All that "meaningful discourse!" :-)

Goyim...

That's probably not trouble with phonetics, but memory trouble. A lot
of times
during a contest (I don't compete, but just answer people who are competing)
I do a QSO and after listen to a subsequent QSO or his CQ to get the
call right in
the log book. That way I avoid wasting their time.

I didn't realize "Zed" has a "French connection". Live and learn. I
never noticed that there are any regional trends to it's use, I'm ten
minutes from the Mason-Dixon line and it's been SOP everywere I've
tuned since AM days. It's used unconsciously even on the machines and
in face-to-face conversation. N 3 N Zed is one of the locals, I
suspect that if somebody called him N 3 N Zee it would cause a
back-up-and-think-about-it moment. Maybe it's just an Old Fart thing.
Heh.

> Besides, I like to make absolutely sure that someone I've never spoken to
> before gets it right. Occasionally the "E" also causes problems.

I have a long-established policy: I *always* use phonetics to open
every QSO with somebody I haven't worked previously, on HF or on the
machines. I really don't care if the machine politically-correctness
cops like it or not.

Yup, zed is the French name for the letter Z. It is NOT part of a phonetic
alphabet. Outside of ham radio (which I got into in 1992) you only hear it
in areas subject to French influence.

Dee D. Flint, N8UZE

No. Just as with Morse, there is proficiency built up by use. With a set uof headphones, and the ability to adjust the volume and tone to where I like it, even my rotten ears can work phone nicely. In the field days and contests where I have worked high power, I have spent a lot of time with weak phone signals. I have gone from asking for repeats in about 25 percent of the cases to almost never.

In fact, the whole phonetic debate is a little funny, since despite the kvetching, an experienced operator can pick out the different phonetics without getting his/her knickers in a twist.

Nobody seems to know the Where or When of that claim.

Where were they...and at what date?

> You and Lennie are the one's who keep recycling the "seven hostile
>actions" phrase. Goggle refers.

"Google." :-)

Your CAP Air Ace personna is trying to speak. Don't let it.
Put those goggles away. Or get a new windscreen...

Where and When were those "hostile actions?"

>>Everyone else is a LIAR. 'cept Steve. He's here for meaningful
>>discourse.
>

One can baste a lamb, but only you can lambast others with
undocumented claims and then argue until red in the face that
they were "true."

Neither Brian nor myself ever had to "pull any cart." Nursie put that cart together all by himself. Except it is made of air.

Such air-heavy objects are very easy to pull.

Now Where and When were those "hostile actions?" Furnish some reference so that anyone can check it out themselves.

You made a claim that "MARS is amateur radio" and cannot back it up. Not even the DoD will support that claim...and the DoD has DEFINED MARS.

How about calming down before you get too eager to "kill?"

[still off your meds?]

> Kissed Two Eager Ogres...?!?!

[not getting enough?]

> Or one reeeeeeeeally tacky one......Kinky two easy organsms...?!?!

Definitely not getting enough. Try a kumquat, not a "cumquat."

Why are you against the NATO phonetic alphabet?

Radio communications around the world have adopted the 1955
NATO phonetic alphabet.

The U.S. military adopted the NATO phonetic alphabet in 1955.
Not good enough for you? Tsk, tsk.

> You put things in quotes and attribute them to me when such is not true.

Nursie originally wrote "Sorry, Hans, MARS >>IS<< amateur radio."

That's the full one-sentence quote.

Much later (about 3 weeks) nursie tried to backpedal and say
a different thing.

Too bad. The second sentence was still incorrect.

> Leonard H. Anderson caught lying again.

No. Just trying to keep the truth afloat in your imaginary sea
of deceptive fantasy.

When are you going to read (and understand) DoD Directive
4650.2 (effective 21 Nov 03)? How about USN-USMC
Communications Instruction NCP 8 (C)? Never?

You COULD find out the truth...but the truth hurts you, doesn't
it? It doesn't let you claim all those outrageous things you
state. Poor baby.

You could have said you made a mistake. You didn't. For
3 weeks you couldn't even furnish anyone a link or ID to the
military regulations describing MARS. That was easy enough
to do on a simple search for two others.

You were given the links. Why didn't you follow through?

No, you couldn't do that. Instead you insist on blaming others for your own failures. Not nice. Not gentlemanly. Not being a good amateur extra. Not being a man.

This isn't Burger King and you cannot have it your way.

Bon apetit and temper fry...

What are "reawrds," nursie? [that is NOT Yiddish...]

And what is "etherical?" Something to do with 'ether?'

Why are you trying to pass gas?

If you meant "ethical," we might get some idea. However, a lot of braggadoccio about some unsubstantiated military action is hardly "ethical," is it? More like a fish story.

Maybe you meant "ethereal?" Like 'out of this world...'

Some of those claims of yours are that way...

Temper fry...

> You are still going to claim that Brian "lost" his logs, aren't you?

As long as he keeps refusing to post some sort of "evidence" for the
claims he made, yes.

> You don't really know either way, do you? Tsk, tsk.

It's not what I know or don't know, Your Putziness....It's what PuppetBoy
can produce to substantiate his claims.

Regardless of wether they are in his garage, a rental storage unit, his
bathroom reading rack, or his imagination, they are NOT "here"...THAT is fact.

Brain knows that even if he produces some log with callsigns in it, it
becomes a simple matter to contact the various persons to ascertain if they
really DID work T5/N0IMD.

I am now sure that Jim was right. I am sure that Brain HAS a T5/N0IMD
"logbook" somewhere.

It's just that it's empty.

Steve, K4YZ

Why?

He may know just where they are.

They may have been in a garage at one time and in a storage unit another.
>

Can produce or will produce?

> Regardless of wether they are in his garage, a rental storage unit, his
>bathroom reading rack, or his imagination, they are NOT "here"...THAT is
>fact.

So what's the problem?

Anyone who reads these exchanges knows that Mr. Burke will simply avoid/refuse any sort of substantive answer on the subject. That's pretty much a given.

So why bother about it?
>
>Brain knows that even if he produces some log with callsigns in it, it

Maybe.

Or maybe those people will have moved, changed callsigns, passed away, etc.

>I am now sure that Jim was right. I am sure that Brain HAS a T5/N0IMD
>"logbook" somewhere.
>
IIRC, the exact calim was "logs", not "logbooks". Could be some pieces of wood.

> It's just that it's empty.
>
Or maybe there's one entry. Or two. Or three.

Remember there were no claims as to number of QSOs, band, mode, rig, etc. One local VHF/UHF QSO would count as "operation" wouldn't it?

if that were the case - wouldn't it make all of the claims true?

And why get all upset about it? Nobody is claiming they worked T5/N0IMD. Nobody is complaining they didn't get a QSL card from the alleged operation.

However if you will check the etymology in the dictionary, it is of French
origin. Interestingly enough no etymology is given for zee.

>Can produce or will produce?

All us readers are still waiting for nursie to document his
"hostile action" When and Where. :-)

>> Regardless of wether they are in his garage, a rental storage unit, his
>>bathroom reading rack, or his imagination, they are NOT "here"...THAT is
>>fact.
>
>So what's the problem?

Tsk, tsk. Nursie is suffering post-traumatic stress disorder
after all those "hostile actions" is the problem. :-)

>Anyone who reads these exchanges knows that Mr. Burke will simply avoid/refuse
>any sort of substantive answer on the subject. That's pretty much a given.

Gotta love how Rev. Jim KNOWS what will happen in the future!

A regular seer, that sucker. Tailor made. Suits him. :-)

>So why bother about it?

This newsgrope would be so empty about nursie's emotional
outbursts. Worry that they might quit. :-)

>>Brain knows that even if he produces some log with callsigns in it, it
>>becomes a simple matter to contact the various persons to ascertain if they
>>really DID work T5/N0IMD.
>
>Maybe.

Gosh and golly, seer Rev. Jim, nursie never once contacted any
of the radio amateurs who knew me, and still know me. Yet nursie
claimed he did because he said they "all" spoke badly of me. :-)

>Or maybe those people will have moved, changed callsigns, passed away, etc.

My references haven't. One just got back from a nice cruise he
and his wife took. :-)

>>I am now sure that Jim was right. I am sure that Brain HAS a T5/N0IMD
>>"logbook" somewhere.
>>

There's a lot of licensed deadwood in here, Rev. Jim... :-)

>> It's just that it's empty.
>>
>Or maybe there's one entry. Or two. Or three.

Doesn't Rev. Jim KNOW how many? Tsk, tsk...

>Remember there were no claims as to number of QSOs, band, mode, rig, etc. One
>local VHF/UHF QSO would count as "operation" wouldn't it?
>
>*if* that were the case - wouldn't it make all of the claims true?

Nursie will NEVER admit anything. :-)

Remember, birds of a feather flock around a lot in newsgroups.

:-)

>And why get all upset about it? Nobody is claiming they worked T5/N0IMD.
>Nobody is complaining they didn't get a QSL card from the alleged operation.

Nursie gets all a-twitter from any disagreement, however slight.

If he gets all upset (again), the nastygrams just keep on
coming, and coming, and coming...

[he has "organsms" over that... :-)]

Temple fry, Rev. Jim...keep the faith... :-)

"Bloodletting?" :-) Poor baby, so easily injured are you?

>> Bon apetit and temper fry...
>
> Seems I am not the one with an appetite problem, Lennie.

Have you seen a doctor about your problem, puppetnursie?

Or do you do your own diagnoses, like practicing medicine
without the legal license? [a big no-no in most states]

Get some mental therapy, puppetnursie. That would help all
those around you...if not yourself...

Sociopathy CAN be cured.

You first. Where and When those "hostile actions?" :-)

>> You don't really know either way, do you? Tsk, tsk.
>
> It's not what I know or don't know, Your Putziness....It's what
>PuppetBoy can produce to substantiate his claims.

Tsk, tsk. Where and When Puppetnurse's "hostile actions?"

> Regardless of wether they are in his garage, a rental storage unit, his
>bathroom reading rack, or his imagination, they are NOT "here"...THAT is
>fact.

Neither are those "hostile actions." :-)

> Brain knows that even if he produces some log with callsigns in it, it
>becomes a simple matter to contact the various persons to ascertain if they
>really DID work T5/N0IMD.

That's like that other member of the Gang of Four "contacting those out of band Frenchmen." :-)

We all know that when Puppetnursie makes another claim like the "hostile action" bit, none of us can get any corroboration on it except from your alternate personnae. :-)

> I am now sure that Jim was right. I am sure that Brain HAS a T5/N0IMD
>"logbook" somewhere.

Rev. Jim is ALWAYS right. He says so repeatedly, chiding others for being "incorrect." ["incorrect" as not Believing as Rev. Jim does]

> It's just that it's empty.

Tsk, tsk. Puppetnursie's reality is EMPTY except for discarded
brags and boasts.

More "meaningful discourse" from the Puppetnursie. Only problem
is that the "discourse" keeps getting defined as "dis-curse." :-)

Tsk, tsk. Nursie still trying to invent a stinging rebuke and his stinger got broke so long ago that he can't even muster a good rash... :-)

"Nothing to send."

That should be the sub-title of every post nursie makes.

Nursie's big negative nothing. Less rest mass than a neutrino.

Temper fry...

>in sheer terror.

I dunno, I've never been to Tokyo. Not even for 30 seconds.

Remember the exchanges about how far it is from air bases in North Korea and
Vladivostok to Tokyo, Bear bombers and such? Someone was very unhappy when it
was pointed out that the distance is well over 650 miles, not "about 500
miles". And that the statement "about an hour in a Bear bomber" meant little
because that aircraft did not enter service until the late 1950s.

Pointing out the fact that any American *under* a certain age grew up with the
knowledge that hostile ICBMs could reach us in a matter of minutes sets off a
predictable response, too.

That sequence (in "34 Years Ago Today") was a classic. ;-)

>I have to admit to being a little puzzled by what

In those Reply Comments, you proposed a minumum age requirement of 14 years for
any class of US amateur license, even sthough such a requirement has never
existed in the USA. You gave no evidence of how the lack of such a requirement
has had a negative effect on amateur radio or any other radio service, yet you
wanted such a requirement (which would not affect you, of course) created.

Here's a few simple, direct questions, Len. In fact, I'll direct them to the
entire group:

1) Should there be an age requirement for an amateur license?

2) If so, what should the requirement be for the various ages?

3) If so, why should there be such an age requirement?
>

Who? You cannot be referring to me, because I find Morse Code radiotelegraphy
to be a relaxing experience.

> Tsk, tsk, tsk...then manufactures a falsehood that I "denied its
> historical importance." In any other venue that would be a LIE. :-)

For something to be a lie it must be untrue.

And how do you know that the person I referred to is you?
>
> In the first days of ALL radio, the ONLY way to use it for any sort

>
> There's no question that "morse code" has historical significance.
> It does. But, the first radio demo was 108 years ago...roughly five
> generations in the past.

That's all true.

And what's also true is that the person referred to in the preceding post denies and distorts the role Morse Code radiotelegraphy has played since those early days. Such as its role in World War 2 radio communications. Or its role in maritime communications well into the 1990s. Or its widespread use by radio amateurs.

Some would call that "lying by omission". ;-)

> Today, the only real use of manual
> telegraphy codes is in amateur radio where its advocates go on
> angry benders of denunciation of anyone who even frowns on its
> "usefulness."

"benders"?

"You can't have "meaningful exchanges" when you soil the
communications environment with personal attacks of any kind
on those who do not agree with you."

> All the other radio services just dropped "morse" as
> being too slow, too error-prone, and requiring comm specialists
> at each end that weren't useful anymore.

Only the last reason is true. Other services wanted to dispose of the need for and cost of skilled operators.

But amateur radio is largely *about* skilled radio operation.
>

How do you know the person described is you, Len?

You don't have to "respect" anyone. But someone who can discuss in a civil manner - without name calling or ad-hominem insults - earns the respect of almost everyone, including those who disagree.

For example, I have great respect for K2UNK, Bill Sohl, even though we disagree on almost all amateur radio policy matters. I cannot recall a single instance where Bill made fun of anoter's age, work, gender, license class, education, name, ethnicity, and/or military service.

That's "civil debate".

"You can't have "meaningful exchanges" when you soil the
communications environment with personal attacks of any kind
on those who do not agree with you."

There's a very wise bit of advice that says a person should treat others as they wish to be treated.

Well I have to disagree. The DX has attempted to facilitate communication by conveying what works for him since English is almost never his native language or he/she may be so accustomed to a specific set that other sets cause him to "stumble" mentally.

It's like they teach you in classes on giving speeches. You need speak in a manner that the target audience will understand. In this case the target is the DX. You are the one trying to break through to him/her. He's not trying to break through to you.

The teacher in one of my speech classes gave the following example:

A plumber writes to a PhD chemist asking if it is OK to use hydrochloric acid to clean pipes. The chemist writes back that the acid is highly corrosive and its use is contraindicated. The plumber writes back thanking the chemist for OKing the use of hydrochloric acid. The chemist tries again using similar wording. Once again the plumber thanks the chemist for his approval. This goes on for a couple more rounds of letter writing. Finally the chemist breaks down and writes "Do not use hydrochloric acid. It eats the hell out of the pipes."

The chemist had to switch to the "language" of his target audience (the plumber) rather than the "language" that he used in his own work.

Sorry for replies to some older posts. I've been through two weeks of hell at work, and didn't get to respond to everything. Now I'm taking a well deserved day off and can get back to it.

Yes, the shoe does fit.

>>I for one, am impressed by just how GOOD Mr. Anderson is at this!
>
> I'm not.

There are all sorts of reasons to be involved in a newsgroup. Some of us like to post to exchange knowledge, some to debate, and others to have an adventure - using other posters as pro or antagonists in a sort of text based adventure game.

With the different personalities involved, the games can get pretty interesting and funny, or sometimes they can become boring and repetitive. The MARS is Ham radio stuff is a good example of the latter.

If a poster is the type that is trying to antagonize others - that is to say one that is using the group in the text adventure mode - he or she does not want to get people so angry that they don't respond. That would be losing the game. This player will want to be antagonistic of course, but will want to allow other posters to stay just this side of filtering or ignoring him or her.

Some here filter Len, but enough do not that he finds a steady stream of willing participants in his game.

Face it, he is good at it. It may not be what you are in here for, but he succeeds in his game.

Note this does not apply to the strange fringe postings that appear to be personal battles, such as the one that Dave seems involved in with some hams in his locale. That is just really wierd stuff.

When I work DX, I try to include a little bit of the other Ham's
language in the QSO, if I can. I'm no genius, but I can pick language up
fairly quickly.

My point is most Hams are fairly intelligent people. The basic language
of an exchange is English, like it or not. A ham in a small country
speaking an obscure language is going to enjoy a lot more success if he
or she pick up the language that the communication is done in.

> It's like they teach you in classes on giving speeches. You need speak in a

Well, in my version of Hamworld, we are both trying to communicate with
each other. Perhaps I am wrong.

Language being what it is, does the person that is justified in
ignoring "improper" phonetics also justified if they don't like the
pronunciation? Or inflection? Should we listen and pronounce the worked
exacltly the same as they do? What if they *want* different phonetics?

Like I say, my version of being a ham is two people that *want* to
communicate with each other and will do what they can to facilitate
that. Sometimes that takes proper phonetics, sometimes that takes
several rounds of trying to get the call, when proper phonetics may be
followed by *improper ones*. Sometimes it means straight csllsigns. And
yes, I can copy callsigns in several languages.

Unfortunately, the refusal to answer "improper" phonetics or whatever
reminds me of "No Kids, No Lids, and No Space Cadets". or an exchange I
heard in a contest a few weeks ago, where one ham told (ordered is more
like it) another to stop using "Please copy" before the exchange. Told
him he sounded like a stupid idiot when he did that.

Too many hams are entirely too rigid.

- Mike

Where I am originally from (the UK) the international phonetics are on the test, and I suspect that this is true elsewhere. Consequently, I had to learn them so that I could instantly come up with the correct phonetic for any letter and vicea versa. Many people can do that who can't even speak English, as they had to learn it to get a licence. They weren't tested on using Japan and Zanzibar, though.

Most of the 'Avocado, Bascule, Cumquat' variety of phonetics comes from US hams, I imagine because it isn't on the FCC tests, and this is then dressed up as 'freedom of choice', rather than admit that they don't know their phonetics. Also, many people end up learning a different set or just use any phonetics they have heard on air, but this is not conducive to being understood. There is a useful American expression here, it's what you call 'all being on the same page', and that's where we should aim to be.

That isn't to say that you can't use altenative phonetics if the standard ones don't succeed. I do that.

I suppose I ought to submit some questions on phonetics for the question pools. I wonder if I could succeed in getting it tested? I beleive it should be tested. Even the most diehard CW ops seem to use 2m FM, and there are occasions where phonetics can be useful there too.

Exactly. For example, I have operated from St Martin (FS) - one QSO on 2m FM. I probably have a log of it somewhere. Ironically, that QSO was with another country, St Martin (PJ7), but it doesn't count because it was via the local repeater in PJ7.

Neither can one do that by:

1. Constantly bringing up years-old exchanges from archives
and trying to win one for your gypper.

2. Using cute lil Yiddish cuss words (mild), especially when
the user doesn't know whatinheck it means.

3. Trying to be a Fundamentalist Believer in telegraphy mode
long after other radio services have given it up as any sort of
"necessary" skill in this new millennium.

4. Acting the shocked (perhaps outraged) moralist by chiding
others of impropriety in giving return fire to those who are
overtly sniping at certain individuals. Hypocrisy is clearly
seen by all readers.

>Why didn't you answer the question, Len?

I do. You don't like the answers! Awww...poor baby!

See? The date of acceptance of that Comment on docket 98-143
is on public view as 13 January 1999.

That's over FIVE YEARS AGO. It's been argued and bitched about by
olde-tyme hammes in here at least twice after that. Now Rev. Jim
keeps on regurgitating it...he should see a doctor about not being able
to keep opinions of others down...vomitus hate-opinion-itis is a serious
thing that may indicate a more serious malady.

R&O 99-412 rather ended any further discussion on docket 98-143 but
lots and lots of hum radio guys had to keep on commenting and
commenting and commenting and commenting and...<yawn>

>Here's a few simple, direct questions, Len. In fact, I'll direct them to the
>entire group:

Tsk, tsk, tsk...you are Feenix risen from your own ash, Rev. Jim.

[if you don't know "Hashafisti Scratchi" then the above doesn't
make any humor...:-)]

The NO-AGE non-issue is just that. No age thing on licensing for
hum radio licensees. Period. End. Full stop.

It's fairly obvious that chronologically-long-in-the-tooth radio hums
can get terribly immature and childish about their divine, sacred
olde-tyme hamme raddio traditions being scoffed. Tsk, tsk, tsk.

>> Rev. Jim got his BP up over 200/100 again on manual telegraphy.

>That's all true.

That CANNOT be! I posted it. Therefore (in Rev. Jim fanstasy) it must
be IN ERROR! INCORRECT! Full of flaws! :-)

>And what's also true is that the person referred to in the preceding post
>denies and distorts the role Morse Code radiotelegraphy has played since those
>early days. Such as its role in World War 2 radio communications. Or its role
>in maritime communications well into the 1990s. Or its widespread use by
>radio amateurs.

Good news: Plenty of space on the Mall in DC for a great big
MONUMENT TO TELEGRAPHY! Start an organization to lobby
for its erection. Sounds like your sort of thing...!

Hello? World War 2 ended FIFTY-NINE YEARS AGO.

Rev. Jim took no part in WW2 nor in any of the military conflicts that
followed in all those 59 years.

Try to keep up with current events or reality might shock you.

[by the way, what has WW2 telegraphy to do with NATO
phonetic alphabets?!?!? try to stay focussed...]

>You don't have to "respect" anyone. But someone who can discuss in a civil
>manner - without name calling or ad-hominem insults - earns the respect of
>almost everyone, including those who disagree.

Ooooo...Rev. Jim done beat hisself to a pulpit.

Sermon on the Antenna Mount! And it's only Wednesday! :-)

>For example, I have great respect for K2UNK, Bill Sohl, even though we
disagree
>on almost all amateur radio policy matters. I cannot recall a single instance

>where Bill made fun of anoter's age, work, gender, license class, education,
>name, ethnicity, and/or military service.
>
>That's "civil debate".

I'd call the above MISDIRECTION. :-)

Bill can wade in as he wants...or doesn't want. Bill's option, not
yours.

This thread is about PHONETIC ALPHABETS. Or is it? :-)

"Able, baker, charlie..." phonetic alphabet was used by the U.S.
military prior to 1955. In 1955, the entire U.S. military adopted
the NATO Phonetic Alphabet ("alpha, bravo..."). That's factual.

Not only factual, I was in the U.S. Army at the time (1955), read
the AR, memorized the new phonetic alphabet and used it. Also
factual.

Gosh and golly, Rev. Jim, had I your gift of prescience, I would
have kept the mimeographed pages intact from 49 years ago,
had them in a safety deposit box vault for safekeeping to show
those of today! :-)

[no xerocopy machines back then, no job-printing run-offs for
most military documents, just mimeographed on rather easily
oxidizeable paper]

>"You can't have "meaningful exchanges" when you soil the
>communications environment with personal attacks of any kind
>on those who do not agree with you."

Tsk, tsk, tsk. Rev. Jim, speak softly and quit trying to use
your Big Schtick.

Look out or someone will beat you to a pulpit. :-)

[which has happened many times in here but those on
anaesthetic can't feel it... :-)]

"You can't have 'meaningful exchanges' with Rev. Jim unless
you cherish, love, honor, and obey the Belief in manual
telegraphy and the radio times of before the Rev. existed."

Beep, beep...

LHA / WMD

Not in the mid- to late-1950s, senior. :-)

Rev. Jim IS predictable. Lives in the PAST. He MUST keep on fighting the good fight over ancient postings, again and again and again and again and...<yawn>

>That sequence (in "34 Years Ago Today") was a classic. ;-)
>
>>I have to admit to being a little puzzled by what

>Perhaps multiple ones are needed in order to handle his prodigious output ;-)

Perhaps Rev. Jim ought to change religious orders away from
the hypocratic hellfire-and-brimstone telegraphy cult. That way
he would not be so mortally wounded again...and again and
again and again and...<yawn>

Some of these postings "just write themselves." :-)

Actually there are questions on the test. Theoretically, the prospective ham is supposed to learn the phonetic alphabet. However, there's only one or two questions on the test pertaining to the phonetic alphabet. So if the student just memorizes the answers to the questions, he won't have a strong grasp of it. There's often a question about why it is used but some of this info doesn't stick with the person past the test itself.

Amateur Radio Newsline™ Report 1400 June 11, 2004

The following is an advisory and not necessarily for air. Ladies and gentlemen, Amateur Radio Newslines' Support Fund Administrator, Andy
Jarema, N6TCQ:

--

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator, getting caught up with our supporters. In the month of August of last year we heard from The Reading, PA Radio Club, W3BN; Joseph Bartzi, Jr., KC8DKF of Columbus, OH; The North Hills Radio Club in Sacramento, CA; monthly contributor William Walters, WA2IBM, of San Jose and monthly contributor Scott Hensley of the Area Communications Team, also in San Jose

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a federally chartered 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1400 with a release date of Friday, June 11 2004 follows in 5-4-3-2-1.

The following is a Q-S-T.

Australia to make big changes in its Amateur Radio service, Greece will welcome hams at the 2004 Summer Olympics and Amateur Radio Newsline celebrates 1400 weeks of service to the world-wide ham radio community. It all comes your way, right now!

(Billboard Cart Here)

**

RESTRUCTURING: BIG CHANGES DOWN-UNDER

Big changes are coming to ham radio down-under. This, as Australia announces some sweeping changes that are about to take place in that nations Amateur Radio service. Owen Duffy reports:

--

The ACA has released their report entitled "Outcomes of the Review of Amateur Service Regulation". The report contains the ACA's intended changes to the Amateur service following stakeholder response to the recent discussion paper entitled "A Review of Amateur Service Regulation."

The key changes are removal of the Morse qualification requirements for all grades of amateur radio license; introduction of a new entry level license (the Foundation License) along the lines of the UK Foundation License, although it will be adapted to suit Australian preferences.

A three tier licensing structure: Advanced, Standard, and Foundation; translation of Unrestricted, Limited and Intermediate licenses to Advanced; translation of Novice and Novice Limited licenses to Standard; a privileges package for the Standard License that is much greater than enjoyed by Novice Licenses today.

A generous privileges package for the Foundation License allows voice or Morse code at low power (10W PEP) using only unmodified commercial transmitting equipment on all of 80m, 40m, 15m, 10m, 2m, and most of 70cm.

Australian participation in CEPT Recommendation T/R 61-01 (reciprocal licensing) is in progress. The status-quo is essentially preserved in respect to higher operating power; interference and interference management built on current arrangements.

Apparatus Licensing as the vehicle for licensing Australian amateur stations (though stations licensed under CEPT Recommendation T/R 61-01 would be class licensed). State significance of callsigns remains.

This has been Owen Duffy for the CQVK project on Q-News Australia.

--

As we go to air, no effective date for these changes to take place has been announced by the Australian Communications Agency. (Q-News)

**

INTERNATIONAL: THE BIG DISPUTE

Two Asian Pacific nations are embroiled in a territorial dispute and Amateur Radio appears to be caught right in the middle. Q-News Graham Kemp, VK4BB, is in Brisbane with the details:

--

A centuries-old territorial dispute between Japan and South Korea is again escalating with the South Koreans placing a group of amateur radio operators on the rocky islets known in Korea as the Lonely Islands. To the Japanese they are the Bamboo Islands.

The radio station, licensed by South Korea, was seen as a provocation by the Japanese. Some amateur radio operators in JA are

said to have interfered with the South Korean stations transmissions.

I'm Graham Kemp, VK4BB, of Q-News for the Amateur Radio Newsline.
--

Kemp says that hams around the world were surprised to hear about the dispute. This is because our hobby stresses development of technologic skill along with friendly international communications. (Q-News)

**

RESCUE RADIO: THE NEBRASKA TORNADO AFTERMATH

Back on this side of the Pacific Amateur Radio operators were on duty aiding tornado-stricken communities in Nebraska and elsewhere in the Midwest. Norm Seeley, KI7UP, picks up the story from here:

--

As we reported last week, a May 22nd tornado virtually destroyed most structures in the small town of Hallam, Nebraska. Hallam is located some 20 miles south of Lincoln and one death there was attributed to the storm.

During and after the tornado ham radio was an important part of the overall emergency service effort. The ARRL Letter quotes Nebraska Section Emergency Coordinator Reynolds Davis, K-zero-G-N-D, as saying that Lancaster County ARES and SKYWARN spotters were activated that evening in response to a report of an approaching front. Within a half-hour, W0NWS at the National Weather Service office was receiving tornado damage reports via the Lincoln Amateur Radio Club K0KKV repeater.

The storm severely damaged a high school in Norris, Nebraska, and plucked the tower supporting the K0RPT repeater's south region receiver from the ground. The tornado went on to demolish additional homes to the northeast. Its path of destruction finally ended south of the town of Bennet.

Once the SKYWARN Nets closed, the remainder of the K0RPT system was put into service to support Red Cross communications between the tornado scene, the chapter house and a shelter set up in a Lincoln high school for residents displaced by the storm. Two ARES nets were activated May 23rd to coordinate damage survey and assessment. They logged reports via K0EOC at the Lancaster County Emergency Operations Center.

For the Amateur Radio Newsline, Norm Seeley, KI7UP

--

Amateur Radio communications support continued for several days. (ARRL)

**

Break 1

More news after a break for you to identify your station. Cue the announcer, please:

"From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the K2SBD repeater serving Long Island. New York."

(5 sec pause here)

**

WITH NEWSLINE: SEND US YOUR ID - PLEASE

The station I-D you just heard was recorded a few weeks ago at the Dayton Hamvention. And it has lead us to an idea.

Would you like to I-D your own repeater or bulletin station here on Amateur Radio Newsline? Well here is how you can do it.

Simply record on a cassette tape the following sentence and include the call sign and location you want to honor.

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the
"xxx"
repeater serving "yyy zzz." The "xxx" is the call
sign. The "yyy"
and "zzz" are the city and state.

Then, take the tape and mail it to Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. As time permits, we will select an audio I-D and include it in the newscast.

All tapes submitted become the property of the Amateur Radio Newsline and cannot be returned.

Again, the address to make yourself a part of this bulletin service is Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. (ARNewsline(tm))

**

HAM RADIO IN SPACE: FIRST EXPEDITION 9 QSO A BIG SUCCESS

AMSAT reports that the first ARISS contact with the Expedition 9 crew on the ISS took place on Tuesday, May 25th. During his first-ever amateur radio contact, Astronaut Mike Fincke, KE5AIT, answered 18 questions asked by the students who gathered at the Erie Planetarium in Pennsylvania.

The contact used the facilities of telebridge station, VK5ZAI, in Australia to assure high quality space to ground communications. It

was deemed very successful as the children applauded and thanked KE5AIT for taking the time to join them from space. We will have more ham radio space related news later on in this weeks newscast. (AMSAT, ARISS)

**

WORLDBEAT: HAM RADIO AND THE 2004 SUMMER OLYMPICS

If you are planning to attend the 2004 Summer Olympics in Greece, we have some good news for you. Foreign radio amateurs from CEPT countries or from countries with reciprocity can use the special prefix J42004 from August 1st to November 15th without any special license from Greek Authorities.

Not only that. Demetre Valaris, SV1UY, says all hams visiting Athens for the Olympics is more than welcome to give a shout on 145.425 MHz with a 88.5HZ access tone. Demetre says that this is so visitors can hook up with Greek hams and share hospitality.

What about visiting hams from non CEPT nations? They will have to contact Greek telecommunications regulators for special permission to operate. (Via E-Mail)

**

RADIO RESEARCH: MCRN TO TEST RADIATION ANGLES

The Marconi Radio Club of Newfoundland station VO1MRC will be conducting an antenna comparison experiment on the 19th and 20th of June and you are invited to take part. Amateur Radio Newsline's Bruce Tennant, K6PW, has more:

--

Each day during the experiment from 0000 to 2400 UTC station VO1MRC will operate a CW beacon on 5269.5 kilohertz. Its purpose will be to determine the relative performance of high and low radiation angles. The antenna in use will be identified by a code in each transmission.

VO1MRC will also be open briefly for 2 way contacts with stations authorized to transmit on 60 meters starting 0000 UTC each of these days and will operate simplex on 5260.5 kilohertz CW. Following this it will transmit on 5327.5 kilohertz upper sideband and receive 5346.5 kilohertz upper sideband and 3807.5 kilohertz on lower sideband.

The experiment was proposed by Marconi Radio Club of Newfoundland and is endorsed by Radio Amateurs of Canada. Its operated under an authorization issued by Industry Canada which is that nations telecommunicastions regulatory body.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

For further information, please check the Marconi Radio Club of Newfoundland web site. That U-R-L is http://www.ucs.mun.ca/~jcraig/5megex.html (RAC)

**

ENFORCEMENT: TO MUCH RF

The licensee of FM station KWNZ, located in Carson City, Nevada, has been fined $10,000 by the FCC. This, for creating ground-level radiation in excess of the permissible public exposure level at KWNZ's McClellan Peak transmitter site.

The CGC Communicator says that the various excuses offered by the licensee were not impressive. For example, KWNZ contended that there was no evidence whatsoever of public use of the particularized ten square foot area where the station exceeded the RFR permitted radiation limits.

According to the FCC, it is not necessary to establish actual public use of the particular unfenced and unmarked]area where excessive power density occurs. The regulatory agency says that public use of an area nearby is sufficient.

(DO NOT READ: More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1533A1.doc (CGC)

**

ENFORCEMENT: AMATEUR RADIO ACTIONS

Now with more enforcement news here's the FCC's Daryl Duckworth, NN0W:

--

Audio report only. Hear it on this weeks newscast at http://www.arnewsline.org
--

More on these issues as the FCC releases follow-up information. (FCC, RAIN)

**

BEST PRACTICES: EMERGENCY READINESS GUIDE FOR LOCAL MEDIA

The FCC's Media Security and Reliability Council has published a new booklet titled the "Readiness Guide for Local Media on How to Prepare for Emergencies." This colorful pamphlet is good for a quick overview of what the media should do in times of emergencies. Its available on the web in both Mocrosoft Word and PDF format. The PDF version is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-

244522A1.pdf. Download the following doc version at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-244391A1.doc. Finally, the generic website for the Media Security and Reliability Council is http://www.fcc.gov/MSRC/. (CGC)

**

ON THE AIR: THE COLLINS COLLECTORS NETS

And if you own vintage ham gear, you might want to become a member of the Collins Collectors Association and join one of their monthly nets. The nets are held the first Wednesday of the month on 3.888 MHz beginning at 7:30 PM in the Eastern time zone and 8 PM in the Central, Mountain and Pacific time zones.

These nets draw hundreds of vintage stations from across the country and are anchored by a "tall ship" AM station in each time zone and you do not need to operate Collins gear to take part. For more information. just tune in. Comments go by e-mail to wa9vrh@mtco.com (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: LLOYD "SIG" SIGMON W6LQ - S.K.

A ham radio operator who developed a public warning scheme that eventually carried his name, has died. This, with word that 95 year old Lloyd Sigmon, W6LQ, became a silent key on Wednesday, June 2nd, following a long illness.

Known to his ham radio buddies as Sig, in 1955 W6LQ perfected a method that allowed the Los Angeles Police Department to issue emergency warnings over local radio stations. At the time Sigmon was an executive with radio station KMPC and wanted to boost station ratings by providing traffic information.

Then Los Angeles Police Chief William H. Parker permitted use of Sigmon's device but only on the condition that it be made available
to any radio station that wanted to use it. He also is dubbed the bulletins as SigAlerts in honor of W6LQ.

The first SigAlert was broadcast on Sept. 5, 1955. It was carried by six radio stations and urged medical personnel to respond to a train derailment outside Los Angeles Union Station. The California Highway Patrol later took over freeway traffic warnings from the Los Angeles Police Department and handles SigAlerts, which now are computerized.

Lloyd Sigmon, W6LQ, was born in 1909 in Stigler, Oklahoma. He was fascinated by electronics and received his first Amateur Radio license at age 14. He died at Green County Assisted Living Center in Bartlesville, Oklahoma, where he had been residing the past four years. (Published news stories)

**

RADIOS LEGACY: THE HISTORIC KGFJ 1230 KHZ TRANSMITTER SITE HAS BEEN SHUT DOWN

The CGC Communicator reports the passing of a different sort. This with the announcement that on May 24th a historic AM broadcast transmitting site was turned off after 80 years of service.

In 1924, radio station KGFJ started broadcasting from the Odd Fellows Lodge Building on Oak Street near downtown Los Angeles. In more recent years, the station call sign was changed its call letters to KYPA.

Shortly after 4 PM on May 24th, Marvin Collins, W6OQI, turned on the new 1230 kHz transmitter. Its signal is diplexed into a tower at the KBLA 1580 kHz transmitter site.

Collins says that the old KGFJ "flat top" antenna had been in continuous use by since 1924. He adds that the old antenna may well have been the last full-time use of a flat top antenna anywhere in the country.

Marv took photos of the old KGFJ site and the new diplexed setup at KBLA, visit Marvin's web page at http://earthsignals.com/Collins/ and scroll to "KGFJ 1230." You can write to Marv at KFIam640@aol.com

(CGC)

**

HAM RADIO IN SPACE: BIG LAUNCH DOLLARS RAISED AT DAYTON

AMSAT says that its Launch Fund campaign now has $93,0000 in it. This, thanks to donations received at the recent Dayton Hamvention including one anonymous donor who matched every dollar collected with another one.

AMSAT North America President Robin Haighton, VE3FRH, says that now is the time to make a final push to reach $110,000 goal. He adds four words that seem to come right out of the Mel Brooks musical the Producers. The four words are - "we can do it." And
Haighton is

confident that they will.

More about the fund and ham radio space exploration is on-line at www.amsat.org. (AMSAT-NA)

**

HAM RADIO IN SPACE: ECHO NEAR COMPLETION

And some more good news from on the ham radio satellite scene. It comes from Jim White, WD0E, who has been testing and performing final integration of the ECHO ham-sat.

White says that as far as he can tell the ECHO team is on track and the new satellite is looking good. He says that there are a few minor items have to be completed before the bird is sent to the Kazakhstan launch site. White says that he is confident that it will be 100% by the time it gets there for the launch. (AMSAT-NA)

**

WORLDBEAT: HFRADIO.NET TAKES LIGHTNING HIT

Due to a system failure caused by a recent lightning strike, the H-F-RADIO dot NET Canadian Amateur Radio Bulletin service has lost its database of subscribers. In order to rebuild it and for subscribers to continue receiving those weekly bulletins, hams across Canada are asked to send an e-mail to webmaster@hfradio.net with the word "subscribe" in the subject line. (RAC)

**

DX

IN DX, K8AQM, reports that his trip to Samoa will take place between July 7th to the 21st. While there he will operate as 5W0TR on 160 through 10 meters using CW, SSB, RTTY and PSK. Also, look for him as KH6BB from Hawaii July 5th and 6th and 22nd through he 24th. QSLs go via K-8-A-A as his Callbook address.

And members of the United Kingdoms Wrexham and District Amateur Radio Society will be on from the Isle of Man from September 1st to the 8th. Station location will be at the discontinued Coast Guard lookout tower at Scarlett Point. Activity will be on all High Frequency bands plus 50 MHz, 70MHz, 144MHz and 432 MHz, at full UK power on CW, SSB, RTTY, PSK and SSTV. More information is on-line at www.gb4iom.co.uk (Various DX sources)

**

THAT FINAL ITEM: CELEBRATING NEWSCAST 1400

And finally this week its time for a bit of a celebration here at Amateur Radio Newsline. That's because this newscast marks 1,400 consecutive weeks that we have been bringing you news from the worlds

of Amateur Radio and personal communications. With some thoughts on this milestone, here's our producer Bill Pasternak, WA6ITF:

--

If you get out your calculator and do the math, you will find that 1400 weeks comes out to be 26 point 923 years. Close enough in our book to say 27. And in ham radio news, I guess we can say that's a
pretty long time.

Back when we still edited on tape I used to wonder how many splices that we made in a year. One day I sat down and figured out that there were about 30 in an average newscast. That was 120 a month or 1440 a year and an awful lot of Scotch splicing tape. Had we stayed on tape it would mean that we would have cut into a piece of audio tape 38,880 times as of today.

But we stopped putting the newscast together using tape almost 4 years ago. Now its done in the digital world using computers and programs like Goldwave and Cool Edit pro. Becoming part of the digital age early on is something we are kind of proud of. Being on your favorite repeater for the past 27 years and never missing a deadline is another.

As we enter year 27 and begin rolling on toward year 28, we pause and renew our simple pledge to you. The promise we made many years ago and which continues to guide our very being. Amateur Radio Newsline will be here as long as you want us and as long as you support us. We exist to serve you and we all consider it an honor to do so.

Speaking for all of the volunteers who make up the world-wide Amateur Radio Newsline team, I say "thank you." Thank you for sharing your
lives with us through the magic of Amateur Radio. Thank you for caring about us through your ongoing support. Most of all, we thank you for being a part of what we like to call the Amateur Radio Newsline family.

To paraphrase a line from the show Chicago. "We simply could not do
it alone."

Again, we thank you.

I'm Bill Pasternak, WA6ITF.

Jim.

--

As one of the anchors who has been here almost from the start, I add my thank-you's as well.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff
for
nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm
Jim
Davis, W2JKD, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

Good precis, Mike. However, there's one group left out from this
venue, the Traditionalist-Fundamentalist who has adopted a very
rigid set of geas set out to cleanse a personal involvement with
an avocational radio activity. ("geas" refers to magical gimmicks
set to keep devils out of a local territory)

>With the different personalities involved, the games can get pretty
>interesting and funny, or sometimes they can become boring and
>repetitive. The MARS is Ham radio stuff is a good example of the latter.

Agreed. But, the "MARS is amateur radio" statement is an
example of not only a Traditionalist-Fundamentalist but one who
wants to make a hobby into a surrogate of a military life, of
rigid obeyance of some kind of "orders" from a fantasy of what
a hobby really is...and then fails to note the existance and the
raison d'etre of that particular originally-military radio service.

MARS was originally conceived (under the previous AARS) to
get radio amateurs involved with the U.S. Army communications
of 1925. Comms of any radio service of 1925 were rather
simple. Even the Army admitted that. The AARS never grew to
be a big thing and WW2 put a halt on everything amateur insofar
as operations. There's not much about "phone patches" as a
goodwill effort to give servicemen a link with home through
amateur radio prior to 1942... :-)

During the Cold War times, phone patches, whether through
MARS or individual hams, were very good for boosting morale,
especially for those stuck in so many foreign places. It hit a
high point with the Vietnam War, the southeast Asian MARS
stations handling up to 42,000 phone patches a month up to
1970. That's referenced at the Army's Center For Military
History (CMH) and available for download by anyone. [I gave

the link in here]

But, the Vietnam War ended 29 years ago, almost a generation
and a half in the past. MARS still has the task of involving
civilians with military radio but MARS has, for a long time,
changed its mission to be a true auxilliary radio service in the
military, that of being an affiliate communications service with
other U.S. government radio services. The one-month exercise
two years ago of Grecian Firebolt 2002 showed that MARS
does function quite well on its own without civilian radio amateurs
to fulfill its mission.

The existance and definition of MARS is covered by publicly-
available documents. However, the image in the minds of many
is solely from amateur publications (who overemphasize ham
involvement relative to the bigger mission picture) and that
image is about three decades out of date.

> If a poster is the type that is trying to antagonize others - that is
>to say one that is using the group in the text adventure mode - he or
>she does not want to get people so angry that they don't respond. That
>would be losing the game. This player will want to be antagonistic of
>course, but will want to allow other posters to stay just this side of
>filtering or ignoring him or her.

Some have their minds made up and will never change. :-)

In here, several operate slightly differently in that perceived personal
"honor" is involved. They say something wrong or make an error and
then refuse to admit it until pinned against several walls and had it
rubbed all over them. :-)

That applies on any subject in any computer-modem venue, was so
even back in the late 1970s on ARPANET...then the original
USENET (probably the worst are academics not yet risen to their
full titled heights, heh heh)...continued on into BBSs and now the
Internet.

Amateur radio in general seems to be one of the most conservative
of all radio services...plus the fact that most of the hobbyists are
quite unaware of what goes on in other radio services. Amateur
radio publications seldom mention other radio services in the USA.
As a result there is a great deal of insularity (a sort of "dielectric
materialism") which, in turns, breeds even more conservatism.

Most interesting, that conservatism. Radio communications involves
the sharing of information. Radio does it very fast, yet the technology
advancements are all coming from the designer-manufacturers.

> Some here filter Len, but enough do not that he finds a steady stream
>of willing participants in his game.

The regulars are a very, very tiny percentage of the entire hum radio licensees...and they seem to be staunchly, archly, embedded-in-old-concept holes in the ground on what amateur radio "should be." Not a good venue to discuss anything but hidebound status-quoism.

Those who aren't in agreement with keeping things absolutely the same as when those olde-tyme hammes got their beloved licenses is in for a rough go. :-)

> Face it, he is good at it. It may not be what you are in here for, but
>he succeeds in his game.

It may be a game to others, Mike, but it is a lunchtime amusement for me. :-)

In one way, it is fun to poke holes in others' faulty concepts such as telegraphy and the Absolute Need to test all licensees for that ability forever and ever into the end of time in order to invade their precious HF turf! :-)

51 years ago I lucked out in my military service and got stationed at a major communications facility. That changed my concepts of what radio communications was about. Practically a wholesale revision, having had little exposure prior, all from amateur publications. The Army, the Navy, the Air Force just didn't use any telegraphy then for fixed-point to fixed-point radio communications. They had not done so since WW2. The USN depended on on-line cryptographic communications in the fleet, on cruisers and heavier class ships back in 1940 (that's how the USN could coordinate movements to engage in the Battle of Midway). That crypto messaging was by RTTY, not manual telegraphy. The "Sigaba" crypto TTY system was never compromised.

The regulars in this venue don't want to hear of that. It wasn't about "amateur radio" and it hasn't been publicized in QST. Except for Heil, none of the regulars were involved in any big-time radio communications experience. As a result, many are openly antagonistic against anyone who has done so and try to divert the thread into claims that I "embellish" my "CV," tooting my own horn so to speak :-) Really no. I'm trying to point out that "CW" was already being downsized a half century ago and its use is constantly decreasing until it has virtually disappeared for communications everywhere but in amateur radio.

> Note this does not apply to the strange fringe postings that appear to
>be personal battles, such as the one that Dave seems involved in with
>some hams in his locale. That is just really wierd stuff.

The true antagonistic poster seldom gets much response. Those get a large charge out of saying the worst things about another. That's part of the time-distance isolation "safety factor" for them in computer-modem communications. They can get away with it! :-)

What gets "weird" (or 'wired') is when another replies with correct facts and Strong response. The original antagonists almost go berserk. :-) [see the posts of the one who likes to use the word "putz"] The original antagonists Hate that sort of thing. It spoils their private little sociopathy game they so enjoy. :-)

>>
>> Naw, it's totally resistible. And predictable.
>
> And yet you are now involved once more!

He can't help it. His "honor" is at stake...someone put a stake through a vital part back when he was trying to peddle Uber-status-quoism all about keeping amateur radio forever locked into the old standards and practices.

It may be an "evangelical" kind of thing. Or just brainwashed syndrome.

Ethnic cleansing must be done, impure concepts washed away.

>>> This is no small accomplishment. I for one have to respect that.
>>
>> I don't.
>
> You don't have to, that much is true.

Life is tough and then you newsgroup... :-)

"Sine die" - someone turned off the audio oscillator...

QED is not one of the "Q codes" in telegraphy.

Back to trying to find out what's holding me down in my search for anti-gravity...

For some reason, my call "Whiskey Alpha Two India Sierra Echo" comes back "Whiskey Alpha Two India Sierra Tango" fairly often. Seems people hear the ends of the words better than the beginnings. "Echo" and Tango" rhyme somewhat,
which I thought the phonetic alphabet was to avoid. What's the most common alternate for "Echo" used on HF?
